LETTER OF TRANSMITTAL.

HON. FRIEND WM. RICHARDSON,
Governor of California,
Sacramento, California.

DEAR SIR: In compliance with the provisions of law, I have the honor to submit this report as Acting Director of Institutions for the biennium ending June 30, 1926. This duty devolves upon me because of the resignation, on March 1, 1926, of Mr. Walter D. Wagner, former director. Much constructive work was carried on under his administration, and at no time in the history of the institutions have they functioned more efficiently than during the past biennium. There have been but few changes in the personnel of the institutions under the jurisdiction of this department. At Napa State Hospital Dr. J. M. Seanland, who had been in charge as medical superintendent for three years, resigned on December 1, 1925, and Dr. G. W. Ogden, who had been first assistant physician for many years, was appointed to the vacancy. It has been somewhat difficult, at times, to keep the medical staff filled, as the entrance salary and civil service requirements were somewhat of a bar in securing young physicians, who are to be desired on account of their up-to-date knowledge and adaptability to training. Through the cooperation of this department and the civil service commissioner, however, these conditions have been remedied, and the hospitals will be able to secure the services of first class assistant physicians.

INSTITUTION POPULATION.

As usual, there has been an increase in the population of our institutions, the greatest increase, of course, being in the state hospitals for the insane. During the biennium 8113 patients were received in the six state hospitals, while 4250 were discharged, and 2378 died. On June 30, 1924, there were 11,637 patients in these state hospitals; on June 30, 1926, there were 12,712 patients, an increase of 1075, or approximately 9 $\frac{1}{4}$ per cent. The increase for the previous biennium was only 346, or about 3 per cent. In all institutions under the jurisdiction of this department there were 16,016 inmates on June 30, 1926, as compared with 14,544 on June 30, 1924, an increase of 1472, or approximately 10 per cent. Had it not been for the work of this department in conducting an intensive campaign of deportation, the increase would have been much greater, as 582 patients were returned to other states and countries from the hospitals alone, while 413 inmates of other institutions were also deported, thus reducing the population and relieving the state of the cost of caring for a total of 995 inmates. The saving to the state is reflected in the table attached to the report of the deportation agent, and it is apparent that the appropriation of funds to carry on this work is good business policy. The sum of \$75,000 has been requested for this work in our budget for the next biennium, so that there may not be the necessity of asking for an emergency appropriation, as was done during the past two years.

Sonoma State Home for Feeble-Minded increased 355 during the two-year period. The institution was able to absorb this increase on account of new buildings which have been constructed, although the institution is full to capacity, and still has a large waiting list. With the completion of buildings now under construction at Pacific Colony, this condition will be relieved, although it will probably be a year before Pacific Colony will be ready for inmates.

The three correctional schools, Preston School of Industry, Whittier State School, and Ventura School for Girls, show very slight increase for the biennium. There were 1022 inmates June 30, 1924, and 1064 June 30, 1926, an increase of only 42. However, had it not been that 410 boys who were committed to Preston School of Industry were returned to other states and countries as nonresidents and aliens by this department, the situation at Preston would have been critical, as the school is full to overflowing, and has been for the past three years. Buildings now under construction will relieve this situation to a great extent, but it will still be necessary to exercise a careful watch over the population to keep it within bounds.

Reference to the following table shows that on June 30, 1926, there was an excess of 1085 patients over normal capacity in the state hospitals. On June 30, 1924, this excess was 1243. As stated before, the increase during the two years was 1075, or just about equal the excess, so that our building campaign during the biennium has just been able to take care of the excess which existed two years ago, without providing for any increase. Buildings now projected and those for which appropriations have been requested in the budget for the coming biennial period should provide sufficient room to take care of the patients without crowding.

CALIFORNIA STATE HOSPITALS.

Statement Showing Capacity and Population, June 30, 1926.

<i>Hospitals</i>	<i>Normal Capacity</i>			<i>Actual Population</i>			<i>Excess</i>
	<i>Male</i>	<i>Female</i>	<i>Total</i>	<i>Male</i>	<i>Female</i>	<i>Total</i>	
Agnews -----	854	637	1,491	1,005	841	1,846	355
Mendocino -----	638	383	1,021	740	386	1,126	105

Stockton -----	1,630	957	2,587	1,842	1,175	3,017	430
Totals -----	6,665	5,125	11,790	7,245	5,465	12,710	1,085

IMPROVEMENTS.

Among the many splendid improvements made during the last two years are the following:

Agnews State Hospital.

- Home for married employees.
- Residence for business manager.
- Two 15,000 gallon water tanks.
- New ice and refrigeration plant.
- Purchase of 178 acres of fine farm land.

Mendocino State Hospital.

Splendid new receiving hospital with capacity for sixty patients. Completely equipped with surgery, hydrotherapy, laboratory, dental surgery, examination rooms, and hospital quarters for employees, with 15 bed capacity.

- New boiler house, boiler and equipment.
- Many other minor improvements.

Napa State Hospital.

Cottage for 100 female patients.
Addition to Francis Cottage to accommodate 50 male patients.
New coils in refrigerating plant.
Improvements at Dozier cottages.

Norwalk State Hospital.

New 265-h.p. boiler installed.
Four ward buildings, two for males and two for females, each having a capacity of 120 patients.
Reinforced concrete industrial building.
Receiving building, fully equipped, to accommodate 120 patients..

Southern California State Hospital.

Three cottages for patients.
One cottage for employees.
Two 2-story ward buildings.

Stockton State Hospital.

Two cottages at the farm to house 240 patients.
New central kitchen at farm.
New boilers at female department.
New well and pump.
New equipment in laundry.

Sonoma State Home.

Cottage for day employees.
Underground electric system.
New fire protection system.
Automatic lawn sprinklers.
New 250-h.p. boiler installed.
Three cottages for inmates, capacity 80 each.
New bake oven.

Whittier State School.

New reservoir, capacity 1,500,000 gallons.
Remodeled main kitchen.

Ventura School for Girls.

Fine new residence for superintendent.
Repairs to roads.
Repairs to ice plant.

Preston School of Industry.

Remodeled old laundry quarters and trades building.
Constructed 630 feet of wooden flume at water ditch.
Manufactured 650,000 bricks.

Industrial Home for the Adult Blind.

New dining room for employees.
New equipment for kitchen and bakeshop.
Tile roof on recreation building.

COLLECTIONS AT STATE HOSPITALS.

The collections at the state hospitals for the insane for the year ending June 30, 1926, show an increase of \$17,315.79 over the previous year. The total collections for the biennial period amounted to \$1,019,668.25. In addition, the Sonoma State Home collected \$116,067.52, making a grand total of \$1,133,327.57 turned into the general fund of the state treasury.

This department collected during the biennium for commitment and transportation expense the sum of \$23,919.96, showing a substantial increase over the previous two years.

PRIVATE SANITARIA.

The law governing private sanitarium was amended at the 1925 session of the legislature to provide for a license fee of fifty dollars per year for these institutions. Under this provision, licenses have been issued to fifty-four institutions caring for mental cases, as shown in the list printed elsewhere in this report. A supervisor of private institutions was appointed on January 25, 1926, who makes regular and thorough inspection of all licensed institutions, and is constantly on the watch for those who are caring for mental cases without license.

QUARTERLY MEETINGS.

There have been regular quarterly meetings held at the different state hospitals, those attending including the medical superintendents, members of the Board of Control, the Civil Service Commissioner, the Director of Institutions, the Chief of the Division of Architecture, and others. These meetings have been of great benefit, as many important subjects have been discussed and problems worked out. Papers have been presented by some of the medical superintendents. Among these was one by Dr. G. M. Webster, Medical Superintendent of the Southern California State Hospital, on the subject of "Vitamins," and another by Dr. G. W. Ogden, Medical Superintendent of the Napa State Hospital, his subject being, "The Substitution of Postum Cereal for Coffee." These articles are printed in full elsewhere in this report.

PER CAPITA COSTS.

The following table shows the yearly per capita costs at each of the institutions, these costs being based on total expenditures for salaries and maintenance, but not including expenditures for permanent improvements.

<i>Institution</i>	<i>76th fiscal year ending June 30, 1925</i>		<i>77th fiscal year ending June 30, 1926</i>	
	<i>Average population</i>	<i>Per capita</i>	<i>Average population</i>	<i>Per capita</i>
Agnews State Hospital.....	1,817	\$275 46	1,843	\$272 28
Mendocino State Hospital.....	1,087	290 32	1,115	289 81
Napa State Hospital.....	2,671	243 91	2,818	227 09
Norwalk State Hospital.....	1,053	266 40	1,178	266 92
Sonoma State Home.....	1,877	269 89	2,038	251 27
Southern California State Hospital.....	2,390	256 32	2,531	231 82
Stockton State Hospital.....	2,899	237 60	2,992	240 85
Preston School of Industry.....	539	574 68	533	592 68
Whittier State School.....	315	643 04	311	643 10
Ventura School for Girls.....	165	711 57	170	663 72
Industrial Home for Adult Blind.....	129	394 29	127	420 94

It will be noted that in most of the institutions the per capita cost for the seventy-seventh fiscal year is lower than for the seventy-sixth, although, as stated before, they have never been more efficiently conducted, and the wards of the state have had the best of care. Food and medical supplies are of the best to be had in the market, and the equipment in our state hospitals is of the most modern type. A goodly portion of reduction in cost is due to the products raised and manufactured by the institutions, and we can not too strongly recommend the purchase of additional farm land, and the erection of suitable industrial

buildings, so that as an institution grows it may keep pace with its population in the production of foodstuffs and the manufacture of various articles of wearing apparel and furniture. As an example of what can be done, and has been done, Norwalk State Hospital has manufactured a large quantity of fiber furniture, not only for its own use, but has also furnished Whittier State School with a large order. Southern California State Hospital has also made this style of furniture for some time, and has furnished several cottages. Napa State Hospital has recently taken up the manufacture of this furniture, and is turning out good work. These products look as well as any that can be purchased, and are much better made than most of those found in the markets.

Aside from the monetary consideration, occupational therapy is one of the greatest aids in the restoration of the mentally afflicted, and the moment a patient can be prevailed upon to take up some useful occupation, he has been started on the road to recovery, if such a thing is possible. Even if there is no chance for ultimate recovery, his mind is taken off his troubles and his lot made happier by having something to occupy his time and thoughts.

INDUSTRIAL FARM FOR WOMEN.

While the statute creating the Industrial Farm for Women still remains a law, the institution, as you know, was closed on June 30, 1923. As pointed out in a former report, the location selected for the farm was not a wise one, as there was no chance to develop an institution of even so small a population as 200 inmates. In August, 1924, the Sonoma State Home was permitted to take over the property, and a colony of sixty epileptic boys was established there. This has been a very successful venture, as it gives the home an opportunity to have a separate unit for these unfortunates, without in any way increasing the overhead expense.

It is therefore recommended that the property now standing in the name of the Industrial Farm for Women be, by proper legislation, transferred to the Sonoma State Home, in order that the latter institution may properly ask for and expend funds for the maintenance of its epileptic colony.

If it is contemplated to reestablish the Farm for Women, then a new and suitable site should be purchased; otherwise the statute should be repealed.

In conclusion, I wish to thank the superintendents of the various institutions for their hearty cooperation, the Board of Control for wise counsel and advice, and all those who in any way have contributed to the welfare and happiness of the wards of the state.

Respectfully submitted.

E. G. TWOGOOD,
Secretary and Acting Director.

November 18, 1926.

REPORT OF DEPORTATION AGENT.

September 1, 1926.

MR. E. G. TWOGOOD,
Secretary and Acting Director,
Department of Institutions.

DEAR SIR: The biennium just expired has been a banner one for deportations, we having examined the cases of 1296 alien and nonresident inmates of our institutions. Of this number, by and with the hearty cooperation of the United States Immigration Service, 259 aliens were deported, and by our own organization 736 nonresidents were returned to their home states and countries, making a total of 995 undesirables eliminated from our institutions. Our activities show an increase of forty per cent over the previous biennium and an increase of nearly 500 per cent over the biennium ended a decade ago.

A comparative study of state and state hospital population statistics for the past decade shows that while the population of the state increased 70 per cent the hospital population increased but 43 per cent. This statement, as it relates to hospital population, pertains to resident population only and has no relation to the number committed, hence it is not indicative of an increase or decrease of insanity. We are showing the result of the study as a basis of our belief that deportations have materially reduced the hospital population.

It may be of interest to note that the 723 nonresidents were distributed to every state in the Union, with one exception, and the following foreign countries: France, Italy, Greece, Latvia, Canada, Mexico, China, Japan, Hawaiian Islands and Philippine Islnds.

Due to our persistency we are continually adding to our list of sister states with whom we have established reciprocal relations and we now have correspondents in twenty-five states and cities.

Our statute, section 2191, Political Code, provides for a legal settlement of one year. In recent years, the more progressive states who are actively engaged in the deportation of nonresidents have concluded that a residence of two years in which to gain a legal settlement is much fairer than a period of one year and have so amended their statutes. It is my belief it would redound to our benefit to make a similar change and I recommend that section 2191, Political Code, be so amended.

The following table shows the number of aliens and nonresidents deported from the several institutions during the biennium:

	<i>Aliens</i>	<i>Nonresidents</i>	<i>Total</i>
Stockton -----	56	66	122
Napa -----	39	54	93
Agnews -----	21	29	50

Totals	3,552		\$831,826.16		\$2,916,150.00			

*This column merely shows the saving for one year. A conservative estimate of the average institutional life of an insane person is ten years; hence to arrive at the amount saved the total should be multiplied by ten.

REPORT OF SUPERINTENDENT, INDUSTRIAL HOME FOR THE ADULT BLIND.

MR. E. G. TWOGOOD,
*Secretary and Acting Director,
Department of Institutions,
Sacramento, California.*

DEAR SIR: I have the honor to submit the report of the Industrial Home for the Adult Blind for the seventy-sixth and seventy-seventh fiscal years.

The following is a summary of the expenses and other statistics as required by the act establishing the home:

	76th fiscal year	77th fiscal year
Salaries and wages-----	\$24,328 14	\$26,050 00
Support-----	26,535 32	26,933 20
Total -----	\$50,863 46	\$52,983 20
Inmates, monthly average-----	129	127
Per capita cost-----	\$394 29	\$420 94
FACTORIES.		
Net sales-----	\$56,502 34	\$60,706 21
Total expense-----	49,253 07	50,561 11
Net profit-----	\$7,249 27	\$10,145 10
Wages paid to blind workers-----	\$13,455 30	\$15,455 24

The increase in the per capita cost for the last fiscal year is due, in great measure, to the expense of the department of field work being included in the general expenditures.

This department, for which provision was made in the budget of 1925, has been functioning since January last, when one worker was appointed for the northern part of the state. Three months later the work was begun in the southern district.

These field workers are trained occupational therapists who visit the blind in their own homes to teach industrial and occupational work and perform any other service which may ameliorate the condition of the blind. During the short period of six months in which they have been engaged they have made 694 visits to blind people, have given 432 lessons in industrial or occupational work and have had an average of 28 pupils under instruction each month. This in addition to rendering assistance in many other ways.

We hope that funds will be appropriated by the legislature to enlarge the scope of this work which can be made the most beneficial and far-reaching of any activities for improving the condition of the blind of the state.

In carrying out the policy of admitting to this home only those blind who are young enough to profit by instruction in the shops it follows that the educational and industrial work must be enlarged and more trades taught. In view of this we are asking for an appropriation of \$15,000 for an addition to the workshop. With this improvement and the extension of field work the interests of the blind will be greatly enhanced.

Respectfully submitted.

DOUGLAS KEITH,
Superintendent.

REPORT OF SUPERINTENDENT OF PRESTON SCHOOL OF INDUSTRY.

MR. E. G. TWOGOOD,

*Acting Director, Department of Institutions,
Sacramento, California.*

DEAR SIR: The following is a report for the Preston School of Industry, covering the eighteenth beinnium ending June 30, 1926. The report reviews the growth and development of the school, the classroom and trade activities, the parole program, farming, the building and construction work, and calls attention to the needs of the institution.

The statistical tables present figures concerning the population movement, causes for commitment, and other interesting and important data regarding inmates of the Preston School of Industry.

GROWTH AND DEVELOPMENT.

The Preston School of Industry during the biennium ending June 30, 1926, has been called upon to accept approximately two boys per day. As space for housing boys during the period has not been increased, it has been necessary to move the population more rapidly than desirable. This has been accomplished through deportation of nonresident boys to their parents in other states, and through the splendid cooperation of the courts and probation officers. Without the assistance and close cooperation between the officers of the Preston School of Industry and the courts and probation officers of the state, the large number of cases needing institutional care and supervision could not have been cared for.

Many boys have had to be released sooner than the regular parole program provides for in order to make room for new commitments. Several have been released each year by order of court, while others were released on furlough through approval of the courts. The school authorities and the court authorities have worked together in the matter of selecting boys for early releases and, consequently, few serious mistakes have been made through these releases. When the new buildings that are now under construction are completed, this practice can be discontinued.

During the past biennium, the shop and trade facilities have been materially increased. A large machine shop with a classroom, paint shop, tool room, and ample space for machine shop practice and repair work was completed early in 1925. This shop is equipped with lathes and other machinery necessary in auto repair work, and it is a splendid shop in which to give instruction to boys in auto mechanics.

The planing mill and cabinet shop was enlarged by removing a partition, and including the space formerly used as a laundry. The additional space has given more room for work benches and machinery.

The space formerly used as an auto repair shop is now used for steam fitting.

The construction of new automobile garages for state and employees' cars has made available space very satisfactory for a sheet metal and plumbing shop. The old building housing these departments is now used for storing building supplies.

The brick plant equipment secured through transfer of machinery for brickmaking from the Mendocino State Hospital has given the Preston School of Industry another occupational activity. Brickmaking profitably utilizes the labor of the discipline company during the sum-

Administration Building and landscape view, Preston School of Industry.

mer months. Several boys each year leave the Preston School of Industry and engage in brickmaking as an occupation.

A brick barn was completed in 1925. This barn is used for cows and young calves, and has greatly improved the efficiency of the dairy plant.

A new farm cottage with a capacity for thirty boys is under construction on the Riley ranch. This cottage will house farm boys, and will not only increase the capacity of the school, but will add to the efficiency of the farm department, by permitting the boys to live near their work.

Bricks are burned, and plans are being drawn for the segregation and detention unit, which, when completed, will house ninety-eight boys.

A large amount of repair work on the buildings and the water system has been done during the past two years.

The plumbing in two of the buildings was completely renewed, and many other important repair jobs completed.

Additional landscaping and tree planting during the biennium has improved the appearance of the school grounds. A turf football field is one of the landscape improvements.

INSTITUTIONAL NEEDS.

The growth in the population of the State of California has naturally increased the number of commitments to the Preston School of Industry. The increase in the number of boys received calls for a general expansion of the plant if it is to continue functioning as an efficient institution.

The following are some of the most important and urgent additions and betterments needed during the next biennium:

1. A new hospital and receiving building.
2. Classroom building.
3. Gymnasium.
4. Expansion of the water system. Enlargement of the power plant, and provision for adequate supply of water for domestic use.
5. Enlargement of the heating plant.
6. Expansion of shop facilities through installation of additional equipment.
7. The purchase of more farm land to increase production, and to provide additional opportunities for employment of boys interested in agriculture.

It is not necessary to call attention to the fact that a large amount of the crime committed today is committed by youths between the ages of fifteen and twenty-one. The Preston School of Industry is, therefore, called upon to care for a large number of delinquents annually; a number proportionately larger than at any time in the history of the state.

The State of California, if it wishes to do its duty to its erring youths, must make substantial expenditures at the Preston School of Industry. A modern, well equipped educational and trades institution is required, if the work of rehabilitating and training delinquent youths is to be successful. It is as important to the welfare of society to expend money for this work as it is to provide adequate funds for public school education. Correctional school work is definitely a part of the educational program of the state.

THE FARM.

During the past biennium the farm activities have continued unabated with satisfactory results, all the departments having increased their output during the period.

The garden has produced all of the fresh vegetables, melons and strawberries consumed by the school, besides providing tomatoes for canning, 4000 gallons of which were canned for winter use this season. The school during the fiscal year 1925-26 consumed 360,000 pounds of fresh vegetables.

The school is about to take possession of 23 acres of fine alluvial bottom land, recently purchased, which will increase the production of garden and field crops as well as providing additional acreage for alfalfa. The alfalfa acreage has been increased by leveling and preparing 11 acres of old corn land for seeding. This, together with the increased planting made possible by the purchase of the above land, will, when it comes into production, considerably reduce the cost of the school's milk production.

The dairy is in excellent condition under the management of an experienced herdsman, who during the past biennium has reduced the cost of producing milk from 18 cents per gallon to 16 cents per gallon. This reduction was made in spite of the fact that the school has had to purchase a large quantity of alfalfa hay. Last year the dairy was increased by the purchase of 10 purebred Holstein heifers, but the herd is still too small to provide as much milk as is really needed to properly feed the rapidly increasing population and also provide sufficient butter for the institution. During the past fiscal year the school consumed 60,000 gallons of milk. This in itself seems a large quantity of milk but is really not as much as should be fed to the boys to make a well-balanced diet. The purchase of at least 10 more purebred cows is recommended.

Truck farming, Preston School of Industry.

The school has continued farming approximately 200 acres of land owned by The Philadelphia Quartz Company. This land is farmed on shares and has proved quite profitable to the school. The land is becoming more productive each year due to the intensive cultivation and drainage and even better results may be expected as the land is further developed. This property lies between two portions of state land and should be eventually purchased by the state. The school is asking the legislature for an appropriation of \$20,000 for the purchase of new farm land to be used chiefly for growing alfalfa and forage crops which are needed to feed the increasing dairy herd.

The swine department continues to be the best paying department of the farm. During the past biennium approximately 20 tons of pork were consumed and the herd increased from 200 to 500 head. The old Berkshire stock is being discontinued and replaced by purebred Duroc stock. A large hog pasture is being planted to alfalfa, which will further reduce the cost of swine feeding.

The poultry department continues to do fairly well; however, there is ground for much improvement. While sufficient eggs are produced for the school needs it is costing more than it should. The present poultry plant is not properly equipped. It is to be moved into a new location next year and equipped with modern facilities for incubation and brooding. Last year the school produced and consumed 12,000 dozen eggs.

The fruit trees and vines planted since 1920 have made satisfactory growth and will, during the next two years, produce considerable fruit. By the end of the next biennium the school should be able to can and dry practically all of the fruit needed for consumption.

MEDICAL CARE.

One of the outstanding features of the Preston School of Industry's correctional program is the medical and surgical care given to boys committed to the institution. The medical staff is composed of a resident physician and three registered nurses, who arrange their schedule so as to give a 24-hour nursing service. Many of the boys received by the school have not been given proper medical and surgical attention and consequently come to the school suffering from ailments of long standing. The school endeavors to correct these physical defects and return the boys to society in fit physical condition.

The following is a report of the hospital services for the past biennium:

Hospital and Clinic Including Surgical Cases.

		June 30, 1924 to June 30, 1925	June 30, 1925 to June 30, 1926	Total two years
I.	<i>Surgical Cases.</i>			
1.	Major operations.			
	(a) Appendectomy	28	40	68
	(b) Laparotomy	3	6	9
	(c) Hernia plasty	10	15	25
	(d) Bone cases	3	7	10
	1. Reduction femur.			
	2. Reduction clavicle.			
	3. Rib resection.			
	Totals	44	68	112
2.	Minor operations.			
	(a) Tonsillectomy	16	46	62

* (Average is higher on account of the "Flu" epidemic in March, April and May of 1925.)

DENTAL CARE.

The dental work of the school is done by a local dentist, who devotes half of his time to the dental work here. He works on a piece basis and furnishes all of the materials used.

Parents, where they are able to do so, are requested to pay for the dental work. A dental estimate is sent to parents shortly after boys are received at the school. If parents are unable to pay for the work, the estimate is then approved and the work paid for by the school. The dental needs of boys received by the Preston School of Industry are much greater than would be found among an average group of boys living in normal homes. This is due to the fact that many boys received by this institution are from broken homes or have been away from home several years prior to their commitment here and have consequently been neglected from every standpoint. Occasionally it is necessary to do considerable bridge and crown work and in a few cases make partial plates for boys whose teeth have been so badly neglected that an attempt to save them would be futile.

EDUCATIONAL ACTIVITIES.

The school department.

Most boys who enter this institution have long considered school a stumbling block, a check to coveted freedom. From lax homes and broken homes and institutional homes and no homes at all they have heard the call of the streets and felt the lure of a fancied high wage-earning power; and they have strained at the confines of the regular school, submitted for a time to the loosened leash of the part-time program, and have finally broken away altogether into a world with whose forces they were unprepared to cope.

To some boys our school department is the first door which opportunity has opened. To these it means a chance to learn the language which they hear all about them. To others it means returning with distaste to an experience which has become little more than an unpleasant memory. To a few it is the picking up of threads but recently severed. It is the task of the school department to take this motley company—the fresh and the jaded, the neglected and the pampered, the defiant and the repentant, the discouraged and the hopeful—and to implant new hopes and renew lost desires, and to offer to each, in a half-day program covering a limited period of time, the academic work which will best suit his needs.

For this task the Preston School is employing teachers not only trained and efficient in classroom work, but also broad in experience and rich in that sympathy which expresses heart power without sentimentality. Every teacher on the force holds the California credential regularly required for the grade of work she is doing. The grade teachers are normal trained, and the high school teachers hold college degrees. Contact with these cultured teachers is among the finer influences which the boy meets in the Preston School.

The plan of the work is as follows: From the receiving school, where testing, classification and placement are accomplished, the boys are distributed to the regular classrooms for instruction. Those handicapped by language difficulties enter the Americanization class. Those below the eighth grade are assigned to schools two and three. Boys capable of carrying junior or senior high school work are taken care of in schools four and five, where the departmental plan is followed. From the upper divisions, a boy may be transferred to the mechanical drawing class for technical study correlated with the trade instruction he is receiving; or he may enter the commercial class for special training in office work.

A detailed account of the work of the various departments follows, the description in each case being written by the teacher in charge.

School one.

The first classroom which a boy at Preston enters is the receiving room, to which he is assigned after having been in the institution about a month. During that time he has had necessary medical attention, has received instruction in military drill, and has become accustomed to his new environment. Upon his arrival in this classroom his age, previous schooling, and other information which might be of assistance to the teacher in placing him, are learned; for the purpose of this class is to test and place the boy in the regular class which seems best adapted to his needs.

After a week of observation and testing in mathematics, English, spelling, composition and reading, he is recommended for assignment to another school. The foreign boy with little knowledge of English is placed in the Americanization class; the greatly retarded boy, or the one who has had very little opportunity, represents another group; the boy who has not finished grammar school is classed in another group; the one capable of junior high school work enters that department, while the high school boy is placed in a class designated as school five.

Many times a boy is assigned to a group because he needs a review, which he covers quickly, after which he is promoted to the next higher class. The individual system prevails throughout Preston classrooms, and a boy is promoted as soon as he is ready regardless of the progress of the rest of the class.

The Americanization class.

The Preston School of Industry receives many boys unable to cope with their problems because of inability to speak or understand English. This foreign population is composed largely of Mexicans, with a small number of Chinese, Japanese, Filipinos, Italians, and Indians.

It is the aim of the Americanization class to remove the language handicap, impart an understanding and appreciation of American customs, ideals and government, and thus pave the way for competent citizenship.

The foreign boy is usually timid, but he is anxious to advance, and he takes his work seriously. Patience and tact are required to win his confidence; but once this has been accomplished, his progress is usually remarkable.

In this class much time is given to oral composition, employing first the words the boy must use concerning his immediate needs, and later those expressive of his home, industrial and social environment.

The oral composition is followed by reading, the text used being suitable for beginning students of American citizenship. Instruction is also given in spelling, arithmetic, and written English. As a result of the written composition, many of these boys learn to write very creditable letters.

School two.

The boys of school two average eighteen years of age, and range from illiteracy to fourth grade ability. Marked retardation in school work results either from arrested mental development or from lack of school advantages. The academic work given to dull normal or borderline pupils must consist chiefly of reviews and drills to increase skill in processes already partially mastered. When these boys have reached the limit of their mental capacities, they are released for manual or mechanical trades.

The boy who is retarded because of lack of educational training often makes marked progress. In a class with boys of his own age, many of them more unfortunate than himself, he can study and recite without embarrassment, and he feels the joy of achievement. Such a student covers the work rapidly and wins promotion to the higher schools.

The mathematics department—upper division.

The work of this department is individual. It covers mathematics from the eighth grade to about the second year of high school.

Boys review all the fundamentals, after which they study the course that best meets their individual needs. The work of the schoolroom correlates, as far as possible, with that of the trades. Boys who intend to follow a trade are given trade mathematics. Those who intend to go back to high school are given algebra and geometry—subjects that will give them high school credit.

A parole business course has been added to the curriculum this year. It is compiled in twelve lessons in printed pamphlet form, and requires about six weeks for completion. The subject matter deals with such problems as how to seek employment, how to budget one's wages, how to purchase clothing for the least amount of money, and how to get recreation without the entailment of much expense. After learning to budget their wages, the boys see, for example, that an automobile is a financial burden not to be assumed on a small salary.

This course is invaluable to the boy when he leaves the school on parole. Of the 3600 who have come to Preston since 1920, the majority, no doubt, have never had any training in personal business efficiency.

Had they known how to take care of their wages, many would have been spared the embarrassment of being without money, which leads to getting it dishonestly.

English, civics and history—upper division.

The English course includes twenty lessons dealing with practical grammar, punctuation, letter writing, and oral and written composition. One lesson each week is devoted to the study of the current magazines, such as the *Literary Digest*, the *Outlook*, and the *Pathfinder*. The practice in reporting on various articles constitutes a valuable exercise in oral expression. The work is carried on individually with occasional reviews in groups, and the course seems to be growing in popularity with the boys.

A civics course has been arranged in sixteen lessons, which emphasizes the duties and privileges of good citizenship and gives a thorough knowledge of our laws and government under the constitution, finishing with a lesson in ethics.

An extensive library of excellent reading on the subject has been gathered for this course, which adds variety and lends interest to the subject. The boys are encouraged to make practical application of the knowledge gained.

American history is taken up topically with the aid of several textbooks, and maps and illustrations are used whenever possible.

The commercial department.

The subjects offered in the commercial department of the Preston School of Industry are shorthand, typewriting, bookkeeping, business English and spelling.

This department is striving to fit the boys for an occupation that commands fairly good wages at the start, and that will serve as a stepping stone to broader fields after they go out into the business world.

There are a number of office positions in the institution which are filled by boys trained in the commercial department. This practical experience in office work has proved very valuable to the boys who have taken stenographic positions on leaving the school.

At present there are twenty-eight boys enrolled in this department.

The mechanical drawing class.

This class has an enrollment of seventeen boys.

Special effort is being made to correlate the drawing with the trade the cadet is following in the institution.

The class enrollment includes boys interested in plumbing, sheet metal, wood work, electrical work, landscape gardening, commercial art, and cartooning.

The average time spent in the class at the present time is about five months. After completing a general course comprised of about seven short plates, each cadet is started on the drawing that relates to this trade. Pupils of exceptional ability are given a regular high school course.

The library.

The library of the Preston School of Industry contains 6216 volumes. The circulation averages 1450 books per month, in addition to the

literature which is circulated by the religious workers of the school. In circulation, fiction leads, with useful arts second. There are books for each trade, and many of the boys take advantage of them. Fiction and trades books attain the highest circulation, followed by war stories, biography, travel, science, history, literature, philosophy and general works, in the order named.

Many magazines are supplied to the cadets, some of which are: *Literary Digest*, *Pathfinder*, *American Boy*, *Mid-week Pictorial*, *Baseball*, *American Magazine*, *Outlook*, and magazines for all trades. The purpose of the library is to keep busy minds occupied during the hours that are devoted to relaxation, and provide supplementary material for classroom and trade instruction.

Physical education.

Boys need physical activity. The pent-up energies of youth can best be directed into expression through organized athletics. An athletic director devotes most of his time to coaching and supervising athletics. Teams compete with outside schools, including high schools, state teachers colleges, junior colleges, and the University farm school. The teams during the past biennium have been successful in winning a majority of the games played with outside teams.

The work of the representative teams excites interest in athletics among the boys of the various companies. Daily competition between company teams, which compete for the championship in the various sports, creates much wholesome activity. Football, needless to report, is the most popular sport. A new turf field for football has added to the pleasure and interest in this game.

Track and field events are a part of the spring and summer athletic program. Intercompany teams are rewarded by special dinners, and the companies represented receive trophy cups. In track and field sports the highest point winners are also given individual rewards.

Baseball and basketball are played in season. Handball is also played by the boys at the school recess periods.

The swimming pool is a source of much pleasure and comfort to the boys during the summer months. Competitive swimming contests are a part of the swimming program.

Music.

Music is an avocation with the Preston boys. They are, meanwhile, learning a trade and attending school. The band boys' program is school one half day, and work in a trade one half day, with their music in the evening.

The band is organized into two divisions: The first band is for the older members, and the second band consists of beginners. The second band averages a roll call of thirty, while the first band averages forty pieces. The boys are accepted without any knowledge of music or musical instruments. They learn in a remarkably short time to play well enough to enter the first band.

There are boys who have been able to enter the music profession after leaving the school because of their rapid progress here. The boys who are naturally talented and show interest find their knowledge of music helpful to them on parole. Where there is a desire to specialize in music, efforts are made to give the boys an opportunity to progress.

Perhaps the most commendable part of the musical training is that it is given in addition to a trade and school program, since the practice period for the first band is in the evening. It virtually gives each member a time and one-half program. To join the band is considered a privilege, and it has a steadying effect on the boys. Also, each member is given units of credit for his work. A part of each Sunday morning's assembly is selections by the band. Its greatest triumph is the work at the State Fair in Sacramento. The State of California invites the boys to come; offers them accommodations and amusement for an entire week. The band plays afternoons and evenings on the fair grounds, and for the exhibits. There have been many trips for celebrations and patriotic occasions and picnics.

For the entertainment side there is, in addition to the band, the orchestra, composed of some of the more talented members. The orchestra is often asked to play for benefit dances and for school and church entertainments.

In addition to the band and orchestra instruction, a boys' chorus meets twice each week under the supervision of a pianist and one of the officers of the school. Group singing is a part of the regular Sunday morning assembly. It is hoped that the vocal instruction can be further expanded. Music, both instrumental and vocal, is not only elevating and cultural, but is also an efficient aid in keeping up the morale of a correctional institution.

The military drill.

Upon entering Preston, new boys are placed in the receiving company. They remain there for the first thirty days and receive physical examinations, clinical treatments if necessary, and are taught the rules and regulations of the school.

It is a well recognized fact that close order drill is most valuable in securing good discipline as it develops instantaneous and willing obedience to orders. This is the chief purpose of military drill in the Preston School of Industry.

The military program has been arranged so that each boy while in the receiving company is required to attend military school one half day where he studies and recites for about two hours, after which he marches to the field for two hours of practical drill. Only close order drill in the school of the squad, and without arms, is taught, and for this purpose extracts from the "Infantry Drill Regulations," are printed in small booklet form.

The first lesson consists of committing to memory the "Position of the Soldier"; or "Attention" and being able to recite the same while standing in that position. This is a valuable beginning since the boy's troubles have more or less distracted his mind and scattered his thoughts. When taught to concentrate in this manner he is able to better apply himself to work in his trade.

Furthermore, close order drill teaches team work and unity. The boy learns to cooperate with his fellow cadets and if qualifications of leadership are present there is ample opportunity to develop them by becoming a cadet officer. Such a boy usually becomes a leader in other activities and a foreman in his trade.

On Saturday mornings, cadet officers' school is held. This school is attended by the cadet major, the captain and lieutenant of each

company. These officers are taught the necessary qualifications for good drill instructors. They study physical training and practice the proper exercise of the voice in giving commands.

On Sunday mornings before marching to chapel, the battalion is formed for a dress parade. While passing in review, competent judges decide which companies have the best lines, naming first, second and third places. There is much enthusiasm, and competition is keen for the honor of first place, which is announced after the parade.

A quarterly military competition is held. Each company drills for a stated period before judges. The prize to the winning company is 100 credits to each boy in the company toward his parole. A second company prize of 50 credits and a third company prize of 25 credits are awarded. This competition drill with its prize features has stimulated interest in military work.

VOCATIONAL PLACEMENT.

The placement of boys in trades is handled by the trades council, consisting of the superintendent, assistant superintendent, detail officer and school principal.

Soon after his arrival each boy is given an entrance interview by two members of the trades council. A blank is filled out containing data which later is used in determining his trade work.

Auto mechanics shop, Preston School of Industry.

After a boy has been in the school six weeks, his name comes before the trades council for consideration. At that time concrete information is at hand concerning his past school, work and conduct record. This data has been obtained from the principal of the school he last attended, from his parents, from probation officers' reports and from the boy himself. Before his name is placed on the eligible list for a trade, the

following items are considered and are listed in the order of their importance:

1. What is his real ambition?
2. What kind of work will he have an opportunity to follow when he leaves the Preston School?
3. What are his qualifications as judged by:
 - a. Previous experience.
 - b. General intelligence,
 - c. Physical ability.
4. How about his general conduct record since entering Preston? Is he trustworthy?

The boys are taught while "on the job," most of the projects being maintenance jobs. Most boys take a pride in doing their work right because they know it is real production work and must stand the test of actual use. It is sometimes difficult to secure work suitable to the abilities of all the boys in any one trade. The simple jobs are handled by the new boys, while the more difficult work is done by the more experienced boys.

Within the last biennium a new machine shop has been built with ample floor space and equipment to take care of the automobiles, trucks and tractors. A short course on the gas engine has also been instituted, and each class member is required to study about the technical aspect of the auto mechanics trade while he is also getting started upon the practical work. The school owns and operates two tractors and four trucks, all of which, with the exception of one truck, are operated by the boys.

An average of 254 boys have been receiving trades training daily for the past year. Of this number 130, or 51 per cent, were working all day. This does not include boys working in discipline companies or extra squads. There is no training more valuable for boys who have not learned how to do a real day's work than manual labor of this type, especially when it is well organized and each boy is required to do his share according to his ability. After a boy has learned the value of a day's work and has gained confidence and self-respect, he is ready to learn a trade.

Trade training is offered in the following: Dairying, poultry husbandry, general farming, horticulture, vegetable gardening, cabinet making and mill work, carpentering, masonry, electrical work, painting, plumbing, sheet metal work, auto repairing and truck and tractor driving, blacksmithing, steam fitting and oil firing, baking, butchering, cooking, printing, shoe making and repairing, tailoring, laundry work, photography and clerical work.

RELIGIOUS TRAINING.

The religious program of a correctional school for boys between the ages of fifteen and twenty-one can not be overlooked if the institution wishes to accomplish effective and lasting results in character building. It is becoming more definitely the opinion of those in a position to know that present day juvenile delinquency is in no small measure the result of a lack of proper religious and moral instruction.

Boys who have been delinquent and realize that they are headed in the wrong direction, are, in many instances, more willing and desir-

ous of gaining strength and aid through spiritual growth than the youths whose conduct has not caused them serious reflection.

The Preston School is endeavoring to provide an opportunity for moral and spiritual training of the youths placed in its care. Its religious program is briefly as follows:

1. *Protestant.* A full-time chaplain is employed. Part of his salary is provided by the United Church Brotherhood of Los Angeles County, whose cooperation deserves special commendation, and has made possible a much more effective religious program among the Protestant boys of this institution.

The chaplain holds voluntary Bible classes every day of the week except Monday. These classes are held during the evening or early morning hours in order not to conflict with their school or trade programs. A keen interest is taken by the boys attending these classes.

A regular service is held every Sunday afternoon. A young people's meeting is also held prior to the afternoon service. The young people's services are conducted under the supervision of the chaplain, but with a representative of the San Joaquin County Christian Endeavor Society always present to take part in the meetings.

The chaplain interviews all new boys and endeavors in every way possible to assist boys in finding themselves while in the school. The chaplain also extends the service to the boys on parole by suggesting church affiliations on the outside, and giving them letters of introduction to pastors.

2. *Catholic.* A part-time chaplain is employed, who holds regular services every Sunday morning at 11. This service is also attended by the Catholics living in the vicinity of Ione. An instruction class is also conducted by the Catholic chaplain.

Catholic literature is received regularly from Catholic organizations. This literature is distributed to Catholic boys. Occasional visits are made to the institution by Catholic religious welfare workers.

A Catholic committee composed of three employees of the school also assists in promoting the religious work among the Catholic boys of the school.

3. *Christian Science.* The Christian Science churches of northern California jointly maintain a field worker at the Preston School of Industry. He conducts regular Sunday morning services and Bible classes for boys interested in Christian Science.

Several copies of the Christian Science *Monitor* are provided daily. Other Christian Science periodicals are distributed to boys interested in Christian Science literature.

4. *Jewish.* Until recently the Jewish boys met weekly, under the leadership of one of their own group, but, due to lack of a satisfactory leader among the boys, they have not been able to hold their meetings. The Jewish population at no time during the biennium has exceeded fifteen. Jewish holidays are properly observed, and services conducted by members of the Jewish faith from Stockton or Sacramento.

The secretary of the Jewish Committee for Personal Service in State Institutions visits the school frequently and holds personal interviews with each Jewish boy.

In addition to the above religious activities the regular Sunday morning assembly programs include speakers representing various religious faiths. Sacred hymns and prayer also are a part of the Sunday morning assembly program.

PAROLE.

Two years ago (June 30, 1924) there were 398 boys on parole from the Preston School of Industry. During the two-year period there were 586 released from the school on parole, making a total of 984 boys whose names were on the parole records. Of these, 448 were discharged and 66 returned to the school for violation of parole, leaving 470 names on the parole records June 30, 1926.

Three kinds of discharge papers are issued to boys when they are twenty-one years of age, according to the kind of record they have made: The diploma of honor for the superior, an honorable discharge to boys maintaining average records and the ordinary release to those with inferior records. The following report blank is filled out and mailed to the parole officer the first of each month and a careful record is kept:

MONTHLY VOCATIONAL REPORT

City _____ Date _____ 192__
Mr. R. A. LANG, Waterman, Calif. I wish to report for the month as follows:

Work Report

Name of Company or Employer _____
Business Address _____
Kind of work _____ Wages \$ _____ day
Per week
month
How many days did you work last month? _____

Financial Statement

Are you buying any property of any kind, musical instrument, lot, home, life insurance, study course? State what the investment is _____

How much have you paid on your investment? \$ _____
I now have deposited in the _____ Bank \$ _____
I have cash on hand and coming to me in wages \$ _____
Total investment, cash and wages due \$ _____

Social and Study Report

Give name of any club or lodge you belong to _____
Are you taking any educational work, public school, night school, correspondence course, library, drawing, music, band? State what the course or study is _____
Where and how do you spend your evenings and leisure time? _____

Sign your name here _____
Address, street number _____

Statement of Adviser and Friend or Parent

I believe the above statement to be correct:
Signed _____
Address _____
(Write your letter on the other side of this blank)

NOTE—Keep your name on the "Honor Roll" by mailing your report the first day of each month.

Honor Roll—Every boy who sends his report each month and keeps his record clear as per agreement.

Negligent List—Boys who neglect to send their monthly reports as per agreement.
Failure List—One who persistently fails to send in his reports, runs away or gets into trouble.

In addition to the reports made by the boys, frequent visits are made to their homes by the field workers, and the following blank is filled out for each interview and filed with his record:

**Vocational, Social and Investment Statement of Youths Released from the
Preston School of Industry on Parole**

Case report by _____ Date _____
 Youth's name _____ Address _____
 Name of employer _____ Address _____
 Kind of work _____ Wages \$ _____
 Recent changes _____
 Investments _____

Reports

- 20—On time; satisfactory
 15—For sending report late
 10—Reported when notified
 5—Negligent; not interested
 0—Reports only when personally interviewed

Employment

- 20—Regular, promotional, satisfactory
 15—Irregular, or dissatisfied
 10—Odd jobs and labor
 5—Changeable, unsatisfactory, discharged
 0—Refuses to work; shiftless, wanderlust

Savings and Investments

- 20—Regular and systematic
 15—Occasional, then withdraws
 10—Spends lavishly; selfishly; foolishly
 5—Buys motorcycle; cut-down auto
 0—Earns little; in debt, dishonest

General Conduct

- 20—Satisfactory; habits good; neat
 15—Smokes cigarettes; careless
 10—Out late nights; restless; disobedient
 5—Disagreeable at home; argues
 0—Deceives; falsifies; profane

Keeping Out of Trouble

- 20—No complaint of any kind
 15—Bad associates
 10—Pool halls; public dances; resorts
 5—Gambling; drinking; disorderly
 0—Petty stealing; forgery, arrest

Remarks _____

This follow-up system enables the school to determine definitely the group or classification each boy belongs in, at the time of his discharge or the termination of his parole period. The diploma of honor is issued only to those who maintain a 100 per cent record. There are six requirements or tests in maintaining a 100 per cent record. First, properly filling out and mailing the vocational monthly report; second, putting forth his best energies in his employment and earning a reputation for honesty, faithfulness and industry; third, remaining with his employment until he becomes established in a regular occupation which will give him a good start in life by the time he is twenty-

one years of age; fourth, systematic saving of a portion of his earnings; fifth, satisfactory conduct at home and in his social relations; sixth, associating with good companions and keeping out of trouble.

The following sketch of a boy on parole is a sample of an average 100 per cent record: G. W. was released on parole December, 1924. While in the school he worked in the horticultural squad and flower gardens. He requested the same kind of employment outside. A position was arranged for him in a flower and shrub nursery at a salary of \$18 a week. He remained with this position four months, when he secured a better position and an increase of salary, following the same kind of work. After three months he made another change, securing a better opportunity with a large advertising firm in San Francisco in their nursery department, and his salary has been increased until now he earns \$130 a month. Our records show he has remained with his present position for more than a year, has \$185 in his savings account, paid all of his bills, board and other expenses as they have arisen. He will soon be twenty-one years of age and will be entitled to the diploma of honor, signed by the Governor.

There were 85 boys or $16\frac{1}{2}$ per cent of the total number discharged from parole at the age of 21, who received the diploma of honor. One hundred and ninety-two boys or $37\frac{1}{2}$ per cent received the honorable discharge. The ordinary release was issued to 171 boys. Of this number there were 50 whose addresses were lost and 70 others whose records on parole were unsatisfactory, a total of $23\frac{1}{4}$ per cent. There were 37 boys who were sentenced to prisons for new offenses and 14 others in jails for the same reason. Sixty-six returned to the school for violation of parole, making a total of 117 boys, $22\frac{3}{4}$ per cent, who were definite failures.

It has been the school's experience that careful placement, including suitable employment and supervision, properly arranged and well understood prior to the time of parole, is of great importance. When employment is not arranged in advance the first question usually asked by prospective employers is, "Where have you been working?" The boy must either evade the question or explain that he has just recently been released from the Preston School of Industry. When there is employment arranged in advance the boy knows what he is going to do and will easily and quickly adjust himself to the new conditions.

With the large number of boys now on parole needing advice and supervision, twenty-five to thirty-five new placements to be arranged each month, and with the constantly increasing demands made upon the parole officers, provision should be made for more field workers and a much larger measure of supervision than is now possible.

A parole business course has been introduced into the class rooms. In this course the boys are instructed how to make out their reports; how to arrange their finances and budget expenses; how to buy shoes, clothing, neckties, socks, shirts and underwear; how to distinguish between shoddy and good quality of cloth; how to secure good recreation for a reasonable outlay; how to secure employment when out of work; how to approach a prospective employer when seeking a position, and how to keep a record of interviews with employers. Vocational guidance and the selection of an occupation is a practical and interesting lesson included in the course. The advantages and dis-

advantages of different occupations, apprentice wages, requirements, opportunities for promotion and increase in wages, the attitude of employers toward boys who are willing to work and follow instructions are all explained. There are twelve lessons in the course and it requires about six weeks of half-day school to complete it. The best time for the boys to enter this class is after they have made application for parole and while arrangements are being made for employment and supervision.

The boys file their applications for parole two or three months before they have earned the required number of credits entitling them to release. This gives the field workers ample time to make all arrangements for employment. When all the arrangements are made and the boy has earned the required number of credits he appears personally before the parole commissioners, who instruct him regarding his employment and responsibilities on parole. All boys who are passed for parole each month are invited to be present at a dinner given in the superintendent's dining room. This dinner is a very enjoyable occasion and the boys in the school look forward with keen anticipation to the time when they will be guests.

Everything possible is done to encourage the boys when they leave the school and to make them feel that life is worth while and that they will amount to something. They are made to know that their progress and achievement will be carefully checked and that they will be given due credit for whatever they accomplish. A personal letter of encouragement and advice is written each month to the boys on parole in answer to the reports when received, and in this manner a close personal relationship is maintained.

REPORT OF SUPERINTENDENT OF THE VENTURA SCHOOL FOR GIRLS.

To E. G. Twogood,

*Secretary and Acting Director, Department of Institutions,
Sacramento, California.*

DEAR SIR: During the two years just past much has been accomplished through the pursuance of policies of administration and management as outlined in the previous report. It is not necessary to repeat in detail in this report the foundation or basis for conducting this school, other than to say that education in its broadest sense has proven to be the best method of approaching the task of directing the energies of the young girls into safe and satisfactory channels.

Various improvements have been made during the biennium. The treatment room in the Hospital Building has been enlarged by the removal of a partition, and additional tables have been installed in it.

Special commendation is due the Department of Public Works of the state for thought and attention given this improvement, which has resulted in this school's having a treatment room with no equal as far as usefulness and sanitation are concerned.

The principal difficulty of construction was to obtain a material for the sides of the booths and the tables which could be molded and which would permit of constant use and be absolutely sanitary. Terrazzo was found to be the best material, and with the addition of plain white enamel bowls with flushing rims, the open drain was also obviated.

The enlargement of the treatment room necessitated the moving of the Dental Clinic to another space, and afforded a new storage room for drugs and hospital supplies.

A new and larger ice plant has replaced the old one, and the roads on the state's grounds have been improved by the addition of Corona quarry waste, which makes a splendid road when rolled and sprinkled.

A residential cottage for the superintendent of the school, which was built last year, is greatly appreciated and aids the work by affording a quiet place for rest away from the office building.

The regular men employed at the school have attended to the general upkeep of the buildings and service equipment during the two-year period.

Our physical surroundings have been changed considerably by an encroaching oil field, whose boundaries have not been determined at the present time.

A neighbor's orchard on the west has been replaced by a tank farm, and the territory on the north has been developed to such an extent that several producing wells are near the boundary of the school's land in that direction.

The development of the oil field has brought with it a greater number of residents in the vicinity, and this school is no longer an isolated community on the hill side.

The arable land of the school, all of which is planted to orchard and vegetables, has been kept under constant cultivation. The citrus grove and walnut orchard have produced abundantly, but the deciduous fruits, with the exception of the apricots, have not produced as they should. Unfavorable weather conditions both years have interfered

with the proper foliation of the trees with consequential lack of fruit development.

The girls raise the vegetables and harvest the nuts and fruit. Last year most of the apricots were dried, as they had to be handled rapidly. This year, with a lighter crop and cooler weather during the ripening season, canning in glass jars has been the principal method of caring for the fruit.

Late in the biennium an opportunity to obtain instruction in the growing of flowers, shrubs, and trees, has opened the way to the development of a new vocation which is well suited to certain girls in this school. The lath house, which has been idle for years, is now one of the busiest places on the grounds and is filled with young plants, all of which have been tended by a group of interested girls.

Too much cannot be said in praise of the staff of the school, the officers and the teachers who have worked very faithfully to further the work of this institution.

Under the direction of Dr. Mabel T. Bell, the health of the girls has had careful attention. By the use of prophylactic measures and the observance and treatment of girls presenting mild symptoms of disease, much illness has been averted. Standard routine treatment for girls affected with gonorrhea has been followed, and the new treatment room has aided this work very materially.

The dentist is giving more attention to the girls' teeth than formerly, as he serves two institutions now instead of three as before.

The girls of school age who have five hourly sessions, and those of the part time division, and commercial studies, have worked diligently and much has been accomplished.

Fourteen girls in 1925 and thirteen in 1926 received county diplomas for completion of eighth grade work. Graduation exercises, both years held in the auditorium, attracted a number of visitors from far and near and added materially to the dignity of the occasion. This is the fifth graduation of this kind that this school has had, and a number of girls have continued their studies in various high schools of the state. One of the girls, who has just completed a high school course, was one of twenty-five out of 296 to be graduated with special honors. She is working this summer, and will enter university this Fall. This girl has had no help of any kind from her family, and whatever she has accomplished has been through her own efforts, with the assistance of the kindly supervision of the parole officer from this institution.

As a result of the genuine training which the girls receive in academic work here, an increasing number each year express a desire to continue their school work outside. The stimulus which they receive in this school easily finds expression in a desire to continue their studies in an effort to compensate for time lost before coming here.

The psychological work has been done by Dr. Ellen B. Sullivan. She has examined girls who enter without a mental test, and has reexamined such cases as demonstrate strange or unusual tendencies.

The sewing, weaving, basketry, under the direction of Miss Ada Vesper, have followed the educational policy in that all classes in sewing, weaving, basketry, etc., stress first of all thoroughness in fundamentals. The practical work of these classes in keeping apace with

the needs of the institution furnishes a prevocational training which is believed to be of greater value than a strictly vocational course which would occupy the same length of time.

The training which the girls have received in cooking, baking, laundry, housekeeping, and garden work has followed the same general plan as described in previous reports, and the results have been very satisfactory. Many of the girls who have married and established homes outside have surprised their husbands with not only being excellent housekeepers, but with their ability to provide back yard vegetable gardens which have been the admiration of the neighborhood.

The parole officers, Mrs. Alice T. Weed in southern California, who devotes full time to the work, and Mrs. Mabel G. Mitchell in the northern part of the state, a half time employee, have carried on the work of placing and supervising paroled girls from this school in a satisfactory manner. The superintendent of the school supervises a group of girls in close proximity to the school.

The average time spent in the school for the group of girls paroled during the first year of the biennium was 1.9 years, and during the second year 1.62 years. Of the second year group the shortest time in the school was one year four months, and the longest time two years seven months.

The policy of placing girls in good homes when they leave the school is a very satisfactory arrangement, as this gives the girl the most protection possible during the period of adjustment to outside conditions. After she indicates sufficient stableness to meet and satisfactorily handle the problems of every-day life, there is ample time for other work. Even the high school girls, who are working in homes other than their own, have made much more progress than those at home.

Thirty-nine girls have married during the biennium, and most of them are making splendid records.

Every girl on parole is given many opportunities to establish herself, and no girl is returned to the school unless she has failed to respond after several trials.

There were 165 girls allowed to leave the school on parole from July 1, 1924, to June 30, 1926.

During the biennium intensive training has been given all girls, with a maximum of school work for the younger ones.

Quiet order has been maintained principally through such constructive measures as the presentation to the new girl of advantages to be gained by a life of usefulness and industry while in the school, and by the following up of these suggestions with an interesting and varied program of work and play, to keep the interest from lagging. Such added privileges as are enjoyed by the Alta Vista cottage, with its slightly greater freedom in cottage supervision and girls' clothing, and such outings as picnics, entertainments off the grounds, and the two weeks' camping trip in the hills, have proven to be an incentive to good conduct.

The disciplinary troubles are greatest among the girls who have been here less than six months, and as the population has increased, and turn over of student population is rapid, there are more girls in this

group in proportion to the population than formerly, and consequently more care than ever must be exercised to maintain the splendid morale which is present in the school at the close of the biennium.

The laundry in the discipline cottage should be enlarged, or preferably rebuilt, so that the girls need not work in such close proximity as they are doing at present. This is the school's most urgent need at the time of writing this report.

The encroaching oil fields, with no means of keeping wanderers off the grounds, and the constructing of new roads into the hill country north of the state's land, have added to the difficulties of management.

Although new problems of administration have been presented with added responsibilities, the superintendent is certain that the real work of the school—training of the young girls and directing of their lives into paths of usefulness and rectitude—is progressing very satisfactorily, and that the new biennium is being entered with courage and the hope of greater accomplishments than ever before.

Respectfully submitted.

OLIVE P. WALTON, M. D.,
Superintendent.

REPORT OF THE SUPERINTENDENT OF WHITTIER STATE SCHOOL.

After additional years of test and trial we are still assured that the fundamental principles behind the present policy of Whittier State School are sound. Experience makes it evident that there must be a further elaboration of our plans. The following report gives but a cross section of the present status of the work and a few suggestions as to some steps forward for the future.

During the biennium just closed we have endeavored as far as possible to consistently follow our policy of providing for every boy

Boy Scout cottage, Whittier State School.

at Whittier State School individual analysis, diagnosis and treatment; to make a special effort to find the need existing in the case of each boy, and then to try and work out the program best calculated to meet his need. Of course, there are many ways in which boys can be cared for in groups, but there are always conditions and circumstances peculiar to the individual, which make it necessary that he be separately dealt with. The individual must never be submerged in the group—on the contrary the group is of value only as it helps in solving the problem of each of its members. Boys should not be compelled to adjust to some one common mold; molds must be so patterned as to suit the requirements for effective treatment of each one of them. We try to see that this underlying principle in our program finds itself evidenced in the classroom, the shops, and all through the school. On the other hand, the boys must learn the meaning of team work and cooperation. Ample

opportunity to do this is afforded through home life in cottages, organized athletics, free play and the adjustments that every one recognizes are essential if a number of individuals are to live together happily.

Inducement rather than compulsion should motivate a boy's action. "I will because I should" ought to replace a grudging "I will if I must." Unless the boy learns to will to be and will to do, the great accomplishment has been missed in his training. To be compelled to do what is right by force, or to be prevented from some wrongful action merely through fear or by reason of temporary inability because of restraints artificially imposed, is but poor preparation for right living in the society to which the boy is to be returned. It is our constant aim to create in the heart and mind of the boy not only a desire but a determination to be and to do right because it is right. No mere outward formal compliance with rules and regulations is a safe basis for his return or for expecting to see a boy become truly successful in life.

There can be no escape from the fact that, "As a man thinketh in his heart, so is he." We must actually replace wrong ideals with right ideals and so organize our program for each boy that his character will in fact be formed again. Attitudes of mind of employees and of boys are of decided importance.

We have continued our trades work with emphasis on "trades" training as opposed to mere "manual" training. Boys who complete trades courses provided at Whittier go out and earn a living wage or better. Many on leaving Whittier have immediately entered the trade learned, and have followed it continuously and successfully for years. Some have become established in business for themselves. The closest possible cooperation should be maintained between shops and classes. We try to make all of the activities of the school really educational in character, so that a boy is constantly under some definite form of training. On the basis of results obtained, additional trades equipment should be provided at once. The pay roll should be increased so that men of high character who are first-class mechanics and qualified instructors can be secured and retained. Special ability is required on the part of those who undertake to train and rehabilitate these boys and to direct their energies into proper channels. We should be able to pay salaries at least equivalent to those paid in the public school, and in our opinion we should pay more.

Two additional teachers were added to our Department of Education, and increases in salaries of teachers were granted in five cases. Four boys were graduated from our high school at the close of the last school year, and we have formulated plans for having the school regularly accredited.

A good attitude toward attendance in classes has been maintained. Almost all the boys solicit the opportunity to go to school though most of them have been listed as truants before coming to Whittier. During the summer vacation an opportunity was afforded the boys to attend summer school if they so desired. The response was instantaneous on the part of many who were behind in certain subjects, and four classes were in regular session all during the summer.

In baseball, football and basketball, teams representing the school have contested with many neighboring high schools, winning a majority of the games played and earning an enviable reputation for clean playing and good sportsmanship. Our physical education director gives particular attention to the needs of each individual. We should have additional facilities so as to better provide for this work. Intramural athletics have been encouraged and promoted.

A number of our playgrounds are located on land suitable for citrus fruit culture. An equal acreage is given over to seedling walnuts. These trees are of an age, and the value of this kind of nut has fallen off to such an extent, that the orchard lacks in value. We have been preparing the soil around the playgrounds referred to for citrus fruit trees, and hope to plant them this coming winter. The exchange in use of these two plots will ultimately add to the net income and will move the playgrounds away from the Los Angeles-San Diego highway, which they now immediately adjoin.

There is pressing need for additional accommodations at Whittier. There should be adequate provision for a material increase in the population. Our capacity has remained stationary for the past few years. There is a waiting list of boys actually committed to Whittier who can not be immediately received. The number of boys on this list averages about 35. The utmost care has been exercised to see that the number accepted from each of the counties equals as nearly as possible the percentage the population of the county bears to the total population of the state. The measure of success obtained is but one of the many evidences of the watchful care of Mr. Elmer E. Knox, secretary of the school. He has not only rendered invaluable service within the school, but in handling this very difficult situation has made his agreeable personality felt in all of the probation offices. The inability of Whittier to receive boys promptly not only has frequently worked a real hardship to individual boys, but the delay has seriously interfered with the efficient operation of the courts. If a boy should be made a state ward then the committing court should be able to remove him promptly from the home, the neighborhood, the "gang" or whatever influences have been breaking him down. There are over twenty boys in Los Angeles alone under commitment to Whittier.

Many of these boys could be cared for to advantage in county "adjustment or probation schools" and thus never become state wards. The adjustment school will be referred to later in this report.

With the steady lowering of the age of boys at the time of admission the attitude of the public school toward Whittier is steadily changing. Whittier is beginning to be recognized by it as a special school to which boys go from the public schools and to which they must return. There is an increase in the number of those identified with the public schools who visit Whittier to learn of the methods we employ so that they may incorporate them into their plans. A decided improvement in the relationship between educational agencies and Whittier has resulted from exchange of visits. That the boys who come here are mostly problems in education is being recognized.

In this connection the following table is of interest:

Comparison of Mentality of Boys at Whittier State School in 1918 and 1926.

Classification			No. of cases		Percentage of cases	
			1918	1926	1918	1926
Superior -----	Above	110-I.Q.	14	35	5.5	10.9
Average normal -----		90-110	56	136	22.3	42.5
Dull normal -----		80-90	60	83	23.9	26.0
Borderline -----		70-80	46	59	18.4	18.4
Feeble-minded -----	Below	70	75	7	29.9	2.2
			251	320	100.0	100.0

1918 cases quoted from Whittier State School Biennial Reports; Report for 1916, page 60; Report for 1916-1918, page 27.

1926 cases include 320 cases present at Whittier State School June 30, 1926; 7 cases below 70 classified as feeble-minded are really in the borderline classification and are held for observation of the case.

The demand has been so great for an increase of high school facilities we have been making every possible effort to meet this educational need of the boys reaching Whittier. Our boys must have the advantage of a completely equipped junior and senior high school as well as every suitable provision for adjustment classes with an ungraded class for the younger boys. This will mean a considerable addition to our present equipment as well as a material increase in personnel.

PRESENT ACTIVITIES OF THE DEPARTMENT OF RESEARCH OF WHITTIER STATE SCHOOL.

A. Clinical.

The clinical program includes service within the institution, which contributes to the better understanding of boys in the school and boys on placement outside. The aim is to furnish information of value in planning treatment of individuals within the group.

The program of individual clinical service is both a measurement and an adjustment one. An individual analysis and diagnosis is made in the case of every boy. This includes psychological tests, tests of educational achievement, psychiatric examination where that is indicated, social analysis, and an analysis of the conduct record, habits, emotional trends, interests and special abilities of the boy.

A plan of treatment is made based upon the clinical findings. This plan includes school adjustment, modification or substitution in case of undesirable habits and ideas, adjustment of emotional complexes and arrangement for decreasing the instability in the cases of unstable children with a psychopathic trend.

Placement within or without the school is based upon knowledge of the clinical findings. This is in the hands of a placement committee. The director of research is a member of this committee.

When boys are sent in for study incident to proper institutional placement or come from counties furnishing little information with reference to the personality of the boy, the program is one of intensive study, previous to arranging a plan of treatment or suggesting replacement by court in an environment better suited to the particular case.

When boys come in from counties having satisfactory clinical service and furnishing detailed clinical records, these are *supplemented* in necessary directions having to do with a plan of treatment while under the supervision of Whittier State School.

In addition to diagnostic work and individual treatment, a personal service is growing up in the school. This includes discussion of the phases of the individual case relative to a more satisfactory adjustment. Such personnel conferences are arranged at the request of any of the following groups: (1) boys who request such conferences, (2) teachers or tradesmen who wish to confer with reference to treatment of problem cases or special problems of their individual service, trade analysis, etc., (3) the school in general (service here is furnished as a matter of routine in placement committee meetings and less formally whenever requested by administrative or other officers), (4) in so far as possible by the placement officer in relation to cases of boys outside the school, under the supervision of the school.

Hospital-Research and Office Building, Whittier State School.

The personnel of the department includes the following members; one psychologist devoting half time to the direction of the work, one paid clerical and stenographic assistant dividing his time between this department and the placement department, volunteer service from a large group of advanced students of psychology of the University of California, Southern Branch, and special contributions of students from other universities making studies of value to this clinical work. (Stanford, Wyoming, etc.)

The work from month to month has a similarity of routine. Variation enters due to the following factors: Certain types of service may be related to special needs of a particular time. Some phases of the work are being gradually introduced because of a desire on the part of the director to try changes before incorporating them into the routine. Because of the limited personnel, special studies have to be fitted into a very full program.

A limited psychological service is afforded by this department to the Ventura School for Girls. Due to the limited personnel no attempt is made at present to make this service complete.

B. Journal of Delinquency.

The publication of the *Journal of Delinquency* was suspended during 1924. Regular publication was resumed in January, 1925. The *Journal* has been edited by the director of research. The work of the department has included: editing the *Journal*, enlarging the subscription list, particularly that of paid subscribers; improving the material in the *Journal* and attempting to bring the publication up to date. The price of the *Journal* was increased June, 1926, to \$3 per annum, the previous price being \$1.25. Plans and initial editorial announcement were completed for changing the *Journal* from a bimonthly to a quarterly. This change is to date from January, 1927.

The foreign exchange of the *Journal* has been developed until now we are in active communication with social agencies and their publications from every country in the world. This results in our being in contact with the most advanced social experiments, their successes and failures. Also through the review of the foreign literature in the *Journal of Delinquency* literature is made available to the scientific reading public that could not be found elsewhere. The foreign language departments of the university have assisted in the review of this literature.

The circulation of the *Journal* included the following:

Paid subscriptions-----	187
Editorial -----	34
Complimentary -----	79
Review publishers -----	38
Exchanges -----	53
Foreign exchanges -----	29
<hr/>	
Total -----	420

The above represents a doubling of the list of paid subscribers within the last year, and at an increase of nearly two and a half times the original price of the *Journal*.

To add to the efficiency of our department for after care of boys who have been permitted to leave Whittier on placement in the hope that they will meet with success away from the school, it is imperatively necessary that there be an increase in the number of employees caring for our boys on placement. One man is now making a vain effort to properly supervise over two hundred boys scattered from San Diego to Siskiyou and from the foothills to the sea. It can not be done successfully, and no doubt disaster in certain cases has resulted. The investment of time, money and effort in boys trained at Whittier, and the hazard of failure, is too great to have the condition continue.

To members of the faculty at Stanford University, and many of the advanced students, we are under obligation for continued support of Whittier, to Dr. Elwood P. Cubberley, Dr. Lewis M. Terman, Dr. Walter Miles, Dr. Calvin P. Stone, Dr. Maud Merrill and other members of the Psychology Department.

An arrangement with the State University at Los Angeles has enabled us to secure the regular services of Dr. Ellen B. Sullivan as head of our Research Department. She has enlisted the fullest measure of cooperation of faculty and student body of the university. Clinical work at Whittier is a definite part of the university student program. We appreciate the attitude of the Department of Psychology, the Department of Education and the Spanish Department, which have all made active contributions to the work at Whittier. Dr. Grace M. Fernald has continued her invaluable assistance in every phase of the work. The state is under lasting obligation for the service she has contributed. To Dr. Shepard I. Franz we are indebted for administrative cooperation between his department and the Department of Research at Whittier. Miss Catherine McLaughlin has been interested in particular research problems, and has supervised some of this work done by university students. Dr. Rosenberg has furnished volunteer service in instruction in Spanish and assisted in the editorial work of the *Journal of Delinquency*. We have long felt that we had much of value to offer the university, as we were sure it had for us. We consider Whittier presents an unsurpassed opportunity for laboratory work. For this reason the cooperation mentioned was a consummation highly to be desired.

Practice teaching in the school is being carried on by a student of Whittier College.

Whittier Union High School has cooperated with the state school in accepting students in need of special training provided by that institution. We are indebted to Principal Albertson and the board of trustees.

Dr. Thomas J. Orbison of Los Angeles has made his services available to Whittier at all times, and has frequently visited the school to examine and prescribe treatment for special cases. He has also interested psychiatrists, neurologists, alienists and other specialists, who have rendered valuable supplemental service, all without remuneration of any kind.

Our thanks are due to Mr. William Wrigley and his associates of the Catalina Island Company for another very successful camping season. We need a larger launch, as it is now necessary to tow many boys in open boats. Some effort has been made to secure a launch 40 feet over all with a two- or three-cylinder motor. Our present boat is but 28 feet over all and single-cylinder.

Individuals and organizations were most generous in their contributions toward the success of the Christmas season. Practically 25 per cent of our boys are annually without a single remembrance for Christmas. Our friends, by "adopting" certain of these boys for the day or by sending us the wherewithal to purchase simple presents for one or more of them, have made it possible for us to see that without exception Santa Claus has at least one gift on the Christmas tree for every boy in the school. This is the greatest day in the year.

We have in prospect a special "home rehabilitation" worker who will render full time to a careful study of home conditions of all boys coming to Whittier. In this the cooperation of the state university is assured. We are endeavoring to establish the relationship between home conditions and juvenile delinquency, and to bring about such readjustments in faulty homes as will make them fit places to which

boys may return at the close of the period of training in Whittier. This arrangement has many evident incidental advantages. To be able to assist the family to learn how to properly supervise the boy while at the same time the school is endeavoring to prepare him to conduct himself properly, should add greatly to the prospect for success. Not only the boy but his entire family is helped to see that the state school represents the state's interest in the welfare of the boy, that at great expense it is trying to give practical expression to this interest. The value of preventive work accomplished by anticipating and preventing delinquency in other members of the family, of itself will undoubtedly more than justify the creation of this department. A logical result should be increased loyalty to the state and a sincere effort to maintain a home that will accord with accepted standards of American living, and conduct that will conform to the reasonable requirements of the law.

The relationship between immigration and juvenile delinquency will be given careful consideration in these investigations. We are satisfied that facts of importance will be developed.

Health conditions during the two years were excellent. One boy of unfortunate heredity died during the biennium.

The absence without leave record has been good. As indicated in Table No. 5, the monthly percentage has been approximately $\frac{1}{4}$ of 1 per cent, and we have gone as long as six months without a single boy being off the ground without permission. We have no fences or outside "guards" to prevent boys from leaving. In the main they accept their training as an evidence of friendly interest on the part of the state in their behalf. Loyalty spelled out in this practical form is their natural response.

No appropriation for permanent improvements was made for Whittier at the legislative session of 1923, and only \$51,025 (including equipment and general repairs) in 1925. New construction therefore is practically at a standstill. Generous appropriations should be made by the legislature in 1927 if a high degree of efficiency is to be maintained.

Some years ago the school purchased 20 acres of water-bearing land in San Gabriel River bottom. A well was sunk and a good flow of water secured. As yet no pump has been installed. Our need for this water is very great. All other sources of supply are either highly uncertain or very expensive. In spite of adverse conditions, however, under the effective direction of Mr. W. A. Smith, assistant superintendent, we have obtained exceptional results from the citrus orchards. We have delivered to the citrus association the highest percentage of Sunkist lemons ever received at the packing house, and at the same time the heaviest pick of fruit per acre for the age of trees. Value of crop now on the trees is estimated at \$20,000 to \$30,000, provided we escape damage by frost. We believe the entire orchard should be protected by heaters; at present we have none.

The walnut crop in the entire district was light and of low grade. Ours averaged up well, but net returns will be much less than usual.

The old horse barn is being razed and the excellent grade of lumber and material above the floor level is being preserved for use in other structures. Tractors have largely replaced horses and mules. The adjoining building formerly used as a dairy has been converted into

a garage. The dairy herd was discontinued. The moving of the garage will make it possible to utilize the space it formerly occupied for classroom and library purposes. We will have four additional classrooms. There are boys enough waiting an opportunity to enter the department of education to fill them all. The change will add greatly to the efficiency of our academic work, and enable us to place practically every boy in the academic department.

We have held for many years that the state should authorize the establishment of 24-hour schools, to which boys would be assigned by the public school on the basis of their rights and needs as children rather than be committed by the court as offenders against the law. They are entitled to 24-hour care and training. Whittier might ultimately become the state's 24-hour school. This, of course, involves making satisfactory provision for all boys now coming to Whittier. As a matter of fact, the majority now at Whittier could probably be dealt with more satisfactorily if received as school boys than as court wards. Assignment to a 24-hour school should be exclusively an educational procedure free from stigma. Responsible adults or the community rather than the child should be required to explain irregularities in the child's conduct.

It should be made possible for any school district or group of districts to organize and maintain their own local 24-hour schools, directed and financed by the districts interested.

We suggested to the authorities at Sacramento that what we designated as an "Adjustment Department" might be organized and conducted at Whittier. This would be for boys whose need might be met by a short period of training at the State School. This should possibly not exceed six months, instead of the customary commitment during minority with an average stay of about two years; at the end of or during this time, the boys to be returned to the committing court with a statement of progress made. In most instances we would anticipate a boy would be given another chance. In other cases where the response had not been satisfactory he might be formally committed to Whittier, to remain under training for the customary longer period. We advanced this proposal not only for its possible value as a preventive measure, and the economy to the state in some cases through reducing expense by shortening the training period from approximately two years to six months or less, but also because this would give to juvenile courts and detention homes the largest measure of relief the state could provide in the shortest period of time. The buildings at what was the Girls' Department were considered to accommodate this department at Whittier. These buildings are to be inspected by representatives of the State Department of Public Works to determine whether they can be made safe and, we believe, as to the economy of investing the amount required to strengthen the buildings, and to complete the contemplated alterations, repairs and improvements. There will also be the matter of suitability to be considered. It might be more efficient to raze some of the buildings, and utilize as much of the material as possible in erecting modern structures specially designed for the purpose.

There are many cases where boys could be saved from the court record of commitment to a state school if the county or groups of counties had their adjustment or probation schools under court and

probation office control, and we propose that authorization be secured from the next session of the legislature to enable any county or groups of counties to create and maintain such schools. Boys could be placed in these schools on indefinite probation or for such a period as might seem best. There are many good reasons for keeping certain boys in their own communities. This would also avoid the stigma of having been made a state ward and, assuming good home or other local influences, these could still be exerted under the supervision of the probation office. Reabsorption into the public school should be more easily effected than where there has been complete removal from the county; suitable educational opportunity to be provided all boys in adjustment or probation schools. County boards of education could provide teachers, etc., for these boys would have to be given regular schooling if they were in attendance in the public school. Inasmuch as these boys now reach state institutions in large numbers, the state might consider granting a reasonable subsidy to adjustment or probation schools in the expectation that as a result of this training many of the boys would never become state wards. The Adjustment Department in Whittier should be of service to many counties unable to maintain schools of the kind. It should also be of assistance to adjustment schools in determining satisfactory methods for conducting them. Boys could be sent to these adjustment or probation schools by order of the juvenile court for 24-hour care during a limited period of time. Unresponsive boys in these schools might later be committed to a state school. Responsive boys would be returned to the public school and to suitable living conditions. Adjustment or probation schools would be for boys whose delinquency record had progressed to a point beyond which they would be eligible for a 24-hour school. Such schools would afford an opportunity to meet the need of a child while a ward of the court, in the hope that this would avoid the necessity of making him a ward of the state.

Consideration should be given to the establishment of a centrally located state school for boys of middle age.

The Pacific Colony, when occupied, should help care for feeble-minded delinquents.

Definite provision should be made to give permanent custodial care to certain types of psychopathic children who now reach state schools because of delinquent conduct. This also involves preventive measures for the potentially insane. For the time being, this group possibly could be reasonably well cared for as a specially segregated group in one of the homes for the feeble-minded.

There are also a certain number of individuals who are so unresponsive that they should be transferred from one state institution to another as their age increases and their response remains unsatisfactory—in some instances the custody might ultimately become permanent.

Return to society should not be determined by the age of the individual who has been made a state ward, nor by the length of time he has been under state supervision. The determining factor should be the probability of a satisfactory conduct response if returned.

The percentage of boys who have gone out from the school and who, in spite of adverse conditions, do not again appear before the courts as offenders, continues to be large. That some fail, and of these a few make records that are very bad, is understandable if one is fully

informed as to all of the facts. We are sure that if additional placement supervision is provided the number of these cases can be still further reduced. Many boys do exceptionally well. Some have been holding responsible positions for years. While we have lacked the facilities to make a satisfactory follow-up study, the best information obtainable indicates that not less than seven out of ten boys coming to Whittier succeed after leaving, and that a possible additional 10 per cent are doing fairly well. Undoubtedly a certain number who are not accounted for are getting along very satisfactorily.

Words can not adequately express the appreciation due to the staff for the loyalty it has so splendidly evidenced to the superintendent. On one occasion certain individuals were recommended for dismissal for conduct unbecoming employees of the school. The small number involved and the attitude of the balance of the staff was very gratifying. Men and women have carried on in a way that has set an example worthy of being followed by every boy enrolled. It is not feasible to make special reference to all those whose names stand out so prominently in this connection.

FRED C. NELLES,
Superintendent

REPORT OF MEDICAL SUPERINTENDENT, AGNEWS STATE HOSPITAL.

MR. E. G. TWOGOOD,
*Acting Director State Institutions,
Sacramento, California.*

DEAR SIR: The usual tables and statistical records show in tabulated form, easy to understand and convenient for comparison, useful data and expenditures of the hospitals for the biennium.

They do not show, however, what is most important, in exchange one hospital with another, each hospital's efforts and spirit, by research, experimentation and new methods, to advance the usefulness of our hospitals and the cause of psychiatry.

What has the hospital done, as relates to patients, better than it did before? What new physical or metaphysical to advance psychiatry? What advance in understanding and methods? What efforts, though results are not yet apparent? These are the things we like to know both for their helpfulness and their stimulus.

In addition to doing its best for those entrusted to it Agnews desires to be useful beyond its own immediate field in the general field of psychiatry. In its laboratory well equipped for pathological, histological, bacteriological, biochemical and serological work, our very able laboratory director, Dr. Frederick Proescher, in addition to routine diagnostic work, has done considerable in research and experimental work with more or less satisfactory results and much promise. In this report it will be possible only to refer to and briefly outline some of these, leaving to a later and comprehensive report a full publication, though some of them have already been published in journals. A new method for staining nerve cells in block has been worked out. The diagnostic value of the sedimentation speed of erythrocytes in mental diseases has been investigated. Investigation of the iron content of the spinal fluid in general paralysis and other mental diseases has been made, leading to simple and specific laboratory test for the differential diagnosis between general paralysis and other syphilitic diseases of the central nervous system. Research work on the distribution of blood groups in mental diseases has been carried on and the entire population of Agnews has been grouped and also many hundred patients of other state hospitals. Immunization experiments with the paralysis spirochaete has shown that a complete immunity can be produced against virulent dermatropic strains, proving beyond a doubt that the paralysis spirochaete is a biological different strain from the dermatropic strain.

Every patient admitted to the hospital is subject to complement fixation test of the blood and if the clinical symptoms warrant the spinal fluid is examined. 2680 complement fixation tests of the blood and 759 of spinal fluid have been made.

While we have made very useful our excellent autopsy department in our research work we hope to be able to obtain a larger percentage of autopsies on our deceased.

The following shows anatomical diagnoses of the autopsied cases and is tabulated according to the psychoses:

- 30 cases of dementia praecox.
- 29 cases of general paralysis.
- 7 cases of arteriosclerosis.
- 6 cases of senile psychoses.
- 6 cases of epilepsy.
- 2 cases of cerebral spinal syphilis.
- 1 case of alcoholism.
- 1 case of idiocy.
- 6 cases no clinical diagnosis.

Tuberculosis was found in 14 cases, the highest percentage in dementia praecox with 33.3%. Malignant tumors were found in 5 and brain tumors in 3 cases. In 29 cases of general paralysis, 2 cases of aortitis syphilitica were found and 1 case of psychosis with cerebral spinal syphilis showed an aortitis and myocarditis syphilitica. Of interest was a case of diffuse sclerosis of the brain and multiple mixed tumors of the kidney. The pathologist refrains from drawing any conclusions from these small number of autopsies.

The lack of technical help made it impossible to do a routine histological examination on all of our material, however, all cases of general paralysis were systematically histologically examined and animal inoculations done. While this work is not complete I may state here that all of our inoculations in rabbits (intratesticular) were completely negative. The inoculated rabbits were kept as long as a year under observation, but none developed any lesions even where the original material contained a large number of spirochettes, as demonstrated by the dark field illuminator.

Lack of space does not permit me to go into further details of our routine and research work, but we hope to publish in the near future a complete report of our activities. Dr. Proescher says: "To keep pace with the rapid development of newer methods we need more equipment, especially for the histological and physico-chemical work; the latter is the most important for the study of colloidal and ferment reactions. The problem of dementia praecox can only be successfully attacked in applying the modern methods of colloidal chemistry."

Metaphysical or psychological investigation quite as important as physical has not been neglected; and based on certain ascertained facts and adopted theories some better methods have been found to help to readjustment. Further equipment and facilities for physiotherapy have been added and found useful.

Greater variety of occupation and as much as possible of a more interesting and stimulating character is being provided but not yet in the variety and to the extent desired, making the welfare of the patient, not the product, the controlling factor. As a therapeutic measure employment must not be drudgery and distasteful, but engaged in cheerfully and with interest. If not so at first, something must be found, or a way must be found to make it so. A normal person likes employment that is interesting and agreeable or that brings remuneration or produces something beautiful or elicits commendation. We are using these psychological facts to incite in the abnormal the normal feeling and attitude toward life. Also, really normal individuals not

only like but must have recreation, diversion and amusement. Too many of those coming to us have not had opportunity for these or have shunned them. They must be supplied. Convinced of their importance we have prepared for greater activity and have created a distinct department to make them of real therapeutic value and not merely to amuse. An ample recreation field has been prepared with grandstands to accommodate our population and a band stand. In addition facilities for various games and recreations are provided throughout the grounds. With us these activities may be continued through the year. For indoor amusements and activities we have our beautiful and commodious auditorium, which with its own beauty and artistic colors appeals and stimulates. Add the harmony of music and the rythm of motion and we have another most important mental therapeutic factor. The hospital always has a good orchestra and band.

My desire to have trained directors of all these activities is now to be realized and then we will test more fully their usefulness.

These are some of our activities and ambitions which we are being permitted to carry forward with the sympathy and cooperation of your department, and the support of other departments most necessary, and I am sure with the approval of the public.

We are still far from possible understanding and possible results, but we are progressing and *must move forward*.

Of the more subtle psychical manifestations and our studies relating thereto it is not our purpose to speak in this report; but only of some of the more practical, for which we need support and financing.

Respectfully submitted.

LEONARD STOCKING,
Medical Superintendent.

REPORT OF MEDICAL SUPERINTENDENT OF MENDOCINO STATE HOSPITAL.

PATIENT POPULATION.

On July 1, 1924, total population of the hospital was 1085. On June 30, 1926, the total population was 1126, showing an increase for the biennium of 41 patients. This represents a period during which relatively no patients were transferred from other hospitals. The total admissions during this period were 481. We have comparatively few admissions, due chiefly to the fact that the bay counties commit patients to hospitals nearer to that district as an accommodation to friends and relatives, and partly to the fact that this hospital is situated farther from San Francisco than the other three hospitals in this district. Most of the cases with a psychosis admitted here from the bay counties are past the age of usefulness in our industries, and the commitments from the neighboring counties have, in general, the same characteristics. Therefore, we feel that we are handicapped in this respect as compared with other hospitals whose admissions are greater and who get patients whose condition is such that they are capable and able to work during the period of commitment. We could increase our capacity in clothing manufacture or other industries provided our admissions were composed of a suitable type for this work. We are, at the present time, employing on an average of 147 males in our industries and details. The buildings under construction require a large number of details to perform the common laboring work. We are employing 58 females in our industries—sewing room, art room, laundry and domestic service. However, we could use more in both services, male and female, if available.

There has been a marked improvement in the general condition of quarters occupied by patients during the past biennium. This includes light, ventilation, plumbing, food and clothing of all patients in the hospital, due in a measure to the remodeling accomplished within the past four years. We find this reflected in the general attitude and behavior of the patients.

The character of employees, particularly those who come in direct contact with the patients, has been markedly improved in the last biennium, and this again reacts favorably on the patient population.

The need is felt at this institution for adequate and suitable quarters for employees. We are attempting to get sufficient money from the next legislature to build a unit, but this will not house all of our employees. While we have remodeled some rooms in the basement of the main building for this purpose, they are not all that is to be desired. It is felt that the satisfactory housing of employees in pleasant sanitary quarters with individual bath facilities would tend to make for better service. We further believe that the personal comfort and health of the employee is of first consideration. Many of our employees are obliged to live off the grounds and, aside from the inconvenience to the employee and the hospital in distant residence, the state is obliged to pay certain amounts for maintenance, all of which could be avoided were sufficient quarters provided on the hospital grounds. The night watch force at this hospital is scattered and a portion of them are forced to sleep in an insanitary frame building, and it is hoped that

sufficient quarters to house the entire night watch force at least will be provided during the coming biennium.

It is to be hoped that nothing will interfere with the program instituted for this institution, viz. proposed buildings to increase the population to 2700, and that it will be carried out.

That the character of the buildings now being constructed under the supervision of the Division of Architecture comprehend all the latest improvements necessary for the proper care and treatment of mental cases, and that these added structures will materially benefit the patients can not be questioned.

We have gradually varied the food to the point where it contains all the necessary food elements in proper proportion and quantity. However, we have, at this time, reached almost the limit of production and if there is to be any increase, we must have additional land or cut general ranch production (stock feed) to some extent.

NEW CONSTRUCTION.

The receiving cottage was accepted from the Division of Architecture in July, 1925. There was still interior work to be done, furniture to be installed, and housekeeping materials provided before it could be regularly occupied by patients. It was occupied by patients in February, 1926, but for a considerable period of time between acceptance and occupancy, the surgery and hydro departments were in use. This building was an essential addition to the hospital, the prime object, of course, being the reception of new psychiatric cases, by which they could be given more individual care and intensive treatment within the one structure. However, the modern convenience, as shown by the surgery, hydro, dental surgery and laboratory, has been very apparent since its opening. In this building the Division of Architecture has evidently solved the problem of sufficient light, ventilation, convenience and general adaptability. The section on the third floor set aside as a hospital unit for employees has proven its worth and advantages on several occasions, and has been much appreciated by those employees who were, of necessity, cared for there.

Landscaping about this building has not been completed at the time of this report, and the general character of the grounds surrounding it detracts materially from the attractiveness of the building, which in itself is of a very pleasing architectural design.

The new female cottage "G" is well under way and may be occupied before the end of this fiscal year (78th). Cottage "H," the twin to "G," has been begun at the time of this report. These two cottages have a capacity of eighty-eight patients and, by construction and site, should contain the better class of patients who can appreciate such surroundings.

The new heating plant unit has been completed during this biennium and is in use. One new modern-type large-capacity boiler was installed and we are asking that this boiler be duplicated in the next budget, as it will be needed before the end of the next biennium, due to increased heating area.

The proposed custodial building has not yet been begun, but it is expected that it will be under way before the end of the present fiscal year. This building is to be constructed for the care of such patients as need special custodial care and who are now patients in this and other hospitals of this state, or who may be committed to any hospital

in the state in the future. These patients are the type that can not be held in buildings constructed for the usual psychotic patient and who are an actual menace to a community, due to their behavior when at large. The money set aside by the last legislature for this building was insufficient to make it a workable unit, therefore additional money will be asked from the next legislature to complete it.

The new gas house has been completed and in operation since January, 1926.

The new paint shop was constructed with such money as was available but it is found inadequate in size for our purpose. Therefore, we are still occupying the old quarters and asking for additional money to enlarge it.

A very satisfactory farmhand cottage was constructed and occupied.

REMODELING.

The basement of the main building of the hospital has been remodeled to accommodate 19 employees.

The old hydro rooms on wards 8 and D have been remodeled and are now occupied by patients.

The ranch foreman's cottage has been repaired and the ranch ward remodeled—plastering, painting, etc.

The manor house was remodeled to accommodate a physician and his family, as no quarters were available for this purpose.

PERSONNEL.

Dr. M. J. Rowe resigned in January, 1925, to accept a position as first assistant physician at Norwalk State Hospital. Dr. R. O. LeBaron was immediately advanced to the position of first assistant physician at this hospital.

Dr. Frank Dwyer was appointed in February, 1925, and resigned in March, 1925.

J. E. Thompson, secretary to the superintendent, went on leave of absence in February, 1925, and Mrs. Gertrude Elliott was acting secretary until November 3, 1925, when she was certified to the position.

Dr. A. E. Kiser was appointed in March, 1925.

Dr. R. M. Putnam was appointed in June, 1925, and was relieved from duty in May, 1926.

Dr. Elizabeth Ward Toek was appointed in July, 1925.

E. E. Frary, ranch foreman, resigned in November, 1925, to accept a similar position at the Pacific Colony, and H. D. Plantz was at once certified to the position.

Dr. S. H. Babington was appointed in July, 1926.

BUSINESS MANAGER'S DEPARTMENT.

The farm production is steadily increasing over former years, the seventy-sixth year production being \$58,842.21, net profit \$19,445.47, while the seventy-seventh gave \$65,952.13, net profit of \$30,575.98.

Certain changes have been made in our water system which permit the use of well water being used for all domestic purposes, while the storage water from the reservoirs is used for irrigation. We will need one new domestic pump and well and one new irrigation pump and well to complete present plans covering our system.

DONALD R. SMITH,
Medical Superintendent.

REPORT OF MEDICAL SUPERINTENDENT OF NAPA STATE HOSPITAL.

MR. E. G. TWOGOOD,

*Acting Director of Institutions,
Sacramento, California.*

DEAR SIR: I have the honor to submit herewith the following Biennial Report of the Napa State Hospital, covering the biennial period ending June 30, 1926.

Movement of population.

A synopsis of some of the more important tables show that during the seventy-sixth fiscal year our admissions were as follows:

Admissions—	
Male	474
Female	224
Total	698
Discharges—	
Male	212
Female	104
Total	316
Parole—	
Male	158
Female	155
Total	313
Deaths—	
Male	147
Female	95
Total	242

And for the seventy-seventh fiscal year:

Admissions—	
Male	463
Female	355
Total	818
Discharges—	
Male	308
Female	83
Total	491
Parole—	
Male	197
Female	187
Total	384
Deaths—	
Male	134
Female	112
Total	247

Weekly conference of medical staff.

During the seventy-sixth fiscal year, 1380 patients were presented before the conference and during the seventy-seventh fiscal year, 1402.

Resignations and appointments.

Resignations—Dr. J. M. Scanland, medical superintendent, December 1, 1925. Dr. J. T. Kenure, assistant physician, November 30, 1925.

Appointments—Dr. F. Leslie Herrick, assistant physician, March 15, 1926. Dr. C. A. Johnson to first assistant physician, January 26, 1926.

Occupational therapy.

To our departments for men has been added the manufacturing of fiber furniture, and a large number of pieces have been placed on the wards and other departments of the institution. Our men are also occupied in the making of shoes, brooms, various kinds of brushes and many other articles of utility.

In the work therapy department for women, wearing apparel and various articles of fancy work are being made.

Mechanical departments.

A great deal of remodeling and reconstruction has been done during the seventy-sixth and seventy-seventh fiscal years by the carpenter, painter and other departments. A statement of permanent improvements has already been submitted.

Farm and orchards.

General farming products are increased each year, particularly orchard, and it is our intention to increase the production of vegetables.

Water supply.

The necessity for an increased supply other than from wells is shown by the comparative statement submitted of cost of electric power due to pumping from wells as our supply from reservoirs is not adequate.

Welfare of patients.

Many patients, men and women, are given parole of the institutional grounds with employment for those physically able. Menus have been studied weekly; wards have been painted and new fiber furniture and pictures have been placed on the different wards of the institution.

Sterilizations.

A greater number of sterilizations on men and women have been performed since December, 1925, to June 30, 1926, than at any other time in the history of the institution.

Funds for parole patients.

I recommend that the law authorizing the superintendent to advance certain funds, to patients on their discharge, be so amended as to include parole patients. At times there are men and women who can be granted parole but not discharge who have no relatives or friends and require funds for their transportation and expenses to their destination.

Special institutional needs.

Replacement of the group of 18 frame cottages now occupied by 386 women patients.

Nurses Home.

For single men and women.

Added capacity for decrepit men and women.

Two wings to the cottage for decrepit women; two wings to the cottage for decrepit men. There is special need for an added capacity for this type of patients.

Cottage.

For first assistant physician.

Garage.

For employees.

Extension.

To laundry and equipment.

Purchase of land.

Juarez tract adjoining hospital.

We wish to acknowledge our indebtedness to the Knights of Columbus, who provide each week, candy, raisins, toothpaste, tobacco and cigarettes for our ex-service patients, and we greatly appreciate the cooperation of the Jewish Committee for Personal Service in State Institutions for they have helped us greatly in the after-care of women patients.

Respectfully submitted.

G. W. OGDEN,
Medical Superintendent.

REPORT OF MEDICAL SUPERINTENDENT OF NORWALK STATE HOSPITAL.

MR. E. G. TWOGOOD,
*Acting Director, Department of Institutions,
Sacramento, California.*

DEAR SIR: I have the honor to submit herewith the following report of the Norwalk State Hospital covering the biennial period ending June 30, 1926:

Movement of population.

The synopsis of the tables sent to you will show that our total admissions for the period were 1196 and we had a net gain in population of 275.

On account of this institution being so close to Los Angeles those in extremely weak physical condition are brought to this institution in ambulances and carried on stretchers; some weeks we have four and

* Living room in Ward 15, Norwalk State Hospital, showing type of furniture made by patients.

are generally in the advanced stages of general paralysis, which imposes an additional burden upon our physicians and nursing force. With patients crowding our wards beyond their capacity and many sleeping nearly 1200 admissions for the two-year period this has been also a large burden upon our staff which is somewhat limited. Our proximity five ambulances visit this institution bringing patients. This necessitates carrying a large number on our infirmary ward, as these patients

to Los Angeles is also the cause of an overwhelming number of visitors calling at the institution and this, with the frequent telephone calls, adds to the burdens of our limited staff.

Our building program, while large for the past two years, does not seem to be adequate to keep up with our increase in population and undoubtedly before the end of this biennial period we will again have upon the floor. We expect to have our new treatment and receiving building finished some time this coming fall which will be of material assistance in caring for the large number of admissions and will enable this institution to change from a custodial institution to an active hospital and we will be able to give in our next biennial report results of laboratory, X-ray, hydrotherapy and other remedial forms of treatment to assist in the cure and improvement of our patients.

Occupational therapy department.

We were very fortunate in being able to build from funds left over from two cottages a large industrial building. This is being used exclusively by men patients and it is with great satisfaction that we can see acute forms of mental trouble constantly improved by this occupational therapy and many of the chronic types are made more comfortable and in better mental condition from the occupations which they enjoy. We had one patient who was quite actively suicidal who was placed in charge of a hand loom in the making of rugs. Immediately upon given this work he became more cheerful, took an active interest in the work and from that time on made no attempt to harm himself.

We are now engaged in making the following items and the total quantity produced in the two years' time is as follows:

Industrial Department (Male).

Mattress, Pillows, Bedding, Etc.

Awning	1	Mattresses, canvas	3
Bath covers	15	Pillows	237
Camisoles	92	Pillows, hair	14
Camisole strings	12	Pillows, hydro	13
Cap, bath	1	Pillows, rubber	2
Hammocks, bath	11	Pillows, special	12
Mattresses, single	381	Stretcher	1
Mattresses, double	4		

Textiles, Rug Weaving, Etc.

Blankets	9	Rugs, rag	24
Cocoa mats	119	Rugs, roving	14
Duck, yd	436	Rugs, runner	5
Overalls, yd.	770	Shirting, yd.	2997
Overall, white, yd.	220	Ticking, yd.	962
Rugs, fluff, each	62	Toweling, sock, yd.	1279
Rugs, Indian, each	15	Toweling, yd.	2049
Rugs, jute, each	17		

Brooms, Brushes, Etc.

Basket bottoms	6	Brushes, radiator	98
Brooms	1834	Brushes, scrub	221
Broom rack	1	Brush, stable	1
Brushes, ceiling	7	Brushes, vegetable	12
Brushes, counter	70	Brushes, whitewash	9
Brushes, crumb	24	Fly swatters	1295
Brushes, floor	159	Paraffine sticks	20

Furniture Manufacture, Woodwork, Etc.

Brasses, door	2	Radio boxes, cabinets	7
Bed, doll	1	Settees, fibre	26
Bird cage	1	Saw horses	10
Chairs, fibre, D. R.	542	Smoking stand	1
Chairs, fibre, small	193	Stands, fibre	2
Chairs, fibre, rockers	66	Stools	2
Chairs, fibre, large	104	Stool, ladder	1
Frames, picture	26	Serving stand, fibre, for set	1
Frames, rug	16	Sign, wood	1
Floor lamps, fibre	10	Tables, fibre, miscellaneous	64
Lamp shade, fibre	1	Table, fibre, for set	1
Reel, skein	1	Table, radio	1
Reel, warp	1	Table, bedroom	1
Chairs, fibre, for set	4	Table, oak	1
Chairs, barber	3	Table, child's	1
Checkerboards	2	Tables, davenport	2
Coat hangers	742	Tables, center	2
Cushions, chair	170	Trays, reed	3
Cushions, settee	6	Tray bottoms	6
Cushions, auto	7	Wardrobe	1
Ferneries, fibre	17	Warp spreader	1
Footstool	1	Weaving stand	1
Loom, Swedish	1	Wooden pulleys	3
Mailbox	1	Picture stretchers	6

Shoemaking, Leather Goods.

Anklets, pair	6	Shoes, pair	475
Belts, pair	2	Slippers, canvas, pair	1465
Hame straps, pair	2	Washers, leather, pair	2
Muffs, pair	2	Wristlets, pair	27
Restraint straps, pair	15		

Industrial Department (Female).

Miscellaneous fancywork	1714	pieces
Rug, braided	1	piece
Rugs, crochet	2	pieces
Rugs, Oriental	8	pieces
Rugs, hooked	71	pieces
Baskets	112	pieces

Too much can not be said in speaking of the beneficial results from occupational therapy. Our chronic wards are inclined to fill up with patients suffering with dementia praecox who, due to this form of mental trouble, are inclined to withdraw within themselves and sit idly the entire day, paying no attention to their surroundings. If we can find for this class of patients a form of occupation which they will enjoy and in which they can take an interest we have made great strides in the care of the insane. The improvement of the patient's mental condition is, of course, the main factor, but in addition to this we have a patient formerly idle who has become a useful man or woman who is able to produce something and assist in the production of necessities for use in the institution.

While we have done some excellent work in the men's department we are greatly handicapped in this work in the women's department. What work is being done by the women patients is done on the ward and by all means we should have a building devoted exclusively to occupational therapy for women. There are many articles at present not being made which we could teach them to make if we have the proper quarters and they are away from the annoyance of other patients who will not take an active interest in this work.

Improvements requested during the coming biennium.

I wish to call your attention to the following permanent improvements requested for the seventy-ninth and eightieth fiscal years:

For the great increase in the number of commitments from the south and to prevent the crowding at the end of every biennial period we

should have at least four additional ward buildings; two of these should be so constructed that we could use them for infirmary wards.

Our increase in population will require more produce from our gardens and the increase in our dairy herd will require more land for raising dairy feed and hay.

We have at the present time no place for recreation purposes for the patients and on account of the large number of visitors to the institution the patients have no privacy when exercising about the grounds. When taking walks they can not keep away from the heavy traffic through the institution grounds and by all means we should have some

Dining room, during noon, Newark State Hospital

additional land to provide for recreation grounds for patients and for increase in our farm and garden facilities.

Since the opening of this institution there has been a constant demand for an assembly hall and chapel. Patients are entitled to a place to go for religious services and during the week for entertainments and dances. We have been trying to get along by using some of the larger wards but this is now impossible and by all means we should be provided with a building large enough to care for the future size of the institution. We have frequent requests from relatives and friends asking why the institution does not provide some form of amusement for the patients in the way of picture shows and dances.

Our present paint and carpenter shops are in an old frame building. Upon inspection of this building by a representative of the Department of Public Works it was found that this building was in such a condition that it would not pay to repair it. I am asking that we have an industrial building erected that will house the paint and carpenter shops on the first floor and the women's industries on the second floor.

We have no cottages for assistant physicians and our assistant physicians are compelled to live in one- or two-room buildings built by the

institution. In endeavoring to fill a recent vacancy on my staff I offered a position to a very competent psychiatrist connected with the Veterans' Bureau and he was unable to accept employment in this institution because of the fact that I could not give him proper living quarters for himself and family since his family consisted of more than two members.

Since this institution has been opened there has been no permanent lighting system for the grounds and by all means a permanent lighting system should be provided.

Due to the growth of the institution it has been found necessary to increase our cold storage capacity. The only way to do this is to take away rooms used by the present store room. The store room is so limited at the present time that we are unable to keep in storage the quarterly supplies needed by the various departments. A suitable storeroom and warehouse is very urgently needed by this institution. This will enable us to conserve and store our quarterly supplies and issue them on requisition when required.

We have two frame buildings at our farm colony which are housing patients employed upon the farm. These two buildings are entirely inadequate for the use for which they were intended and they are far from being fire proof and it would be dangerous to house a large number of patients in them without very close supervision. As the space in these two buildings is extremely limited we are compelled to convey the patients from the institution to the farm and return them at night. We should have a fire proof farm colony building in which the patients who do the work upon the farm may be comfortably and safely housed.

Our quarters for employees are extremely limited. Many employees are sleeping upon disturbed wards and at the present time we have not enough room in the institution to house the employees needed for the new treatment and receiving building. By all means we should have an additional building for employees.

Our water supply in this institution is all obtained from wells and we need an additional well at the main hospital and one at our garden colony with the necessary storage tanks and equipment.

For the past several years Mrs. W. S. James has remembered all the friendless patients in the institution with Christmas presents and I wish to acknowledge my thanks and appreciation for this thoughtful work.

I also wish to express my thanks and appreciation to Mrs. Jean G. McCracken, the Los Angeles Psychopathic Parole Officer, for her friendly cooperation and assistance.

To the officers and employees of the hospital I wish to express my appreciation for their loyal and efficient service during the past biennial period.

Respectfully submitted,

EDWIN WAYTE,
Medical Superintendent.

REPORT OF MEDICAL SUPERINTENDENT OF SONOMA STATE HOME.

MR. E. G. TWOGOOD,

*Acting Director, Department of Institutions,
Sacramento, California.*

DEAR SIR: I have the honor to submit herewith the following biennial report covering the period ending June 30, 1926:

At the close of the biennial period ending June 30, 1926, the Sonoma State Home had an enrollment of 2887; the number of admissions during this period being 867; the deaths, discharges and transfers to other institutions being 64; the applications filed during these two fiscal years being 943; the number of applications on file June 30, 1926, being 594; the net population of this date being 2113.

New cottage for single women working days, Sonoma State Home.

The general health of the patients has been unusually good for the past two years. The credit for this better health is due, we believe, to greater efforts along preventive lines, such as immunization of patients against contagious diseases, closer attention to diet, recreation, physical exercise, employment, etc.

We have continued surgical work along the various lines, the major portion of which has been for sterilization. We have sterilized 119 males and 177 females, totaling 296 for the two-year period, with a grand total of 1041 sterilized in the institution to June 30, 1926.

We are still strongly in favor of sterilization and sincerely hope that nothing will prevent California institutions from continuing in this all important remedial and preventive work. Recent data obtained shows that California institutions have sterilized 74 per cent of all

cases in the United States but we know that other states are becoming interested, likewise many foreign countries.

In August, 1924, we were permitted the use of the grounds and buildings of the Industrial Farm for Women. We established a colony for sixty epileptics on this farm, thus using this property to a very good advantage.

The school department is progressing to a better advantage than ever before. Part of this is due to our new school building where the educational activities are more centralized. The schoolrooms are smaller which permits better instruction and better supervision. Our teaching staff is and has been for some time fully qualified to teach this type, our qualifications being that the teachers must hold certificates from the State Board of Education. In the academic department we have all grades from kindergarten up to and including seventh grade, the school enrollment last year being 335.

The parole work of the institution is progressing satisfactorily and we are more convinced than ever that the parole system is here to stay and we can do so much better and more efficient work by the addition of well trained social workers. Therefore, we hope that the additional social workers requested for the next two years will be granted in order that we may establish a regular social service department within the institution, whose duty will be the placement and supervision of all cases leaving the institution for any reason. We had 874 cases on

New cottage for single men working nights, Sonoma State Home.

parole from the institution on June 30, 1926. From this number you can readily understand the great saving to the state.

The various farm departments have been very productive during the past two years and practically all are on a good paying basis and the production has been at a very nominal cost.

The main improvements made by the Department of Public Works, with approximate costs, during the two years are as follows:

Wagner cottage, a cottage for inmates, capacity 120-----	\$54,592 82
New garages for employees, total of 48-----	4,996 30
Electric system completed, including street lighting-----	22,797 05
Farm buildings, new and repairs to old buildings-----	8,540 06
Sewage plant, completed-----	5,227 28
Bake oven, replacement-----	4,198 59

Improvements made by the institution are as follows: 18,434 square feet cement walks; 3245 lineal feet cement gutter; 801 lineal feet cement curb and gutter; 2189 cubic feet stone wall; stone bridge, garage at farm; gardeners' workshop.

New school and assembly building, Sonoma State Home.

In the completion of the electric system much rewiring was done in buildings where the old wire was a fire hazard. Most of the electric, telephone and street light wiring was placed underground. Modern standards for the street lighting system have been installed, thus making a great improvement in the lighting of the grounds.

Our future needs are: a general, receiving, isolation and tubercular hospital, a cottage for inmates, a cottage for employees, better water system and better fire protection at the dairy and nearby buildings, a commissary and industrial building, additional schoolrooms, a service tunnel from the power house to the main kitchen, remodeling the farm cottage at the Sonoma Farm, a new vegetable room, storeroom and porch at the Sonoma Farm.

We are greatly indebted to the San Francisco *Call* for the gift and installation of a complete radio unit, which cost approximately \$5,000. Radio music, etc., now reaches every ward and cottage in the institution and adds much to the happiness of our patients.

To you, the various State Departments, who have given me help and counsel; to the officers and employees of this institution for their loyal support and cooperation; to the friends who so liberally helped us out with Christmas donations, etc.; and to the San Francisco *Call* I extend my heartiest thanks and appreciation.

Respectfully submitted.

F. O. BUTLER,
Medical Superintendent.

REPORT OF MEDICAL SUPERINTENDENT OF SOUTHERN CALIFORNIA STATE HOSPITAL.

MR. E. G. TWOGOOD,

*Secretary and Acting Director,
Department of Institutions,
Sacramento, California.*

DEAR SIR: During the past two years from July 1, 1924, to June 30, 1926, this hospital received 1824 committed patients, an increase of 389 over the previous two years, with a growth in population from 2299 to 2632, during the two-year period. Discharges were 990, deaths 349 and transfers to other hospitals 24. This increase in population is to my mind a normal one and will change very little from year to year, even with the rapid growth of our sister institution at Norwalk.

Buildings.

The Department of Public Works during the past two years has constructed two ward buildings, known as the east and west wings, which are occupied at present by 200 patients, and have practically completed a new laundry building to replace the one destroyed by fire on June 28, 1925. The hospital has built with its own labor and is occupying five cottages of two rooms each and one of five rooms, which have done much to relieve the lack of room for employees.

Industries.

During the past two years there has been a great improvement in the quality as well as the quantity of work done in the industrial departments. Much furniture and fancy work has been made and sold, the proceeds being used for the purchase of new material and for the benefit of the patients. Our sewing room, mattress department, and loom room have done yeoman service in replacing of materials and clothing lost in the fire, and caring for the greatly increased population.

Medical.

During the past two years, and especially the last one, we have been very busy with a great increase in the amount of work done in surgery, X-ray and allied departments. Much of the benefit that accrues from a stay in a mental hospital comes from the correction of physical disorders which are a source of irritation to the delicate nervous and mental balance of the human organism. We are trying, in so far as possible, to sterilize every male or female who enters the hospital during active sexual life, this not only from the standpoint of relieving the present mental condition but preventing future attacks and limiting as far as possible the birth of the unfit into the world.

Dr. Reily.

During the past two years, Dr. Reily, who was superintendent of this institution from January 1, 1912, had been in poor physical health, and less able to carry on than before. On the first of October, 1925, he took a prolonged leave of absence to regain his strength, but with all that could be done for him by rest and medical care, he grew gradually worse, passing away on May 14, 1926, of an acute attack of bronchial pneumonia, which was more than he could stand in his already weakened

condition. Dr. Reily did much for the institution, establishing the industrial departments, the departments of occupational therapy, giving at all times all and at many times more than was in him, toward the improvement and upbuilding of the hospital, and the care of the patients. He left a place in the hearts and memories of those who have worked with him that can not readily be filled. His zeal for the welfare of his charges is something that all of us may well emulate.

Staff.

The vacancy caused by Dr. Reily's leave of absence was filled by the appointment of Dr. G. M. Webster, the first assistant, as acting superintendent, and the advancement of Dr. S. B. Pond to acting first assistant. Later these two appointments were made permanent. At present Dr. O. C. Reeve is filling a temporary appointment at the institution on the staff, during the vacation season. The remainder of the medical staff and the heads of departments are unchanged. There has been no question of the loyalty of any of these or their interest in the hospital, and I want to take this time to thank them all for the help and encouragement which they have given me, and the care that they are taking of the patients under their charge.

The future.

Taking the increase of patients during the past two years (320), as a basis, it is very necessary that we plan our hospital to care for at least 3150 patients by the first of July, 1929, the end of the next biennium. This means that a very active building program should be undertaken, and that with all the construction which has been planned for on our next budget, we are still going to remain very much crowded. The hospital at present has 550 acres of land. At least 100 acres more are necessary to care for the growth of the institution. With this amount, we can maintain the necessary supply of fruits and vegetables for our table and fodder for our stock, but without it, it will be necessary to purchase largely of both, which will make a marked increase in per capita cost.

In closing, I want to express my very deep appreciation of the help and guidance which has been so freely given to me by the Board of Control and Department of Institutions, and assure you of my loyalty and cooperation.

Sincerely yours,

G. M. WEBSTER,
Medical Superintendent.

Items Purchased from Benefit Fund

Men's and women's sweaters, ties, belts, garters, caps, hose, combs, slippers, aprons, handkerchiefs, pins, beads, bracelets, brooches, watches, etc., face powder, soaps, perfume, letter paper.

Improvements Made During Year Ending June 30, 1924

Cottages for patients.
Industrial building.
Addition to store room—additional warehouse.
New colony houses, poultry plant.
New floors, cottages 17, G and McGonigle.
Fencing at Shay and Taylor Ranch.
Installed sprinkler system at cottages 1, 18 and R.
Put in walks, gutters, etc., at cottages 1, 18 and R.
Repair ovens in bakery.
Recovered pipe lines.
Completed plumbing shop.

Improvements Made During Year Ending June 30, 1925

Three cottages for patients.
Cottages for employees.
Built garage for employees' cars.
Built root crop and cold storage cellar.
Remodeled dairy barn, cow sheds and piggery at dairy.
Built pens, sheds, etc., new piggery on Shay ranch.
Four new silos.
Put in walks, gutters, curbing, etc., cottages 2, 3 and 4.
Sprinkler system installed, cottages 2, 3 and 4.
Reroofed laundry building.
Put in pipe line from cottage G to domestic reservoir.
Fenced Base Line ranch.
During the past two years wards 2, 3, 4, 5, 6, 7 and 1 were razed.
Second floor of Administration Building repaired and reroofed.

Improvements Made During the Year Ending June 30, 1926

Two 2-story ward buildings.
 *Four 2-room cottages for employees.
 *One 6-room cottage for employees.
 *1 motor house, 8x10 at dairy.
 *2 hose cart and ladder houses, 12x15.
 *1 poultry house, 18x36.
 *Used old brick and other materials from wrecked ward buildings.
 New roof, floor and troughs at pig pens.
 New bridge at Taylor ranch, 12x16.
 New roof on power house.
 New roofs on two poultry houses.
 1000 feet irrigating ditch, 8x9.
 Concrete curbing, industrial building to Highland avenue, both sides driveway
 —900 feet (brick, cement coated).
 New 8 inch cement pipe line at dairy, 150 feet.
 New fence and corrals at dairy.
 Painted interior and exterior cottages H, K, L, N, O.
 Painted interior administration building, two floors.
 Painted interior and exterior superintendent's cottage.
 Painted three assistant physicians' and steward's cottage.
 Painted bakery.
 Painted four silos.
 Repaired gas lines.

Surgical Department Report.

Fracture reduced, plaster casts and splints applied in all cases at the X-ray room under fluoroscope and radiograph (X-ray operations included in above compilation.)	37	51

REPORT OF MEDICAL SUPERINTENDENT OF STOCKTON STATE HOSPITAL.

MR. E. G. TWOGOOD,
*Secretary and Acting Director, Department of Institutions,
Sacramento, California.*

DEAR SIR: Herein you will find my report for the seventy-seventh fiscal year, concerning the movements of the patients, moneys received and expended, and the various activities about the hospital and farm.

Since my last report we have completed, and are now occupying, two new cottages for men patients at the farm. There are now 492 patients located in the new cottages. We are asking for an appropriation at the coming session of the legislature for the erection and equipment of two more cottages with a capacity of 125 patients each. When these cottages are completed and occupied we will be able to remove the old building located at the hospital proper, which has been in service since 1854. We have noticed a marked improvement in the condition of many of the patients who have been transferred to the farm. A great number are now being employed in the different departments; in the fields, the dairy, and caring for the hogs and chickens. This is not alone beneficial to the patients' mental and physical condition but helps them to support and maintain the others.

There were 809 patients admitted during the past year; 498 were discharged; 315 died; 265 were paroled, and 138 escaped.

The central kitchen is nearing completion, and when this building is finished we will have one of the best kitchens in the state, not alone in appearance, but in equipment, and arrangement. The farm has had a very successful year in the matter of productions, as you will see by the business manager's report.

X-ray department.

In our X-ray department we had 263 radiographs for bowel, stomach, head, and chest examinations; and fractures. There were 102 dental films taken in the same period.

The surgery.

During the past year we have sterilized 129 patients, 100 being men, and 29 women. Besides the sterilizations we have performed other operations, as follows:

Appendectomy	4
Breast amputation	1
Herniotomy	1
Hysterectomy	1
Perineorrhaphy	1
Ovarian cysts and oophorectomy	3
Thyroidectomy	4
Tonsillectomy	8
Cæsarian section	1
Epididymotomy	1
Circumcisions	2
Bone amputations	3
Deflected septums	1
Removal of body tumors	1
Removal of facial tumors	1
Cystoscopy	1
Testectomy	1
Normal deliveries	2
Opening of abscesses	1
Suturing of wounds	1
Resection of rectal fistula	1

Teeth extraction	1
Tapping of abdomen	2
Correction of dislocated bone in foot	1
Ingrown toenail lifted	4
Plaster casts	4

Some time ago we sent out circular letters to the patients who had been sterilized, and received many replies; most of them were favorable, that is, the patients claimed marked benefits from the operation. This, of course, was very gratifying to us. We have never had any bad reports from the operation.

Dental department.

During the past year the following work has been done in our dental department:

Dental examinations	1647
Dental prophylaxis	344
Extractions	1245
Amalgam fillings	180
Cement fillings	484
Gutta percha fillings	53
Temporary fillings	150
Treating teeth	992
Treating gums	454
Nerves devitalized	9
Artificial dentures made	65
Artificial dentures repaired	40
Post-operative treatments	94

The laboratory.

During the past year the following work has been done in the laboratory:

Urinalysis	2928
Blood counts (leucocytes)	161
Blood counts (red)	13
Blood counts (differential)	160
Blood glucose	55
Blood urea nitrogen	38
Wassermann reactions	1756
Spinal punctures made, and fluid examined for globulin, cell count and Wassermann reactions	181
Arsaphenamine administered	597
Wassermann reactions for spinal fluid	167
Sputums	47
Post-mortems	13
Throat cultures	18
Examinations for malaria	14
Feces	3
Tissue sections	2
Widals	2
Hemaglobin	7
Colloidal gold test of spinal fluid	37
Miscellaneous	26

We are very appreciative of the courtesy extended, and the help given us by your department and the Board of Control.

Yours truly,

FRED P. CLARK,
Medical Superintendent, Stockton State Hospital.

THE SUBSTITUTION OF POSTUM CEREAL FOR COFFEE.*

During the last few days I have been studying the menus of the different state hospitals and find that all the hospitals, as does Napa, serve coffee for breakfast. It is a well-known fact that coffee is a caffeine beverage, and we know what effect caffeine has upon the central nervous system. First, that it strongly stimulates the cerebral cortex so that coffee drinking may result in an excitable nervous condition with an alert mind and complete inability to sleep at a time when an inactive mind and sleep may be the greatest necessities of the patient. Second, it stimulates the perception and so may increase a patient's sufferings and the appreciation of his sick condition. In many mental states a condition of apathy is better. It is true that one person will sleep well and experience no discomfort after several cups of coffee, while another may be kept awake by one cup.

The amount of coffee used in making one cup contains on an average of one and one-half to three grains of caffeine. The dose of the citrate of caffeine, the most favored of the caffeine preparations used as a central nervous stimulant, is two grains, so that though there is always some of the caffeine left behind, a cup of strong coffee would equal almost five grains of the citrate of caffeine and none of us would care to prescribe such a dose every four hours all day for several days, even for one who is in a healthy condition. When a moderate overdose of caffeine is taken, as two or three times the accustomed amount of coffee, the brain and cord become over-active and there are increased reflex irritability and increased motor activity and impairment of the mental power, because ideas follow one another so rapidly as to prevent concentration of thought. The patient can not concentrate his attention and becomes excitable, restless, etc.

Besides the caffeine action in coffee, we have an oil, a caffeol. This is somewhat stimulating to the cerebrum and in the alimentary tract is a local irritant so that in hyperesthetic states of the stomach or intestinal tract, coffee is contra-indicated. Coffee is not in itself nutritive; it is only the addition of milk or cream and sugar that changes it into food. We all know that the coffee habit is common among brain workers and those who must remain awake at night; that much coffee may result in nervousness and insomnia with cardiac and digestive neuroses.

The variations in individuals' susceptibility to coffee are marked, one person being wakeful and restless and mentally stimulated by a single cup of coffee, while another will be unaffected by several cups. The drinking of coffee is becoming so common and harmful effects so evident that physicians are beginning to be prone to proscribe this beverage rather than prescribe it.

There is much to be said on the subject of coffee and nothing in its favor but against its use. I believe that if any of us were in private practice and were to be consulted as to the condition of the vascular or nervous system, that the first question we would ask would be as to the amount of coffee they were drinking and would proscribe coffee.

*Address by Dr. G. W. Ogden, medical superintendent Napa State Hospital, at quarterly conference of the State Board of Control, State Department of Institutions, State Department of Public Works, and State Medical Superintendents, held at Stockton State Hospital, April 23, 1926.

It seems to be that as it is possible for us to find a substitute for coffee that the patients would be benefited thereby and those of our patients in the excited group as manic depressives, dementia præcox, etc., would convalesce sooner towards recovery.

As a substitute for coffee, I would propose Postum Cereal, which is made of whole wheat and bran roasted with a small portion of sugar-cane molasses. Postum contains no trace of caffeine and is appetizing and nutritious.

Postum was substituted for coffee for the acute mental and non-workers at the Napa State Hospital. This substitution was on many wards not noticed by the patients and where noticed, comments were favorable—that Postum was preferable to coffee as it had been made in the past and that the Postum was a much more palatable and pleasing drink.

VITAMINS—THE DIETARY HABITS OF MAN.

By Dr. G. M. WEBSTER, Medical Superintendent Southern California State Hospital.

To Casimir Funk we owe our knowledge of vitamins as specific food factors, though many had tilled the field before him and suspected their existence. He named them vitamins because he found them to be nitrogenous, amine containing and because he found them to be of vital importance. He also gave us the terms, avitaminoses or deficiency diseases, comprehensive names applied collectively to those diseases or syndromes arising from a deficiency of vitamins.

The doctrine of vitamins occupies the most important position in the prevention and cure of disease. The study of vitamins is still in its infancy, and we may expect in the next few years a very rapid increase of our knowledge of this most important factor.

Much is already definitely understood as to the etiological relation of vitamins to certain disease entities and syndromes, but we meet with many body disturbances which seemingly depend upon food factors, and about which we know as yet little or nothing, such as the asthenias associated with anorexia, perhaps best illustrated by that peculiar condition called anorexia nervosa, or going to the other extreme, and more easily dealt with, theoretically at least, the conditions resulting from excess food or excess of certain types of food, as seen in the obese, the potential diabetic, and perhaps I am justified in adding, the hypertension patient.

The diseases which are prevented wholly or in part by a wise selection of our foods, are the following: Goitre, polyneuritis or beri-beri, scurvy, pellagra, rickets, xerophthalmia, sterility, caries of the teeth, diabetes, nearly all forms of indigestion, obesity, thinness and tuberculosis. These diseases have almost innumerable sequelæ, which also are favorably affected by the properly selected diet.

It is a happy circumstance that in general those who have access to ordinary foods select those varieties which are wholesome and suitable to preventing disease, or to aid in its cure. Man, however, having lived so long in an artificial atmosphere, has lost much of this instinct exhibited by the lower animals. He is much less wise now than the beasts of the jungle and the domesticated animals on the farm. Therefore, he cannot always trust to his own selection. The so-called progress of cookery should take much of the blame for destroying man's judgment in the selection of diet. The so-called refining of foods has done more to unfit them for human consumption than any other factor. The prevailing practice is decortication, degermination, demineralization and devitaminization of substances which otherwise would be wholesome and protective. In cereals we take away the germ and the skin and thus lose the most vital factors of the most common and cheapest articles of our diet. In vegetables and fruits, we do the best we can in the same direction by removing the skin. The vital elements we failed to remove in this preparatory process of serving our food, we try to finish by a prolonged application of heat favoring destructive oxidation.

One of the outstanding factors of our present knowledge of food is the fact that denatured foods diminish the generative faculties; not only is pregnancy hindered, but when it does take place, the offspring is often born dead or with so little vitality that it soon dies.

It was a great surprise to McCollum and Davis to find that polished rice supplemented with protein, casein, butter fat and a properly constituted salt mixture, failed to induce growth in young rats (1915). Not only did they fail to grow, but in the course of a few weeks they developed in some cases a state of paralysis which was suggestive of polyneuritis.

It is unnecessary to dwell upon the specific nature of the deficiencies of each of our more important natural foods, but it may be said that in general there is a marked tendency for the diet of the average American of today to be deficient in the element calcium, to be somewhat over-rich in phosphorus in proportion to the amount of calcium it contains, to be deficient in the vitamin A, as well as the antirachitic principle associated with certain fats, the vitamin D. Numerous experimental studies with animals have established the remarkable value as supplementary foods of either milk or leaves. This is one of the well-established facts in animal husbandry.

Fruit juices or the edible parts of fruits differ from the cereal grains, and resemble the tuber and root vegetables in an important respect. There is an excess of basic radicals which renders their ash alkaline, whereas most seeds give an acid ash. Meats are also of acid character. The meat and bread portion of our diet, when oxidized in metabolism, leads to the formation of an excess of acid over base-forming substances. A certain alkali reserve in the blood is essential to maintain its capacity to carry carbon dioxide to the lungs for elimination.

Steenbock's observations on the differences in vitamin B content of different samples of maize support the view that general statements as to the relative values of many of our common foods with respect to the vitamin content is all that are justifiable. The fact that we can readily prepare diets from ordinary wholesome foods which contain several times the minimum amount of vitamins on which apparently normal nutrition can be maintained over considerable periods, tends to render the discussion about the advisability of taking concentrated commercial preparations of vitamins a purely academic one.

Investigators assert that the effect of the vitamin is not necessarily one of appetite stimulation but rather a stimulation of metabolic processes which promote growth.

Cramer (1923) advanced the view that vitamins have a drug-like action on the alimentary canal. He believes these substances maintain the integrity of the apparatus for digestion and absorption. He believes that vitamin B has a specific stimulating influence or effect on the lymphoid tissue; vitamin A on the intestinal mucous membrane as well as on the formation of blood platelets.

Yoshine believes that avitaminosis lays the foundation for the development of damage to the organism when stress is put upon it.

There are, we now know, serious mineral deficiencies, lack of vitamins A, B, and C in all cereal preparations, especially when these represent essentially the endosperm of the seed.

McCollum classes vitamins as fat soluble A, water soluble B and C, and more recently Hess has suggested the possibility of a D which is antirachitic.

It has been demonstrated that the best of all fatty substances is cod-liver oil, that it possesses preventive and curative properties against xerophthalmia, protecting against a deficiency of calcium salts in rickets. It has also been shown that the antirachitic property is not due to the presence of fat soluble A, but to a fourth vitamin D, which seems to be able to regulate bone metabolism.

This type (fat soluble A) is not affected by the usual methods employed in cooking. So too with the B or water soluble vitamin, unless boiling is employed. Greater harm follows if the boiling medium is distinctly alkaline. Milk, and in greater amount, eggs furnish the B type, also condensed milk, cheese, most of the nuts, some of which contain A vitamin also. Spinach is rich in both A and B.

Milk has been found to be notably rich in vitamin A but to contain relatively only moderate or only small amounts of B and C; muscle meat contains all three vitamins, but in very small amounts; whereas such organs as the liver and kidney are very rich in both A and C and only moderately supplied with vitamin B.

We find that the higher fat diet relieves the pain in ulcers better than when the first few days' feedings contained eggs, and that the patient makes a more rapid clinical recovery. It is known now that milk fat is rich in vitamin A, while there are no vitamins in olive oil. The addition of cream to the milk, therefore, not only adds to the palatability of the food formula, but is soothing to the ulcer and increases the general nutrition of the patient.

THE CHEMICAL NATURE OF THE ANTI-NEURITIC SUBSTANCE, VITAMIN B.

Vitamin B contents of foods: Dunham (1921) tested upon rats the relative vitamin B content of several vegetable foods. He found the daily dosage in milligrams of food necessary to prevent loss of weight to be as follows: Baker's yeast 50, raw potatoes boiled with the skins 95, potatoes boiled without skins 125, potatoes baked 100, spinach boiled 85, cabbage raw 70, cabbage cooked 95, carrots raw 70, carrots boiled 105, turnips boiled 105, peas uncooked 115, peas canned, boiled, 125. A comparison of the raw and cooked foods shows that some of the vitamin is extracted by the cooking and is lost in the water.

Lack of vitamin B in diet will lead to nerve degeneration with disturbed sensory and motor function and symptoms of polyneuritis.

McCarrison is of the opinion that vitamin B is necessary for proper adrenal function. There is also evidence suggesting that a deficiency of vitamin affects thyroid and other internal secretions. It therefore seems that since the general use of white flour, white meal, white rice, and white sugar, all devoid of vitamins, a deficiency of vitamins in the average diet may have something to do with the apparent increase of duodenal ulcer during the last few decades.

The anti-scorbutic vitamin, C, seems not only to protect against the disease known as scurvy, but against infections of the entire gastrointestinal tract.

Fruit and raw vegetables are the best sources of vitamin C; and since it has been proven that they do not increase gastric acidity, there is no reason why strained orange juice, or strained tomato juice, or the strained juice of other uncooked fruit and vegetables should not be begun early in the diet of the ulcer patients. Since the heat necessary for canning tomatoes does not destroy vitamin C, if fresh tomatoes

are not available the strained juice from canned tomatoes may be used. Some patients do not like tomato juice, but when told that it is both food and medicine, they take it and soon cultivate the taste for it.

Experiments have demonstrated clearly the existence of a vitamin whose specific property so far as we can tell at present is to regulate the mineral metabolism of the bones, and the demonstration in recent years of the unique quality of fish oils as a source of this vitamin D suggests the importance of fish in the diet which was hitherto unsuspected.

It has been pointed out that animals confined to their basal ration of casein, lard, salts and starch, supplemented with yeast and vitamin A are usually sterile, and that lettuce, meat, whole wheat, wheat germ, rolled oats, dried alfalfa and large quantities of milk fat will relieve this condition. Wheat germ oil is said to be especially effective even in small doses.

The system of diet which can be confidently recommended with assurances that it will go a long way toward improving the physical fitness of the nation is a very simple one, and its daily practice involves no great self-denial.

The first and most important principle is the extension of the use of dairy products. Instead of the present consumption of half a pint of milk a day there should be about a quart per capita. This is a feature of the diet of all pastoral peoples of the past and present which has made them superior in physical perfection to all other peoples. The second principle to be kept in mind is that there are dietary properties in the leafy vegetables which are unique among foods of vegetable origin. These have been the protective foods for many of the Asiatic peoples. Their consumption in liberal quantities as regular constituents of the diet serves not only to provide the body with valuable nutrients it can not secure in adequate amounts from milled cereals, tubers, and muscle meats, but also serves to maintain the intestinal tract in hygienic condition through promoting elimination. Milk likewise serves, through its encouragement of the growth of lactic acid-producing organisms (which cause souring of milk), to bring about the disappearance from the intestine of those types of bacteria causing putrefactive decomposition of the food residues with the production of substances which are a physiological abomination.

It is essential to keep in mind the third principle of great importance in nutrition, viz, that of taking daily a certain amount of raw vegetable food for the specific purpose of providing the body with a sufficient amount of the antiscorbutic substance. It is much more important than has been hitherto believed to have the diet nicely adjusted with respect to all its essential constituents, in order that the development shall be as nearly optimum as possible. It is under such conditions that characteristics of youth are preserved and the span of life prolonged. We are taking too little of the protective foods, milk, the leafy vegetables, and fresh fruits, and a movement toward stimulating the consumption of these classes of foods would go far toward effecting that improvement in our national health standards for which the many agencies concerned with the public health are seeking.

If we could only introduce now a general reform in our food, taking advantage of these factors, I think we could safely look forward to a greatly increased vitality of our people.

STERILIZATION PROCEDURE AND ITS SUCCESS IN CALIFORNIA INSTITUTIONS.*

By F. O. BUTLER, M. D., Medical Superintendent, Sonoma State Home for
Feeble-Minded, Eldridge, California.

The law permitting sterilization in California State Institutions was first passed by the legislature in April, 1909, this original law having been changed in June, 1913, and amended in May, 1917, to read as follows:

STERILIZATION LAW.

Approved May 12, 1917. In effect July 27, 1917.

The people of the State of California do enact as follows:

SECTION 1. Section one of the act entitled "An act to provide for the asexualization of inmates of state hospitals for the insane, the Sonoma State Home, of convicts in the state prisons, and of idiots, and repealing an act entitled 'An act to permit asexualization of inmates of the state hospitals and the California Home for the Care and Training of Feeble-Minded Children, and of convicts in the state prisons,' approved April 26, 1909," approved June 13, 1913, is hereby amended to read as follows:

Section 1. Before any person who has been lawfully committed to any such hospital for the insane, or who has been an inmate of the Sonoma State Home and who is afflicted with mental disease which may have been inherited and is likely to be transmitted to descendants, the various grades of feeble-mindedness, those suffering from perversion or marked departures from normal mentality or from disease of a syphilitic nature, shall be released or discharged therefrom, the state commission in lunacy may in its discretion, after a careful investigation of all the circumstances of the case, cause such person to be asexualized, and such asexualization whether with or without the consent of the patient shall be lawful and shall not render the said commission, its members or any person participating in the operation liable either civilly or criminally.

SEC. 2. Whenever in the opinion of the resident physician of any state prison it will be beneficial and conducive to the benefit of the physical, mental or moral condition of any recidivist lawfully confined in such state prison, to be asexualized, then such physician shall call in consultation the general superintendent of state hospitals and the secretary of the state board of health, and they shall jointly examine into the particulars of the case with the said resident physician, and if in their opinion or in the opinion of any two of them, asexualization will be beneficial to such recidivist, they may perform the same; *provided*, that such operation shall not be performed unless the said recidivist has been committed to a state prison in this or some other state or country at least two times for rape, assault with intent to commit rape, or seduction, or at least three times for any other crime or crimes, and shall have given evidence while an inmate of a state prison in this state that he is a moral or sexual degenerate or pervert; *and provided, further*, that in the case of convicts sentenced to the state prison for life, who exhibit continued evidence of moral and sexual depravity, the right to asexualize them as provided in this section, shall apply whether they have been inmates of a state prison in this or any other country or state more than one time or not; *provided, further*, that nothing in this act shall apply to or refer to any voluntary patient confined or kept in any state hospital of this state.

SEC. 3. Any idiot, if a minor, may be asexualized by or under the direction of the medical superintendent of any state hospital with the written consent of his or her parent or guardian, and if an adult, then with the written consent of his or her lawfully appointed guardian, and upon the written request of the parent or guardian of any such idiot or fool, the superintendent of any state hospital shall perform such operation or cause the same to be performed without charge therefor.

SEC. 4. An act entitled "An act to permit asexualization of inmates of the state hospitals and the California Home for the Care and Training of Feeble-Minded Children, and of convicts in the state prison," approved April 26, 1909, is hereby repealed.

*As presented at National Conference of Juvenile Agencies, Jackson, Mississippi, November, 1925.

The Penal Code of the State of California also provides as follows:

Statutes 1923, Chapter 224.

An act to add a new section to the Penal Code to be numbered six hundred forty-five, relating to prevention of procreation of persons convicted of carnal abuse of females under the age of ten years.

(Approved May 25, 1923.)

SECTION 1. A new section is hereby added to the Penal Code to be numbered six hundred forty-five, and to read as follows:

645. Whenever any person shall be adjudged guilty of carnal abuse of a female person under the age of ten years, the court may, in addition to such other punishment or confinement as may be imposed, direct an operation to be performed upon such person, for the prevention of procreation

There are now six state hospitals for the insane in California, with an enrollment on October 1, 1925, of 13,480. Of this number, 12,326 were actually in the institutions. We have one state institution for the feeble-minded with an enrollment on October 1st of 2561. Of this number, 1997 were actually in the institution.

The first case to be operated on for sterilization was in 1910 at one of our state hospitals for the insane. Since that time to October 15, 1925, there have been in the six hospitals for the insane 2234 males and 1362 females sterilized, making a total of 3,598. In the one state institution for the feeble-minded there have been 384 males and 557 females sterilized, totaling 941 and making a grand total for the seven institutions of 4539, making a yearly average for the fifteen year period of 302. The majority of this number, however, has been done in the last few years.

You may be interested to know that the sterilization law has been declared unconstitutional in about seven of the seventeen states that primarily had a sterilization law. However, such action in the other states did not change our views in the matter, and while perhaps we did operate on fewer cases for a time, we have gradually increased the work and are sterilizing a greater number than ever before. The various state departments, the public welfare organizations of the state and the public in general have become interested in this very important subject and have been supporting it, and with this combined support I am of the firm belief that sterilization in California has come to stay.

We receive many cases for the purpose of sterilization alone, and after being operated on they are permitted to return to their respective communities. When we learn of a defective mother with many offspring, the majority of whom are defective, one way or another, it is our policy to try to get her to an institution for the operation in order that she may return and care for the children and not propagate more of her kind. If this is not accomplished, it generally means a yearly increase in the family of the incompetent. For instance, in our institution we have many mothers with from one to five children also being cared for. Had these mothers been sterilized years ago they could probably have been kept out of the institution, and surely we would not have the children with us.

In our own institution, (the Sonoma State Home for the Feeble-Minded) we had several inmates from one family. This warranted some research work, and the field worker found the following: In this family were two strains. One strain, the feeble-minded woman and the

defective and incompetent man in four generations yielded 25 defectives out of a total of 36 in eight matings. The other strain, the normal sister of the above woman, and the normal brother of the above man, has yielded 39 persons in seven matings with only one dull normal.

Then perhaps you are all familiar with the history of the Kalilak family. Martin Kalilak married a feeble-minded girl. In this strain out of forty-one matings there were 222 definitely defective persons. Martin Kalilak was also married to a normal woman, and from this mating all were normal and included many prominent national figures.

The chief type of cases sterilized are the mental defectives, epileptics, cases of chronic and recurrent insanity, cases in which insanity is most probably due to pregnancy, demented cases who leave the hospital for any reason who are in the child-bearing period, cases with a definite history of hereditary taint and those who already have more children than they can properly care for.

After it has been decided by the institution that the individual should be sterilized, the nearest relative or guardian, if any, is written to for consent for the operation. Very little objection is made when the operation is fully explained—in fact, we frequently have requests for the operation from relatives before the subject is mentioned to them. After consent is obtained, we secure permission from the Director, Department of Institutions (formerly the State Commission in Lunacy) and the Secretary of the State Board of Health, who are the present state authorities whose signatures legalize the operation. It is not necessary to obtain the patient's consent, although it is done in some instances. When permission is granted by the above authorities, we are at liberty to proceed with the operation.

The chief operative technique in most of the institutions is as follows:

Females. A general anesthetic. The usual median line incision is made just above the pubis as in any ordinary surgical procedure. The uterus is brought up to the abdominal opening and a small portion of the fallopian tube on each side next to the uterus is excised, both stumps being ligated and the uterine end of the tubes being buried by suturing the uterine muscle over them; likewise the serous or peritoneal coat is sutured over this portion as well as the free edges of the peritoneum where the portions of the tubes were removed, thereby making a triple barrier against either the ovum getting into the uterine cavity or the male germ getting beyond the inside of the uterine cornu, the abdominal closure being the same as in any ordinary case. We usually keep the patient in bed about ten days and out of the surgical department on the fourteenth day and at a light occupation on the twenty-first day.

One of the state hospitals performs the operation on females as follows:

Incision is made in the median line of the abdomen, one to one and one-half inches in length, just above the pubic bone, the index and middle fingers are inserted into the abdomen and the fundus of the uterus is located by touch. The tips of the fingers are carried outward along the tube. The tube is drawn up into the incision and clamped with a small hemostat at the isthmus, this being the narrow portion of the tube and relatively free from blood vessels, making the operation practically bloodless. An incision about one-half inch in length is

made in the serous covering, exposing the tube. The tube is picked up with thumb forceps and one-half inch is cut out. The uterine end of the tube is ligated with fine silk; the incision in the serous coat is closed with continuous fine catgut suture. The same procedure is done on the opposite tube. Abdominal wound is closed in layers. General anesthetic is preferable. Operation in ordinary conditions can be completed in fifteen minutes. Patient is usually left in bed one week.

We have not heard of a case of pregnancy yet following such operative procedure.

Males. Either a local or general anesthetic. A small portion of the vas deferens, the small cord which carries the glandular secretion on each side, is resected. This is done through a very small incision in the scrotum, the vas being isolated first by working it out to the skin where it is picked up with proper forceps and held while the skin is incised. The tissue is then removed from around the vas, the vas then ligated and approximately an inch distal to the ligature is removed, leaving the distal end of the vas open. The skin closure usually requires not more than one suture. This operation requires but very little time and the patient usually leaves the surgical department within two days and usually returns to light duties at once.

In regard to pathological changes in the tissue of cases following this operation on both sexes, there has been no change noticed in the gross or microscopical examinations, and no deaths following a plain sterilization case. There have been no ill effects of any nature in the cases at any of the institutions, for which we are duly thankful—in fact, it has been just the reverse—better physical and mental condition, especially with the insane.

The benefit derived from sterilization of the insane I feel is best emphasized by mentioning three cases as cited by Dr. Clark, Medical Superintendent of the Stockton State Hospital for the Insane, in his last biennial report to the Director, Department of Institutions.

1. "J. T. was committed to the Stockton State Hospital in 1914, suffering from manic depressive insanity, maniacal type. He was badly disturbed, restless, excited and had to be spoon fed. He eventually recovered from an attack and was taken home by his father on parole. After being out for a couple of months he had a recurrence of the attack and was returned to the hospital. He again recovered from the attack and was finally discharged as recovered. In 1917 he was recommitted suffering the same form of mental disturbance, went through the same circle, was paroled and again returned. At this time he was sterilized and recovered in a very short time; was taken home and finally discharged as recovered. About three years ago I met the young man in Oakland and he informed me that since his operation he had had no further nervous or mental trouble and was in perfect health.

2. "W. L. This young man was suspected of having set fire to some packing houses. I was sent for by the district attorney of the county and while the boy showed no marked mental symptoms he was retarded in his speech and it was three or four seconds before he could seem to grasp what was said to him. Dr. Hatch, then general superintendent of state hospitals, who was with me, suggested to the judge of the superior court that the young man be committed to the Stockton State Hospital, where he could be sterilized, in hopes that the operation might benefit him. This was done and shortly after his admission the operation was performed. In two months from the time of the operation I had an interview with him and his mental condition seemed to be absolutely normal. In another month he was discharged as recovered. He was subsequently married and a year ago accompanied by his wife called at the hospital and I had a long conversation with him. He informed me at that time that since leaving the hospital he had been well and had had no nervous or mental disturbance."

3. "F. J. was committed to the Stockton State Hospital from the Folsom State Prison suffering from manic depressive insanity. This young man had been in the penitentiary for about a year and a half and his mental condition finally became so bad that he was sent to the hospital for treatment. He would respond somewhat to hydro-therapy but never entirely cleared up for any length of time. Soon after W. L. (the previous patient mentioned) had recovered, Mr. J. sent for me asking that we sterilize him as he had seen the beneficial effect of the operation on the other man. This was done and in a short time Mr. J.'s condition improved to such an extent that we considered he had entirely recovered. I wrote to Governor Johnson, who was Governor at that time, recommending that the patient be granted a pardon as I felt that he was insane at the time he committed the act for which he was sent to Folsom. This pardon was granted and shortly afterwards the patient was discharged from the hospital as recovered. Since that time he has been living in the vicinity of Stockton and I have seen him on numerous occasions and he says that he is well and appears normal."

We have a number of cases similar which I could describe at length. Dr. Clark further states:

"In talking to male patients who have been benefited by the operation, many claim that in about two weeks after the operation they begin to feel better, that is, their mentality improves and they feel stronger both mentally and physically. I have had a number of men at the hospital ask me to sterilize them after they have seen the beneficial effects of the operation on other patients. In cases of the women we have no direct beneficial effects excepting the fact that their minds are relieved from the fear of further pregnancy. Many of our patients who have had a psychosis following childbirth, refuse to leave until they have been sterilized, feeling that another pregnancy would mean a recurrence of the psychosis."

With the feeble-minded, theoretically, there should be no change, as there is no functional disturbance to the pelvic organs, but it appears to make them more amenable to discipline and more easily controlled. From a recent individual survey of the girls still remaining in the institution, it was ascertained that in approximately 37 per cent the operation did diminish their sexual desires.

With the male cases in general, and especially those who practice masturbation, we are of the opinion that the operation does benefit them both physically and mentally on account of the reabsorption of the glandular secretion.

Some of our girls have been married since being sterilized and are enjoying happy home lives, the whole matter of operation having been thoroughly explained to the man before marriage took place.

The question is frequently asked: Does sterilization increase prostitution and venereal diseases? From observation at all the institutions, we are decidedly of the opinion that it does not, as the majority of the cases do not appreciate the significance of the operation to that extent. In our own institution we receive new admissions frequently who have venereal disease but rarely do we have one returning from parole with venereal disease, even though they have been out of the institution for months and even years.

Permit me to emphasize the chief reasons why sterilization of both sexes should be the common practice, not only in every state in the Union, but the entire universe:

1. The prevention of the propagation of the mentally and physically unfit.
2. The prevention of returning psychosis in cases where psychosis is directly due to gestation and parturition.
3. Physical and mental improvement in both sexes.

With the general practice of sterilization over the country, and the passing of proper eugenic laws, there is bound to be an appreciable diminution in the procreation of the mentally unfit, and instead of having to build more institutions to care for the insane, feeble-minded, delinquents and criminals, in course of time the burden will gradually be lessened.

In conclusion I want to say that in California we think the law permitting sterilization of the insane and mentally deficient is one of the best things that has been done to prevent the unfit from reproducing their kind and adding to the state's burden of caring for the same. It is only to be regretted that we cannot reach out further—*i. e.*, sterilize those defectives who do not come into state institutions, it being estimated that there are perhaps 16,000 defectives in California alone who are being cared for outside of state institutions. The very life of our nation is its manhood and womanhood, and something must be done that we may beget none but sound offspring, and thus have a nation physically and mentally strong.

APPENDIX

STATISTICS OF STATE HOSPITALS AND SONOMA STATE HOME

STATEMENTS OF REVENUE AND EXPENDITURES, ETC.

Statement Showing Number of Sterilizations Performed in California State Institutions for the Insane and Feeble-minded to June 30, 1926.

<i>Institution</i>	<i>Males</i>	<i>Females</i>	<i>Total</i>
Agnews State Hospital.....	134	14	148
Mendocino State Hospital.....	48	13	61

STATE OF CALIFORNIA

THIRTY-SECOND BIENNIAL REPORT

OF THE

Superintendent of Public
Instruction

FOR THE

SCHOOL YEARS ENDING JUNE 30, 1925, and JUNE 30, 1926

Transmitted to the Governor

SEPTEMBER 15, 1926

CALIFORNIA STATE PRINTING OFFICE
CHARLES A. WHITMORE, State Printer
SACRAMENTO, 1927

LETTER OF TRANSMITTAL.

DEPARTMENT OF EDUCATION,
SACRAMENTO, September 15, 1926.

HONORABLE FRIEND WM. RICHARDSON,
Governor of California.

SIR: I have the honor to submit herewith the report of the Superintendent of Public Instruction for the biennium ending June 30, 1926, as required by section 1532 of the Political Code of California.

Respectfully yours,

Will C. Wood

Superintendent of Public Instruction and
Ex Officio Director of Education.

SECTION I.

SUMMARY OF LEGISLATIVE RECOMMENDATIONS.

Reorganization of State Department.

(1) I recommend legislation to reorganize the present "double-headed" state department of education. The overlapping of functions among the various agencies in the department, the many anomalies in relationships within the department, the lack of subordination in the supervisory staff, and the lack of efficiency and cooperation in certain directions, due to conflicts in conceptions of duties, responsibilities and powers, makes the continuance of the present organization impossible. Laws should be passed defining clearly the powers of the State Board of Education, which should be purely legislative and regulatory, and the powers of the Superintendent of Public Instruction, which should be executive and supervisory. Provision should be made for unified control of the entire supervisory staff, and for the allocation of professional functions to professional officers and employees. This legislation is the most important relative to education to be introduced at the forthcoming session of the legislature.

Election of School Trustees.

(2) In an opinion rendered February 25, 1926, the Attorney General held that no person was privileged to vote at a school election who had not registered subsequent to January first of the even-numbered years as required by section 1094 of the Political Code. This opinion, which was quite correct, seriously interfered with elections in various parts of the state owing to the fact that theretofore no person had questioned the right of anyone on the old great register to vote at a school election held in an even-numbered year. In the opinion, which is a somewhat lengthy and learned exposition of the election laws, the Attorney General very justly indicates that section 1094 does not include among the exemptions from this requirement elections of school officers. In view of this opinion I recommend an amendment to section 1094 of the Political Code so as to include among the exemptions from the requirement for registration subsequent to January first in each even-numbered year, school trustees and members of the city boards of education. Unless such provision is made we shall have the same difficulty arising on each even-numbered year.

State Division of School Planning.

(3) For reasons fully set forth in the discussion of "Economy in School Buildings," I recommend the creation of a division of school planning in the State Department of Education, such division to furnish school districts with information and advice that will assist them in planning economical building programs and to pass on plans for school buildings.

Cooperative Purchase of School Supplies.

(4) I recommend the enactment of legislation providing for cooperative purchasing of school supplies in school districts outside of cities.

Modifying Laws Governing Length of School Day.

(5) The laws of the state are too stringent with respect to the number of hours schools may be in session and the number of hours a pupil may be kept in school. It was all very well, when school work was almost entirely of the grind and drill type, for the legislature to limit the number of hours children under eight may be kept in school to four hours a day. However, school work has changed greatly in recent years, provision now being made for play, music, excursion work and other activities that relieve the grind and drill. As a matter of fact, most children would be far better off if they were kept in school longer. The time now spent on the street in our cities would be shortened if the school day were longer. I recommend the amendment of section 1673 of the Political Code, so as to eliminate the maximum time limits on the school day, and provide that the maximum school day may be fixed by each district subject to approval by the State Department of Education.

A Six-Day Week for Junior Colleges.

(6) The law relative to holidays, as it stands, works a hardship on junior colleges and results in the nonuse of many classrooms in junior college buildings for a considerable part of the time. Under present law, the junior colleges must close on Saturday, Sunday and certain extra holidays. Most of the junior college courses are of the three unit a week type, that is, they require three hours of recitation or lecture work on three separate days, and convenience dictates that these days shall be alternate. Under present law, the work must be given only on Monday, Tuesday, Wednesday, Thursday and Friday. The result is that the buildings are generally used to overflowing on Monday, Wednesday and Friday, while they are comparatively empty on Tuesday and Thursday, which days can not be worked into a three unit a week plan. I recommend that section 10 of the Political Code be amended so as to permit junior colleges to offer work on Saturday as well as on the days above mentioned, but providing that the district so arrange its work that pupils having religious objections to Saturday work may arrange their courses on other days without prejudice to any of their rights. This measure will simplify junior college organization, make it conform more closely to college practice generally, and effect a more economical use of the junior college plant.

Modification of Law Governing Salary Schedules.

(7) Section 1687 of the Political Code governing teachers' salary schedules should be amended so as to provide that school boards in fixing salaries may make uniform allowance in the salary schedule for years of preparation and years of experience in teaching. This will enable school districts to reward teachers who are well trained and encourage teachers to get more training for the work.

The Junior High School

(8) The junior high school has passed beyond the experimental stage. It should now be recognized as an integral part of the secondary school system. I recommend that the laws be amended so as to provide that attendance of all pupils in the junior high school shall be counted as a

part of the attendance of the high school district and apportionments of state and county funds made on account of attendance in junior high schools, on the same basis as apportionments for regular high school attendance are made. I also recommend the repeal of section 1617 of the Political Code in case the above recommendation is adopted. Provision should also be made, by amendment of the high school textbook law, for free textbooks in junior high schools.

Adult Education and Evening Schools.

(9) Section 1764 of the Political Code provides that no tuition charge should be made in any school of the state. This provision was justified at the time of its adoption in 1915, but conditions now justify a modification. Unquestionably tuition should be free in regular day high schools, and in cases of all minors and of foreigners of any age preparing for citizenship. However, our evening school and special day and evening class enrollment has increased enormously in recent years, most of the students being adults. Highly specialized and rather expensive courses are maintained for the benefit of these adults. Other courses are being urged and should be provided, but not entirely at public expense. The adults who want work in these classes are earners and most of them would be willing to pay a reasonable tuition charge. I recommend that the laws be amended so as to authorize high school and junior college boards, in their discretion, to charge tuition fees in cases of adults, in such courses as they may deem it desirable to do so, such charges not to exceed fifteen dollars a term for any course, provided that the charge shall not apply to aliens enrolled in courses offered in preparation for citizenship. I also recommend that school boards be authorized to require a deposit for textbooks loaned to adult students and that authority also be given for charging rental for textbooks loaned by the district to adults.

Classification of School Districts.

(10) I recommend that school districts be classified according to average daily attendance of pupils into three classes and that powers be conferred upon school boards in accordance with such classification. This recommendation is made on the assumption that proposition No. 15 on the ballot, giving constitutional authority for such classification, will be adopted at the election to be held on November 2, 1926.

County Superintendents' Salaries.

(11) Several of the most efficient county school superintendents declined to stand for reelection in 1926 because of the inadequacy of compensation provided. I have in two previous reports recommended reasonable increases in the salaries of these important school officers. The failure to enact laws in accordance with these recommendations has resulted in losses to the schools. I reaffirm the recommendation and urge the granting of adequate salaries to all county superintendents.

Registration of Minors.

(12) The present law providing for registration of minors does not function. I recommend that it be amended so as to provide for regis-

tration by competent census marshals every third year in all districts except districts maintaining a continuous census. The law should also make provision for reports of registration to the state school office by all districts; for penalties on parents and guardians who fail to give the required information; and penalties for failure to make the registration and make report thereon in accordance with law.

Bonding School Fiscal Agents.

(13) I recommend that school boards be authorized, empowered and required to put all school employees handling school moneys under adequate bond for the faithful performance of their respective trusts.

Audit of Student Funds.

(14) I also recommend that each school board be required by law to provide for the proper auditing of all funds raised by student bodies or other student organizations using the name of the school.

Junior College Laws.

(15) I recommend that the junior college law be amended so as to provide (a) that counties or parts of counties may unite to form a junior college district; (b) for the annexation of high school districts to junior college districts with the consent of both districts concerned; and (c) for such supplementing of the "federal mineral lands lease fund," from which state apportionments to junior colleges are now made, as may be necessary to continue state apportionments on the present basis.

School for the Deaf.

(16) I recommend that an act be passed authorizing the State Director of Education, with the approval of the State Board of Control and State Controller, to sell at public auction the property now used for the State School for the Deaf; to relocate the school on a site in Alameda County, and construct the necessary buildings out of the receipts of the sale of the present property. The act should follow as closely as may be the provisions of chapter 326, Statutes of 1925, in reference to the sale and relocation of the San Diego State Teachers College.

My reasons for making this recommendation are: first, the growing congestion about the School for the Deaf, making problems of discipline and neighborly relationships increasingly difficult; second, the need for more agricultural land for pupil gardening and other agricultural purposes; third, the age and condition of the present building, which will soon have to be replaced or extensively remodeled; fourth, the possibility that the present site has attained such value that a new institution, modern in every respect, may be erected out of the proceeds of the sale; and fifth, the desirability of segregating the School for the Deaf from the School for the Blind completely.

Salary of Deputy Superintendent.

(17) I recommend for reasons set forth in this report the amendment of the statutes so as to provide for a salary of \$4,500 a year for the Deputy Superintendent of Public Instruction.

Accreditation of Four-Year Colleges for Teacher Training.

(18) I recommend that the State Department of Education be authorized to accredit four-year liberal arts colleges for elementary school certificates.

State Curriculum Commission.

(19) I recommend for reasons set forth elsewhere in this report the passage of an act creating a State Curriculum Commission, the members to be appointed by the Superintendent of Public Instruction for three-year terms, such members to serve without pay, their expenses to be paid out of the funds appropriated for the Superintendent of Public Instruction. Such Curriculum Commission should have power to draft and adopt minimum standards for elementary school courses of study and should succeed to the powers of the State Board of Education in reference to the approval of courses of study in high schools and junior high schools, and the listing of textbooks for high schools.

Codification of School Law.

(20) I recommend the creation of a commission to codify the school laws of California, such commission to be provided with a special fund adequate for the work.

Provision for Physically Handicapped Children.

(21) I recommend legislation providing for more adequate education for physically handicapped children.

Retirement Salary.

(22) I recommend that a law be enacted providing for an actuarial investigation of the teachers' retirement fund, such investigation to be made jointly by the state and the California Teachers' Association.

THE GROWTH OF THE SCHOOL SYSTEM.

WALTER E. MORGAN.

Some conception of the scope and growth of the California school system may be conveyed by a presentation of statistics concerning the number of institutions maintained, the number of students enrolled, the number of teachers employed, and the amounts of money expended during the past biennial period.

KINDERGARTENS.

Growth of Kindergartens.

The growth of the kindergartens in California has been so rapid, both with regard to the number of kindergartens maintained and the number of pupils enrolled, as to indicate that the kindergarten has come to stay.

Kindergartens were maintained in forty-five of the fifty-eight counties of the state in both of the school years 1924-25 and 1925-26. In 1924-25, 228 elementary school districts, or 6.9 per cent of the total number of active elementary school districts, maintained kindergarten classes. In 1925-26, the number of elementary school districts maintaining kindergartens had increased to 238, or 7.3 per cent of the total number of elementary school districts. The total number of kindergartens maintained in 1924-25 was 815. This was 19.9 per cent

of the total number of elementary schools. In 1925-26, the number of kindergartens had increased to 907, or 21.9 per cent of the total number of elementary schools.

The total state enrollment in kindergarten classes was 58,762 in 1924-25, and 68,142 in 1925-26, showing an increase of 16 per cent.

The total number of teachers employed in kindergarten classes was 1062 in 1924-25 and 1187 in 1925-26. In addition there were nine kindergarten supervisors employed both years, making the totals for the two years 1071 and 1196, respectively.

The distribution of all kindergarten teachers by type of certificate held is given here for each of the two years:

<i>Certificate</i>	<i>1924-25</i>	<i>1925-26</i>
Kindergarten—Primary	232	276
Kindergarten—First Grade.....	512	576
Kindergarten only.....	327	344
Totals	1,071	1,196

Expenditures for Kindergartens.

The total district expenditure for kindergartens was \$3,055,615.76 in 1924-25 and \$3,117,265.52 in 1925-26. Of the total expenditure for 1924-25, \$2,090,613.98 was expended for current operating costs, \$116,755.91 for capital outlays, and \$848,245.87 for transfers to other districts (largely to elementary school districts for rental). Of the total expenditure for 1925-26, \$2,344,941.13 constituted current operating expenses, \$66,891.44 was devoted to capital outlays, and \$705,432.95 was transferred to other districts.

The percentages of the total current kindergarten expenditures which were devoted to each budgetary classification during each of the two years are given below:

<i>Budgetary classification</i>	<i>1924-25 per cent</i>	<i>1925-26 per cent</i>
General control.....	2.05	2.42
Teachers' salaries.....	82.99	85.27
Other expenses of instruction, including library.....	3.99	3.87
Operation of school plant.....	10.97	8.44

The above figures show that over four-fifths of the total amount expended for the operation of kindergartens is being devoted to teachers' salaries. The average salary paid kindergarten teachers was \$1,589.92 in 1924-25, and \$1,612.03 in 1925-26. Full-time kindergarten supervisors received an average salary of \$2,480 in 1924-25, and \$2,522.22 in 1925-26.

The cost per pupil in average daily attendance in the kindergartens of the state was \$70.58 in 1924-25, and \$68.52 in 1925-26. These figures are based on total kindergarten expenditures for current operation, with outlays and transfers excluded. The distribution of the total cost per pupil among the various budgetary classifications is given below for each year:

<i>Budgetary classification</i>	<i>1924-25</i>	<i>1925-26</i>
General control.....	\$1 44	\$1 66
Teachers' salaries.....	58 58	58 43
Other expenses of instruction, including library.....	2 82	2 65
Operation of school plant.....	7 74	5 78
Totals	\$70 58	\$68 52

ELEMENTARY SCHOOLS.

Number and Classification.

The total number of elementary schools maintained in the state during 1924-25 was 4095. In 1925-26 this number was increased to 4125. This increase (30) seems very small when considered in light of the increase in enrollment (16,485). The apparent discrepancy is explained, however, when it is noted that there were 39 less regular active districts in 1925-26 than in 1924-25, the number of districts being 3299 in 1924-25 and 3260 in 1925-26. Consolidation of schools effected for the purpose of participation in the many advantages derived from the larger unit of control has had the effect of eliminating many of the very small schools with their relatively high per pupil costs and low educational efficiency. In 1924-25 there were 1868 one-teacher schools in the state. In 1925-26 this number was reduced, as the result of the consolidation of some of these schools and the suspension or lapsing of others, to 1795.

In addition to the number of regular elementary schools reported here, there were 99 junior high schools maintained in 1924-25, and 113 in 1925-26, with grades 7 and 8.

The total number of elementary schools are distributed in the following table according to the number of teachers employed:

Number of teachers employed	1924-25		1925-26	
	Number of schools	Per cent of total	Number of schools	Per cent of total
1 -----	1,868	45.62	1,795	43.52
2 -----	527	12.87	561	13.60
3 -----	261	6.37	263	6.38
4 -----	192	4.69	211	5.11
5 -----	116	2.83	121	2.93
6 or more -----	1,131	27.62	1,174	28.46
Totals -----	4,095	100.00	4,125	100.00

Enrollment.

The state enrollment of pupils in the elementary grades is given here by grades for both years of the biennial period:

Grade	1924-25	1925-26
1 -----	133,374	133,561
2 -----	85,180	88,169
3 -----	82,242	83,804
4 -----	83,244	82,127
5 -----	80,220	81,482
6 -----	74,646	77,056
7 -----	67,167 ^(a)	73,584 ^(a)
8 -----	68,976 ^(a)	71,751 ^(a)
Totals -----	675,049	691,534

^(a) Segregated as follows: 48,786 in regular elementary schools, 18,381 in junior high schools.

^(b) Segregated as follows: 48,470 in regular elementary schools, 25,114 in junior high schools.

^(c) Segregated as follows: 50,819 in regular elementary schools, 18,157 in junior high schools.

^(d) Segregated as follows: 48,334 in regular elementary schools, 23,417 in junior high schools.

In 1924-25, 27.37 per cent of the total seventh grade state enrollment and 26.32 per cent of the total eighth grade state enrollment was in junior high schools. In 1925-26 the percentage of total seventh and eighth grade state enrollment, which was in junior high schools, was 31.99 and 30.62, respectively.

Number of Teachers Employed.

The total number of teachers employed in the elementary schools of the state was 21,695 in 1924-25, and 22,462 in 1925-26. These numbers include all certificated persons employed in the elementary schools. They were distributed as follows:

	1924-25			1925-26		
	Men	Women	Total	Men	Women	Total
Principals	639	1,577	2,216	653	1,631	2,284
Regular teachers.....	427	17,270	17,697	451	17,819	18,270
Teachers of special subjects....	361	934	1,295	384	1,013	1,397
Supervisors of special subjects	56	203	259	49	197	246
Full-time rural supervisors.....	33	75	108	37	85	122
Part-time rural supervisors.....	8	18	26	12	25	37
District superintendents.....	89	5	94	98	8	106
Totals	1,613	20,082	21,695	1,684	20,778	22,462

Certification and Training of Teachers.

Rural supervisors are not included in those for whom data are reported concerning certification and training. The distribution of all other elementary school teachers by type of certificate held is given in the following table for 1924-25 and 1925-26:

Type of certificate	1924-25	1925-26
Regular secondary.....	761	891
Regular junior high.....	243	571
Regular elementary.....	18,813	19,048
Primary	404	441
Special	1,340	1,352
Totals	21,561	22,303

Of the 21,561 teachers included in the above table for 1924-25, 2,981, or 13.83 per cent, were graduates of colleges or universities, and 15,286, or 70.90 per cent, were graduates of normal schools or teachers colleges. Of the 22,303 reported for 1925-26, 3,368, or 15.10 per cent, were graduates of four-year colleges or universities, and 15,625, or 70.06 per cent, had graduated from a two- or three-year normal school or teachers college course.

The total number of teachers who were graduates of normal schools or colleges constituted 84.73 per cent of all elementary school teachers in 1924-25, as compared with 85.16 per cent in 1925-26.

In considering the training of elementary school teachers, it is interesting to note the large increase in the number who hold certificates of higher than elementary school grade; that is, certificates which entitles the holders to teach in junior high or high school grades. The total number of elementary school teachers holding general secondary or junior high school certificates was 1,004 in 1924-25. In 1925-26 this number had increased to 1,462. In addition to these teachers, a large number of those holding special certificates are also entitled to teach in secondary schools.

Costs of Elementary Education.

District expenditures for elementary schools for the past biennium were as follows:

	1924-25	1925-26
Current operation	\$47,718,377 25	\$52,008,285 97
Capital outlays.....	18,394,651 65	22,563,146 29
Transfers	2,381,525 88	2,584,035 70
Totals	\$68,494,554 78	\$77,155,467 96

Nearly three-fourths of the total district expenditures devoted to current operation were expended for teachers' salaries. The percentage devoted to each budgetary classification during each year of the biennial period is given below:

Budgetary classification	1924-25 per cent	1925-26 per cent
General control.....	2.82	2.99
Teachers' salaries.....	74.91	73.18
Other expenses of instruction, including library.....	5.07	5.64
Operation of school plant.....	8.91	8.96
Maintenance of school plant.....	3.62	4.39
Fixed charges.....	1.79	1.73
Auxiliary agencies.....	2.88	3.11

Teachers' Salaries.

The following table shows the average annual salary paid during each of the years of the biennium to the various elementary school employees:

	Average Annual Salary Paid.			
	1924-25		1925-26	
	Men	Women	Men	Women
Principals	\$2,318 60	\$1,930 20	\$2,400 07	\$2,006 06
Regular teachers	1,709 10	1,640 63	1,763 08	1,696 41
Teachers of special subjects.....	1,896 91	1,723 20	1,941 51	1,850 43
Supervisors of special subjects.....	2,684 08	2,506 62	2,800 83	2,695 64
Full-time rural supervisors	3,139 03	2,738 89	3,583 41	2,687 01
District superintendents	3,339 12	2,709 00	3,383 03	2,560 00

It will be noted from the data in the above table that the lowest salaries paid are those of regular teachers, and that special subject teachers receive considerably larger salaries than do regular teachers.

Costs per Pupil in Average Daily Attendance.

The total expenditure per pupil in average daily attendance in the elementary schools of the state was \$90.30 in 1924-25 and \$97.15 in 1925-26. These figures are based on total district expenditures for current operation. Average daily attendance of pupils in the seventh and eighth grades of junior high schools is not included in the divisor. All junior high school expenditures are made by high school districts, so both attendance and cost data for junior high schools are included in the high school figures.

The distribution by budgetary classification of the cost per pupil for current operation of the elementary schools of the state during the past two years is given here:

<i>Budgetary classification</i>	<i>1924-25</i>	<i>1925-26</i>
General control-----	\$2 55	\$2 90
Teachers' salaries-----	67 65	71 09
Other expenses of instruction, including library-----	4 57	5 48
Operation of school plant-----	8 04	8 71
Maintenance of school plant-----	3 27	4 27
Fixed charges-----	1 62	1 68
Auxiliary agencies-----	2 60	3 02
Totals -----	\$90 30	\$97 15

SECONDARY SCHOOLS.

Number and Classification of Secondary Schools.

The total number of secondary schools (exclusive of state special schools) maintained by public funds in California during the school year 1924-25 was 446. This number was increased to 469 during the school year 1925-26. The schools were distributed as follows:

	<i>1924-25</i>	<i>1925-26</i>
Junior high schools with grade 9-----	95	106
Junior high schools, grades 9 and 10-----	4	7
Senior high schools, grades 10, 11 and 12-----	38	51
Regular high schools, one year only-----	6	5
Regular high schools, two years only-----	5	4
Regular high schools, three years only-----	2	4
Regular high schools, four years-----	288	284
Junior colleges (districts)-----	8	8
Totals -----	446	469

It will be noted that the number of regular high schools was 301 in 1924-25, and only 297 in 1925-26; and that the entire increase was in the number of junior high schools and senior high schools, the former increasing from 99 to 113 and the latter from 38 to 51. The number of junior colleges remained the same. Two new junior college districts had been organized, but neither was in operation during the past biennium. The two new institutions are the San Bernardino Valley Union Junior College and the Marin County Junior College.

In addition to the eight junior college districts, junior college courses were offered by 17 high school districts in 1924-25, and by 19 high school districts in 1925-26. Junior college courses at the several teachers colleges were conducted by contract for high school districts in each instance.

Enrollment.

The total state enrollment in secondary schools was 351,272 in 1924-25, and 387,489 in 1925-26. The distribution of this state enrollment is given here:

	<i>1924-25</i>	<i>1925-26</i>
In junior high schools-----	27,543	33,191
In regular high school classes-----	142,506	149,937
In special classes of regular high schools-----	3,355	2,978
In special day and evening classes-----	48,905	49,157
In compulsory part-time classes-----	18,240	19,241
In evening schools-----	105,325	127,213
In junior college courses of high schools-----	1,944	2,293
In junior colleges (districts)-----	3,327	3,479
Totals -----	351,145	387,489

The total state enrollment in regular high school classes constituted, in both years, less than one-half of the total secondary school enrollment. The combined enrollment in evening schools and in special day and evening classes of day high schools was greater, in each year, than the total enrollment in regular high school classes. That the high schools are rendering through these special classes a service which is extremely desirable, is indicated by the fact that of the total increase (36,344) in secondary school enrollment 21,888, or over 60 per cent, was in evening school alone.

Approximately 40 per cent of the total ninth grade enrollment was in junior high schools in 1924-25. In 1925-26, over 44 per cent of all ninth grade pupils were enrolled in junior high schools. The table below gives the enrollment in each grade of high school and junior college.

	1924-25	1925-26
Grade 9, in junior high school.....	27,495	32,981
Grade 9, in high school.....	41,808	40,308
Grade 10, in junior high school.....	48	210
Grade 10, in high school.....	43,934	48,372
Grade 11, in high school.....	32,617	34,655
Grade 12, in high school.....	24,147	26,602
First year junior college, in high school.....	1,434	1,831
First year junior college, in junior college.....	1,506	1,883
Second year junior college, in high school.....	510	462
Second year junior college, in junior college.....	541	790

Number of Teachers Employed.

During the school year 1924-25, a total of 10,972 teachers were employed in the secondary schools of the state. This number was increased to 12,110 during 1925-26. The following table gives the distribution of all full-time and part-time teachers employed during each year in junior high schools, high schools, junior college departments of high schools and in junior colleges maintained by junior college districts.

	1924-25		
	Full-time	Part-time	Total
In regular high schools*.....	9,531	1,183	10,714
In junior college departments of high schools.....	15	13	28
In junior colleges (districts).....	67	163	230
Totals.....	9,613	1,359	10,972
	1925-26		
In regular high schools*.....	10,821	1,031	11,852
In junior college departments of high schools.....	5	13	18
In junior colleges (districts).....	93	147	240
Totals.....	10,919	1,191	12,110

*Including junior high schools.

Certification of Teachers.

No adequate report is made to the state office concerning the certification of teachers in junior colleges maintained by junior college districts. The distribution by type of certificate held of all secondary school teachers, excepting those employed in such junior colleges, is given here:

<i>Type of certificate held</i>	<i>Number holding each type of certificate</i>	
	<i>1924-25</i>	<i>1925-26</i>
Regular secondary -----	6,189	6,950
Special secondary -----	4,248	4,568
Junior high school -----	272	297
Regular elementary -----	33	55
Totals -----	10,742	11,870

It is of special significance to note the large number of secondary school teachers who are teaching on special types of certificates. It is not to be assumed that these teachers have had less training, or even an inferior type of training, than have those holding general secondary credentials. On the contrary, many of these have had as much training in educational theory and methods as the average, and have more than the average amount of training in the special fields in which they are engaged.

It may be noted here that all teachers reported as teaching on elementary certificates are employed in junior high schools.

COSTS OF SECONDARY EDUCATION.

No data are available concerning costs in the junior high schools of the state. Financial data reported concerning the secondary schools are segregated for high schools and junior colleges only.

The total district expenditures for high schools for 1924-25 amounted to \$54,183,540.01. Of this amount, \$35,247,143.09 was expended for the actual operation of schools during the year; \$18,317,390.11 (34.2%) was devoted to the purchase of sites, buildings and equipment (capital outlays); and \$619,006.81 constituted transfers to other districts or counties.

In 1925-26, the total district expenditures for high schools amounted to \$59,123,689.25. Of this amount, \$18,533,231.09 (31.8%) was expended for capital outlays; \$842,744.10 constituted transfers; and the balance, \$39,747,714.06, went for the current expenses incident to the operation of high schools.

The junior college expenditures for the two years were as follows:

	<i>Operating expenses</i>	<i>Outlays</i>	<i>Total</i>
1924-25 -----	\$515,846 30	\$162,234 24	\$678,080 54
1925-26 -----	664,457 83	565,746 88	1,230,204 71

The percentage of the total district expenditures devoted to each budgetary classification is given below for both years of the biennial period, both for high schools and for junior colleges. The percentages are based on total expenditures, less capital outlays and transfers.

<i>Budgetary classification</i>	<i>1924-25</i>		<i>1925-26</i>	
	<i>High school per cent</i>	<i>Junior college per cent</i>	<i>High school per cent</i>	<i>Junior college per cent</i>
General control -----	3.6	4.4	3.7	3.9
Teachers' salaries -----	69.4	68.3	69.0	67.3
Other expenses of instruction, including library -----	7.1	5.6	7.9	7.5
Operation of school plant -----	9.0	5.5	8.8	5.2
Maintenance of school plant -----	3.8	1.8	3.8	1.1
Fixed charges -----	1.8	10.9	1.7	10.4
Auxiliary agencies and sundry activities -----	4.8	1.9	4.6	1.7
Laboratory supplies -----	.5	1.6	.5	2.9

Teachers' Salaries.

It will be noted from the foregoing figures that slightly more than two-thirds of all expenditures for operation of secondary schools were devoted to teachers' salaries. The average annual salaries paid principals and regular full-time teachers in high schools, and junior colleges are listed here.

Average Annual Salary Paid.				
		1924-25		1925-26
Principals		Men	Women	Men Women

Costs Per Pupil in Average Daily Attendance.

The costs per pupil in average daily attendance, based on expenditures for current operation alone, are given here, together with a segregation of costs per pupil for each of the budgetary classifications of expenditures. In computing per pupil costs in high schools, the average daily attendance of all junior high schools is included in the divisor, since all junior high school expenditures are included in the data reported for high schools.

ECONOMY IN SCHOOL BUILDINGS.

The Public Pays for Inexpertness of Some Architects.

In my last biennial report, I pointed out the tendency to waste public money in poorly planned school buildings, and in overelaboration and overadornment of schoolhouses. While there has been a wholesome reaction to the criticism made in 1924, there is need for continued emphasis on the economical planning of school structures. The waste I have pointed out is due in no small part to the employment in many school districts of architects who know little about schoolhouse planning. It is not true, as many trustees assume, that any architect can plan a school building economically. The planning of school buildings is a highly specialized and technical business, involving not only a knowledge of architectural design, building stresses and strains, and the preparation of specifications but also a good knowledge of school administration, school hygiene, and the sciences underlying the heating and ventilating of large buildings.

The inexperienced school architect sometimes wastes as much as a quarter of the cubic contents of a building in such extravagances as hallways and stairways of unnecessary dimensions, and in unnecessarily large rooms. One must understand how a school is organized and conducted to plan a school building successfully. We have reached a point in California where we should no longer let architects learn at public expense how to plan schoolhouses by experimenting and making costly

errors. We should insist that such buildings shall be planned only by competent men who have made a special study of the problem.

Extravagance in Planning Bond Issues.

Another great saving can be made by making accessible to school boards information about estimating the amount of money that should be put in a school building construction program, and about the issuance of bonds. Too frequently a school board facing the need for new buildings has no advice on its building program before bonds are voted. The board members guess at the amount of money required, and because of inexperience in schoolhouse planning and construction, they usually make very poor guesses. If they guess too large an amount, and the bonds are voted, the extra amount is usually wasted in unnecessary adornment, or in building experiments of questionable value. If they guess too small an amount, the people are called upon to vote additional indebtedness, which brings unnecessary criticism not only on the board, but also on the school.

I wish also to point out that the average school board is not in a position to know what is the prevailing rate of interest at which bonds may be floated, consequently the interest rates paid on no small number of bond issues is too large. In fact, some school boards deliberately fix a high interest rate in order to get a large premium on the bond issue, which is in the long run a very expensive way to get more money for building than the bond issue calls for.

A State Division of School Planning Recommended.

In view of the need for professional assistance to school boards in the planning of school buildings, I recommend that a division of school planning be organized in the state department of education whose function shall be to advise school boards in their planning of capital outlays and in preparing for the issue of bonds. Such division should be in charge of a competent expert in school planning and should be financed in part by the state and in part by the districts concerned. To this division, the plans for all school buildings should be submitted for approval, according to such regulations as the state department of education may prescribe. Such a division in the state office, properly managed, could effect a saving amounting to many times the cost of such a division.

COOPERATIVE PURCHASE OF SUPPLIES FOR RURAL SCHOOLS.

Each session of the legislature since 1917 has seen an effort made to protect the rural school districts from the plundering of their maintenance funds by certain school supply houses through "here today and gone tomorrow" agents. The methods employed are four fold: (1) overcharging; (2) overloading; (3) substitution of "as good as" products; and (4) making short deliveries. No fixed price is used by these agents in selling the same product to schools in the same county. The result is that the rural schools of the state are annually mulcted

in the sum of many thousands of dollars. The county superintendent of San Luis Obispo County who has introduced cooperative purchasing of school supplies in his county estimates that at least \$5,000 per annum is saved by lowered prices and conservative purchasing in San Luis Obispo County alone.

The following comparisons of prices are indicative of what can be done when supplies are bought through bids submitted for supplies in quantity delivered to a central depository. These figures are taken from a report furnished by the superintendent of schools of San Luis Obispo County.

	<i>Prices paid by individual districts in 1921-22 under old plan</i>	<i>Cooperative bids for 1922-23</i>	<i>Cooperative bids for 1923-24</i>
Pens. per gross.....	\$1 50	\$0 75	\$0 50
Ink. per quart.....	1 50	1 00	60
Paste. per pint.....	1 00	65	45
Manila drawing. per ream.....	3 25	90	63
Legal cap. per ream.....	5 40	2 16	1 40
Blotters. per gross.....	1 00	35	27
Cut news. per lb.....	19	05	04½

In addition to the prices quoted in 1921-22 there was added delivery charges. The prices quoted in 1922-23 and 1923-24 are for delivery in San Luis Obispo or in the individual school districts. In the last named year, goods were required to be delivered in San Luis Obispo so as to be sure that quantity and quality were according to bid requirements.

The following data are taken from a report made by H. W. Bridgman to members of the National Association of Purchasing Agents and members of the California State, County and Municipal Purchasing Agents Association. All of the data have reference to school districts in Alameda County.

Public Service Towels.

<i>District</i>	<i>Firm</i>	<i>Price paid</i>
Piedmont	E	\$10 00 per case
Palomares	C	14 00 per case

Esterbrook Pens.

<i>District</i>	<i>Firm</i>	<i>Price paid</i>
Oakland	B	\$0 52 per gross
San Lorenzo	B	1 00 per gross
Mission	B	1 20 per gross
Newark	B	1 70 per gross

Chalk.

Six prices were charged for Alpha chalk, ranging from 42 cents to 74½ cents. One firm charged from 40 cents to 80 cents for "no grit" chalk. The district buying the chalk at 80 cents bought more boxes than that buying for 40 cents. (Oakland District, 12 at \$0.40; Mission District, 20 at \$0.80.) Five separate prices, ranging from 29 cents to 61 cents, were charged for Waltham chalk.

Pencils.

The highest price paid per gross was \$10.20, by Independent District. The lowest was \$1.24, by Alameda for 125 gross Dixon No. 268 pencils.

Centerville paid \$3.84 per gross for the same pencil for which Oakland paid \$2.20 per gross.

One firm charged seven separate prices for Commerce No. 395 pencils, and two different prices to the same district. (Independent 2 Commerce No. 395 at \$4.50; 2 Commerce No. 395 at \$5.)

Penholders.

The medium price per dozen was almost two and one-half times the average price, which means that 50 per cent of the districts paid two and one-half times or more than the average price paid by all the districts. Alameda paid only 20½ cents a dozen for Eagle No. 1040 holders and Mocho \$1.60 a dozen for No. 1015 holders. Twenty-five per cent of the schools paid 77½ cents or more a dozen while another quarter of the schools paid only 35.7 cents or less.

One company repeatedly sold cork tip holders for \$1 per dozen.

Eberhard Faber No. 78 holder sold at \$0.33 1-3, \$0.55 and \$0.60 a dozen, respectively.

Eberhard Faber No. 1331 holders cost one district \$0.20½ and another \$0.45 a dozen.

Eagle No. 1040 holders sold at four different prices, ranging from \$0.20 to \$0.40 a dozen.

Pens.

There are so many numbers in pens that comparison of prices on identical items is difficult, yet one firm sold Triumph No. 2 at three different prices—from \$1 to \$1.25 a gross.

Gillott No. 404 pens were sold at four different prices, from \$1.12 to \$1.50 a gross.

Esterbrook No. 444 pens cost one district \$0.85 a gross, and a second district \$1.50 a gross. (Newark, No. 2 Esterbrook 444 at \$0.85; Valle Vista, No. 1 Esterbrook 444 at \$1.50.)

Cut News Scratch Paper.

The most common variety of scratch paper furnished is cut news. It does not vary in quality except in cutting. The lowest price paid was \$0.042 a pound by Alameda, and the highest \$0.165 a pound by Albany.

One firm charged six separate prices ranging from \$0.06 to \$0.10 a pound.

Paper Towels.

There were 11 separate prices charged for P. S. towels ranging from \$7 to \$14.50 a case.

Westowels brought seven separate prices, the lowest of which was \$9.75 and the highest \$13 a case.

Roll towels were sold by Firm A at six prices, ranging from \$10.75 to \$25 a case. (Firm L is recorded as selling San Lorenzo three bills of P. S. towels as follows: Two cases at \$7; two cases at \$14; three cases at \$13.)

Overloading and Substitution.

Data on these phases of selling rural schools supplies are not had in individual cases, since the matter is not usually discovered by the county superintendent of schools in time to check over the charges and orders.

In one case, however, it was found that a school of twenty-five pupils was sold twelve quart bottles of red ink, sufficient to last the district twenty years. In another instance eighteen brooms were supplied to a small rural school.

The only solution of the difficulty which faces practically every rural school in the purchase of its supplies is cooperative purchasing. Not only can goods be bought at reasonable prices under this plan, but the certainty of quantity and quality commensurate with the needs of these schools can be assured. It is high time that the rural school children shall be afforded protection from those supply houses whose one desire is to sell supplies, regardless of the needs of the schools, at any price that can be obtained.

The only way to correct this evil is to put the purchase of supplies on a wholesale basis. Only cooperative purchasing can accomplish this. I recommend legislation which will bring about cooperative purchasing of school supplies.

RETIREMENT SALARY FUND.

Present Plan Is Tentative.

The California plan for teacher retirement has been in operation since 1913. When the plan was inaugurated, the sponsors of the plan recognized that it was more or less experimental, inasmuch as data was not at hand to make a fair calculation of future payments from the fund. They were morally certain that the plan would have to be revised ultimately. Writing in February, 1918, in the *Sierra Educational News*, I stated the situation as follows:

It is unfortunate that we have not data at hand for an investigation of the problem by an actuary. Any legislation adopted now will of course be subject to revision in the light of experience. Only after some years of actual operation of the law shall we have data that will enable us to define a permanent solution.

Again, in October, 1920, writing in the same journal, I reiterated the view that the present plan is tentative. Following was my statement at that time:

We are aware that the California plan for retiring teachers is not based upon scientific principles. We are aware that any business man would condemn it because there is no scientific relation of income to expenditure. We don't know how much will be required to meet the obligations in 1922 or 1925 or 1950. We ought to know this, and then set aside enough money to meet those obligations when they become due. American experience with retirement salaries for teachers has been too brief; the data collected by systems operating over a period of years has been too incomplete for actuaries to develop dependable scientific tables which we may use as a guide. Annuity tables used by life insurance companies are not fully adapted to our needs. The experience of European countries in handling teachers retirement problems can not be applied successfully in America because conditions are so different. If we accept fully the recommendations of the actuaries, who are naturally conservative, the teachers will have to contribute so much toward the retirement salary that they will find the payments a burden, or, on the other hand, the retirement salary will be so little that it will not be worth while. We in California are gathering data and employing actuarial assistance to analyze it. We hope to develop our own tables, accepting them only tentatively at first, and correcting them in the light of our experience.

The Leslie Report of 1921.

In 1921, an actuary was employed who, after analysis of such data as we had on hand, declared the plan unsound, and recommended reorganization. Following are important excerpts from his findings and recommendations:

The situation disclosed by these figures (those available in 1921) is in line with the results of actuarial investigations of other teachers' pension funds. In every instance staggering liabilities were revealed for which there were no offsetting assets. Reorganizations have been carried out or are being attempted in many of these cases. The states of Connecticut, Massachusetts, New Jersey, Ohio, Pennsylvania and Vermont, and the City of New York, have sound pension plans in actual operation. In Michigan, a bill has been introduced in the legislature to create a proper system, and the city of Milwaukee has adopted a solvent retirement scheme which becomes operative in January, 1922. It is interesting to observe the similarity between these various systems in at least two important respects, viz, the requirement of fixed contributions from both the state and the teacher, and provision for the return of the teacher's contributions with interest upon separation from the service.

without pension. The guiding principle seems to have been to place the full pension liability arising out of past service upon the state and to cause the state to contribute equally with the teachers to meet the cost of pensions attributable to future service.

The revision of the Teachers' Retirement System of California should be along the lines developed in other states which have adopted systems both sound and equitable. Unless the state assumes an equal share of the cost of pensions for future service and the entire cost for past service, the burden of reorganization will be too great for the teachers to carry. Unless provision is made for the return of contributions with interest upon separation from the service under circumstances not qualifying the teacher to a pension, the opposition to necessarily high rates required for a sound system and for adequate benefits will either prevent the reorganization or force down the scale of benefits.

There are two important things to be done in order to carry through a reorganization of the present system upon a sound basis. In the first place, it is essential that rates of separation and retirement be developed from the actual experience of teachers in California. Unless this is done any rates of contribution proposed will be attacked by the teachers on the ground that they are not based on California experience and that such experience is distinctly more favorable than that used as the basis. In the second place, it is desirable that a representative committee of the teachers be delegated to study the problem in order not only to decide intelligently upon the best system to be adopted but also to perform the necessary educational work among the other teachers to win their wholehearted support. When the teachers composing such a committee are finally brought to a realization of the tremendous financial problem involved and the absolute necessity for a permanent solution of that problem, they will then appreciate the necessity for such educational work as will enable them to present a solid and unyielding front at the next session of the legislature.

Two years later when the actuary's report was quoted to justify a charge that the fund was bankrupt, I commented as follows in the November, 1923, issue of the *Sierra Educational News*:

My impression is that the Retirement Salary Plan will ultimately have to be revised. However, we can not revise it intelligently now, because we have not had enough experience with the present plan. The experience with other plans does not apply to our conditions, as the California Retirement Plan differs a great deal from any other retirement plan now in effect. My belief is that the fund will run on for a considerable number of years before the outgo begins to exceed the income. By that time, we will have had enough experience to justify a revision. Meanwhile, we should not be stampeded.

The Gundelfinger Analysis.

During the latter part of 1924, Mr. S. Gundelfinger, at the request of the Governor, made a supplementary analysis of the fund. Following is the gist of his report:

In its decennial report covering the period August 10, 1913 to June 30, 1923, the Public School Teachers' Retirement Salary Fund Board said:

It is the impression of those in charge of the fund that the financial basis of the fund eventually will have to be revised, but that we have not yet had enough experience to show just what should be done, and that it is not wise to hurry about making a change, since the fund will evidently run on for a number of years before the expenditures will exceed the income.

The impression that the financial basis of the fund requires revision is not only completely confirmed as correct, but it is also apparent that the situation demands a speedy and fundamental reorganization. The State of California is now diverting funds contributed by active teachers to the benefit of retired teachers, with no prospect of being able to continue the process for

an indefinite period. The remarkable growth in the number of active teachers, which is characteristic of the past, can not go on forever. On the other hand, the number of retirements is bound to increase with the passage of time. The relative volume of cash expenditures to cash receipts, so far from being an index of safety, has no bearing on the question of solvency other than being dangerously misleading.

To establish a basis for a scientifically unassailable and practically accurate determination of rates of contribution, it is imperative that the rates of separation and retirement actually obtaining among teachers in California be currently observed and currently recorded. To this end, information similar to that gathered in 1919, and pertaining to new entrants, is essential. In addition, current reports of all changes in the status of active teachers are indispensable. Without the former data, successive valuations become less and less reliable; without the latter, no intelligent adjustment of rates to changing conditions is possible.

Gundelfinger Recommendations.

It is therefore urgently recommended that the Public School Teachers' Retirement Salary Fund Board secure legal authority to exact the information and reports above referred to from individual teachers and from the proper school officials, as the case may be, and that complete experience observation records be currently maintained, commencing at the earliest feasible date, under competent actuarial direction.

The inadequacy of present rates of contributions, and the consequent inevitable state of insolvency into which the fund is rapidly drifting, forbids the application of these rates to new entrants. It is therefore recommended that public school teachers entering the service after a convenient fixed date in the near future be relieved from the burdens and excluded from the benefits of the present retirement law, without prejudice to vested, accrued and inchoate rights, and that enactment be secured of a new retirement law, applicable to all public school teachers entering the service after such date, and embodying provision insuring a continually sound financial condition.

For the latter purpose, any one of the four plans suggested by Mr. William Leslie in connection with the valuation made by him in 1919 possesses the virtue of adequacy. Periodical adjustment of rates, based upon experience indications of the observations records hereinbefore recommended, should be expressly provided for.

For reasons which will presently appear, the choice of a plan is suggested which provides for the return, upon separation from the service for any cause except retirement with an annuity, of the teachers' individual contributions, together with interest at four per cent per annum, compounded annually.

It is apparent that the elimination of new entrants from the operation of the present retirement law has no effect upon the condition of the present system. To reduce the deficiency in the present system to manageable proportions, it is necessary that the system be relieved of the commitments incurred by it in respect of a considerable contingent of the 32,000 active teachers now embraced by it. This, it is believed, can be accomplished in the case of a large number of teachers not too far advanced in age or service, by according them the optional right to enter the new system with its refund and interest features, in consideration of a waiver of all rights vested in and derived by the teachers under the present law. Adequate rates of contribution for such teachers can be developed, and it is believed that such a plan would be welcomed and accepted by many as a valuable inducement. The transfer of a large number of teachers from the old to the new system involves, of course, a curtailment of the current revenue of the former, equal to \$12 per annum for each teacher transferred. The revenue from inheritance tax, however, would remain unimpaired, and the deficiency thus greatly reduced. This reduced deficiency, however, offers a far less difficult problem than the present excess of liabilities over assets. It is believed that the remaining deficit will be amenable to gradual amortization by a series of annual appropriations of relatively modest proportions.

Attitude of School People Toward Reorganization.

In March, 1925, the following statement relative to the fund was given out by ten superintendents of the state, including the Superintendent of Public Instruction:

There is no occasion for alarm concerning the Public School Teachers' Retirement fund. The fund now shows an invested surplus of over \$2,000,000 as compared with \$217,000 in 1916, and has increased during the last eight years at an average rate of about \$200,000 annually. This rate of increase shows no signs of diminution during recent years.

The report compiled in December, 1924, at the request of the Governor, by a former accountant of the Board of Control now in the employ of the Insurance Commission, and recently made public does not show a careful analysis of the California Retirement Plan which differs from that of any other state. It is not supported by any tables or analysis of data, being based upon broad assumptions rather than facts. The accountant has merely made a superficial estimate of the liabilities of the fund as he states in his own report. He could make no accurate estimate inasmuch as data on which an actuarial investigation can be made, are not available. Former estimates of the failure of this fund have not been borne out by experience. An accountant of the Board of Control made a report in 1916, in which he estimated that the surplus in the fund would be exhausted in 1920, and that the fund would show a deficit of \$1,485,627 in 1925. Against this estimate the fund shows a surplus of over \$2,000,000 on January 1, 1925. His estimate of receipts for 1924 was about 90 per cent below actual receipts and his estimate of expenditures almost 75 per cent too large. The estimate of the actuary made four years ago has also been disproved by the experience of the last four years. The failure of these superficial estimates indicates the need for caution in suggesting legislation to change the present retirement plan.

A survey of the reports of the fund convinces us that the fund is in no immediate danger and that precipitate legislation looking toward a change in the retirement plan should be opposed. We shall, however, support any legislation providing for the gathering of data on which a thorough investigation may be based, and will approve an investigation of the fund by a competent actuary chosen by an unbiased commission or by a special joint committee of the legislature. We are opposed to any legislation whatever, looking toward the revision of the California Retirement Plan until an unbiased investigation has been made.

Present Status of Fund.

The California Teachers' Retirement Fund now (July 1, 1926) has assets amounting to \$2,478,756.68, of which \$2,436,161.50 is invested in bonds, and \$42,595.18 is deposited in the state treasury. The income for 1925-26 was distributed as follows:

<i>Income 1925-26.</i>	
Teachers' contributions.....	\$406,527 10
Interest on investments.....	91,082 31
Inheritance tax.....	321,157 04
Total	\$818,766 45
<i>Expenditures.</i>	
Investments	\$319,600 00
Retirement allowances.....	457,094 85
Office salaries.....	14,670 99
General expenses.....	3,349 02
Total	\$794,714 86

Recommendation.

In spite of the apparently favorable statement, I believe the time has come for a careful study of the fund with a view to revising the law

ultimately. We have sufficient data on hand to enable us to establish a far better basis for the fund than the present basis.

I therefore recommend that an actuarial investigation be undertaken jointly by the state and the California Teachers' Association and that meantime only minor changes be made in the law.

CODIFICATION OF THE SCHOOL LAW.

In my last biennial report I called attention to the need for codification of the school law. A bill providing for codification passed both houses of the legislature, but owing to the introduction of amendments during passage, it was in unsatisfactory form. It did not become a law. Meanwhile the need for codification has become more apparent. Court decisions given in the last two years have tended to raise serious questions concerning the constitutionality of certain classifications of school districts by the legislature. A decision by the higher courts that such classifications are unconstitutional would work a real hardship on the larger school districts especially. To obviate this situation I renew the recommendation that the school law be codified and that the necessary machinery to achieve this end be set up by legislative act.

TENTATIVE PROGRAM FOR PARENT EDUCATION.

The Need for Parent Education.

During the last quarter of a century, burdens formerly borne by the American home have been shifted to the schools. There is a tendency to make the school more responsible than it has been heretofore for the development of character. There is need for greater emphasis on character education, but the schools can not bear the entire burden. It must be borne in mind that the schools have the pupils only about 1000 hours out of the 8760 hours of each year. Presumably the child is under the influence of the parent during the remaining 7760 hours. In consequence there must be closer cooperation between home and school in the problem of character education.

I am impressed with the fact that in the handling of children, many American homes are out of step with the schools. Thirty years ago the rod was practically abolished as a means of discipline in the public schools. In consequence the schools were obliged to develop ideas of discipline based upon modern psychology and researches in character building. I think it will be conceded that the discipline in the average American school today is far superior to the discipline which prevailed in the average American school during the reign of the rod. It is also superior to the discipline which prevails in the average American home where the use of the rod is not forbidden. Some way must be found to harmonize the kind of training given in the school with that given in the home. Otherwise, character development will be interfered with.

It is not too much to say that in perhaps a majority of the homes of America parents are trying to bring up twentieth century children for twentieth century civilization by eighteenth century methods. The average parent knows little more about scientific methods of training children than did his great-grandparents. There is too much disposi-

tion to meet problems involving children on the spur of the moment rather than anticipate them and prepare to meet them in the light of known principles of character building.

One of the best things the school can do is to bring to parents the more significant results of research in child psychology, child hygiene, and character education. We have made significant advances in psychological research, in child hygiene, and character education. What we need in the building of character is to bring to bear upon the problems of the American home some of the principles of psychology and character education that have been worked out in research laboratories so that parents will understand what the schools are attempting to do in character education and give sympathetic cooperation in this field. Until we have such cooperation we shall not be able to develop character in the degree we should.

California Plans for Parent Education.

We have announced an experiment in adult education in California which we feel will be worth while. The experiment is being financed by the Laura Spelman Rockefeller Memorial of New York, which has generously made an appropriation of \$7,500 a year for three years. Our purpose in making this experiment is to assist parents in the discharge of their parental responsibilities in a more intelligent and efficient way. We recognize that we shall be among the pioneers in the field of parent education, and shall therefore proceed conservatively and experimentally. After we have blocked out the problem in the light of experimental work and developed a technique of parent education, we shall be prepared to extend the work to all the larger centers. We propose organizing five experimental classes. At four centers we shall offer a course to mothers of preschool children; at the fifth center we shall offer a course for fathers. These classes will meet every week for two hours, the time to be selected according to the convenience of parents who enroll. A nursery for the care of babies of mothers attending will be provided to serve two ends: first, that mothers attending shall be under no nervous strain concerning their children while such mothers are in class; second, that parents may have opportunity to observe children under direction.

About one hour of the time will be devoted to lectures on child psychology, character education, and child hygiene. The remaining hour will be devoted to discussion under the director's leadership of problems germane to the course, brought in by the parents themselves, and to the organization among the parents of simple projects in character education. In this way we shall be able to give a well organized course in child problems, assist parents in meeting problems as they develop and stimulate parents through the method of group research in the same way that teachers have been stimulated.

Organization of Work.

Following is the plan for the organization and direction of the work in parent education in connection with the public schools: The Superintendent of Public Instruction is the general director of the

entire project. Associated with him is a general committee consisting of the following:

Miss Ethel Richardson, representing the adult education movement.

Miss Maude I. Murchie, representing Smith-Hughes Home Making Work.

Dr. W. W. Kemp, representing the school of education of the University of California.

Mrs. E. R. Crum, representing the Parent-Teacher movement.

Dr. Mariana Bertola, representing the California Federation of Women's Clubs.

Mr. E. B. DeGroot, representing the Boy Scout and similar movements.

Dr. Elizabeth Woods, representing school research agencies.

Dr. Miriam Van Waters, representing corrective agencies.

Dr. Eleanor R. Stadtmuller, representing the State Bureau of Child Hygiene.

Dr. J. N. Force, representing the division of child hygiene of the University of California.

Mr. E. L. Hardy, representing the teachers colleges.

Mrs. Sue L. Fratis, representing the nursery school movement.

Miss Madeline Veverka, representing the kindergarten primary division of the public schools.

The general director has appointed as active director of the work Dr. Herbert R. Stolz, formerly State Supervisor of Physical Education in California. Dr. Stolz holds the degree of M.D. from the Stanford Medical School. He has had training and experience along the lines of physical education and character education. He has real sympathy with child life and with the progress of parent education.

Plan for 1926-27.

Classes have been organized for the year 1926-27 in the following centers:

1. Berkeley—Classes meeting weekly under the directors of Dr. Stolz. Class specializing on problems of the preschool child.

2. Oakland—Class for mothers of preschool children holding weekly meetings.

3. Washington School, Oakland—Class for fathers of adolescent boys. The class meets weekly.

4. Stockton—Class for mothers of preschool children, meeting weekly.

5. Sacramento—Class for mothers of preschool children, meeting weekly.

Classes will be conducted at these centers in northern California during the year 1926-27. It is planned to organize similar classes in southern California during the year 1927-28. Dr. Stolz will make trips to southern California from time to time during the year to keep in touch with parent education developments in the southern part of the state.

In organizing the classes we have insisted upon the community meeting the following conditions:

1. The school superintendent and school board must be genuinely interested in the project.

2. The parent-teacher clubs must give real sympathy and cooperation.

3. There must be real sympathy and cooperation on the part of those in direct charge of the adult education program.

4. The school board must make provision without charge for the following:

(a) A suitable classroom capable of seating about thirty parents.

(b) A suitable room for a nursery school.

(c) Heat, light, and janitor service.

(d) Reference materials needed for members of the classes.

The classes are limited to thirty members to be selected according to methods worked out by Dr. Stolz and each local superintendent. Effort has been made to have each class truly representative of the community. Members are pledged to attend regularly and for the full time.

Extension of the Work.

After the development of the course and of a reasonably satisfactory technique of parent education, we propose reducing the amount of time given by the active director to actual class work with parents, and assigning him for part-time to the work of training teachers of parent education classes, and to the supervision of parent education classes conducted in the public schools. Provision will be made for the training of directors of parent education classes who can be certified for work in the public schools. It is planned to make the parent education work a part of the special day and evening class program, in which case no additional legislation for the financing of parent education will be required.

If by such methods as have been outlined above we can help parents solve the problems of child training, we may succeed in having the home reassume some of the many functions it has been transferring to the school. This can undoubtedly be done to the advantage of the children who should have similarity of training both in home and school.

DEPARTMENT OF SPEECH CORRECTION.

In September, 1925, I appointed Mrs. Mabel Farrington Gifford Assistant Superintendent of Public Instruction in charge of the department of speech correction. The appointment of Mrs. Gifford was made possible through the generosity of the California Speech Foundation, which supplies funds for the maintenance of the speech department. Before her appointment Mrs. Gifford served several years as supervisor of speech correction in the San Francisco city schools, and had also been connected with the San Francisco State Teachers College. Mrs. Gifford was assigned to the duty of instructing public school teachers in methods of handling children who stutter, stammer, or show nervous hesitation in speech. She was also directed to make a survey of speech correction problems in the state.

Mrs. Gifford's services were made available without charge for teachers' institutes and for conferences with groups of teachers. Mrs. Gifford also conferred with city and county superintendents and conducted surveys in various counties.

I am pleased to announce that the donor who made possible Mrs. Gifford's appointment has agreed to finance her work for at least another year.

Classification of Speech Defects.

For convenience in classifying, the different speech defects may be thus arranged:

1. The nervous speech disorders, under which come stammering, stuttering, cluttering, and nervous hesitation.
2. Retarded speech in both normal and subnormal children.
3. Infantile substitutions not caused by mouth malformations.
4. Substitutions of sounds or imperfect speech caused by malformations of the speech organs.
5. Voice defects, not organic.
6. Voice defects after certain operations, such as cleft palate or adenoid.
7. Imperfect speech through partial deafness.
8. Aphasia, sensory or motor.
9. Foreign substitution of speech sounds, caused by foreign environment.
10. Sluggish enunciation due to poor muscular coordination, which may possibly have been caused by certain diseases of childhood.

Beginnings of Speech Work in California.

The first organized work in the schools of California in speech correction was started in September, 1916, in the San Francisco school department, under the supervision of Mrs. Mabel Farrington Gifford, at a time when the subject was still in its pioneer stage in the United States. Five schools were chosen as centers. The defective speech classes from the schools in each district assembled at their respective center one-half day each week. The other days of the week these classes received twenty minutes drill from the teacher assigned to accompany the pupils to the center. A complete record of each pupil was kept, consisting of conditions before and during correction.

The classes were divided into two divisions, class 1 consisting of stammerers, stutterers and cluttering cases, class 2 consisting of lisps and cases of infantile speech, faulty articulation and enunciation. Model lessons were given for class 1 in the physiological and psychological training for stammerers and stutterers with exercises for the development and control of the outer speech mechanism, establishment of confidence, emotional control and poise. Written instructions were given each teacher for the purpose of accurately following up the instruction given by the supervisor. For class 2, tongue, mouth, vocal gymnastics and special drills in phonetics and voice development were given. Articulation and enunciation exercises were clearly outlined and the schedule arranged for home practice.

Of the total enrollment of 1486 pupils, 39 per cent were enrolled in class 1; 61 per cent in class 2. The department received splendid co-operation from superintendents, principals and teachers of the entire school department. Parents and teachers rapidly became interested in the work, particularly from the view point of the greater efficiency of

the child. In the past, children having defective speech had been retarded in their school grades and general development, owing to their inability to properly express their ideas.

During the first year only primary and grammar grade cases were handled. In 1917 high school classes were added, which included not only nervous speech disorders, but also the correction of foreign pronunciation. The work grew steadily during this interval, and two full-time speech teachers were appointed to assist in teaching and visiting the 12 speech centers in the elementary schools.

During the spring term, January to June, 1924, the work was carried on in 90 schools, including 2 junior high schools and 6 high schools. The total number of stuttering and articulation cases treated was 2955, of which 1051 were stutterers and 1904 articulation cases (including foreign mispronunciation). Of the total number 2461 were either improved or corrected. The following table gives the individual group figures:

<i>Stutterers</i>		<i>Articulation cases</i>	
Gross enrollment	1051	Gross enrollment	1904
Corrected	281	Corrected	576
Improved	523	Improved	1081

During the last year, 1926, five full-time speech teachers have been added, covering 90 elementary schools, 5 junior high and 6 senior high schools with a grand total of speech defectives numbering 3180. Of this number 1032 were stammerers, 742 boys and 290 girls. Of the 2148 articulation cases, 1336 were boys and 812 girls. In the stammering group 235 were reported corrected and 712 improved. In the articulation report 494 were corrected and 1523 were improved.

A speech correction department was opened in Los Angeles, under Miss Alice Chapin, three years ago. Twelve teachers have been added to the staff and are covering 41 grammar schools and 18 junior and senior high schools. In 1926 the number of boys enrolled totaled 855 and the number of girls totaled 342, the combination number being 1197.

Speech Work in San Francisco Junior and Senior High Schools.

Simple work in general speech improvement was given in all 7-A classes and in 9-A classes.

This work included an understanding of simple mental hygiene:

- a. Fears—and how to overcome them.
- b. Likes and dislikes.
- c. How we can change ourselves.
- d. Poise—control—calmness.
- e. Anger instincts and their sublimation, etc.

The work brought good results and was greatly appreciated by the pupils. Most interesting reports were written by many of these adolescents, which were very gratifying. The teachers noted much improvement in general control, poise and calmness.

In the elementary and junior high schools four trained teachers have given full time to the work during the school year 1925-1926, handling 42 schools, each school receiving from 1½ to 3 hours time.

Sixty-one teachers, mostly opportunity teachers, have given part time to corrective speech work, of whom:

- 16 hold special state certificates for speech work;
- 24 have had special training (no certificates);
- 6 have had partial training for the special work;
- 15 have had no special training.

The work in the senior high schools is carried on by one teacher. It has been well organized.

Speech Survey of Sonoma County.

A partial survey of Sonoma County to ascertain the number of speech defectives in the public schools of that county was made by Mrs. Gifford in January, 1926. It was impossible to visit all the schools of the county, only the larger schools being visited.

Mrs. Gifford discovered during ten days' visiting, 25 stammerers and 132 articulation cases, making a total of 157 cases in the county.

During Mrs. Gifford's ten days' survey of the Sonoma County schools, she had the splendid cooperation of the teachers, principals, and the county superintendent of schools.

Miss Clark, the county superintendent, carefully arranged and advertised the centers, so that parents in the outlying districts could take advantage of this opportunity to bring their children in for examination. It was gratifying to see how many of the parents drove in to the centers in spite of the extremely cold weather.

This arrangement of centers enabled Mrs. Gifford to explain the causes and treatment of the various speech defects to both the parents and teachers. She also gave "first aid" treatments (lessons) to all the children.

From surveys in other cities and counties, it has been found that about 7 per cent of all the school children have one or more of the various speech defects. While a great many of the children having the minor speech defects, such as lisping and infantile speech, were not sent in to our centers, the number of recognized cases in Sonoma County amounted to approximately 150. This proves the need of trained speech teachers to instruct these children. Some of these children suffer from fears which keep them in a nervous state constantly. These fears should be removed by proper instruction. Most of the cases of stammering are caused by fears and emotional conflicts. Several other cases of defective speech were caused by defective hearing. Provision should be made for these cases to receive not only speech training, but also lip reading. Otherwise these children are greatly handicapped, not only in school, but in later social and business life.

Training Teachers for Speech Defect Work.

Under the University Extension Department classes are held for teachers covering the theoretical and practical phases in speech correction. Evening classes for adults having speech defects are also provided.

Between July, 1919, and June, 1923, the teacher-training work was carried on at the State Teachers College, San Francisco, where two courses were given, one to student teachers at the college, and the other,

an extension course, to teachers in service in the San Francisco School Department.

Speech Clinic in San Francisco.

In addition to the work given during the regular school hours, a clinic free to the public is maintained throughout the year at the Affiliated Colleges, under the auspices of the University of California Medical Department. Here on Saturday mornings classes are conducted for pupils, students and adults. Teachers are invited to bring cases from their various schools for diagnosis and individual instruction.

In 1915, this clinic was opened under the auspices of the pediatric department. Since then the other departments also have referred to the clinic all cases needing speech improvement. Every kind of a speech defect, from the simplest type—that of poor enunciation, in cases sponsored by interested teachers—to the most difficult, i. e., the nervous type, has visited the speech clinic at the University of California Hospital.

PROGRAM OF EDUCATION FOR PHYSICALLY HANDICAPPED CHILDREN.

The California school system makes reasonably satisfactory provision for the education of children who are normal physically, mentally and morally. However, the state is not making thoroughly satisfactory provision for children under physical handicaps. While provision has been made for a state home for deaf and blind children during the last 60 years, and while the educational features of the school for deaf and blind children have received increasing emphasis during the last two or three decades, it was not until 1903 that the organization of special classes for deaf children was authorized by law. Special classes for crippled and blind children were not authorized until 1921. Provision is now made for the organization of special classes for these three types of children, admittance being limited to children between the ages of 3 and 21 years. In the case of deaf children, all teaching must be by the pure oral system. Provision is also made for a teacher apportionment for each nine deaf or blind or crippled children, or a fraction of such number not less than five, actually attending a special class for that particular type of children. This means that approximately \$1500 per annum is set aside out of state and county funds for each nine children under the physical handicaps mentioned above, in case the school district establishes special classes for their education.

Undoubtedly a great advance has been made during the last five years in the education of deaf, blind and crippled children in special classes. However, a survey, admittedly incomplete, made during the last year, indicates that the state is not offering educational advantages to a great number of physically handicapped children.

Classification of Physically Handicapped Children.

The survey showed the following classification of physically handicapped children:

- (1) Blind.
- (2) Deaf.
- (3) Crippled.

(4) Children handicapped by poor health—tubercular, anemic, cardiac.

(5) Children whose sight is poor, requiring sight saving efforts.

(6) Children who are hard of hearing, necessitating special instruction differing from the teaching of the deaf.

(7) Children suffering with speech defects, which are classified and discussed elsewhere in this report.

Restoration and Education of Physically Handicapped Children.

Recognizing the magnitude of the problem, the Superintendent of Public Instruction recently called a conference to discuss ways and means of improving the education and extending means for the restoration of physically handicapped children. Before the conference was called the following advisory committee was appointed to formulate a statement of the problem for presentation at the close of the conference:

Mr. Ira W. Kibby, State Supervisor of Civilian Vocational Rehabilitation, State Department of Education, Sacramento.

Mr. Chas. B. Bills, Past District President, Rotary Clubs of California, Sacramento.

Miss Georgiana Carden, State Supervisor of School Attendance, San Francisco.

Miss Elizabeth Bates, Assistant Superintendent of Schools, Los Angeles.

Mrs. G. A. Reilly, Vice President, California Congress of Parent-Teacher Associations, Alameda.

Mr. H. R. Braden, State Department of Finance, Sacramento.

Mrs. Carrie Parsons Bryant, State Board of Education, Los Angeles.

Dr. Alvin Powell, Director, Alameda County Health Center, Oakland.

Dr. Herbert R. Stolz, State Supervisor of Physical Education, Sacramento.

Dr. Mariana Bertola, President, California Federation of Women's Clubs, San Francisco.

Dr. George R. Davis, Chairman, Rotary Committee on Crippled Children, San Francisco.

Dr. John Louis Horn, School of Education, Mills College.

Dr. Edward F. Glaser, State Board of Health, San Francisco.

Mr. Lewis B. Avery, Assistant Superintendent of Schools, Oakland.

This committee is representative of the various organizations and agencies interested in the physically handicapped child. In the course of the conference the committee brought in the following report, which I heartily endorse:

The committee recognizes that to accomplish this aim, two definite programs must be set up: (1) A program for the physical restoration of the handicapped child, when such physical restoration is possible. This, in many cases, will alleviate the handicap condition and make it possible to educate him as a normal child. (2) A program for the education of all handicapped children in California.

These two programs should be closely coordinated so that the child will receive the greatest possible benefit from both services. When possible, education should accompany hospitalization. However, inasmuch as the program for physical restoration will in all probability necessitate the setting up of new state machinery, the committee feels that this phase of the work should be referred to some organization such as the California Society for Crippled Children, or the California State Medical Association, for further study and report.

Educational Program.

The Advisory Committee believes that the educational program for the physically handicapped child should consist of three steps:

(1) A state wide program to provide elementary education for all physically handicapped children who can not fit into the classes of the regular school successfully.

(2) A state wide program to provide secondary education for all handicapped children of high school age and to provide special occupational training for all of those who have a physical handicap which limits them in the selection of an occupation.

Many children have a physical handicap that does not prevent them from attending regular classes but which does limit their scope of possible occupations. Such individuals need special training to fit them for special occupations wherein their physical handicap will not be an occupational handicap.

(3) A program of placement to assist those who are trained in an occupation in securing suitable employment which is in keeping with their particular disability. A follow-up program should be a part of the placement program so as to determine how effective the training program has been.

District Must Provide Training.

The committee believes that this program should be such that any handicapped child needing special training may demand such training, and that the district wherein he resides must provide it, or must furnish such funds as are necessary for the child to be trained where special training is given. This program of training can be carried out either through (1) home teaching; (2) special class instruction; (3) providing transportation for those who are physically unable to go to school but are able to attend regular classes; (4) institutional training; (5) correspondence training with tutorial assistant.

Nature of Training.

The elementary course should parallel the ordinary elementary school work, fitting the child to enter the secondary phase of education.

The first part of the secondary school program should be of an exploratory nature, such that will bring out the interests, aptitudes and physical and mental capacities of the student.

The second part of the secondary program should be based on careful counselling and advisement, taking into consideration the physical handicap of the student and the possible occupations that he can fit into. It should consist of (1) a well rounded program of cultural subjects; (2) training for citizenship; and (3) vocational training toward a definite occupational objective.

It is recognized that an individual may have a handicap that is no serious bar to his entering the regular elementary and academic courses but that will constitute a serious occupational handicap. Special occupational training should then be provided for such individuals.

Inasmuch as it will be difficult to conduct the secondary school training through home teachers, provision should be made whereby such students can be brought together so that classes can be organized in certain centers or in an institution where special training can be given. When the students are required to leave their home districts, provision for maintenance should be made.

The third phase of the secondary educational program should consist of placing the individual in employment so that he can utilize his occupational knowledge. In order to obtain the best results in accomplishing the third phase of this program, it will be necessary for the State Department of Education to provide for a study of those occupations that are carried on in California, that are best suited for different types of physically handicapped persons and to determine where this employment can be found. The department should then work out the type of training best suited to fit such handicapped people for these different types of employment.

Problems of Finance and Teacher Training.

Inasmuch as it is necessary to provide special training for handicapped children, the cost will be greater than the cost for educating normal individuals. An equitable method of distributing these costs between the district, the county and the state should be provided.

The committee furthermore recognizes that the training of handicapped children will demand specially trained teachers. It therefore urges that in order to obtain teachers best fitted for this work, special training eventually should be required of all such teachers. These teachers should therefore

receive a higher remuneration than the regular teachers because of this extra training.

The teachers colleges should be urged to study this problem and to set up such courses as will prepare those teachers who can best fit into this type of work.

The education of the handicapped child is a new and special problem and will need careful promotion, attention and supervision which the district cannot adequately provide. Provision should therefore be made for the State Department of Education to appoint such experts as are needed to properly organize, promote and supervise this work.

IMPROVEMENT OF THE TEACHERS' INSTITUTE.

Original Purpose of the Institute.

The institute has served a very useful purpose in California, and is still serving a useful purpose. However, the nature of the institute has changed very greatly as the needs of the profession have changed. When the institute was first established, there were few professionally trained people in the state. In consequence, the programs of the early institutes dealt very largely with methods of teaching. Discipline also came in for much attention. However, considerable time was devoted to topics of general interest, particularly to moral and scientific discussions with a view to broadening the teacher's outlook. With the growth of university and normal school education, the institute gave less attention to discussion of methods and information topics, and more attention to the discussion of educational aims and values and the organization of the course of study. The chief purpose of the institute in the eighties and nineties was to present new professional viewpoints to teachers, and give professional inspiration. The gathering also afforded the superintendent opportunity to acquaint teachers with changes in local school organization and the county or city course of study.

Changes in Character of Institute.

Shortly after 1900, we note another significant change of emphasis, due to the growth of the California Teachers' Association. County superintendents began to call their institutes in connection with the annual meeting of the California Teachers' Association. With the growth of this movement, methods of teaching as an institute topic fell further into the background. Local teaching problems were given less emphasis, particularly in cities where grade meetings held after school served to give opportunity for the discussion of such problems. The inspirational element began to command greater attention. However, the chief advance traceable to the larger meetings was the development of a spirit of greater professional solidarity and the finding of common professional ground. The meetings were large enough to justify the organization of special sections such as the high school section, the elementary school section, the administration section, and the various subject sections. Undoubtedly the larger meetings yielded greater professional results. However, it must be borne in mind that many counties did not join the larger meetings because of distance and pressure of local merchants to keep the institute at home. These counties were obliged to follow the traditional plan, emphasizing methods and local problems.

Shortcomings of Present Plan.

In recent years, because of the growth of the large section meetings which succeeded the general state meeting, many school administrators and teachers have suggested a reorganization of the institute to secure better results. Bigness of teachers' meetings is desirable for certain purposes, but bigness may not be so desirable for other purposes. Undoubtedly big meetings are of great value from the standpoint of inspiration and solidarity. The question is, "How can we conserve the values of the large meetings, and at the same time make better provision for contacts that will enable superintendents and teachers to discuss problems of interest to special groups, and problems more or less local?" Each superintendent has a special program which he is endeavoring to carry out. How can he utilize the institute to help carry out that program? Obviously such problems and projects can not be discussed in great meetings representing many counties and cities.

Proposals for Reorganization.

We must of course conserve all the good in the large meetings—the connection with teachers organizations, the inspirational values and the opportunity for finding common professional ground. My belief is that we can make provision for special and local needs without sacrificing any of the value of the larger meetings. In order to do this, however, the law should be amended so as to eliminate certain outworn restrictions on the length and time of meetings. In certain rural counties where teachers are for the most part inexperienced in the county school organization, at least five days at the beginning of the school year might be devoted to an analysis and discussion of the course of study, conferences with the superintendents and rural supervisors, discussion of the handling of tests, school organization and similar local matters, with considerable time given to inspirational and general professional topics. Such a program could probably be arranged with the cooperation of one of the teachers colleges and the university. Such careful planning and discussion of school work is very desirable in view of the lack of close supervision in rural districts. However, even in rural counties, two days should be reserved for attendance upon large section meetings of the C. T. A. if such meetings are held within reasonable distance. Such section meetings should be scheduled at the close of the fall term, and at points convenient to teachers.

Institutes in Cities.

In cities also two days at least should be reserved for the section meetings of the C. T. A. This makes provision for the development of professional solidarity. Grade meetings can be held from time to time after the regular school day, as at present, for the discussion of local school problems. However, interim inspirational meetings, occupying not more than four half days during the year, should, I believe, be scattered throughout the year. Each city would plan its own interim meetings as it sees fit. Instead of inspirational meetings lasting four or five days, I believe we should try half-day meetings every two or three months, such meetings to be addressed by speakers who have real professional messages. Speakers from abroad could be scheduled for a circuit of cities. Under this plan we could have pro-

professional inspiration and discussion of ideals in smaller doses, and in smaller groups, with the certainty that more good will come from such a plan than from the present plan. Moreover, the inspiration given could be pointed toward the improvement of teaching in that particular community.

In lieu of attendance on two of the four interim meetings, I believe that teachers should be permitted, with the approval of the superintendent, to offer equivalent time in attendance upon such professional associations as the Association of Teachers of English, the Association of Art Teachers, the Association of Science Teachers, etc. Attendance upon these meetings should be encouraged inasmuch as they are helpful in giving inspiration and vision in the special field in which the teacher may be working.

Superintendents Asked to Consider Plan.

Certain of these suggestions were sent out in the form of a bulletin to county and city superintendents in August, 1925. Following are excerpts from the bulletin:

In a recent conference with me, the presidents of state teachers colleges expressed themselves as willing to cooperate with county superintendents in arranging a new type of institute program.

The new type suggested can not be adopted without the cooperation of the teachers colleges. It is suggested that a program of unit courses be constructed dealing with practical problems, such courses to cover a period of one week and to be conducted by members of the faculty of the teachers college and rural supervisors of the county, under the general direction of the superintendent. For example, a unit course entitled "The County Course of Study" and involving a careful study of the county course might be offered; another course in "County School Organization," including such topics as promotion, graduation and the use of tests or examinations, might be offered. In addition to such practical courses as I have mentioned, inspirational lectures might be given from time to time.

For teachers completing the course covering a period of one week, the teachers college might allow one unit of credit toward graduation, or toward higher certification. This plan is a combination of the summer session and old-time institute plans but has the advantage of being shaped to meet local needs.

No general proposal as to program or cost can be made at this time, but in counties situated within reach of a teachers college it is certain that an arrangement of this kind may be developed, thus making the institute more profitable without increasing the cost. Of course, if such a plan were adopted, the institute could best be held at the beginning or at the close of any school term thus avoiding a midterm interruption of school work. If the possibilities of this plan appeal to you I would suggest that you discuss the matter with the president of the teachers college nearest you.

The Chico Joint Institute, September, 1926.

In accordance with the suggestions, a joint teachers' institute, embracing the teachers of several northern California counties, was held at Chico State Teachers College in September, 1926, under the direction of President C. M. Osenbaugh, who reports his experience as follows:

At the 1926 annual meeting of the college presidents, Superintendent Wood suggested that the State Teachers College take a more constructive interest in the county institutes. Previous to this time Chico State Teachers College had prepared a program for one of the three days of the Tehama County Institute. The teachers motored to Chico for the day. They declared that one day the most profitable of the three.

For the past two years the following county superintendents, Mrs. Long of Plumas, Mrs. Cunningham of Shasta, Mrs. Gray of Sutter, Mr. Henderson

of Tehama, Mr. Berry of Butte and Miss Malaley of Yuba, have been meeting at the State Teachers College every month. In these conferences common problems are discussed and a definite program of study is pursued for the year.

Acting on Mr. Wood's suggestion Chico State Teachers College presented to the above named county superintendents a plan for a study institute to be held at the State Teachers College for the week beginning September 13th. Their reaction was immediately favorable.

The college requested these county superintendents to submit a list of subjects that would be most profitable for their teachers in service. These subjects were immediately submitted and the president of the college presented a plan in detail for the institute.

The collegiate institute of 1926 was the result. In addition to the county superintendents above mentioned, the teachers from Lassen, under Superintendent Norwood, and the city teachers of Chico, under Superintendent Camper, took part in the institute.

The outstanding features of the plan were as follows: Each subject had to carry with it the required hours of recitation and preparation to secure one college credit. In order to meet this requirement recitation periods in each subject were offered each day for the five days. These periods were an hour and ten minutes in length, one recitation being given in the morning and one in the afternoon. In addition to the above, round tables were conducted each day. A teacher desiring college credit had to attend each of the ten recitations given in the subject of her choice and also to attend at least one of the round tables. At the close of the institute a test was given to those teachers who desired college credit. The program of hours was as follows:

9.00-10.10—First recitation period.

11.00-12.00—Round table.

1.30-2.40—Second recitation period.

The following subjects were offered:

Government of the United States.

Europe in the Twentieth Century.

Composition Teaching in the Grades.

Plays and Games.

Social Science, with emphasis on social program in the Elementary School.

Healthful Living.

Geography of California.

Arithmetic in the Primary Grades.

Two courses in Reading in the Primary Grades.

Upper Grade Reading Methods.

Music—Intensive study of state music texts.

School Administration—Advanced.

Art.

Educational Tests.

Games, Dances and Posture Drills for Elementary Schools.

A course for the men in Physical Education.

It was the purpose of the college authorities to permit a first choice of subjects as far as possible; this was done in nearly every case. Seventeen round tables were conducted each day by the college instructors. The teachers were requested to submit questions for discussion for each day's round table. The round tables were so popular that, even though the attendance was compulsory for only one, they were as well attended as the subject recitations. The questions submitted by the teachers were along the line of difficulties that they had had in their previous teaching. Their questions covered the entire elementary field, in administration, discipline and subject matter.

The high school teachers met at the Chico high school and continued in session for three days. They did not pursue the study type of institute but approximated it as far as possible. The high school teachers went on record unanimously for a study type of institute in the future, the instructors to be obtained largely from the universities.

The new type of institute was pronounced a success as indicated in the following summary:

In answer to the question, "Do you approve this type of institute?" 639 answered Yes, 7 No, and 6 In part.

Six hundred forty-four teachers out of a total of 652 requested the institute to be repeated.

A majority of the teachers were in favor of the study type annually; the others, biennially.

Five hundred ten teachers took the work for credit. No one taking it for credit failed, although the requirements were up to the usual college standard. One hundred received a grade "A," 220 "B," 163 "C," and 21 "D." Nearly all of those not taking the work for credit were enrolled in primary classes, they having previously had credit in these subjects.

Many requested a two weeks' study type of institute every other year.

Constructive suggestions that were made by the teachers themselves will improve this type of institute very materially.

The New Plan Successful.

That the new plan for teachers' institute may be made successful is the unanimous opinion of the six county superintendents uniting in calling the Chico institute. In their report to the Superintendent of Public Instruction they stressed the following points in favor of the new type of institute:

(1) The range of subjects offered is broad, enabling each teacher to select for special study one subject in which she is specially interested, or in which she needs special help. The teacher is not obliged to listen to lectures rehashing what she already knows, nor does she have to feign an interest in a subject which is not real. The interest in the institute was far greater than in the old type of institute because the work done was more practical.

(2) The new type of institute tended to lift the older teacher out of ruts into which they had fallen, and gave them a new interest in school work. They caught a vision of teaching which they carried back with them into their classrooms. Beginning teachers were given an opportunity to get expert assistance in the teaching of subjects with which they were not thoroughly versed.

(3) Teachers got something that they could carry back to school and use.

(4) The teachers felt that they were an active part of the institute. They appreciated the opportunity to do something other than listen. They felt the stimulus that comes from intensive study, reading and discussion of problems. One superintendent reports that the morale of the institute was the best he had ever observed, because all the teachers were interested and in dead earnest.

(5) The unit of credit given was an incentive to satisfactory work. Teachers earning such credit, and becoming acquainted with opportunities afforded by the teachers college, were undoubtedly encouraged to go to summer sessions thereafter.

(6) A closer relationship was established between the teachers college and the schools of northern California. The teachers college is now regarded as a service station, with help available to any teacher in northern California.

(7) The institute provided opportunity for grouping teachers homogeneously according to their interest and problems. The rural teachers especially appreciated this opportunity.

The reports of the superintendents concerning the success of the new type of institute held at Chico lead me to commend again this type of institute to all superintendents of the state.

I conclude this discussion with emphasis upon the need for preserving all that is good in our present institute plan. The suggestions for

improvement are offered in the hope that this splendid agency which has served the California school system so well may be made to serve present needs more effectively.

THE ELEMENTARY SCHOOL COURSE OF STUDY.

Research Results in Revision of Course of Study Laws.

Researches in the elementary school curriculum begun in October, 1924, under a grant made by the Commonwealth Fund of New York have already brought very satisfactory results. Upon the basis of data gathered by the director of the study, Dr. William Chandler Bagley and his associate, Dr. George C. Kyte, the legislature of 1925 passed an act reducing the number of subjects required by law to be taught in the elementary schools from 32 to 12, with provision that local school authorities may add subjects not exceeding three in number to meet local needs. This law marks a real step in advance. It has made possible the working out of courses of study and of daily programs on a reasonably satisfactory basis, which was not possible under the old law. The school time need no longer be dissipated in a great variety of recitations because of legal prescriptions.

It needs to be pointed out, however, that much remains to be done to make the new law fully effective. There is much material socially useful and valuable in the twenty subjects that were eliminated. The school authorities are now faced with the task of selecting the socially significant material in the subjects eliminated, and integrating such materials with the materials taught in the twelve required subjects. For example, materials in humane education should be introduced into reading and language courses; thrift teaching and fire prevention should be made a part of civics; and instruction in the evil effects of alcohol and narcotics should be made an integral part of the work in hygiene and in manners and morals.

Machinery for Curriculum Revision Suggested.

The California Curriculum Study will fall far short of its purpose if its significant recommendations, based upon data assembled, are not embodied in revised curriculums in California. Just how this desirable result may be achieved is a matter for serious consideration. It has been suggested that the State Department of Education be charged by law with responsibility for prescribing minimum standards for courses of study made by local school authorities. However, I am doubtful whether this plan would be satisfactory unless a commission were appointed representing the state department, teacher training institutions, county superintendents, city superintendents, principals and teachers. After all, the course of study is merely an outline of requirements in the various subjects, and it may be vitiated in large part if the requirements are not acceptable to the teaching body. A commission such as I have suggested would guarantee that the requirements would be acceptable to the teaching body.

The findings of the California Curriculum Study will be published in a volume of several hundred pages in the near future. On the basis of this scientific study, genuine curriculum revision can be achieved provided the necessary machinery for making the study

effective is set up. I recommend that a commission be created to make the work of curriculum revision effective. Such commission should serve without salary, but the actual and necessary traveling expenses of members should be provided. The total expenses of such a commission should not exceed a thousand dollars a year.

TEACHER TRAINING AND CERTIFICATION.

High Standards for Certification.

The teacher training institutions in California, both public and private, have shown a remarkable spirit of cooperation in working out a progressive program of education. California is in the very first rank in the percentage of trained teachers employed in the schools. In the elementary schools 85.15 per cent have had either normal school or college training. In the high schools an even larger percentage of teachers are professionally trained, practically all high school teachers except those teaching the commercial and other vocational arts being college graduates. The high standards of certification in California account in large part for this splendid showing.

During the last two years the following advances in certification are to be noted:

Administration Credential.

(1) The administration credential authorized by the legislature of 1921 has become fully effective. When this credential was introduced it was found necessary to grant it to all persons then holding regular administrative positions in the public schools, and to all other persons who at that time met the maximum requirement of five years of successful experience in administration. Beginning January 1, 1925, the Commission of Credentials has declined to grant administration credentials on the basis of experience only, and has held all candidates for this credential for a full half year of specialized work in school administration. This action of the commission guarantees that school administrators charged with duties as superintendents or principals will have special qualifications for such work. The time has passed for assuming that any successful teacher can successfully administer a school. School work has become so highly organized, so greatly differentiated, as to demand that persons employed to administer it shall have special preparation for the work. We recognize that during the next four or five years we shall be in a period of transition, during which we can not insist that all candidates for the administration credential shall have completed the full fifteen units of work before the credential is granted. In order to meet the demands of the schools we have been obliged to admit to an examination qualified teachers who have completed six units of work in administration subjects, and grant to candidates who pass the examination, limited credentials with renewal conditioned upon the completion of the remaining nine units in school administration.

Supervision Credential.

(2) The special credential in supervision is now fully operative in the schools of the state. The requirements for this credential are also

high. For the credential authorizing one to conduct general supervision, fifteen units of work in supervision subjects is required. For the special supervisor's credential, authorizing supervision in a special subject, ten units of work in supervision subjects is required. For the credential authorizing one to serve as head of a department in a high school five units of work in supervision subjects is required.

General Secondary Credentials.

(3) In the requirements for the general secondary credential no essential change has been made. However, the annual teacher training conference, held in September, 1924, went on record as favoring the following plan as a substitute for the present plan:

The student must meet requirements in three groups of professional subjects, as follows:

Group 1. A total of five units in practice-teaching and methods of teaching including at least three units in actual teaching practice.

Group 2. Seven units of work selected from the following courses:

- (a) Principles of secondary education.
- (b) Public education in California.
- (c) Civic education.
- (d) Methods and management of instruction.

Group 3. Six units to be selected from the following courses:

- (a) Organization and administration of education (secondary or public).
- (b) Educational psychology.
- (c) Theory of Education.
- (d) History of education.
- (e) Such other work as may be substituted with the approval of the head of the department of education in the institution concerned.

This recommendation was adopted in June, 1925, when the requirements for the general secondary credential were open to revision.

Special Secondary Credential.

(4) The special secondary credential requires four years of work beyond graduation from high school, or the equivalent. The time requirement is one year less than that for the general secondary credential. The teacher training conference held in 1924 suggested that the requirement for the special secondary credential be advanced to five years beyond graduation from high school, or the equivalent, thus putting the special secondary credential on a plane with the general secondary credential. I heartily endorse this suggestion in view of the fact that there is no dearth of teachers in most of the special fields.

General Junior High School Credential.

(5) The general junior high school credential is now granted on the completion of four years of college work, including at least fifteen units of work in education. The teacher-training conference in December, 1925, recommended that eighteen units of work in professional education courses be required for the junior high school credential, the work to include the principles of elementary education. It also recommended that the credential thus granted should include both the junior high school and elementary school field. This would mark a departure from

the present policy of granting general junior high school credentials to cover the junior high school field only.

New Types of Credentials Authorized.

(6) During the biennial period the following named types of credentials were added to the list of credentials granted:

1. A special credential in academic subjects.
2. A special credential in research and guidance.
3. One-term lecture credentials.
4. Special credentials in science.
5. The junior college credential.
6. The special credential in parent education.

Additions to List of Accredited Institutions.

Between July 1, 1924, and June 30, 1926, the following institutions were accredited for the issuance of the general secondary credential:

Dominican College, July, 1924.

University of Arizona, July, 1925.

University of Oregon, July, 1925.

Boston University, December, 1925.

Recommended Policy of Teacher Training.

The time has come when California should more clearly differentiate between the functions of the various types of teacher-training institutions. My recommendation is that, inasmuch as five years of work is required for the general secondary credentials, training for that credential should be confined to institutions of university or college grade that offer a full year of graduate work and grant the Master of Arts degree; that, inasmuch as the primary purpose of the teachers colleges is the training of elementary classroom teachers, the larger universities be encouraged to discontinue the training of classroom teachers for the elementary schools, leaving this field to the teachers colleges; that, inasmuch as the teachers colleges do not offer graduate courses, the universities which maintain graduate schools of education shall be encouraged to offer advanced courses in elementary education for teachers of experience, and others who are preparing for higher work in elementary education.

It is my judgment that any other place for the apportionment of teacher-training work will result in extravagant expenditures, and ultimately be detrimental to the advancement of education in the state.

Professional Degrees in Teachers Colleges.

In 1921, the legislature passed an act authorizing the State Board of Education to grant to the teachers colleges the privilege of conferring the bachelor's degree in education. The state board established standards for the degree and has authorized the several teachers colleges to grant degrees as follows:

Majors in Which Teachers Colleges Are Authorized to Grant Degrees.

Chico—

Elementary Education.
Elementary and Kindergarten School Education.
Home Economics.
Occupations and Home Mechanics.

Humboldt—

Elementary Education.

Fresno—

Elementary Education.
Elementary and Junior High School Education.
Art.
Home Economics.
Music.
Physical Education.

San Diego—

Elementary Education.
Elementary and Junior High School Education.

San Francisco—

Elementary Education.
Elementary and Kindergarten School Education.
Junior High School Education.

San Jose—

Elementary Education.
Junior High School Education.
Elementary and Kindergarten School Education.
Home Making.
Music.
Art.
Occupations and Home Mechanics.

Santa Barbara—

Home and Community Occupations.
Home Economics.
Elementary Education.
Art.

It is my opinion that the granting of the degree privilege to the teachers colleges has resulted in advancing the prestige and services of these institutions, to the advantage of the elementary schools of the state. However, I realize the danger of expanding the liberal arts courses of the teachers colleges until such courses will crowd out the teacher-training courses. This would be highly detrimental to education in California. It is my judgment that every precaution should be taken to maintain the teachers colleges of the state as teacher-training institutions and that efforts to effect their conversion into liberal arts colleges should be opposed.

THE PLACEMENT OF TEACHERS.

The placement of teachers is a problem in which the state is vitally interested. Teachers should be placed where they can do their most effective work, and school districts needing teachers should be given such service as will enable them to get the best teachers available. At present, the University of California and the several teachers colleges maintain appointment offices whose business is to serve the schools and teachers who have been students of such institutions. Private teacher-

training institutions also maintain appointment facilities, and the California Teachers' Association maintains a placement bureau, the expenses of which are paid by the teachers served. Private teachers agencies charging the teachers who are placed as much as 5 per cent of their annual salaries also assist in placement. There is need, however, for a careful study of the placement problem to insure greater efficiency and better service. So far as the facilities at the state office will permit, such a study will be made during the next two years. After the study has been made it will be possible for the state department to make recommendations that will render the work of teacher placement more effective.

EXCERPTS FROM THE REPORTS OF PROGRESS SUBMITTED BY PRESIDENTS OF STATE TEACHERS COLLEGES.

CHICO STATE TEACHERS COLLEGE.

C. M. OSENEAUGH.

The most notable increase in our enrollment has been along the line of higher education—more advanced courses in English, mathematics, language, social science, etc. The candidates for degrees show a decided increase in number. Although the increase in the enrollment of male students has been quite marked, the demand for young men graduates has been greater than we could fill.

Improvements at Mount Shasta Summer Camp have been made, but the enrollment is still limited to two hundred fifty on account of lack of housing facilities. It is hoped to be able to accommodate four hundred during the next few years. The curriculum up to the present time has been made with the view of serving our own students. The curriculum for next year will be arranged more for teachers in the service and for those seeking to meet credential requirements.

We have had extension classes in Redding, Red Bluff, Oroville and Chico for the past few years.

The lengthening of the course to three years has added academic strength to the institution and we believe our graduates are going out better prepared than ever before. We are serving the largest territory served by any college in the United States. The territory is sparsely settled, but the percentage of growth is increasing rapidly.

SAN FRANCISCO STATE TEACHERS COLLEGE.

A. B. ANDERSON.

Perhaps the outstanding feature in the development of the State Teachers College at San Francisco during its recent history has been the securing of a permanent site and the completion of a building plan as a goal for its development during the next ten years. The plan involves the expenditure of a million and three-quarters dollars, or more, and will probably take eight or ten years for consummation. The institution has adopted a policy of asking for several units in each biennial budget. The first unit of the plan, the gymnasium, was completed in September, 1924. The second unit, a kindergarten-primary building of five rooms, is now completed and will be open for use at the beginning of the coming fall semester.

The college also holds a valuable piece of property located at North Beach known as People's Place. It was formerly operated as a social center by a group of people interested in the furthering of good citizenship. A few years ago this group generously turned it over to the Teachers College with the idea that a foreign kindergarten should be conducted there as well as classes in citizenship.

Another outstanding feature of the recent development of this college has been the establishment and continuation of individual instruction in the elementary department of the college. This is the parent school of individual instruction and it is gratifying to note how the idea is spreading into other parts of the country.

San Francisco Teachers College is preeminently a professional school. It has hewed strictly to the line of teacher training. Its campus and its organization are concentrated on the problem of training a better type of school teacher for the public schools of California.

SANTA BARBARA STATE TEACHERS COLLEGE.

C. L. PHELPS.

As the school year 1923-24 drew to a close, two things were apparent. One was that the plan of practice teaching which had been carried on in the city school system exclusively was no longer satisfactory and the other was that the increase in enrollment in the college rendered the classrooms and equipment entirely inadequate. Relief was sought in two very definite ways. In the first place, the institution undertook on its own account to construct during the summer session of 1924 a building forty by eighty feet and two stories in height, to extend the shop facilities, and to furnish classrooms for the beginning of an elementary school. Following this, a new building was sought from the legislature which met early in 1925. This latter building was to consist of an auditorium, a library and administrative offices. The combination shop and classroom building with reenforced concrete and heavy frame walls was constructed by a carpentry class during the eight weeks' summer session of 1924. Following the construction of this building by the students, the legislature made the necessary appropriation for the new administration building, which has not yet been built. During this period, the regular attendance has increased from 378 to 526 for the current year with a total enrollment of 773. The need for additional room is very acute.

During the past two years, the whole program of work has been readjusted with two ideas in view. The first of these is that a teacher should have as much general education and culture as possible while at the same time the specific professional training should be as liberal and extensive as it can be made within the limits of the course. Second, the idea has prevailed that material which will contribute to the former kind of development should be placed almost exclusively in the lower division and material of the latter kind in the upper division. With the development of the three-year course as a requirement for the certification of elementary teachers, complete four-year courses leading to a degree have been set up for all lines of work carried in the institution.

During the first three or four years of our collegiate life, the question was constantly raised as to the value of the A. B. degree which the

college was authorized to confer. This was a perfectly natural question which could only be answered by the presentation of such degrees to other institutions for evaluation. During the year just past, Columbia University and Stanford University have definitely recognized the degree of this institution as a basis for graduate standing in those institutions. With such recognition, there is no further question as to the value of the degree which the institution confers.

FRESNO STATE TEACHERS COLLEGE.

C. L. McLANE.

The State Teachers College of Fresno has continued to grow, not only in registration and attendance, but in its general standing as an educational institution in the San Joaquin Valley. The initial enrollment for the semester beginning September 13, 1926, is 1406 as compared with 913 two years ago when the last biennial report was made.

Six acres of land were purchased with the \$50,000 appropriation made at the last session of the legislature, and the agriculture equipment in the way of green houses, lath house and propagating plant, was moved to the adjacent tract, leaving the original campus free for future permanent building expansion.

As evidence of the interest and support accorded the college by the community, the citizens of Fresno financed and erected a fifty thousand dollar stadium for the institution. The seating capacity of the stadium, when brought up to its maximum capacity, will be about twenty thousand, and will take care of the athletic and recreational needs of the college for many years.

The school of liberal arts has kept pace with the growth of the school of education, or teacher-training division. Most young people in this section of the San Joaquin Valley who are ambitious to undertake higher educational work of a general nature are looking to the Fresno college to furnish this work for the first two years, at least. The college is well equipped in the way of faculty, laboratories, and library, to carry on this liberal arts work. Besides the regular courses usually offered in the lower division of the leading colleges and universities of the state, courses in commerce, agriculture, engineering, and mechanic arts of a practical or vocational nature are offered to such as do not expect to transfer to another institution for the completion of their college careers.

The division of education has been undergoing rather extensive reorganization in order to meet the added responsibilities which developed from increased demands for upper division courses. The gradual transition to the three-year curriculum for elementary teachers, basing professional work upon a broader foundation of collegiate courses in science and social studies, has made possible much higher standards and more thorough-going courses in the field of education. At the same time a growing demand for advanced courses leading to the degree has made further extension of offerings in education necessary. Members of the instructional staff have accepted the inconvenience of having many of the advanced courses scheduled at late afternoon or evening hours in order to enable teachers in service to enroll for such work. Such enrollment in the past two years has exceeded 500 teachers.

The summer session of the college, known as the Sierra Summer School, is held at Huntington Lake in the Sierra Nevada mountains. It has steadily continued to grow in attendance and curriculum since its establishment in 1914. A site of forty acres has recently been acquired on the north shore of the lake. A commodious building was completed last spring and the new plant was occupied for the session of 1926. The new site, with the cooperative plan of housing and boarding made with a local summer resort, will afford practically unlimited accommodations for the future, so far as physical equipment is concerned.

HUMBOLDT STATE TEACHERS COLLEGE.

R. W. SWETMAN.

The enrollment of 275 for last year at Humboldt State Teachers College, shows an increase of 72 per cent over the regular enrollment for the year, two years previous, while the 1926 summer session enrollment of 276 shows a 79 per cent increase over the 1924 summer session enrollment. During the same period the enrollment in men increased from 24 to 64, an increase of 166 per cent. Analysis of the 1926 summer session enrollment shows that our students came from 76 different communities in California scattered all the way from Riverside and Redlands to Yreka, and from five states outside of California, giving evidence that Humboldt is no longer being limited to a local institution.

During this same period the number of officers and employees has been increased to 24 from 18. This has made possible greater specialization on the part of faculty members and the addition of much needed elective courses.

A significant feature of the work of the college during the last two years has been the organization of a system of self-government in all matters pertaining to the students. Thus the students have at their disposal a most valuable laboratory course in citizenship preparatory to civic leadership later on in the communities where they will teach.

SAN DIEGO STATE TEACHERS COLLEGE.

E. L. HARDY.

The enrollment in the San Diego State Teachers College has increased during the last two years from 1198 to 1553.

Since the time when, twenty-eight years ago, the institution opened its doors as a normal school, the history of the development of the curriculums offered shows an increase from the single teacher-training curriculum offered in 1898 to nine curriculums in teacher-training and twelve in the field of the junior college, to be offered in 1926-27. One additional curriculum should be provided for in the budget of 1927. The demand for kindergarten and kindergarten-primary teachers in the city of San Diego and in the larger suburban communities has reached such proportions that a department of kindergarten-primary training should be added to the teacher-training organization of the college.

In the matter of a new site, the situation remains *in statu quo*, pending action of the city council on a petition for a referendum vote of the people of San Diego on the question of offering to the state a site of 125 acres located in the northeast corner of Balboa Park.

SAN JOSE STATE TEACHERS COLLEGE.

H. F. MINNSEN.

The two years just closed mark a period of quiet accomplishment. The course of study has been revised to meet new needs in kindergarten, elementary, junior high school and secondary education. A pre-kindergarten school and a junior high school have been established. We have been given the degree-granting privilege in the fields of art, music, home making, and occupations and home mechanics. We hope to have the same privilege in the field of physical education very soon.

A recreational field of ten acres is now being purchased which will promote progress in the field of physical education. The Edwin Markham Health Cottage, a nine-room stucco building, which has been under construction since last summer, was entirely a student project, financed by sales and contributions, and in part constructed by college classes.

Classes in journalism have been organized. Emphasis has been placed on student participation in debating and dramatics. The caste of the dance drama, "The Nightingale and the Rose," presented in conjunction with the Fiesta de las Rosas, included the entire student body.

EXCERPTS FROM THE REPORTS OF PROGRESS SUBMITTED BY PRESIDENTS OF SPECIAL SCHOOLS.

THE CALIFORNIA POLYTECHNIC SCHOOL.

B. R. CRANDALL.

In order to reach a proper estimate of the development of this school in the past two years, many features should be considered, significant among them being that of enrollment. One hundred eighty-nine students in 1923 is reported as being the highest enrollment until this year when it suddenly jumped to two hundred fifty-five regulars and forty-four specials. Its distribution is also interesting—eighty-one communities and cities being represented, scattered through the entire length and breadth of the state. The general character and standard of the student body has improved perceptibly. More high school graduates and more girls are among the reasons for this improvement.

The home-making department was reopened with twenty girls in the regular course and forty-four women and girls in short courses. Double that number applied but owing to lack of instructors could not be accommodated.

The next largest per cent of increase in enrollment was in engineering. These graduates are in strong demand and the course is effective. Many agricultural students take this course because of the extensive use of power machinery and electricity on farms today. The enrollment in agriculture has increased. Growth in the printing department is about the same as that of home making. The academic department has the least increase.

CALIFORNIA SCHOOL FOR THE BLIND.

R. S. FRENCH.

Steady progress has been made in impressing on the people of California, particularly the public press, the fact that the state maintains

educational institutions for its sense-defective children and that these institutions are not homes or corrective or custodial institutions but purely educational in their aims and work. The use of the word asylum has almost entirely disappeared and only occasionally is the School for the Blind referred to as a home. One reason for this impression has been the strict adherence to that phrase in the law which demands of entrants "suitable capacity." A number of children have been dismissed because of mental inferiority and although their dismissal has brought considerable trouble in its train, the impression has been strengthened that only those of sufficiently high mentality to profit by the school course may remain as pupils and that the institution has no inmates, as such.

The good results of the health program are apparent both in the general health of the children and in their increased capacity for effective school work.

The completion of the girls' residence has been of great value, both by showing what may be done in effective institutional housing and by separating the blind girls completely from the contact with the deaf girls. This has ended the inevitable friction between the two groups and greatly increased happiness as well as self-helpfulness.

CALIFORNIA SCHOOL FOR THE DEAF.

W. A. CALDWELL.

The removal of the blind girls to their new building has made more classroom space available for the deaf, but there are still many more applicants than can be admitted. The addition of a primary building would not only make possible the admission of many who are at present denied entrance, but would enable us to segregate the entering pupils from the older ones, thus making possible more efficient results in the teaching of speech and lip-reading.

The health of the pupils has been good, aside from mild epidemics of chickenpox and mumps.

The work of schoolroom and shop has gone ahead as usual. Examinations are held three times during the year and reports of the results are mailed to parents. Parents are also kept informed of the school by means of the *California News*, which is issued from our printing office monthly during the year.

TEACHING THE HISTORY OF CALIFORNIA.

The law requires the teaching of California history in the elementary schools. In accordance with this law, the state has provided a brief synoptical history of California as a supplement to the State Series Beginners History. In many counties and cities supplementary texts dealing with the history of the state are used. It is my belief that in our teaching greater emphasis should be put on the history of the west, particularly California. To this end I have from time to time issued bulletins calling attention to important anniversaries and suggesting that the schools celebrate these anniversaries in a fitting manner. Two of the most important occasions mentioned were the Diamond Jubilee of California, marking the seventy-fifth anniversary of the admission of California into the Union, and the hundredth anniversary of the

coming of Jedediah Strong Smith, the first white American to come overland to California.

Following are excerpts from official bulletins relative to California history:

The Diamond Jubilee of California.

The ninth day of September, 1925, will mark the seventy-fifth anniversary of the admission of California into the Union. It is fitting and proper that the people of California, and particularly the school children of the state, should observe this anniversary. No better opportunity could be afforded for impressing upon the minds of Californians, whether native children or immigrants, the stirring events of the early days and for inculcating appreciation of the devotion and hardihood of the men and women who founded this state. Our young people should learn that the pioneers who founded California were quite as brave and hardy as the Pilgrim Fathers who founded New England. It took as much bravery to cross the plains or the Isthmus of Panama coming to California in 1849 as it did to cross the Atlantic in 1620. The spirit of the men who established and maintained law and order in this state, even before the establishment of organized government, is worthy of recognition.

I therefore suggest that the work of the schools for 1925 shall be so organized as to stress the history of California, particularly the history of the state from date of American occupation. Every community in the state has a history which can furnish a motive for school work. Classes in history may direct some of their time to the collection of materials dealing with the early days. The biographies of such men as Jedediah Smith, John C. Fremont, Josiah Gregg, William Lewis Manley, John Bidwell, John Sutter and James Marshall may be made subjects of compositions. The writings of Mark Twain, Bret Harte, Joaquin Miller, Edwin Markham, Ina Coolbrith, Charles Warren Stoddard and others may be drawn upon for materials to be used in reading and literature. In the high schools the work of the year may be made to culminate in a pageant depicting the early days of the state.

I request that superintendents and principals bring the matter to the attention of their teachers so they may plan to give fitting recognition to this important anniversary in the history of California.

Jedediah Smith Centennial.

It will be just one hundred years in November this year since Jedediah Strong Smith, the first American to cross the great plateau, made his now famous journey to California. He was with General Ashley's fur traders in the neighborhood of the Great Salt Lake during the summer of 1826. Inasmuch as the furs and pelts were becoming scarce in the Great Basin, young Smith was sent on to California to discover, if possible, a new area in which furs and pelts might be taken. After great hardships Smith reached California, and after even greater hardships returned to camp at Great Salt Lake.

The Historical Society of Southern California is sponsoring a fitting celebration to mark the hundredth anniversary of the coming of the first American citizen across the Sierras into our state. Throughout the state the classes in California history and in English should give attention to the Jedediah Smith Centennial. I commend the matter to the attention of all school people.

I also issued a special bulletin in which the story of Smith was told, the story having been written by Noel J. Breed, and published originally in the *San Francisco Chronicle*. Through the courtesy of the *Chronicle* the story was reprinted at the State Printing Office, and distributed to 25,000 teachers.

PATRIOTIC INSTRUCTION.

In accordance with law, the schools have stressed sane patriotic instruction during the biennial period, as is shown by the following

excerpts from bulletins of the Superintendent of Public Instruction issued during the period:

Observance of the Flag Code.

The National Americanism Commission of the American Legion has sent me a bulletin containing the Flag Code recommended by the American Legion and other patriotic organizations. The bulletin tells how the flag should be displayed on various occasions, discusses the proper use of bunting and how the flag should be saluted. It also contains an appeal to respect the flag, the history of the flag and other material of patriotic nature. I recommend that in your course in civics you refer to this bulletin, making its material a part of the material of instruction in this subject. I am asking the National Americanism Commission to send you a copy of the bulletin at once.

Lexington and Concord.

The nineteenth of April is the 150th anniversary of the Battle of Lexington and Concord, marking the beginning of the Revolutionary War which gave America her freedom. This anniversary offers a splendid opportunity for patriotic teaching. Our young people ought, on this anniversary, to remember the Minute Men, the ride of Paul Revere, the skirmish at Lexington, the firing of the "shot heard around the world" at Concord. I request that you give this anniversary special consideration and that you do what you can to arrange a fitting program for its observance.

Constitution Day.

September 17, 1925, marks the 138th anniversary of the signing of the Constitution of the United States. Inasmuch as the teaching of the constitution is required by law in the schools of California and inasmuch as the young people of the state should become acquainted with the spirit of this great document, I request that the date be observed in a fitting manner in all the schools of the state by holding suitable exercises in civics classes or general assemblies.

Pledge of Allegiance to the Flag.

Questions concerning the wording of the pledge of allegiance to the United States flag reaching this office indicate there is some confusion concerning the exact wording of the pledge. About two years ago I sent out the pledge of allegiance as originally recommended to me by the American Legion. However, the recommendation was later amended to include the following phrase "of The United States of America." The pledge should therefore read as follows:

"I pledge allegiance to the Flag of the United States of America and to the Republic for which it stands, one Nation, indivisible, with Liberty and Justice for all."

DEPARTMENT OF ADULT EDUCATION.

MISS ETHEL RICHARDSON.

In the last biennial report 1923-1925, the Department of Adult Education gave a history of the adult education work from the beginning in 1919 until June, 1924. This told the story of the initiation of education for the foreign adult under state supervision in California, and the expansion of the idea of education for the adult to include both the native and foreign born. The report of two years ago told a story of pioneering in the field of immigrant education for the adult. The last two years have been devoted to stabilizing and guarding the achievements of earlier years, pushing the work into new localities, enriching the content of the courses, both in English and Citizenship, and redefining the field of the problem.

The pioneer stage in immigrant education is past. The pioneering of the last two years has been in the field of adult education for the native born, and this report will, therefore, cover both subjects; adult

education for the foreign born and liberal education for all adults. The report will be submitted under the following headings:

- (1) Growth and Development of Immigrant Education.
- (2) Legislation.
- (3) Adult Education Conference.

Growth and Development of Immigrant Education.

Elaborate tables are submitted which give statistics concerning the places where classes are held and the enrollment and attendance in classes in English and Citizenship for foreign adults. It will be worth while, however, to call attention to the significant facts shown in these figures. It will first be noted that every city in California with a city school system has offered educational opportunity to its immigrants except Grass Valley, San Luis Obispo and Piedmont. Twenty-three of these cities have trained supervisors in charge.

So far as cities are concerned, there will probably be no expansion in numbers in the next few years, as the foreign population in the three cities mentioned is negligible. Between the year 1923-1924 and 1924-1925 there was an increase of 15 per cent in the number of classes offered in cities. Between 1924-1925 and 1926 there was an increase of 6.4 per cent. There have been slight increases in the enrollments as well in the past biennial. The number enrolled in 1923-1924 being 30,566; in 1924-1925, 36,323, and in 1925-1926, 33,454. The increase in the number of classes and in enrollments can scarcely continue with the cutting down of immigration and the consequent small number of new arrivals from foreign countries. It is always more difficult to encourage those to go to school who have lived in this country for a number of years. They are less eager to learn the language because they have managed to get along without it. The new arrival is most easily solicited for night classes.

The task of encouraging the establishment of night classes for foreigners in the cities of California is, therefore, completed, as there are no further possibilities of expanding into new places. Much remains to be done in working out more satisfactory organizations where the work is already being carried on. All the larger cities will be justified in employing directors of adult education in order to give the importance to this work that it deserves. So long as there is no administrative head for adult education, it will never be given original thought or a suitable share of school money.

Outside the cities, in the high school districts, which have become the natural units for administering the classes for foreign adults, much growth can be noted as well as great need for further expansion. It will be seen that in the union high school districts of the state, one-fourth of the elementary schools show a sufficient number of parents unable to speak English to justify the organization of a class. The number of high schools meeting this need is slowly growing. There were 75 in 1923-1924, 100 in 1924-1925 and 115 in 1925-1926. As a matter of fact, educational opportunities were offered in thirty new high

schools for the first time in 1925-1926. In thirteen high schools, where the work had been previously carried on, it was discontinued. There were 100 more classes organized under the high schools of California during the year 1925-1926 than in any year previously.

It is an interesting fact to note that the holding power of classes of foreign adults in the rural districts is twice as great as in the city districts. This is probably due to the fact that there are fewer attractions with which the school must compete in the country. It is also due to the fact that in the rural districts the evening schools for foreign adults are much more intimate, more recreational in character and often occupy the position of community centers.

In connection with the rural high schools, there is one achievement which should be noted: For some time the State Department has been anxious to carry the work into fields where there had been no success in the past, particularly in the lumber towns and the mining districts. A new high school in a lumber town will be opened next year with a full-time, trained teacher in charge of immigrant education. This is at Westwood, in Lassen County.

It is difficult to estimate the efficiency of the immigrant education program in terms of the demand. To say that last year we enrolled 10,909 foreign adults in country districts, with a gain of 7 per cent over the previous year, is an inconclusive statement. We can only judge our efficiency by showing the percentage of immigrants enrolled upon the whole number of non-English speaking adults in the state who might be enrolled. Unfortunately, this last figure is not available. As a very inadequate guide, we have taken the whole number of foreign born in the various counties and matched this figure against the number enrolled in classes for English and Citizenship. Obviously such a test does not tell the whole story. The county with a large number of foreign born residents may include many for whom English is the native tongue, while another county may have a far larger number of foreign speaking immigrants.

With this inadequate test, it is interesting to note that Monterey County has enrolled the largest percentage of its foreign population and Los Angeles County comes second. This scarcely seems a matter of chance, inasmuch as the county superintendent in Monterey has been conducting the most vigorous campaign and is providing classes, with the cooperation of the high schools of the county, in every district where there are enough students to warrant it. Los Angeles County is one which has a very large number of non-English speaking foreigners and it is, therefore, exceedingly creditable to have enrolled such a high percentage. Many of the cities in this county have a most effective and well organized system, notably Los Angeles City and Long Beach.

The percentage of the foreign population enrolled in English classes in the state as a whole is still much too small. The 1930 census should show a tremendous gain in California in eliminating illiteracy and making the English language the spoken language of the state. It will, therefore, be necessary to redouble our efforts in reaching new territories and in enrolling every non-English speaking man and woman possible in the classes which are organized. There are fifty-one high school districts in California where there are many foreigners unable to speak English where no opportunity is offered for them to learn. In the following sixteen districts where the need is particularly press-

ing, the State Department has, so far, been unable to induce the high school principal or the board of trustees to meet the need.

Covina		

Because the pioneer stage is past in this field, the most important development in the last two years is not shown in numbers, either of enrollment or classes, but in the improved character of the work offered. For this improvement, most of the credit should be given to Miss Ethel Swain, who has charge of teacher training in immigrant education for the University of California. Miss Swain gives courses under the university at any place in California designated by the State Department of Education. Although working for the university, there is the closest cooperation between Miss Swain's work and that of the public schools. She has gone far beyond what is ordinarily expected of the person in charge of teacher training. In addition to holding classes for teachers, she makes the most careful investigation of the schools with specific suggestions to meet the requirements of each classroom. In addition, the lesson material, which is prepared by her pupil-teachers, is carefully edited and used for the state at large.

The number of trained teachers in the state is gradually increasing. In fifty-three high school districts, 100 per cent of the teachers have had special training for the work; in thirteen cities 100 per cent of the teachers are specially trained. In the state at large, there are 80 per cent of the teachers who have taken special training courses.

In addition to the training courses given by Miss Swain, the Director of Adult Education has also given courses both in San Francisco and Los Angeles. The purpose of this was to emphasize the importance of better teaching in the more advanced classes. The first efforts for the education of the immigrant were directed toward the man and woman quite unable to speak English. Much study and thought was, therefore, put upon the methods in the classes for beginners. With the coming of the northern European immigrant in such large numbers, and the lessening of the illiterate immigration, it became necessary to improve the work in the classes where some English was spoken and a richer vocabulary required. Many of the adults in these classes came from countries where the system of education was as good, if not better, than in the United States. There were men and women of maturity and ideas, often greater maturity and more ideas than the teachers; their only handicap lay in their lack of means of expression. To develop this, the teacher must find lessons in the current of everyday affairs; lessons which would give the student the vocabulary of modern science; of the political and social discussions in the newspapers and magazines which would help him to read modern poetry and express his views on all the subjects which keep adults abreast of the times. Such teaching is much more difficult than the simple language lessons which equip an adult to orient himself in his physical environment, find his way about the streets, or make his purchases in the stores. The teachers must

have a better fundamental education and be themselves alert and keen in their intellectual interests.

In the last two years, a vast amount of lesson material has been prepared for these advanced classes. The best has been edited by Miss Swain and printed by the State Department of Education and sold at cost to the teachers of such classes. Other material is available in mimeograph form and exchanged from place to place. Material for classes in which foreign adults are preparing to be naturalized has also been prepared, and is sent as a guide for teachers. An effort was made in this syllabus to emphasize Citizenship as a growing process, rather than the acquisition of a few facts. To this end questions and controversies have been raised which would start discussion.

The most significant advance which has been made the last two years in the field of immigrant education is the independence which the movement has shown. A few years ago, much of the impetus for growth and development came from the state office; in the last two years, the state office has been unable to meet the demands which have been made upon it and has been required to do little in the way of encouragement or direction in this field. In the first place, in each section of the California Teachers' Association, special divisions have been formed for the teachers of foreign adults. These organizations have insisted upon speakers at institutes, experienced in reading the immigrant, and special division meetings for those who make this their major interest. These organizations maintain active committees doing important research in all phases of immigrant education and report at regular meetings of the whole group. An esprit de corps, and a sense of belonging to a special profession, has grown up which has made the standards very much higher than heretofore. One of the most important things which the teachers of these sections have done is the publication of the *Community Exchange Bulletin*. This bulletin is published four times yearly by the teachers in each of the four sections of the state. It offers plays, pageants, lesson material and examples of successful experiments which it would be valuable to try in other places. Nothing comparable to this bulletin is published anywhere in the United States and, as a result, it has a very wide popularity. The State Department made possible the printing of this through an arrangement with the State Printer.

Immigrant education in California is, therefore, no longer a one-man job; it is growing through the devoted cooperation of more than a thousand teachers who recognize in themselves special missionaries of an important cause. They have a social spirit unequalled in any other field in the teaching profession and they have fully realized that the achievements no longer depend on the state office, but their own organized efforts. California was given special recognition of its success in this field in the *Survey Graphic* of June, 1926, where some of the picturesque stories, not suitable for a biennial report, can be found.

Legislation.

The law which most affects the development of immigrant education and all adult education in the public schools of California is the one which requires that all the money earned in attendance in special day and evening classes, from both the state and county, must be spent for the same purpose. The county superintendents have been somewhat baffled in the enforcement of this law. The state office, therefore, this

year made a special effort for the education of county superintendents and high school principals, and sent a letter to every high school principal in the state where evening classes had been held, and a copy of that letter to the superintendent in whose county the high school is located, giving the precise amount of money earned in the preceding year in special day and evening classes. The county figures in almost no instance were correct, showing the need for such educational work. Before another year, it is important that the state office provide the county offices with a method of keeping separate both the earnings and expenditures of the high schools on special day and evening classes. Inasmuch as there has been some confusion in the interpretation of this law, it may be desirable that an amendment be made at the next session of the legislature making clear its meaning.

There has been much discussion concerning legislation which would make it possible for public schools to charge a small fee for adult classes. There is wide difference of opinion as to the advisability of such a law. In general, the southern part of the state is more in favor of free education for all adults and the northern for an opportunity to charge fees. All are agreed that elementary education, at whatever age it may be given, is the birthright of every American citizen and whatever legislation is possible should insure that right without cost. The question arises as to whether there should be a fee or whether a deposit should be made as a proof of the intention of the student or a charge be made for books. Several conferences on this matter have been held by the Director of Adult Education but, as yet, no agreement reached.

Adult Education Conference, Asilomar, 1925.

In order to strengthen the movement for adult education for both foreign and native born, the State Department of Education promoted a conference on adult education in the summer of 1925. This conference was called jointly by the State Department of Education, the State University, through its extension division, and the State Library. It devoted a week to a discussion of adult education problems. The last two days of it were devoted entirely to the education of the immigrant. Miss Marguerite Burnett, director of adult education, from Delaware, and Miss Ethel Swain, Extension Division of the University of California, were the principal speakers at this conference. The directors of immigrant education from the various cities and high school districts made reports on their work. It was the first time many of these directors had met and it served to break the isolation in which much of this work had been done heretofore. The superintendents and high school principals who attended were given inspiration from the enthusiasm which the workers in immigrant education expressed and the amazing ingenuity which they showed in dealing with the many unexpected problems which arise in the course of their day's work.

The special purpose of the conference, however, was to put before the people of the state the importance of seeing adult education in a new light. For several years, as was pointed out in the last biennial report, the State Department of Adult Education has taken the stand that it is the duty of the public school not only to educate its citizens but to keep them educated; that the intellectual life of a community should be continually growing through the activities of its schools.

Liberal Education for Adults.

During a study of adult education which was made in a five months' trip through Europe several years ago, the Director of Adult Education for the State Department was impressed with the wide spread movement to continue education at public expense, in order to keep the citizens of the country more alert to the problems of democracy and give them more capacity for managing their own affairs. The folk high schools of Denmark, the houses of the people of Belgium, Workers' Education Association and educational settlements of England, the Sokols and their educational bodies in Czechoslovakia are all carrying on liberal education in classes which are attended by all groups of people and particularly by working men and women.

The demand for education of this sort is limited in America because of our prosperity and freedom from political or religious pressure so that no one is very much concerned with problems of government and material advancement stifles our interest in intellectual growth. The fact that there is no widespread interest in the continuation of education in other than vocational fields here does not relieve the school of its responsibility. Because 100 per cent or even 50 per cent of the population could not be interested in studying social questions or keeping up with the trend of literature and science, is no excuse for failing to offer opportunity to even the 2 per cent that would avail itself.

The State Department of Education has, therefore, attacked this question in three ways. First, through conferences with the evening high school principals. The evening high schools are giving most of their work in the vocational field; the same effort has never been made to interest people in the study of history, or social questions, or English literature as to study Spanish or commercial geography or business law. Outstanding teachers in the liberal subjects have not been found for the adult classes. During the past two years a new attitude on this question has been growing up. Through the high school principals' conventions, the evening high school principals have become eager to see that adult education in the evening high school is not merely an unimportant adjunct of the day school. The principals have been committed to the idea that the evening school is definitely responsible for raising the educational level of the community. An effort has been made to find outstanding speakers in various subjects of public interest who would give short unit courses which were well advertised. These subjects have covered such questions as *Political Conditions in Europe With Their Effects Upon the United States, Current Events, Modern Poetry, Astronomy, What Psychology Teaches Us About Ourselves, Keeping Up With Science, League of Nations and the World Court, How Public Opinion Is Formed, and California Botany, etc.* These classes have reached a group of people who do not ordinarily attend evening high school and the educational range extends from those who have had practically no schooling to university graduates. The essential difference between these classes and those ordinarily offered in the evening high schools is the teacher. Some one is always chosen who is an outstanding figure, very well qualified in the subject with a capacity to present simply and authoritatively the material of his field. In addition, the teacher must be some one who understands adults and can make a strong appeal to an audience.

The second possibility for a liberal education movement comes from the advanced students in the classes for foreign adults. In several instances, they have been organized into a class in current events with a university instructor. One of these classes met in Oakland and another in Los Angeles. The instructors giving the extension courses reported them exceptionally interesting because of the mixture of nationalities and the eagerness of the students to learn. The adult foreign population, once a sufficient knowledge of English has been gained, is an eager recipient of further educational opportunities.

For the purpose of more rapid development, it seemed advisable to carry on experimentation under private auspices, as well as under the public schools. At the adult education conference, referred to above, three days of which were spent discussing liberal education for all adults, a state committee was formed, coordinating the work of the public educational agencies in the hope of reaching adults in every community which could not be reached by any of the opportunities now available. This committee, which formerly represented only the three public educational agencies, has been enlarged to include representatives of private colleges and universities and outstanding leaders throughout the state. A corporation has been formed with a board of directors of seventeen members, called the California Association for Adult Education. The State Director of Adult Education has raised private money to finance the work of this association which will carry on a program of social and political education in the state for the next year.

Parent Education.

There is an important aspect of adult education which has not yet been given state wide leadership. It has become very popular for classes and study groups to be formed by volunteer organizations to assist parents in the problems of child training. Throughout the United States many centers under universities and other educational bodies have been set up for experimentation and study of the development and growth of children. California felt the necessity of giving some authoritative leadership to this movement and experimenting to discover what part the public schools should play in the education of parents. To this end, the State Director made two trips to New York and assisted in negotiating a grant from one of the large eastern foundations to carry on a program of parent education under the public schools. A well qualified director for this work has been found in Dr. Herbert R. Stolz and classes will be started in the school year 1926-1927.

Migratory Courses of Study.

Although adult education is the special work of this department, the contact which it brings with the foreign adult has made it necessary to consider some of the problems of the non-English speaking child. The most pressing of these is found in the migratory school where the foreign child goes for a few weeks during the harvest season and is then passed on to another district.

During the summer of 1926, with the assistance of seven students at the University of California, a course of study has been prepared for the use of the migratory schools or for teachers who deal with these migratory children. This course of study is tentative and will be developed throughout the year. At present, it covers the subjects of English, arithmetic, hygiene, manual work and simple geography. One of the most interesting suggestions in the course of study is a list of materials that can be gotten without cost from all the various companies sending out material for advertising. Advertising has gone to such lengths that it is possible to get samples of almost everything which is used in the every day experience of a man and woman, by writing for such free samples—toothbrushes, linens, food products, drawing materials, toys, as well as the most elaborate concrete material showing the growth and manufacture of coffee, cotton, silk, rope, etc. One can almost show the industrial and agricultural development of the world by most picturesque material, if the teacher knows where to write for it. This will be helpful in the migratory school where equipment is meager and the children a very special problem. This curriculum will be sent out to any teachers who apply for it.

Adult Education and the Community.

The Department of Adult Education in the state, or in any local school system, is brought into the closest contact with the entire community. Its field should extend to every adult, no matter what his previous educational experience may have been. It is important that we begin to recognize education as a life-long process and the public schools should take an important part in giving to the men and women the equipment they need to make their own lives more satisfactory and their environments nearer the ideal. With an adult education program sufficiently broad in its implications and wide in its appeal, there should be reflected in the public schools, from the kindergarten to the most advanced class, an adaptability which would make education more nearly serve the ends to which it is dedicated. This makes adult education always a new adventure and makes it the link which keeps the school and the community together.

The statistics for the department are appended.

CHANGES IN THE STAFF OF THE STATE DEPARTMENT OF EDUCATION.

During the biennial period several important changes have been made in the staff of the State Department of Education. Some of the vacancies occurring were due to deaths; others were due to the inadequacy of compensation offered by the state. I wish to point out that it has been extremely difficult for the department to retain the services of its best equipped professional officers and employees. This has been true especially in the office of the Superintendent of Public Instruction. The salary of the Deputy Superintendent of Public Instruction is absurdly low considering the responsibilities of the position. The salary of \$3,000 a year which has been fixed for the Deputy Superintendent of Public Instruction is the lowest salary paid to the deputy of any state constitutional officer. I recommend that the salary of the Deputy Superintendent of Public Instruction be increased to \$4,500 per annum. The salaries paid to the Assistant Superintendents of Public Instruction appointed by the Superintendent of Public Instruction himself, are also absurdly low as compared with salaries paid for similar services elsewhere. The Assistant Superintendent of Public Instruction in charge of Adult Education is now being paid \$4,000 a year, which is less than that of any Assistant Superintendent or Supervisor appointed by the State Board of Education. The salary of the Assistant Superintendent in charge of Statistics and Research was, until July 1, 1926, at the rate of \$3,300 per annum. I recommend that the salaries of Assistant Superintendents of Public Instruction be fixed at \$4,500 per annum. In fact, all assistant superintendents connected with the State Department of Education should be paid at the same rate, the assumption being that their responsibilities are equal.

Specifically, the changes in the Department of Education during the last two years were as follows:

Mr. A. R. Heron, Assistant Superintendent of Public Instruction in charge of Statistics and Accounts, resigned to take effect January 1, 1926. He was succeeded in February, 1926, by Mr. Walter E. Morgan, who was given the title Assistant Superintendent of Public Instruction in charge of Statistics and Research.

Mrs. Grace C. Stanley, Commissioner of Elementary Schools, resigned her position in May, 1925. She was succeeded July 1, 1925, by Miss Mamie B. Lang.

Julian A. McPhee was appointed Assistant Supervisor of Agricultural Instruction August 1, 1925.

Mr. Ira W. Kibby was appointed Chief of Division of Industrial Rehabilitation July 1, 1925. This position was vacant during 1924-25 owing to the failure of the legislature of 1923 to make an appropriation for civilian rehabilitation work during the year ending June 30, 1925.

Mr. W. M. Coman became Assistant Secretary of the State Board of Education in charge of Credentials in July, 1924, and continued in that office until September 1, 1925, when he resigned. He was succeeded by Mrs. Evelyn A. Clement.

Miss Ruth M. Eakin was appointed Assistant Secretary in charge of Credentials at the Los Angeles office in November, 1925.

It is with deep regret that I chronicle the death of Dr. Frederic Burk, president of the San Francisco State Teachers College. His death occurred June 12, 1924. Dr. Burk had been president of the San Francisco State Teachers College since the institution first opened its doors, and had rendered a splendid service to the call of education during his long career. He was succeeded by Mr. A. B. Anderson, who was named as acting president.

I also announce with deep regret the death of Dr. E. R. Snyder, president of the San Jose State Teachers College. His death occurred January 13, 1925. Dr. Snyder became president of the San Jose State Teachers College in September, 1924, having been appointed to that office to succeed Dr. W. W. Kemp, who had resigned to become Dean of Education of the University of California. Before assuming his duties as president of the San Jose Teachers College, Dr. Snyder had served for a period of ten years as Commissioner of Industrial and Vocational Education. To him is due the larger share of credit for the organization of the California program of vocational education.

Following is a statement of the salaries paid to all members of the professional staff of the State Department of Education:

Superintendent of Public Instruction.

Superintendent of Public Instruction-----	\$5,000
Deputy Superintendent-----	3,000
Assistant Superintendent—Statistics and Research-----	3,300
Assistant Superintendent—Adult Education-----	4,000
Supervisor of Attendance-----	2,700
Secretary-----	2,700
Head of Textbook Department-----	2,700

State Board of Education.

Commissioner of Elementary Schools-----	4,500
Commissioner of Secondary Schools-----	4,500
Commissioner of Vocational Education-----	5,000
Supervisor of Trade and Industrial Education-----	4,200
Supervisor of Home Economics-----	4,200
Supervisor of Agricultural Education-----	4,200
Supervisor of Physical Education-----	4,200
Supervisor in Charge of Rehabilitation-----	4,000
Assistant Supervisor of Physical Education-----	3,000
Assistant Supervisor of Agriculture-----	3,600
Secretary, Commission of Credentials (Sacramento)-----	3,000
Secretary, Commission of Credentials (Los Angeles)-----	2,700
Secretary, Retirement Salary Board-----	2,600

ELEMENTARY SCHOOLS.

GRAPH No. 5

Sources of Total Receipts for Elementary Schools
1924-25.

Total receipts by the counties for elementary school purposes during the school year 1924-25 amounted to \$87,344,249.51. 52.8 per cent of the total receipts, or \$46,097,508.27, was derived from district sources, including current receipts and prior year balances; 28.3 per cent, or \$24,722,418.22, was derived from county sources; 18.6 per cent, or \$16,289,574.92, was derived from state sources; and .3 per cent, or \$234,748.10, was derived from the United States government. For explanation of the sources of elementary school receipts see footnote, Table 51.

ELEMENTARY SCHOOLS.

GRAPH No. 6.

Sources of Total Receipts for Elementary Schools
1925-26.

Total receipts by the counties for elementary school purposes during the school year 1925-26 amounted to \$98,502,664.35. 55.9 per cent of the total receipts, or \$55,061,315.77, was derived from district sources, including current receipts and prior year balances; 26.7 per cent, or \$26,301,471.83, was derived from county sources; 17.2 per cent, or \$16,931,838.99, was derived from state sources; and .2 per cent, or \$209,037.76, was derived from the United States government. For explanation of the sources of elementary receipts see footnote, Table 51.

¹ Receipts from state sources include totals of unapportioned elementary state school funds of counties, plus one-half of supervision and emergency funds of counties.

² Receipts from county sources include totals of unapportioned elementary county school funds of counties, plus one-half of supervision and emergency funds of counties, plus totals of institute and library funds of counties.

³ Receipts from United States include United States Forest Reserve funds and funds for education of Indian children.

⁴ Receipts from district sources include receipts from district taxes for maintenance and building, receipts from sale of district bonds, and miscellaneous district receipts.

⁵ District balances constitute balances on hand in district funds at beginning of school year, and comprise moneys received from state, county, federal and district sources, though largely the latter (district).

ELEMENTARY SCHOOLS.

TABLE No. 52.

Distribution of District Receipts and Balances, by Sources and Counties, 1924-25.

	Balance on hand at beginning of school year	Amount received from state apportionments	Amount received from county apportionments	Amount received from district taxes for maintenance	Amount received from district taxes for building	Amount received from sale of district bonds	Amount from miscellaneous sources*	Amount received by transfer from other districts in county	Amount received by transfer from other counties	Total receipts including balance from previous school year

HIGH SCHOOLS.

GRAPH No. 9.

Sources of Total Receipts for High Schools
1924-25.

Total receipts by the counties for high school purposes during the school year 1924-25 amounted to \$67,584,855.95. 73.6 per cent of the total receipts, or \$49,765,741.34, was derived from district sources, including current receipts and prior year balances; 19.8 per cent, or \$13,354,947.36, was derived from county sources; 6.4 per cent, or \$4,340,929.50, was derived from state sources; and .2 per cent, or \$123,237.75, was derived from the United States government. For explanation of the sources of high school receipts see footnote, Table 83.

HIGH SCHOOLS.

GRAPH No. 10.

Sources of Total Receipts for High Schools
1925-26.

Total receipts by the counties for high school purposes during the school year 1925-26 amounted to \$76,181,297.99. 74.7 per cent of the total receipts, or \$56,913,884.04, was derived from district sources, including current receipts and prior year balances; 18.8 per cent, or \$14,283,742.58, was derived from county sources; 6.3 per cent, or \$4,824,995.26, was derived from state sources; and .2 per cent, or \$158,676.11, was derived from the United States government. For explanation of the sources of high school receipts see footnote, Table 83.

HIGH SCHOOLS.

TABLE No. 83.

Percentage of Total Receipts for High Schools, Derived from Each Source, by Counties, 1924-25 and 1925-26.

1 Receipts from state sources include totals of unapportioned state secondary school funds of counties, plus one-half of Smith-Hughes receipts.

2 Receipts from county sources include totals of unapportioned county secondary school funds of counties.

3 Receipts from United States include one-half of Smith-Hughes receipts.

4 Receipts from district sources include all receipts from district taxes for maintenance and building and from sale of district bonds, plus miscellaneous district receipts.

5 Prior year district balances constitute balances on hand in district funds at beginning of school year, and comprise moneys received from state, county, federal and district sources, though largely the latter (district).

SECTION XI.

STATISTICAL SUMMARIES.

STATISTICAL SUMMARIES.

	1924-25	1925-26
I. KINDERGARTENS.		
Number of elementary school districts maintaining kindergartens.....	228	238
Number of counties in which kindergartens were maintained.....	45	45
Number of separate kindergartens maintained.....	815	907
State enrollment.....	58,762	68,142
Average daily attendance.....	29,620	34,222
Average number of days maintained.....	183	185
Number of teachers employed ("principals" included).....	1,062	1,187
Number of supervisors employed.....	9	9
Total number employed.....	1,071	1,196
Average annual salary of teachers ("principals" included).....	\$1,589 92	\$1,612 03
Average annual salary of supervisors.....	2,480 00	2,522 22
Number holding each type of certificate:		
a. Kindergarten (only).....	327	344
b. Kindergarten-first grade.....	512	576
c. Kindergarten-primary (including grades 1-3).....	232	276
Totals.....	1,071	1,196
Valuation of kindergarten property.....	\$453,285 00	\$459,808 00
Valuation of property per pupil in A. D. A.....	15 30	13 44
Total expenditures (excluding capital outlays and transfers).....	2,090,613 98	2,344,941 13
Expenditure per pupil in A. D. A. (based on above figure).....	70 58	68 52
II. ELEMENTARY SCHOOLS.		
Number of active districts:		
a. Regular.....	2,815	2,769
b. In unions.....	418	425
c. Joint.....	66	66
Totals.....	3,299	3,260
Number of suspended districts.....	124	125
Number of union districts.....	151	153
Percentage of active districts in unions.....	12.7	13.0
Number of schools maintained.....	4,095	4,125
State enrollment, grades 1-8 inclusive (grades 7 and 8 in junior high schools included):		
First grade.....	133,374	133,561
Second grade.....	85,180	88,169
Third grade.....	82,242	83,804
Fourth grade.....	83,244	82,127
Fifth grade.....	80,220	81,482
Sixth grade.....	74,646	77,056
Seventh grade.....	67,167	73,584
Eighth grade.....	68,976	71,751
Totals.....	675,049	691,534
State enrollment, post-graduate classes:		
First year.....	82	34
Second year.....	18	18
Totals.....	100	52
Number of eighth grade graduates (including junior high school).....	52,815	55,694
Average daily attendance (grades 7 and 8 in junior high schools included).....	561,004	576,448
Average number of days maintained.....	181	180
Number of principals employed:		
Men.....	639	653
Women.....	1,577	1,631
Totals.....	2,216	2,284
Number of regular teachers employed:		
Men.....	427	451
Women.....	17,270	17,819
Totals.....	17,697	18,270
Number of supervisors of special subjects:		
Men.....	56	49
Women.....	203	197
Totals.....	259	246
Number of teachers of special subjects:		
Men.....	361	384
Women.....	934	1,013
Totals.....	1,295	1,397

STATISTICAL SUMMARIES—Continued.

	1924-25	1925-26
II. ELEMENTARY SCHOOLS—Continued.		
Number of district superintendents:		
Men.....	89	98
Women.....	5	8
Totals.....	94	106
Total employed by districts:		
Men.....	1,572	1,635
Women.....	19,989	20,668
Totals.....	21,561	22,303
Number holding each type of teacher's certificate:		
a. Regular secondary.....	761	891
b. Junior high.....	*243	571
c. Regular elementary.....	18,813	19,048
d. Primary.....	404	441
e. Special.....	1,340	1,352
Totals.....	21,561	22,303
Number of rural supervisors employed by counties:		
General—		
Men.....	22	27
Women.....	41	43
Totals.....	63	70
Special—		
Men.....	19	22
Women.....	52	67
Totals.....	71	89
Grand totals.....	134	159
Average annual salaries paid:		
a. Principals—		
Men.....	\$2,318 60	\$2 400 07
Women.....	1,930 20	2,006 06
Average.....	\$2,042 20	\$2,118 71
b. Regular teachers—		
Men.....	\$1,709 10	\$1,763 08
Women.....	1,640 63	1,696 41
Average.....	\$1 642 28	\$1,698 06
c. Supervisors of special subjects—		
Men.....	\$2,684 08	\$2,890 83
Women.....	2,506 62	2,695 64
Average.....	\$2,544 99	\$2,734 52
d. Teachers of special subjects—		
Men.....	\$1,896 91	\$1,941 51
Women.....	1,723 20	1,850 43
Average.....	\$1,771 62	\$1 875 47
e. District superintendents—		
Men.....	\$3,340 24	\$3,383 03
Women.....	2,709 00	2,560 00
Average.....	\$3,306 66	\$3,320 92
f. Full-time rural supervisors—		
Men.....	\$3,139 03	\$3,583 41
Women.....	2,738 89	2,687 01
Average.....	\$2,861 16	\$2,958 87
Total valuation of elementary school property.....	\$173,626,916 00	\$193,035,533 00
Valuation of elementary school property per pupil in A. D. A.....	309 49	334 87
Total outstanding bonded indebtedness for elementary schools.....	93,589,274 00	107,996,522 00
Total district expenditures (excluding capital outlays and transfers).....	47,718,377 25	52,008,285 97
Expenditure per pupil in A.D.A. (based on above figure; A. D. A. of 7th and 8th grade pupils in junior high schools excluded, except in San Francisco city and county).....	90 30	97 15

*Incomplete segregation.

STATISTICAL SUMMARIES—Continued.

	1924-25	1925-26
III. JUNIOR HIGH SCHOOLS.		
Number of high school districts maintaining junior high schools.....	35	40
Number of counties in which maintained.....	18	21
Number of junior high schools maintained:		
a. With grades 7, 8, and 9.....	95	106
b. With grades 7, 8, 9, and 10.....	4	7
Totals.....	99	113
State enrollment:		
a. In grade 7.....	18,381	25,114
b. In grade 8.....	18,157	23,417
Totals, grades 7 and 8.....	36,538	48,531
c. In grade 9.....	27,495	32,981
d. In grade 10.....	48	210
Totals, grades 9 and 10.....	27,543	33,191
Totals, junior high school.....	64,081	81,722
Percentages of total state enrollment in junior high schools:		
Seventh grade.....	27.37	34.13
Eighth grade.....	26.32	32.64
Ninth grade.....	39.67	44.71
Tenth grade.....	.11	.43
Average daily attendance:		
a. In 7th and 8th grades.....	33,822	43,735
b. In 9th and 10th grades.....	18,607	22,048
Totals.....	52,429	65,783
Average number of days maintained.....	179	180
Number of principals employed:*		
a. Full-time in junior high schools—		
Men.....	57	63
Women.....	12	12
Totals.....	69	75
Number of teachers employed:*		
a. Full-time in junior high schools—		
Men.....	445	600
Women.....	1,734	2,144
Totals.....	2,179	2,744
b. Partial-time in junior high schools.....	752	886
Totals.....	3,000	3,705
Total number employed.....		
Average annual salaries paid:		
a. Full-time principals—		
Men.....	\$3,455 62	\$3,606 83
Women.....	3,058 33	3,418 67
Average.....	\$3,386 53	\$3,576 72
b. Full-time teachers—		
Men.....	\$2,269 52	\$2,254 69
Women.....	2,183 34	2,154 39
Average.....	\$2,200 94	\$2,176 32
Total valuation of property reported for junior high schools.....	\$15,653,600 00	\$21,881,574 00
Valuation of property per pupil in A. D. A.....	298 57	332 63
IV. HIGH SCHOOLS.		
Number of districts of each type:		
a. County.....	8	8
b. City.....	30	30
c. Regular.....	24	28
d. Union.....	199	199
e. Joint union.....	23	24
Totals.....	284	299
Number of high schools maintaining:		
a. 1 year (includes 95 junior high schools in 1924-25 and 106 in 1925-26).....	101	111
b. 2 years (includes 4 junior high schools with grades 9 and 10 in 1924-25; 7 in 1925-26).....	9	11
c. 3 years (includes 38 senior high schools with grades 10, 11, and 12 in 1924-25; 51 in 1925-26).....	40	55
d. 4 years.....	288	281
Totals.....	438	461

*Data reported on junior high school principals and teachers incompletely segregated.

STATISTICAL SUMMARIES—Continued.

	1924-25	1925-26
IV. HIGH SCHOOLS—Continued.		
Number of high schools with special day and evening classes.....	136	157
Number with evening high school classes.....	68	77
Number with compulsory part-time classes.....	58	62
Number with junior college courses.....	17	19
Number of elementary school districts maintaining high school classes (Sec. 1610½ P. C.).....	6	7
State enrollment:		
a. In regular high school (junior high included)—		
Grade 9.....	69,303	73,289
Grade 10.....	43,982	48,582
Grade 11.....	32,617	34,655
Grade 12.....	24,147	26,602
Special.....	3,355	2,978
Totals.....	173,404	186,106
b. In special day and evening classes—		
Special day classes.....	10,091	12,342
Special evening classes.....	38,814	36,815
Totals.....	48,905	49,157
c. In compulsory part-time classes.....	18,240	19,241
d. In evening schools.....	105,325	127,213
e. In junior college courses.....	1,944	2,293
Totals, high school.....	347,818	384,010
Number of graduates from four-year course.....	21,894	23,992
Number of graduates from junior college courses of high schools.....	218	197
Average daily attendance:		
a. Regular high school (including 9th and 10th grades in junior high schools).....	140,779	150,448
b. Special day and evening classes and evening schools.....	10,599	11,963
c. Compulsory part-time classes.....	2,760	3,153
d. Junior college courses.....	1,417	1,504
Total for state apportionment purposes.....	155,555	167,068
Average number of days maintained.....	184	181
Number of principals employed:		
Men.....	380	407
Women.....	33	32
Totals.....	413	439
Number of teachers employed:		
a. Full-time—		
Men.....	3,014	3,492
Women.....	6,119	6,896
Totals.....	9,133	10,388
b. Partial-time—		
Men.....	553	464
Women.....	643	579
Totals.....	1,196	1,043
Total number employed.....	10,742	11,870
Average annual salary paid:		
a. Principals—		
Men.....	\$3,568 80	\$3,607 30
Women.....	3,045 21	3,208 15
Average.....	\$3,526 96	\$3,578 20
b. Full-time teachers—		
Men.....	\$2,345 84	\$2,436 27
Women.....	2,203 62	2,212 64
Average.....	\$2,250 55	\$2,287 81
Number holding each type of teacher's certificate:		
a. General secondary.....	6,189	6,950
b. Special secondary.....	4,248	4,568
c. Junior high school.....	272	297
d. Elementary.....	33	55
Totals.....	10,742	11,870

STATISTICAL SUMMARIES—Continued.

	1924-25	1925-26
IV. HIGH SCHOOLS—Continued.		
Total valuation of high school property.....	\$113,343,061 00	\$134,933,008 00
Valuation of high school property per pupil in A. D. A.....	728 64	807 65
Total outstanding bonded indebtedness for high schools.....	71,854,900 00	92,481,475 00
Total district expenditures (excluding capital outlays and transfers).....	35,247,143 09	39,747,714 06
Expenditure per pupil in A. D. A. (on above figure; average daily attendance of junior high schools, all grades, except 7 and 8 in San Francisco, included).....	187 35	190 91
V. JUNIOR COLLEGE DISTRICTS.		
Number of junior college districts maintained.....	8	8
Number of counties having junior college districts.....	7	7
State enrollment:		
a. First year.....	1,506	1,883
b. Second year.....	541	790
Total, first and second years.....	2,047	2,673
c. Special classes.....	1,280	806
Total state enrollment.....	3,327	3,479
Number of graduates.....	243	385
Average daily attendance.....	1,605	2,068
Average number of days maintained.....	177	177
Number of principals employed.....	8	8
Number of teachers employed:		
a. Full-time—		
Men.....	41	54
Women.....	18	31
Totals.....	59	85
b. Partial-time—		
Men.....	89	73
Women.....	74	74
Totals.....	163	147
Total number employed.....	230	240
Average salary paid principals.....	\$5,083 75	\$5,197 50
Average salaries paid full-time teachers:		
Men.....	\$2,655 32	\$2,796 01
Women.....	2,545 61	2,574 19
Average.....	\$2,624 62	\$2,721 33
Total valuation of junior college property.....	\$445,022 00	\$1,038,129 00
Valuation of junior college property per pupil in A. D. A.....	277 27	502 00
Total outstanding bonded indebtedness for junior colleges.....	650,000 00	950,000 00
Total district expenditures (excluding capital outlays and transfers).....	515,846 30	664,457 83
Expenditure per pupil in A. D. A. (on above figures).....	321 40	321 30
VI. STATE TEACHERS COLLEGES.		
Number of state teachers colleges.....	7	7
Enrollment:		
a. Regular semesters (duplicates eliminated).....	4,084	5,174
b. Summer session.....	3,109	4,036
c. Extra-hour classes.....	1,687	1,342
Totals in teachers college classes.....	8,880	10,552
d. Junior college classes*.....	1,447	1,562
Totals in teachers colleges.....	10,327	12,114
Number of graduates:		
a. With degrees (4-year course).....	75	174
b. With credentials (3-year course).....	1,102	1,176
c. From junior college course (2 years).....	161	98
Number of teachers college presidents employed.....	7	7
Number of teachers employed:		
a. Regular full-time faculty members—		
Men.....	92	105
Women.....	156	169
Totals.....	248	274

*State enrollment reported in high school section. Classes maintained by contract for high school districts.

STATISTICAL SUMMARIES—Continued.

	1924-25	1925-26
VI. STATE TEACHERS COLLEGES—Continued.		
b. Part-time faculty members—		
Men.....	20	30
Women.....	28	35
Totals.....	48	65
c. Summer session faculty members—		
Men.....	90	96
Women.....	105	91
Totals.....	195	187
Total number employed.....	498	533
Average annual salary of teachers college presidents.....	\$5,657 14	\$5,971 43
Average annual salary of regular full-time faculty members:		
Men.....	\$2,882 44	\$2,979 38
Women.....	2,458 15	2,505 93
Average.....	\$2,615 53	\$2,687 36
Total valuation of teachers college property.....	\$3,527,661 65	\$3,971,261 67
Total ordinary expenditures.....	939,957 47	1,102,279 95
Number of state teachers colleges maintaining kindergarten training school classes**.....	3	3
State enrollment in kindergarten classes of training schools.....	245	249

LETTER OF TRANSMITTAL.

CONTROLLER'S DEPARTMENT, STATE OF CALIFORNIA,
SACRAMENTO, December 14, 1926.

To The Honorable FRIEND WM. RICHARDSON,
Governor of California.

SIR: I herewith submit to you my biennial report for the seventy-sixth and seventy-seventh fiscal years, as required by law.

RAY L. RILEY,
Controller.

INTRODUCTION.

REVENUE AND TAXATION.

The general fund surplus will approximate \$15,000,000 as of June 30, 1927, an increase of \$4,000,000 over the June, 1926 estimates made by this department. In the event a \$5,500,000 appropriation for highway construction, authorized at the last legislative session, is unexpended the present surplus will be augmented to that extent.

Decreased elementary and high school requirements that are general fund obligations, larger reversions of old appropriations, and increased institutional fees, are responsible for the increased estimates.

Estimated general fund revenues for the ensuing biennial period of \$113,602,000, plus the probable surplus of \$15,000,000, will provide ample funds to finance State requirements for the next two years.

An analysis of the surplus indicates that it is transitory in character and will be absorbed by increased fixed charges and normal departmental expansion within the next four years. On June 30, 1923, there was a general fund surplus of \$4,707,852.21. This surplus increased to \$11,435,670.24, as of June 30, 1925, and on June 30, 1927, there will be a surplus of approximately \$15,000,000. During the past two years \$11,500,000 has been paid into the general fund by railroad companies to cover the impounded taxes, as a result of the King tax bill litigation. It is to be observed that the sum so received, plus the surplus on hand as of June 30, 1923, is substantially the present general fund surplus. During the present biennium, revenues have been affected by an additional increase of \$2,500,000 each year from this source, and if a legitimate surplus was accumulating over and above expenditures, the June 30, 1927 surplus would total \$20,500,000. The present surplus of \$15,000,000 is inclusive of all reversions of former appropriations as of August 30, 1927.

The budget for the seventy-ninth and eightieth fiscal years will reduce the general fund surplus to \$10,000,000, as a minimum, without taking into consideration special appropriations for road construction or other items commonly provided for at each legislative session.

California's public service corporations have been expanding rapidly during the past four years and franchise taxes have increased to correspond with the growth. The high point was reached in 1925. Continued prosperity will tend to stabilize the state's fiscal position; however, a period of depression would be disastrous to revenue sources and it is imperative that the present sources of state revenue be conserved in so far as possible in order to provide against such a contingency. Meanwhile, every effort should be made to protect the present surplus. California's tax system does not permit balancing of budgets and it is impossible to employ ordinary governmental procedure by levying a tax sufficient in amount to meet authorized expenditures. Tax problems are increasing much faster than they are being solved. This is especially true of municipal and agricultural units. The present tax system has negated the powers of the

State Board of Equalization, the only state body that has been in a position to secure tax data for legislative guidance, and as a result the drifting policy that has been followed by the state has caused endless controversies and acute legislative situations over tax questions. There is no machinery provided by the state to collect adequate data and it is earnestly recommended that legislative authority be exercised in directing a comprehensive study of the present tax structure as it affects all classes of taxpayers within the state. Sufficient funds should be provided to accomplish the purpose and ample time given to prepare findings and recommendations for legislative consideration.

SELF-SUPPORTING AGENCIES.

The last biennial report called attention to the revenues of self-supporting agencies and the necessity of legislative determination regarding their status. Large balances are continuing to accumulate in several special funds far in excess of any possible needs. These balances should be reverted to the general fund, or fees sufficiently reduced to absorb the surplus within a reasonable time. All agencies collecting excess funds should have legislative attention by fee reductions to an amount required for proper administration.

During the past four years it has been legislative policy to appropriate a portion of the fees of self-supporting agencies for the ensuing two year period, apparently with the idea that deficiency appropriations would be made from time to time as occasion might require, leaving the matter entirely in the hands of the Board of Control and the Chief Executive. If this policy is to be continued, it would seem idle to budget self-supporting agencies for any amount whatsoever and leave the fund under control of the above-mentioned agencies, for that is the practical operation at the present time. A cursory examination of the number of deficiencies allowed for the various self-supporting agencies will demonstrate the accuracy of this statement.

Especial attention is directed to the Real Estate Department, that is collecting a large surplus each year, reverting directly to the general fund on the 1st of January. The Corporation Department is typical of those agencies with an excessive special fund that does not revert to the general fund.

HIGHWAY FINANCING.

Controversy over highway financing continues and again requires legislative consideration. This office has opposed additional funds for highway purposes until a definite construction policy be adopted. It is probable that the forthcoming legislature will be able to agree upon a budget plan comprehensive enough to cover specific projects and acceptable to the state as a whole. When that is accomplished the problem of financing becomes comparatively easy. It is recommended that the appropriation for the Highway Commission be a lump sum, inclusive of maintenance, reconstruction, and new construction. This would result in a substantial saving in accounting and remove fund controversies that arise between the Highway Department and this office.

APPROPRIATIONS.

During the past six years a careful study has been made of appropriating funds for departmental requirements, and in the opinion of

the Controller a lump sum appropriation for support and salary would expedite state business and would be more satisfactory to the departments, besides a saving in accounting. On the other hand, the method that has been employed during the past four years by the legislature in making appropriations for permanent improvements is contrary to good business practice, for the following reasons: The legislature has definite information upon which it proceeds to act in making an appropriation and presumes that the money so appropriated will be expended for the purpose intended. As a practical result, this may or may not happen. The Board of Control or other state agencies during the interim after the appropriation is made may deem it advisable to employ the appropriation so made for an entirely different purpose, diminish or increase the amount of a specific item at their pleasure. If the legislature wishes to delegate this authority to the Board of Control in the matter of permanent improvements, it would be advisable to appropriate a lump sum for institutions, and permit the Board of Control to expend the same as they desire during the biennial period. The constitution originally contemplated that appropriations of this character should be for a single and certain purpose to be therein expressed. Upon the adoption of the budget amendment requiring the inclusion of permanent improvements in the budget bill, the legislature lost sight of the original constitutional requirements regarding permanent improvements and because the budget bill authorizes the inclusion of more than one item of appropriation, the Controller was unable to question the legality of the appropriation so made.

It is earnestly recommended that future appropriations for permanent improvements be specific in character and for the particular purpose intended by the legislature, even though the same may be included in the budget bill.

MOTOR VEHICLE FUEL TAX.

This tax, commonly referred to as the "Gasoline Tax," was passed by the legislature of 1923 and became effective October 1, 1923. The license of two cents per gallon on all products capable of being used for the operation of a motor vehicle has produced a gross revenue of \$30,245,635.53 during the past two fiscal years. Of this amount \$2,524,346.08 has been returned to claimants where the fuel was not used for propelling vehicles over public roads, leaving a net revenue of \$27,721,289.45, which is apportioned one-half to the several counties of the state in proportion to the number of motor vehicles registered from the county, and one-half to the state, to be expended under the direction of the State Highway Commission for the repair, maintenance, widening and reconstruction of state highways. Under the present act none of these funds may be used for new construction of state roads.

The amendment passed by the legislature of 1925 providing a penalty of 10 per cent for nonpayment of the tax within the specified limit of 45 days after the end of the quarter and the elimination of the contract clause has worked very effectively in forcing payment of all amounts due from distributors. There are several cases pending before the State Supreme Court involving the legality of contracts approximating an amount of one million dollars.

For the last two fiscal years 103,279 individual claims for refunds amounting to \$2,524,346.08 have been passed by the department at a total cost of \$22,381.11.

The tax is economical of administration, there being only between seventy and eighty assessments each quarter which allows both the assessing and collecting to be carried on by the regular forces of the departments affected.

MOTOR VEHICLE TRANSPORTATION LICENSE TAX.

The reaction of the taxpayer to this tax is different from that of any other class. At least 10 per cent of those affected violently protest the payment of their assessments and measured by the revenue produced it is a failure as well as the most unpopular tax ever conceived by the legislature. Since the act became operative in 1923, only \$214,758.23 has actually been collected upon levies aggregating \$1,080,391.38. The delinquency is partially due to continuous litigation since the act was passed and by an injunction issued out of the superior court of San Francisco restraining the Controller from enforcing collection. Under the statute the tax is levied by the State Board of Equalization upon the gross receipts of trucks and busses used commercially, and is collected by the Controller. Because of the migratory nature of the trucking business it is practically impossible to assess and collect from all operators. Collection is expensive to a degree not encountered in any other revenue measure.

At the general election in 1926 a constitutional amendment was passed providing that common carriers, both trucks and busses operating on schedule between fixed termini, should be assessed in the same manner as other public utilities, that is upon gross receipts as determined by the State Board of Equalization and collected in two yearly installments. This leaves only the smaller operators to be assessed quarterly under this act.

Because of the small revenue derived and the high comparative cost of administration, it is recommended that some other mode of taxing trucks and busses not affected by the new amendment be devised, to be collected at the time of registration or some other method that will produce an equal revenue but more economical in administration.

DELINQUENT TAX LANDS.

The number of sales to the state for delinquent taxes for the seventy-sixth and seventy-seventh fiscal years exceed those of the former biennial report by 32 per cent. During this same period of time the amount paid into the county treasurer's funds for redemptions was increased by 72 per cent.

The state's interest in these redemptions made, as shown by comparison with prior report, has fallen off 40 per cent. This decrease is the result of the change in the law separating the state and county sources of revenue, and this interest must continue to decrease with the years.

The amount received by the counties from sales by the state under section 3897 of the Political Code has increased for this period of time, but the state's proportion of the amount due from such sales has fallen off by almost 50 per cent.

In 1921 by legislative enactment, all moneys due the state from sales under section 3897, is deposited in the Veterans' Tax Land Fund, to be used for educational purposes for the dependents of veterans. (Section 3898*a* of the Political Code.)

INHERITANCE TAX.

Although the work of this department has greatly increased in the past two years, practically no additions have been made in the number of persons employed therein.

The collections for the past year are the largest of any, totaling in exact figures \$7,856,936.22 or a net to the state of \$7,424,174.56. A glance at the accompanying tables will show a material increase in the number of estates handled over previous years and when we note that the cost of collection has not increased it speaks well for the efficient administration of the Inheritance Tax Law. The largest number of estates administered upon for any previous year was 2048, while in 1925 the total was 2451, and in 1926, 2732.

That the department has been eminently fair in its treatment of the public is proven by the fact that never in its history has it had fewer matters before the courts for determination and it is hoped that while collections increase, law suits may decrease. In those instances where it has been necessary to appear before the courts, the contentions of the department's attorneys have been uniformly successful.

The status of inheritance tax legislation is materially changed since the last session of the legislature. At that time the federal government allowed 25 per cent credit against the federal tax for taxes paid the state. The new federal revenue measure passed at the last session of congress increased this credit to 80 per cent, therefore, in the majority of estates the combined federal and state tax amounts to but one tax, because of this credit.

The last legislature made some material changes in the law. One of particular moment was to enact into the statute the provision that personal property wherever acquired, if acquired during marriage, is the community property of husband and wife. This amendment gave to citizens of other states, wishing to become residents of California, the same benefits under the inheritance tax statutes as our long time residents enjoyed. The reaction to this piece of legislation has been more than satisfactory and has shown the wisdom of placing it in our act. Another amendment had to do with the taxation of stock in our domestic corporations. In order to receive some revenue upon the transfer of this class of property and still not have it too heavy in amount, an amendment was sponsored taxing such property at a flat rate of 2 per cent of its market value. This necessarily meant the loss of some revenue but the increase in other business channels warranted the change.

For the past two years the department has kept an accurate check on the character of property passing through probate and the figures reveal the interesting information that 70 per cent of the property passing is intangible personalty such as stocks, bonds, cash, etc. From this it is readily seen that a large amount of property not otherwise levied upon for local purposes is finally taxed upon death.

The amounts collected for the years preceding the last four, are as follows:

Year ending June 30, 1913	\$1,586,672 80
Year ending June 30, 1914	1,654,951 42
Year ending June 30, 1915	2,924,610 95
Year ending June 30, 1916	3,145,210 63
Year ending June 30, 1917	3,830,952 13
Year ending June 30, 1918	2,725,406 98
Year ending June 30, 1919	3,409,012 06
Year ending June 30, 1920	2,678,158 63
Year ending June 30, 1921	6,804,731 98
Year ending June 30, 1922	6,344,619 35

The following tables show the amount of tax derived from the small and larger estates for the past four years. Attention is called to the fact that figures opposite "aggregate value" are the net estates after all other costs of administration, debts, etc., have been deducted and do not represent the gross value of the property in probate. For the year ending 1923 the percentage of the net tax collected and paid to the net aggregate value was .046 per cent; in 1924, .044 per cent; in 1925, .042 per cent; and in 1926, .041 per cent.

Computations Covering Inheritance Tax Receipts, Seventy-fourth Fiscal Year, July 1, 1922, to July 1, 1923.

Number of estates	2048
Aggregate value	\$105,181,538 50
Net amount of tax	4,949,205 11
One thousand seven hundred three estates, valued at less than \$100,000 each, paid taxes amounting to	\$726,754 41
Two hundred forty-one estates, valued at from \$100,000 to \$500,000 each, paid taxes amounting to	1,471,220 05
Twenty-one estates, valued at from \$500,000 to \$1,000,000 each, paid taxes amounting to	752,791 29
Thirteen estates, valued at over \$1,000,000 each, paid taxes amounting to	1,594,203 37
Seventy estates, in which the valuation has not yet been determined, paid taxes amounting to	404,235 99
	\$4,949,205 11
Refunds	83,344 47
	\$4,865,860 64
Less—	
Treasurers' commissions	\$29,862 87
Appraisers' fees and court costs	58,047 42

CORPORATION TAXES.

Owing to the ever-increasing demand for additional funds to carry on various state institutions, it was necessary for the legislature of 1921 to raise the rates on all corporations. The table follows:

Corporations	1911-12 per cent	1913-14 per cent	1915-16 per cent	1917-18 per cent	1919-20 per cent	1920-21 per cent	1921-22 per cent
Railways	4	4.75	5.25	5.25	5.25	7	7
Electric railways.....						5.25	5.25
Car companies.....	3	4	3.95	3.95	3.95	5.25	5.25
Express companies	2	2	1.60	.90	.90	1	1
Telegraph and telephone companies	3.50	4.20	4.50	4.20	4.20	5.50	5.50
Gas and electric companies	4	4.60	5.25	5.60	5.60	7.50	7.50

During the fifteen years in which the new tax system has been in operation, the collections for each year were as follows:

1911-12	\$10,387,206 66
1912-13	10,887,144 77
1913-14	12,963,660 10
1914-15	13,516,046 50
1915-16	14,993,584 42
1916-17	15,649,356 24
1917-18	16,379,488 82
1918-19	17,667,295 10
1919-20	19,477,073 50
1920-21	22,272,149 04
1921-22	31,111,611 22
1922-23	32,293,313 32
1923-24	33,544,172 09
1924-25	42,286,142 58
1925-26	47,355,511 17

The cost of collections from 1912 is as follows:

1912	\$0.009
1913	.007
1914	.0075
1915	.0066
1916	.0068
1917	.0051
1918	.0041
1919	.0039
1920	.0036
1921	.0033
1922	.0028
1923	.0027
1924	.0026
1925	.0023

The number of corporations assessed since this law has been in operation is as follows for each of the fifteen years:

1911-12	19,721
1912-13	19,693
1913-14	20,478
1914-15	20,979
1915-16	21,994
1916-17	19,623
1917-18	18,223
1918-19	18,578
1919-20	18,095
1920-21	20,033
1921-22	20,453
1922-23	20,551
1923-24	21,899
1924-25	23,878
1925-26	24,911

SAN FRANCISCO HARBOR TRANSACTIONS.

	1925	1926
Cash receipts, seventy-sixth fiscal year, ending June 30.....	\$2,856,339 50	-----

EXPLANATION.—The excessive increase in personal property for 1913 over 1912 is due to Los Angeles, San Francisco and other counties assessing franchises as personal property and Kern County switching approximately \$18,000,000 in oil wells from real estate and improvements to personal property. In 1914 Kern County returned the oil well assessments to the real estate and improvements column on her rolls.

STATEMENT No. 15.

Showing Collection of Taxes as Levied by the State Board of Equalization under Section 14, Article XIII, of the Constitution, for the Year Ending June 30, 1925.

	Total taxes levied	Total taxes collected	Penalties collected	Taxes delinquent	Penalties delinquent	Total delinquency	Duplications and illegal levies	Lieu taxes	Taxes collected on 1924 assessment roll during 75th fiscal year	Paid by allowance of credit

Total collections as shown by the various assessment rolls during the fiscal year ending June 30, 1925:

Taxes and penalties collected on 1912 assessment roll	\$141 00
Taxes and penalties collected on 1913 assessment roll	22 50
Taxes and penalties collected on 1914 assessment roll	39 38
Taxes and penalties collected on 1915 assessment roll	123 99
Taxes and penalties collected on 1916 assessment roll	188 10
Taxes and penalties collected on 1917 assessment roll	490 90
Taxes and penalties collected on 1918 assessment roll	316 65
Taxes and penalties collected on 1919 assessment roll	102 00
Taxes and penalties collected on 1920 assessment roll	308 99
Taxes and penalties collected on 1921 assessment roll	680 336 43
Taxes and penalties collected on 1922 assessment roll	935 611 50
Taxes and penalties collected on 1923 assessment roll	923 240 05
Taxes and penalties collected on 1924 assessment roll	40 344 319 09
Taxes collected on 1925 assessment roll during seventy-sixth fiscal year	7 681 00
Total taxes and penalties reported received by State Treasurer	\$42 286 142 58
Total taxes and penalties received according to record of assessment rolls	42 286 134 58
Error of \$8.00 occurred in ordering 1923 taxes into treasury	\$8 00

Collections on 1924 petroleum and gas assessment roll during seventy-sixth fiscal year:

Total levy	\$135 835 11	Total 1924 petroleum and gas charges collected	\$133 805 52
Amount collected	133 805 52	Total penalties collected	277 06
Amount of taxes unpaid	\$2 029 59	Total collections on 1924 assessment roll	\$134 083 18
Amount penalties unpaid	246 63	Total collections on 1920 assessment roll	12 48
Total amount unpaid	\$2 276 22	Total collections on 1922 assessment roll	1 99
		Total collections on 1923 assessment roll	314 38
		Total actual collections	\$134 412 03

Total amount reported received by State Treasurer

Total actual collections

Five cent error occurred in ordering taxes into state treasury

\$0 05

STATEMENT No. 16.

Total Collection of Taxes as Levied by the State Board of Equalization under Section 14, Article XIII, of the Constitution, for the Year Ending June 30, 1926.

	Total taxes levied	Total taxes collected	Penalties collected	Taxes delinquent	Penalties delinquent	Total delinquency	Duplications and illegal levies	Lieu taxes	Taxes collected on 1925 assessment roll during 76th fiscal year	Paid by allowance of credit on moneys heretofore paid
I. Public service corporations taxed on percentage basis:										
Railroad companies (steam)	\$12,138,483 52	\$12,137,929 08	\$270 34	\$554 44	\$69 30	\$625 74				
Railroad companies (electric)	3,133,353 92	3,133,353 92							\$450 00	
Gas and electric companies	10,035,903 62	10,035,163 70	166 51	289 92	36 24	326 16				
Telephone and telegraph companies	2,775,018 94	2,774,789 28	487 11	229 66	28 70	258 36				
Car companies	322,967 78	322,967 78	77							
Express companies	97,127 38	97,127 38								
National banks	1,535,026 66	1,517,203 15	324 96	11,480 25	1,337 95	12,838 20	\$861 12			\$0,082 14

Total collections as shown by the various assessment rolls during the fiscal year ending June 30, 1926:

Taxes and penalties collected on 1912 assessment roll	\$5 25	
Taxes and penalties collected on 1913 assessment roll	33 75	
Taxes and penalties collected on 1914 assessment roll	247 51	
Taxes and penalties collected on 1915 assessment roll	111 76	
Taxes and penalties collected on 1916 assessment roll	38 03	
Taxes and penalties collected on 1917 assessment roll	326 63	
Taxes and penalties collected on 1918 assessment roll	365 33	
Taxes and penalties collected on 1919 assessment roll	1 075 77	
Taxes and penalties collected on 1920 assessment roll	1 172 48	
Taxes and penalties collected on 1921 assessment roll	2 203 466 11	
Taxes and penalties collected on 1922 assessment roll	2 113 754 22	
Taxes and penalties collected on 1923 assessment roll	1 375 388 39	
Taxes and penalties collected on 1924 assessment roll	12 188 33	
Taxes and penalties collected on 1925 assessment roll	41 008 503 47	
Total taxes collected on 1926 assessment roll during seventy-seventh fiscal year	2 762 14	
Total taxes and penalties received according to record of assessment rolls	\$47,355,511 27	
Total taxes and penalties reported received by State Treasurer	47,355,511 17	\$0 10
Error of 10 cents occurred in ordering 1925 taxes into the treasury		
Collections on 1925 petroleum and gas assessment roll during seventy-seventh fiscal year:		
Total levy	\$126,424 02	
Amount collected	124,248 30	
Amount of taxes unpaid	\$2,175 72	
Amount of penalties unpaid	286 14	
Total amount unpaid	\$2,461 86	
Total 1925 petroleum and gas charges collected	\$124,248 30	
Total penalties collected	113 51	
Total collections on 1925 assessment roll	\$124,361 81	
Total collections on 1921 assessment roll	43 64	
Total collections on 1922 assessment roll	49 71	
Total collections on 1923 assessment roll	37 08	
Total collections on 1924 assessment roll	334 46	
Total actual collections	\$124,826 70

SACRAMENTO, 1925

PERSONNEL OF BUILDING AND LOAN COMMISSION—1925.

Commissioner—A. E. Falch-----25 Glenridge Ave., Los Gatos
Chief Deputy—T. M. Stensgaard-----
-----Lovejoy Apts., 228 So. Kenmore St., Los Angeles
Deputy—Moses Stern-----1219 25th Ave., San Francisco
Deputy—James L. Fields-----2141 Clinton Ave., Alameda
Secretary—Mrs. Anna Brann-----1175 Regent St., Alameda

OFFICES OF COMMISSION.

San Francisco—641 State Building, Civic Center.

Los Angeles—814 Pacific Finance Building.

BUILDING AND LOAN COMMISSIONERS—1893-1925.

George A. Fisher, San Francisco, Appointed May 31, 1893.

William A. Spalding, Los Angeles, Appointed May 31, 1893.

Frank H. Gould, Stockton, Appointed June 1, 1897.

W. A. Ryan, Los Angeles, Appointed June 1, 1897.

E. D. McCabe, Merced, Appointed December 22, 1898.

D. W. Field, Los Angeles, Appointed July 1, 1901.

Chas. M. Shortridge, San Jose, Appointed July 1, 1901.

J. P. Transue, Los Angeles, Appointed January 7, 1907.

Albert Lindley, Sacramento, Appointed January 7, 1907.

J. P. Transue, Los Angeles, Appointed January 2, 1911.

Chas. F. Curry, Sacramento, Appointed January 2, 1911.

Geo. S. Walker, San Jose, Appointed April 10, 1911.

Chas. R. Derrick, San Francisco, Appointed January 15, 1924.

A. E. Falch, Los Gatos, Appointed January 13, 1925.

LETTER OF TRANSMITTAL.

STATE OF CALIFORNIA,
OFFICE OF THE BUILDING AND LOAN COMMISSIONER,
SAN FRANCISCO, September 10, 1925.

To His Excellency, FRIEND WM. RICHARDSON,
Governor of California,
Sacramento, California.

SIR: In compliance with section 5 of the Building and Loan Commission Act, I have the honor to submit for your consideration the thirty-second annual report of this department, setting forth the operations and condition of the building and loan associations of California under my supervision, as reported by the associations during the seventy-sixth fiscal year of the state, ending June 30, 1925.

Respectfully submitted.

A. E. FALCH,
Building and Loan Commissioner.

ACKNOWLEDGEMENT.

The helpful spirit of cooperation, displayed by officers and directors of building and loan associations, has been of great value and assistance to the commissioner in the performance of the various duties of this bureau.

To the members of my staff, I also desire to express my appreciation for their loyal and efficient service. It is a pleasure to state that they have always been faithful to their trust and have made good in their work.

A. E. FALCH,
Commissioner.

REPORT

OF THE

BUREAU OF BUILDING AND LOAN SUPERVISION.

There never was a time in the history of California when the building and loan associations were in a better and safer condition than now; and this statement also applies to the financial growth of the associations.

The foundations for this strength and stability, prosperity and well-founded optimism for continued growth were not laid in a day. The work has been extending over a period of many years—ever since 1872 when the first building and loan association was founded in California. These foundations consist of wise and stringent laws; strict rules and regulations; thorough state supervision; competent management of associations by efficient and trustworthy officers and directors; cooperation between the bureau of building and loan supervision and the associations. The splendid and effective working of the building and loan system in California has often been commended by building and loan men in various parts of the United States and pointed to as an ideal model for other states to pattern after.

The California building and loan system may be best judged by the results that it has obtained. That there have been no failures among the building and loan associations during the past ten years ought to be a good test of strength. Add to this the fact that the legislature and the bureau of building and loan supervision are continually surrounding the investors in the associations with safeguards—it is safe to predict that this group of financial institutions will continue, even with greater efficiency than in the past, to perform its mission of encouraging men and women to accumulate savings and be thrifty, thus imbuing them with the desire of owning their own homes and instilling in them the principles of better living and better American citizenship.

FIGURES TELL STORY OF GROWTH.

The total assets of the 152 reporting associations amount to \$140,657,891.10, an increase of \$31,970,748.24 as compared with last year when the 138 associations, then reporting, had assets amounting to \$108,687,142.86. There are ten new associations, which were not required to make detailed reports on account of not having been in business more than six months prior to June 30, 1925; the assets of these associations amounted to \$469,922.39, which would make the total assets of all the 162 California associations, now licensed to do business, \$141,127,913.49. This does not take into consideration \$5,234,741.67 in California assets of the one foreign association licensed to do business in this state.

According to the first report of bureau of building and loan supervision, the assets of the 137 associations reporting in 1894 amounted to \$20,820,082.18. This indicates that there has been an increase in assets of \$119,837,808.82 since that year, which is no mean record. Between the years of 1894 and 1906 there were six yearly increases and six yearly decreases in the assets. But since 1906 every year has shown increased assets; it is true that between the years 1907 and 1920, each year did not show an increase in assets as compared with its predecessor, but the fact that there were no decreases indicated the forward movement that had entered building and loan business.

Beginning with the year 1920 the building and loan assets have been increasing by leaps and bounds, even faster than the most enthusiastic friend could have predicted. The increase from \$47,851,294.44 assets in 1920 to \$140,657,891.10 assets in 1925; the showing that the increase in the 1925 assets, as compared with the 1924 assets, exceeded by \$1,529,664.81 the total assets ten years ago; these are facts which indicate that building and loan associations are firmly established financial institutions.

In 1922 the total assets of all building and loan associations, for the past fifty years, amounted to \$64,732,760.05. The increase from 1922 to 1925 has amounted to \$75,925,131.05, showing that the building and loan business has made a larger growth in the past three years by over \$11,192,371 than in the fifty years preceding.

This record should be a source of satisfaction to the painstaking officers and directors of associations, whose earnest and industrious efforts are largely responsible for the well-placed confidence shown by the investing public in building and loan associations.

CHANGES IN ASSETS SINCE 1894.

The following are the changes in assets, as well as in the total roll and number reporting since 1894, the year when the first report was made by the bureau of building and loan supervision:

CHANGES IN TOTAL ROLL, NUMBER OF ASSOCIATIONS REPORTING AND GROSS ASSETS, SINCE ORGANIZATION OF BUILDING AND LOAN COMMISSION.

The following table shows the changes in assets, total roll and number associations reporting, since May 31, 1894, the date of the first annual report, to June 30, 1925.

Years	Total Associations	Associations Reporting	Assets	Increase
1894.....	146	137	\$20,820,082 18

SHAREHOLDERS AND INVESTORS.

The number of shareholders and investors increased 39,999, as compared with last year, the total number being 156,388; of this number 90,347 are male and 66,041 are female. The gain, as compared with five years ago, is 102,286. These shareholders and investors have an average investment of \$811.81, which ought to be an incentive to thousands of non-savers to join this growing army of forward-looking Californians.

The building and loan securities held by investors tell an eloquent story in thrift and savings. The shares in force number 1,122,131. The total net gain was 224,394 shares, of which 215,172 were installment and 9132 were full paid. The increase is 637,902, as compared with five years ago. The total number of investment certificates held by investors is 605,226, a gain of 208,103; the gain over five years ago is 421,375.

LOANS MADE BY ASSOCIATIONS.

That many of the people in need of money are availing themselves of facilities offered them by the associations is borne out by figures; they are coming more and more to realize that the associations' loan plan is one of the most equitable ever desired. There are 50,611 borrowers, an increase of 9,689 in one year and 25,393 in five years. The average loan to each borrower is \$2,586.97, or \$251.27 less than in 1924, but \$519.79 more than in 1921.

As the associations are primarily formed to encourage home building it will be interesting to observe what the figures tell in this department of endeavor. The total home building loans reported now aggregate 84,675, of which 8,768 were made during the fiscal year ended June 30, 1925. There has been an increase of 28,271 building loans in five years. There were 18,596 new real estate loans made during the past fiscal year, an increase of 2,825 or 9,634 more than five years ago.

PERCENTAGE OF INCREASE.

The table entitled "Statistical Information," given in this report, contains items which set forth the activities of the associations. The following table of percentages of increase in the twenty different features of the operations of associations for 1925 contains facts of vital importance:

In assets	29.41 per cent
In loans	27.17 per cent
In money in offices and banks	74.84 per cent
In guarantee capital	29.47 per cent
In guarantee capital surplus	143.09 per cent
In dues—installment shares	16.43 per cent
In paid up shares—principal	5.39 per cent
In investment certificates—principal	46.09 per cent
In borrowed money	14.39 per cent
In incomplete loans—due borrowers	42.79 per cent
In office buildings owned	24.51 per cent
In other real estate owned	145.03 per cent
In number of shareholders	15.00 per cent
In number of investors	62.41 per cent
In number of borrowers	23.69 per cent
In number of new building loans	4.64 per cent
In number of installment shares	23.24 per cent
In number of full paid shares	*
In number of investment certificates	52.39 per cent
In number of new associations	12.41 per cent

*Decrease.

RESOURCES AND LIABILITIES.

An interesting table published in this report is entitled "Principal Items of Resources and Liabilities During the Past Five Years." There has been an increase of \$77,776,072.12 in loans on mortgages and shares in five years; the increase this year, as compared with 1924, was \$27,963,348.83. The arrearages amount to \$248,207.21 (equivalent to one-fifth of one per cent of the loans in force), an increase of \$30,285.70 in one year. There is a big increase in cash in office and banks, as compared with last year, the increase being \$2,426,255.73. The associations own \$853,974.95 in bonds, having increased their purchases in these securities to the amount of \$189,984 during the past year. It is interesting to note that the associations owned \$851,619.74 in bonds five years ago, only \$2,355.21 more than in 1925, which, of course, was due to the liberal purchase of United States war bonds.

In the liabilities there has been an increase in every feature, with the exception of paid-up and prepaid dividends and reserve and undivided profits. The former showed a decrease of \$33,626.78, while in the latter it was \$220,793.44. The guarantee capital stock and surplus reserve increased \$2,882,730.06 during the past year, while the increase was \$6,991,482.40 as compared with the 1921 reports. Installment shares have increased \$3,640,928.57 during the year, while the increase is \$12,495,056.28 since 1921. The full-paid shares increased \$913,221.38 in volume the past year and are \$6,267,625.23 over five years ago. The volume of investment certificates of all classes reported show an increase of \$20,923,830.84 or an increase of \$47,308,719.28 as compared with the total of 1921. The reserve and undivided profits and surplus amount to \$4,524,609.90 as compared with \$3,609,132.99 last year, an increase of \$915,476.91. This reserve and undivided profits and surplus, in addition to the \$7,672,778.66 guarantee capital, provides a protection to the installment and full-paid shareholders and to the investment certificate holders equal to 10.39 per cent of the liability to those particular classes.

A supplementary table, showing the increase or decrease in the assets and liabilities during the past five years, is also given in this report, and will greatly aid those who seek full information concerning the financial standing of the associations as a whole.

The receipts from shareholders and investors total \$79,879,376.69, which is \$23,323,507.61 more than a year ago, and \$57,546,882.22 more than in 1921.

These \$79,879,376.69 in receipts are 56.78 per cent of the tabulated gross assets, and the disbursements on account of withdrawals and maturities aggregate \$58,227,430.82, of which \$4,901,094.53 was on account of dividends and profits apportioned, and the balance invested capital refunded, in all the equivalent of 64.72 per cent of the gross liability to shareholders and investors at the beginning of the fiscal year.

The associations received \$10,125,329.63 from interest, premiums, fines and fees, an increase of \$2,180,340.09 or an increase of \$5,991,039.61 as compared with the receipts from these sources five years ago. The loans repaid amounted to \$30,529,274.66 as against \$26,119,561.16

the year before and \$16,899,336.39 in 1921. The associations sold real estate and bonds to the amount of \$1,492,599.89 last year; this was \$22,439.29 less than in 1924 and \$178,525.82 less than in 1921.

During the past year the net earnings, or dividends, reported as apportioned to the several classes of shares and certificates aggregate \$7,036,567.37 as against \$5,461,731.81 for 1924, and \$3,009,235.38 in 1921, or a net gain in volume of over 133 per cent in the past five years.

The reported disbursements, on account of dividends, to the holders of guarantee stock, installment, paid-up and prepaid shares and investment certificates amounted to \$5,606,912.46 as against \$4,588,946.96 in 1924, being an increase of \$2,876,544.93 or 105 per cent in excess of the reported similar disbursements for 1921.

To the end that funds, otherwise idle, could be made to produce a reasonable, if not a profitable, income, \$952,630.02 was invested in bonds during the past year, as against \$1,126,837.31 invested in like securities during the previous year.

The above information may be elaborated upon and additional information obtained in the tables headed "Principal Items of Receipts and Disbursements During the Last Five Years," given elsewhere in this report.

BUILDING AND LOAN ASSOCIATIONS LOCATED IN TWENTY-SEVEN COUNTIES.

There are only twenty-seven counties in California that have building and loan associations. Although eighteen new associations were licensed during the past year, no new counties were added to the list. With the exception of two associations, those located at Newcastle and Fortuna, there are no associations north of Sacramento. There is no doubt but that practically every county north of Sacramento could support one or more associations, and thus materially be benefited in the matter of encouraging more of its citizens to save and become home owners. A number of these counties have ideal locations for associations and have plenty of enterprising and capable men to act as officers and directors, men who would be a credit to the building and loan movement and could help build up their sections of the state through their associations. The building and loan commissioner and his deputies will always be ready to give encouragement and assistance to capable men and women who desire to organize associations in communities where they are needed.

The following table, showing the distribution of the assets by counties, shows the number of associations and counties in which they are located. The assets of each county and the increases made by each during the

past year should be an object lesson to those counties where no associations exist and where associations are needed:

COMPARISON BY COUNTIES FOR FISCAL YEAR ENDING JUNE 30, 1924, AND JUNE 30, 1925.

DIVIDENDS.

The dividends reported as paid or apportioned to installment shares and certificates represent 19 different rates, with the lowest at 5 per cent and the highest at 14 per cent. The mean average of all being.....			6.955%
Apportioned to installment shares.....	\$1,839,022.56	or 6.531%	
Apportioned to full paid shares.....	1,146,153.43	or 6.319%	
Apportioned to investment certificates.....	3,231,802.38	or 5.632%	
Apportioned to guarantee capital.....	819,589.00	or 9.808%	
Total dividends.....	\$7,036,567.37		
Added to surplus, reserve and undivided profits.....	686,382.88		
Or total net profits.....	\$7,722,950.25		

SALARIES, TAXES AND OTHER EXPENSES.

The amounts reported as disbursed on account of the above, and the percentages to average loans in force are:

For salaries.....	\$828,402.48	or 0.745%
For taxes.....	396,160.10	or 0.356%
For other expenses.....	1,097,235.68	or 0.986%
Making gross expense of.....	\$2,321,798.26	or 2.087%
The percentage for 1924 was.....		1.679%

OPERATING EXPENSES TO AVERAGE LOANS.

Of the above, the percentages directly applicable to operating expenses, aside from taxes, were:

	Percentage for 1925	Percentage for 1924
For salaries.....	0.745%	0.700%
For other operating expenses.....	0.986%	0.762%
An increase of.....	1.731%	1.462%
	.269%	

OPERATING EXPENSES TO DUES CAPITAL.

	Percentage for 1925	Percentage for 1924
Percentage cost for salaries.....	0.776%	0.783%
Percentage cost for other expenses.....	1.028%	0.851%
An increase of.....	1.804%	1.634%
	0.170%	

GROSS INCOME AND PERCENTAGE OF EXPENSES TO INCOME.

	Percentage for 1925	Percentage for 1924
Percentage of net profits to average loans.....	6.945%	7.639%
Percentage of taxes to average loans.....	0.356%	0.217%
Percentage of operating expenses.....	1.731%	9.462%
Percentage of apparent gross income.....	9.032%	9.318%
Ratio of operating expense to income.....	19.165%	15.644%
An increase in percentage of cost of income of.....	3.516%	

SEVENTY-SIX CITIES HAVE ASSOCIATIONS.

The 152 associations reporting during the fiscal year ending June 30, 1925, are located in seventy-six different cities. The list of these cities, the number of associations in each city and the assets of the associations in each city during the years of 1924 and 1925, and the increase or decrease in these assets during 1925, as compared with 1924, is given elsewhere in this report. This table furnishes a great deal of valuable information. It will also forcibly bring to the attention of anyone acquainted with California the fact that there are a large number of worthy cities and towns without the benefits of building and loan associations.

Of the 152 associations listed in the tabulations, ninety-eight have a permanent guarantee capital, while fifty-four are operated on the mutual, or partly mutual plan. Forty-four associations, mostly mutuals, continue to use the "serial plan" in dealing with their installment shares, while all others use the permanent or "Dayton plan" for both installment shares and investment certificates.

CITIES HAVING OVER \$1,000,000 ASSETS.

The following table shows the order of cities in point of assets of \$1,000,000 or more as follows:

Los Angeles -----	\$31,181,197 00	Berkeley -----	\$2,483,722 00
San Jose -----	17,352,329 00	Sacramento -----	2,113,308 00
Long Beach -----	10,020,058 00	Santa Ana -----	1,806,553 00
San Francisco -----	9,759,462 00	Palo Alto -----	1,802,123 00
Stockton -----	9,438,337 00	Whittier -----	1,703,758 00
Pomona -----	7,722,457 00	Alameda -----	1,668,649 00
Santa Barbara -----	5,685,717 00	Culver City -----	1,574,477 00
Oakland -----	4,668,429 00	Ontario -----	1,524,934 00
Pasadena -----	3,712,159 00	Santa Paula -----	1,379,913 00
San Bernardino -----	2,574,842 00	Anaheim -----	1,344,326 00
San Diego -----	2,556,959 00	Orange -----	1,019,360 00
Redlands -----	2,554,364 00		

Thirty-five associations have assets in excess of \$1,000,000.

One association increased its assets over \$2,000,000 during the year.

Four associations increased their assets over \$1,000,000.

Fifteen increased from \$500,000 to \$1,000,000.

Fourteen increased from \$250,000 to \$500,000.

Twenty-five increased from \$100,000 to \$250,000.

THREE CLASSES OF ASSOCIATIONS.

The associations operating in California are divided into three classes, all performing a splendid service in their communities: Those with a permanent guarantee stock; those that are strictly mutual, and those that are without the permanent guarantee stock, yet are not altogether mutual because their loans are not cancelled by the maturity of shares of stock. The associations make their loans on the "mutual plan" or upon the "definite contract plan," and all loans must be secured by first deeds of trust or mortgages made upon an

amortization plan. There is no better security that can be devised for the protection of investors, stockholders and members of building and loan associations. The laws of the state also are strict in the specification of the classes of securities associations may invest in.

NEW ASSOCIATIONS LICENSED.

There were eighteen new associations licensed by the commissioner during the past year. The following table gives the name of the association, the location, authorized capital and date of incorporation:

Name	Location	Authorized capital	Date
United Building-Loan Assn.....	Beverly Hills..	\$100,000	Jan. 26, 1925
United States Bldg. and Loan Assn....	Fresno	75,000	Feb. 28, 1925
Federal Building and Loan Assn.....	Los Angeles ..	100,000	Sept. 24, 1924
Field Building and Loan Assn.....	Los Angeles ..	100,000	Sept. 14, 1924
Franklin Building-Loan Assn.....	Los Angeles ..	1,000,000	Mar. 20, 1925
Guardian Building-Loan Assn.....	Los Angeles ..	1,000,000	Jan. 26, 1925
La Boute Building and Loan Assn....	Los Angeles ..	25,000	Dec. 6, 1924
Lincoln Building and Loan Assn.....	Los Angeles ..	250,000	Mar. 23, 1925
Los Angeles American Bldg. & L. Assn..	Los Angeles ..	100,000	Jan. 20, 1925
Mutual of Hollywood B. & L. Assn....	Los Angeles ..	500,000	Jan. 9, 1925
Pacific Coast Building-Loan Assn.....	Los Angeles ..	100,000	June 2, 1925
Home Foundation Bldg. and L. Assn....	Palo Alto	50,000	Apr. 14, 1925
Bay City Building and Loan Assn.....	San Diego	500,000	July 23, 1924
Industrial Building-Loan Assn.....	San Francisco..	200,000	Apr. 4, 1925
Metropolitan Guar. Bldg.-Loan Assn....	San Francisco..	500,000	Jan. 7, 1925
Standard Building and Loan Assn....	San Francisco..	100,000	Dec. 4, 1924
City Building and Loan Assn.....	Santa Barbara..	100,000	Oct. 22, 1924
Provident Building-Loan Assn.....	Van Nuys	100,000	May 12, 1925

TEN ASSOCIATIONS ORGANIZED LESS THAN SIX MONTHS.

Of the above named associations, ten are not included in the tabulations, as they have been in active business less than six months and, while their assets aggregate \$469,922.39, with 402 members and investors and 4,258 shares and certificates reported as in force, the expenses of organization have been so out of proportion to the limited income possible, that to have included them in the regular tabulations would have materially affected the percentage calculations illustrating the business of those in operation for a term from six months to one year. The condensed statements of assets and liabilities of each, will be found in an appendix to this report.

The names of these ten associations and locations are:

United States Building and Loan Assn., Fresno.
 Franklin Building-Loan Association, Los Angeles.
 Guardian Building-Loan Association, Los Angeles.
 Lincoln Building and Loan Association, Los Angeles.
 Pacific Coast Building-Loan Association, Los Angeles.
 Home Foundation Building and Loan Assn., Palo Alto.

Industrial Building-Loan Association, San Francisco.
Metropolitan Guarantee Building and Loan Assn., San Francisco.
Provident Building-Loan Association, Van Nuys.
Los Angeles American Building and Loan Assn., Los Angeles.

There is one inactive association, which makes the associations licensed on June 30, 1925, total 163.

RATES OF INTEREST ON LOANS.

The rates of interest charged upon loans range from 7 to 12 per cent per annum. The factors governing the interest rate usually depend upon the locality, security offered, and local money conditions. The mean average of all these rates is 8.34 per cent. The following gives the groups of associations as to number and mean rate per cent charged by each group:

8 associations charge-----	7.00%	15 associations charge-----	9.00%
3 associations charge-----	7.20%	8 associations charge-----	9.60%
5 associations charge-----	7.50%	2 associations charge-----	9.75%
9 associations charge-----	7.80%	7 associations charge-----	10.00%
37 associations charge-----	8.00%	1 association charges-----	10.20%
54 associations charge-----	8.40%	1 association charges-----	10.60%
1 association charges-----	8.50%	1 association charges-----	12.00%

The reported interest collections appear as 8.554 per cent of the average loans in force for the year, indicating that much the larger volume of the loans were at a rate in excess of the above mentioned mean rate, and based on the same average loans the approximate gross income was 9.032 per cent and the operating expenses, exclusive of taxes, were 1.731 per cent or 19.165 per cent of the gross income, then by including the taxes the entire cost of operation is raised to 2.087 per cent or 23.106 per cent of the gross income.

RATES OF DIVIDENDS PAID.

The associations paid nineteen different rates of dividends on installment shares and certificates, the mean average rate of all being 6.955 per cent. The groups of associations and the mean rate of dividend or interest paid by each group are as follows:

3 associations pay-----	5.00%	1 association pays-----	8.40%
75 associations pay-----	6.00%	2 associations pay-----	8.50%
4 associations pay-----	6.50%	2 associations pay-----	8.85%
1 association pays-----	6.75%	10 associations pay-----	9.00%
25 associations pay-----	7.00%	1 association pays-----	9.25%
7 associations pay-----	7.20%	1 association pays-----	10.00%
1 association pays-----	7.25%	3 associations pay-----	12.00%
1 association pays-----	7.30%	1 association pays-----	13.00%
1 association pays-----	7.50%	1 association pays-----	14.00%
14 associations pay-----	8.00%		

COMPARISON OF CITIES FOR FISCAL YEAR ENDING JUNE 30, 1924 AND JUNE 30, 1925.

REAL ESTATE AND OFFICE BUILDINGS OWNED BY ASSOCIATIONS.

The real estate reported as owned amounts to \$1,852,613.24, of which \$696,067 is represented by 19 associations owning office buildings and lots on which to build, and \$1,156,546.24 is represented by 31 associations, owning 217 separate pieces, mostly acquired through foreclosure of the security of delinquent borrowers. The aggregate of both classes represents 1.317 per cent of the gross reported assets. There is a tendency now among associations to acquire their own office buildings or lease quarters which will enable them to provide the best possible facilities for serving the public. Five years ago seven associations owned office buildings, valued at \$178,900; these investments were increased to \$312,342.08 in 1922, and since then there has been a tendency among the associations to increase these investments year by year. The associations own furniture and office fixtures valued at \$305,517, as against \$60,652.76 in 1921.

With reference to the question of acquisition of office buildings, the commissioner has ruled that a mutual association may make such an investment in an amount not to exceed the accumulated reserve, and a guarantee capital association in an amount not to exceed its paid-in guarantee capital and surplus reserve. Before an association may make an investment in an office building, it must first obtain the sanction of the commissioner.

THE "FISCAL" YEAR.

The report of the bureau of building and loan supervision is based on the reports made by the various associations, made to the bureau *during* the fiscal year ending June 30. As the fiscal years of the various associations do not terminate on the same date, an adequate comparison can not be made, and this sometimes works an injustice to some of the associations. Under the present system, the status of all the associations, as of June 30, can not therefore be given. For instance, it was stated at the beginning of this report that the assets of all the licensed associations, according to their fiscal year reports, amounted to \$141,127,913.49. If these associations had made their reports as of June 30, the assets would have been about \$160,000,000.

The fiscal year of most of the associations ends December 31, while the next largest group end their fiscal year June 30. It will be seen that the reports of the former group are not up to date by the time the report of the bureau is issued in October. The reports of the associations whose fiscal years end during the months from January to June are, of course, more up to date. The least up to date reports, when issued by this bureau, are those made by associations during the months of July, August, September and October. There are eighteen associations making reports during these months and their reports are from 12 to 15 months old by the time the bureau's report is made public. The commissioner intends to advise these associations to change their fiscal year so that it will end June 30.

It has been suggested that the commissioner direct all associations to close their fiscal year on June 30, but such a course would make it practically a physical impossibility for the bureau to get the report ready for submission to the governor by October 1, as provided by law. The step could be taken if the law was so amended as to permit the report to be made on or before December 1.

COOPERATION BETWEEN ASSOCIATIONS AND BANKS.

The building and loan associations and the banks are the financial backbone of California. Both of these institutions have made splendid records and both have the confidence of the investing public. Each has well-defined reasons for existence and each has certain plain duties to perform. There should be a spirit of confidence and cooperation between the associations and the banks, and it is a good omen that a new era of better understanding is dawning. With a united front, and by working together, the associations and the banks can do much to save investors from becoming victims of the wildcat and bogus stock promoters, who yearly float worthless securities to the amount of about four billions of dollars in the United States.

RECORD MADE BY ASSOCIATIONS.

The building and loan associations have fully established their reputation for safety and reliability not only in California but throughout the United States. California building and loan investors will be interested to know that there are in the United States 11,844 associations, with a total membership of 8,554,352 and assets aggregating \$4,765,937,197. The gain in members last year was at the rate of 18.76 per cent over the preceding year, while the increase in assets was \$822,997,317 or 20.87 per cent over last year's total. The total amount lost by investors in associations last year amounted to only \$250,000, while during the past five years there were but 39 failures among the associations with an aggregate loss of \$769,984; 39 states show no failures during the past five years; there have been no failures among the associations of California during the past ten years.

More than one thousand homes are being built every day in the United States through the aid of building and loan associations, the total being 400,000 last year, showing that the associations encourage home-ownership, because they know that it makes for contentment and prosperity among the citizens. Judged by such a splendid record, it truly can be said that the building and loan association is the greatest instrumentality devised for aiding in the securing of homes and that it is conducted in a manner befitting the high purpose for which it was instituted.

FEDERAL TAXES.

The bureau of building and loan supervision has been gathering considerable data on the federal tax situation, as related to building and loan associations. A committee, appointed by the California Building-Loan League, has sent a questionnaire to the various associations, and upon the basis of these returns, it is hoped to be able to clearly show the California associations how they will be affected by the federal tax laws and rulings.

DATA ON ADVERTISING.

The data collected by this bureau, through a questionnaire on advertising, recently sent to building and loan associations, tells an eloquent story of the need to seriously study the question of publicity in relation to their business. There is no question but publicity has built, and is building up a number of the associations, and that it is spreading the gospel of thrift and saving among the people in some of the communities. But there are not yet enough publicity disciples among the associations to spread the gospel.

Years ago the banks hid their light under a bushel, but now they have been thoroughly converted and their faith in publicity is strong and firm. They have proven, to their satisfaction, that publicity is an agency by which they may build up their strength and further their prosperity and growth.

Building and loan associations have a wonderful opportunity for service and growth in California. All associations can and should make a stronger effort to bring their message before the people, and thereby not only benefit themselves but also help build up their communities.

A number of the associations, since the questionnaire was sent out, and its results made known, have begun systematic publicity campaigns, and already they are getting satisfactory returns. An example of what associations are planning in the line of publicity is the case of the San Francisco associations which propose to carry on a cooperative educational campaign, which is much needed in their section of the state.

INCORPORATION OF NEW ASSOCIATIONS.

The last legislature passed a law which gives the commissioner authority to pass on the question of the advisability of the incorporation of a proposed association; to pass on the character and general fitness of the personnel of such an association; also to pass on the proposed association's name and articles of incorporation.

The commissioner on July 1st of this year made the following rulings relating to the organization of new associations:

“If it be a ‘mutual’ a committee should proceed to secure subscriptions for not less than 2,500 installment shares on which the

monthly payments are to be not less than 50 cents per share, aside from the pro rata of organization expenses, of not less than 50 cents per share, to be paid with the first installment.

"If it be a 'guarantee capital' association to be located in any one of the following cities, viz: Alameda, Berkeley, Fresno, Glendale, Long Beach, Los Angeles, Oakland, Palo Alto, Pasadena, Pomona, Redlands, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Jose, Santa Barbara, Santa Monica or Stockton, then, irrespective of the authorized capital, there must be a paid-in capital of \$50,000 or more, and an organization fund of at least \$5 per share on the shares actually subscribed. In cities over 5000 population the paid-in capital must be not less than \$25,000 plus an organization fund of at least \$5 per share.

"All moneys collected for the organization fund must be paid into the treasury to the credit of that fund, and all those desirous of organizing associations must distinctly understand that this department is opposed to the use of any portion thereof as a commission for securing subscriptions to guarantee capital."

The bureau has made it a practice to give all possible assistance to those who are forming new associations, furnishing complete instructions, sample articles of incorporation and by-laws.

BUILDING AND LOAN NAME.

A new law, which went into effect on July 24, 1925, reserves to the building and loan association the sole use of the name "building and loan." Through the cooperation of the corporation department, a corporation not under the jurisdiction of this department has been compelled to discontinue the use of the words, "building and loan," in its corporate name. Two other similar corporations have been ordered to begin court action to eliminate the words, while another corporation has voluntarily taken such a step. The benefit and effectiveness of this law has already been demonstrated. It will tend to prevent corporations from transacting business in this state in contravention of the building and loan laws or from using any feature of the building and loan laws, unless licensed by the commissioner.

THE AGENT PROBLEM.

The agent question has proven a daily problem to the bureau, and sometimes it is questioned whether he is not, in some cases, a liability rather than an asset to an association. Some states have taken the former attitude and legislated the agent out of existence. A number of associations have efficient agents, who are performing a humanitarian service and they deserve commendation. But there are agents who need a watchful eye on them, reformation or ejection from the financial field. The insurance commission and corporation commission of the

state are cooperating with this department in the matter of obtaining better agents, and, as a result, this bureau had the following instructions printed in the 1925 agents' licenses:

"Licensed agents or solicitors, leaving the employ of the association named herein, must surrender their license to the association, that it may be cancelled on its records, following which, it must be forwarded to the Commissioner for cancellation on his records.

"Agents or solicitors dismissed for *cause* by this department, the corporation department, or the insurance department, will not again be licensed without the written consent of the association or corporation from whose employ they were dismissed."

Other rulings made by the commissioner on the agent question include the licensing and bonding of *all* agents in the employ of associations. The commissioner also requires, before passing on the question of the issuing of a license, information concerning the applicant and it must also be made clear where the association proposes to employ the agent. If it appears to the commissioner that a community has a sufficient number of home associations and outside associations represented, no further license will be issued to an agent to represent an outside association in such a community. Associations having established *home offices* in various communities are entitled to adequate and just consideration and protection from the activities of agents and solicitors of associations having home offices in other localities. The furnishing by associations of information about candidates for agents' licenses will tend to the employment of a higher type of agents and be of benefit to the building and loan movement.

BRANCHES AND ADVISORY BOARDS.

The commissioner has made a ruling against the establishment of branch building and loan associations; he has also ruled against the formation of so-called advisory boards, which had been appointed in connection with agencies established by some of the associations. Such boards frequently were looked upon by investors as boards of directors and tended to elevate an agency to the position of a branch. Associations desiring to establish agencies must hereafter first apply to the commissioner for his consent.

Following are the names of the associations employing agents during the fiscal year ending June 30:

**ASSOCIATIONS EMPLOYING LICENSED AGENTS, DURING FISCAL YEAR ENDING
JUNE 30, 1925.**

Association	Location	No. of Agents
Alhambra Building and Loan Association.....	Alhambra.....	1

LOCATION OF MORTGAGED PROPERTIES.

The commissioner has ruled that an association must hereafter, when making its annual report, give the name of the city and county, or county, where properties, on which it holds a mortgage or deed of trust, is located. The associations are cautioned against being too liberal in loans and valuations of properties on which loans are to be made. They should be especially watchful of their agents who make loans for them, especially in far-off places. These loans made through agents should be carefully checked up by an inspection of properties offered as security. Loan agents should not be allowed too high commissions or permitted to charge up unreasonable, so-called incidental expenses against borrowers. Informing the bureau of the location of mortgaged properties, outside of the home city of the association, will make it easier for the commissioner and his deputies to keep a better check on the loans made by associations in various communities.

LICENSE FEE RATE AGAIN DECREASED.

The tremendous growth of the building and loan business of California made it imperative to employ an additional deputy last March. An increase in the salaries of the deputies was recommended by the commissioner, and an enabling act was passed by the last legislature. The recommendation met with the approval of the board of control and, as a result, the new deserved salary increase went into effect on July 24th. Despite these extra expenses, in the operation of this department, the 1926 license fee rate will be 14 cents, one cent less than last year. All associations having assets above \$71,430 will pay at this rate per thousand of assets. In 1926, the minimum license fee rate will be \$10 per year for associations having assets under \$71,430. It is interesting to note that the license fee rate has decreased from 56 cents per \$1,000 of assets in 1910 to the present low rate. Associations have never made any protest against levies made by this department, being always glad to give it all possible financial support and cooperation to enable it to function and render effective service in the enforcement of the laws and the protection of the investing public.

THE SANTA BARBARA CATASTROPHE.

On the day the news was received of the calamity that had been visited upon Santa Barbara, the commissioner wrote the following letter to all of the Santa Barbara associations:

“In the event that the damage is such as to interfere with the banking facilities, and cause excessive demands on your association for withdrawals, you should not hesitate to invoke the protection of Section 642 of the Civil Code, and require everyone to file a written notice of intention to withdraw and let payments then be made in order of filing when funds are available. If funds are available, payments of less than \$50 for relief of distress or absolute necessity may be made without notice.”

It is significant to state that the associations were able to handle the difficult situation without having to resort to the safeguards the law provides in such cases. The withdrawals were very few, not only because the investors were not in need of their funds but also because they felt that the associations offered the best kind of safety for their savings. Although outside associations, as well as local banks, offered the Santa Barbara associations practically unlimited credit, they had no need to avail themselves of the courtesy extended to them.

NEW FEATURES OF REPORT.

Among the new features of this year's report of the bureau are the following:

- (1) Changes in assets since 1894.
- (2) Principal items of receipts and disbursements during the last five years.
- (3) Changes in assets and liabilities during the last five years.
- (4) Principal items of resources and liabilities during the last five years.
- (5) Comparison of assets of cities for the fiscal year ending June 30, 1924, and June 30, 1925.
- (6) Assets of each association.
- (7) Names of officers and directors of associations.
- (8) Instructions for forming an association.
- (9) Sample articles of incorporation and by-laws of an association.
- (10) Associations employing agents.
- (11) Recent rulings of the commissioner.

CONCLUSION.

Immediately following the published report will be found (a) detailed statement of the receipts of this department; (b) the names of the 162 associations, locations, their secretaries, and assets of the associations; (c) a history of all associations licensed since 1893 to June 30, 1925; (d) the condensed annual statement of condition of each of the 152 associations reporting during the fiscal year ending June 30, 1925, arranged in alphabetical order, both as to city or town of location and to names of the associations therein, including names of their officers and directors; (e) report of a foreign association doing business in this state; (f) a statement of assets and liabilities of ten building and loan associations which transacted business less than six months prior to June 30, 1925; (g) the existing laws, both for the government and supervision of associations; (h) rulings of the building and loan commissioner; (i) instructions for forming new building and loan associations; (j) sample articles of incorporation and by-laws of a building and loan association; (k) code of ethics of building and loan associations.

Respectfully submitted,

(SEAL)

A. E. FALCH,
Commissioner.

J. L. Fields, Deputy Building and Loan Commissioner, being first duly sworn, deposes and says the foregoing is a correct statement of the income and receipts for the fiscal year ended June 30, 1925, the disposition of the same, and also of the salaries and expenses of the department for the same period.

Subscribed and sworn to before me
 this 10th day of September, 1925.

J. L. FIELDS.

A. E. FALCH,
 Building and Loan Commissioner.

[SEAL]

APPENDIX (A)

Containing List of all Associations, Authorized, Organized, or Licensed from 1893 to June 30, 1925, and followed by a Detailed Statement of the Condition of all active Associations reporting to the Commissioner for the Fiscal Year Ended June 30, 1925.

LIST OF BUILDING AND LOAN ASSOCIATIONS

Of which the Bureau of Building and Loan Supervision has any Record, as having been Authorized, Organized or Licensed under the several Acts creating this Department, from 1893 to June 30, 1925. Arranged Alphabetically by Cities, Towns and Names.

NOTE—For explanation of the letters and figures in the "closed" column, see explanation key immediately following this list.

| | 647. | Investment in and loans upon bonds. |
| | 647a. | Consolidation of associations. |
| | 648. | Definition of building and loan association. |
| | 648a. | Formation with or without capital stock. |

Powers—Purposes for which formed.

633. Building and loan associations as hereinafter in this title defined, shall have power to receive money and accumulate funds to be loaned, and to loan the same to their shareholders, investors and others; to permit shareholders and investors to withdraw part or all of their payments, investments or stock deposits, and to prescribe the terms and conditions of such withdrawal; to cancel shares of stock, the payments on which have been withdrawn; to receive money and to execute certificates therefor, which must specify the date, amount, rate of interest, and when the principal and interest are payable, and also the withdrawal value thereof at the end of each year; to borrow money for the purpose of making loans and of paying withdrawals and maturities; and shall have such further powers as may be specifically set forth under this title; *provided, however*, that no such association shall, at any time, have or carry upon its books, for any member or

investor, any demand, commercial or checking account or any credit to be withdrawn upon the presentation of any negotiable check or draft. Every such corporation hereafter formed, in setting forth the purposes for which it is formed, shall state, in its articles of incorporation, that it is formed to encourage industry, frugality, home building, and savings among its shareholders and members; the accumulation of savings; the loaning to its shareholders and members of the moneys or funds so accumulated, with the profits and earnings thereon, and the repayment to each of his savings and profits, whenever they have accumulated to the full par value of the shares, or at any time when he shall desire the same or when the corporation shall desire to repay the same, as it may be provided in the by-laws; and shall also state that it is formed for all the purposes specified in this title. (In effect August 11, 1913.)

Capital—How accumulated; classes of shares.

634. The capital of every such corporation shall be divided into shares of the matured or par value of one hundred or two hundred dollars each, as provided by the articles of incorporation, and shall be paid in by the subscribers in the manner provided by the by-laws. All such payments shall be called dues. Certificates shall be issued to each shareholder on the first payment of dues by him. Shares pledged as security for the payment of a loan shall be called pledge shares, and all others, free shares. All shares matured and surrendered or canceled, shall become the property of the corporation and may be reissued. The capital shall consist of the accumulated dues together with the apportioned profits of the corporation, and shall be accumulated by the issuance of shares in "installment" form and, where the by-laws shall so provide, in any or all of the following forms, viz: "full paid," "pass book," and "guarantee."

Installment shares.

(a) Installment shares shall be either "serial" or "permanent" in form. When issued in "serial" form the periodical dues on shares in each series shall commence with the date of the issue of such series and the holder must pay such dues and such amounts per share and at such times as the by-laws may provide, and such payments must continue on each share until, with the profits allotted thereto, it reaches its matured value or is withdrawn or canceled. On all such issues the dividends shall be apportioned or credited equally to each share in each series. No share of a prior series shall be issued after the issue of shares in a new series, except by way of transfer. Shares issued in "permanent" form may be issued at any time and the dividends thereon may be credited in the pass books of the members. Shares of either form may be issued in "classes" with a different periodical payment for each class designation, to be specified in the by-laws, and shall be issued with full participation in the profits subject to apportionment as dividends.

Full paid shares.

(b) Full paid shares shall be shares upon which a single payment of dues amounting to one hundred or two hundred dollars per share shall be paid at the time of subscription and upon which the holder shall be entitled to either a full participation in the net profits or to an agreed rate of dividends not exceeding six per cent per annum, payable semi-annually in cash, to be specified in the body of the certificate issued.

All such shares may be issued in separate classes as to participation, under regulations to be provided in the by-laws and which must be fully set forth in or upon each certificate issued.

Pass book shares.

(c) Pass book shares are shares which shall participate in the apportionment of net profits and be credited therewith at a rate not less than seventy-five nor more than ninety per centum of the rate apportioned to installment shares, as the by-laws shall determine, and upon which the dues may be paid in at such times and in such amounts as the holder thereof may elect until said shares reach their matured value or are withdrawn. Such shares shall be withdrawable under rules to be provided in the by-laws and fully set forth in the pass books issued. The matured value of this class of shares shall not exceed in volume twenty-five per centum of the matured value of all other shares in force. No membership fee, fine or forfeiture shall be chargeable against such shares.

Guarantee stock.

(d) Guarantee stock shall be stock, provided by the by-laws, to be set apart and sold as a fixed, permanent or guarantee capital. When any such stock has been once so set apart, sold and issued, it shall thereafter remain as a fixed, permanent and guarantee capital, and shall be subjected to all the conditions and liabilities attaching to the paid in capital stock of other classes of corporations. Such guarantee stock shall protect and guarantee all other stockholders and creditors against any loss, and when once paid it must be kept unimpaired.

May issue investment certificates to minors.

(e) Every corporation specified in this title, in addition to being entitled to issue investment certificates to adults, shall also have power to issue one or more investment certificates to a minor of any age and receive payments thereon by or for such minor. If such minor be fourteen years of age or over, he shall be entitled to withdraw, transfer or pledge any such certificate owned by him and to receive from such corporation any and all interest or other moneys at any time becoming due thereon and his receipt or acquittance therefor shall constitute a valid release and discharge to the corporation for the payment of such money.

Investment certificate—Reserve required.

(f) Every corporation specified in this title issuing installment or full paid investment certificates, or both, shall at all times have issued and fully paid for, either an amount of guarantee capital stock, or permanent non-withdrawable capital stock, or both such guarantee capital stock and permanent non-withdrawable capital stock, or a reserve fund equal to ten per cent of the aggregate amount of its liability on its said installment investment certificates and full paid investment certificates; *provided, however*, that the aggregate of guarantee capital stock, or permanent non-withdrawable capital stock, or both such guarantee capital stock and permanent non-withdrawable capital stock, or a reserve fund, of every building and loan association issuing installment or full paid investment certificates, or both, must equal the following percentages of its investment certificate liabilities:

1. Ten per centum of any amount up to and including one million dollars.

2. Seven and one-half per centum of any amount in excess of one million dollars, up to and including two million dollars.

3. Five per centum of any amount in excess of two million dollars, up to and including five million dollars.

4. Three per centum of any amount in excess of five million dollars.

Guarantee stock may have majority of directors.

(g) Corporations specified in this title, issuing guarantee stock, may provide in their by-laws that a majority of the board of directors shall be selected from the holders of such stock.

Entrance and transfer fees.

(h) Every corporation specified in this title shall also have power, by its by-laws, to charge and collect an entrance fee, for each share of stock, or membership share, or investment certificate, it may issue, not exceeding one dollar on each share or investment certificate having a matured or face value of one hundred dollars, and also to charge and collect a transfer fee, not exceeding ten cents on each share, or investment certificate, all of which fees shall be accounted for by the corporation like other funds of the association. No other fee, charge or deduction shall ever be made or permitted to be made against any shareholder, or certificate holder, or against any of his shares or certificates, hereafter issued, or the dues paid in thereon for the purpose of creating a fund to be used in the payment of current or running expenses. (In effect July 24, 1925.)

Retiring free shares.

635. The directors may in their discretion, under the regulations prescribed by the by-laws, retire any free shares of stock, other than those of the guarantee stock, by enforcing the withdrawal thereof, but whenever the withdrawal of any shares is to be enforced, the holders thereof must be paid the amount actually paid in, and the full amount of earnings at the date of retirement; *provided*, that shares of installment stock shall not be forced out until after they shall have become four years old.

Maturity of shares, and payment.

636. When any stock shall have reached its matured value, payment of dues thereon shall cease. Borrowing stockholders whose loans are fully paid shall have their securities released and returned to them. Holders of free shares of stock shall be paid the matured value thereof out of the funds of the corporation with interest at such rate as the by-laws shall provide, from the time the board of directors shall declare such shares to have been matured, until paid; but at no time shall more than one-half of the receipts of the corporation be applicable to the payment of matured shares without the consent of said board. The order of the payment of matured shares, if not otherwise determined by the by-laws, shall be in the numerical order of issuance.

Loans—Officers and directors may not borrow; no loans on guarantee stock or mining stock.

637. Loans may be made upon the "mutual plan" or upon the "definite contract plan." Loans made upon the mutual plan shall be accompanied by a pledge of shares having a matured or par value equal to the face of the loan. Definite contract loans shall be repayable in a

definite number of equal periodical installments, to be named in the note or obligation, each in an amount sufficient for the aggregate of all to repay the principal of the loan together with interest on the unpaid periodical balances, within the time and at the rate agreed upon. It shall be unlawful for any director or officer of any corporation governed by this title, directly or indirectly, for himself, or as a partner or agent for others, to borrow any of the funds of such corporation, and any officer or director violating the provisions of this section shall be guilty of a felony. Any officer or director of any such corporation who consents on behalf of such corporation to make a loan to any officer or director of such corporation shall be guilty of a felony, and shall also be personally liable to the corporation for the full amount thereof. It shall be unlawful for any building and loan association, corporation or society operating under the provisions of this title to loan any of its funds upon any of its own guarantee stock or upon its permanent non-withdrawal capital stock as security. Any officer or director of an association who shall make any such loan for and on behalf of any association shall be personally liable to the corporation for the full amount thereof, and shall also be deemed guilty of a felony. It shall be unlawful for any building and loan association, corporation or society, operating under the provisions of this title, to loan any of its funds upon the security of, or to invest any of its funds in any mining shares or mining stocks, or in the stocks or bonds of any corporation, other than in this title provided; and any officer or director who, on behalf of any such corporation, shall make any such loan or investment, or who shall consent thereto, shall be personally liable to the corporation for the whole amount of any such loan or investment, and shall also be guilty of a felony. (In effect August 11, 1913.)

Security for loans—Interest, rate to appear.

638. For every loan made a note or obligation, expressing and setting forth the exact rate of interest, must be executed by the borrower, secured by a first mortgage or deed of trust upon unencumbered real estate having an appraised value of not less than twenty-five per cent in excess of the face of the loan, except such loans as may be made upon the security of bonds specified in section six hundred forty-seven; or in lieu of a mortgage or deed of trust, loans to the extent of not exceeding ninety per cent of the then withdrawable value, may be made upon the pledge of free shares or certificates as security for their repayment. The board of directors may from time to time fix the rate of interest to be charged on loans. A borrower may at any time repay his loan together with interest or arrears due thereon and upon the surrender of the shares, or certificate pledged as security therefor. (In effect July 27, 1917.)

Arrears in payment; default; forfeitures.

639. Whenever any non-borrowing member shall be six months in arrears in the payment of his dues upon free shares, the secretary may give him notice thereof in writing, and a statement of his arrearages, by mailing the same to him at his last post-office address given by him to the association; and if he shall not pay all arrearages within two months thereafter, the board of directors may, at their option, declare his shares forfeited, and at the time of such forfeiture, the withdrawal value thereof shall be determined and stated, and the defaulting member

shall be entitled to withdraw the same without interest, upon such notice as shall be required of a withdrawing shareholder. Whenever a borrower shall be three months in arrears in the payment of his dues or interest or loan installments, the whole loan shall become due at the option of the board of directors, and they may proceed to enforce collection upon the securities held by the association. The withdrawal value, at the time of exercising such option, of all shares pledged as collateral security, shall be applied to the payment of the loan, and said shares from that time shall be deemed surrendered to the association and canceled.

May purchase real estate on foreclosure sale.

640. Any such association may purchase at any sale, public or private, any real estate upon which it may have a mortgage, judgment, lien, or other incumbrance, or in which it may have an interest, and may sell, lease, or mortgage the same at pleasure to any person or persons.

Apportionment of profits; reserve Guarantee stock participation and reserve.

641. Profits and losses shall be apportioned at least annually, and shall be apportioned to all shares in each class at the time of such apportionment, according to the actual or book value thereof. If the guarantee capital herein provided for if any there be, together with the reserve fund, or if the reserve fund, where there be no guarantee capital, shall not equal five per cent of the outstanding loans at the time of each apportionment of profits, the directors shall set aside, as a reserve fund, not less than five per cent of the net profits accruing since the last prior apportionment, and shall continue so to do until said fund shall amount to at least five per cent of the loans in force, at which figure said fund shall thereafter be maintained. Said reserve fund shall at all times be available to meet losses arising from any source not heretofore provided to be assumed by the guarantee capital. Every such corporation having a paid-in guarantee capital stock, may provide in its by-laws, that an amount not exceeding one per cent per annum on the average loans in force, shall be set aside from and out of the net profits, at each annual distribution thereof, or a proportionate amount at each semi-annual distribution, from which to declare dividends on and provide a reserve fund that shall be specially applicable thereto. At least one-tenth of the amount so set aside shall be carried to such reserve fund until the same shall amount to at least twenty-five per cent of the paid-in guarantee stock. (In effect July 24, 1925.)

Withdrawals; conditions and limitations.

642. A stockholder or investor, desiring to withdraw from any such corporation or to surrender a part or all of his stock, or investment certificate, may do so by giving thirty days' notice, in writing, of his intention or desire so to do. On the expiration of such notice, he is entitled to receive the full amount paid in upon the stock or investment certificate surrendered, exclusive of the entrance fee, together with such proportion of the earnings thereon as the by-laws may provide, or as may be fixed by the board of directors; but not more than one-half of the monthly receipts in any one month must be applied to withdrawals for that month, without the consent of the board of

directors, and no stockholder must be permitted to withdraw whose stock is pledged to the corporation as security for a loan, until such loan is fully paid. All withdrawals must be paid in succession in the order that the notices of intention are given. Whenever the demands of withdrawing stockholders or investors exceed the money applicable to their payment, the notices of intention to withdraw must be registered in the order of filing and payments thereon must be made in succession, in the order that such notices were filed and registered. The board of directors may permit the withdrawal of a part of the accumulations to the credit of a stockholder or member, on shares of installment stock not issued in serial form, without thereby reducing the number of shares held by him. (In effect July 24, 1925.)

Demands unpaid for two years, business may be taken over.

642a. Whenever an application for withdrawal of free shares or certificates shall have been on file, or the payment of matured shares demanded, and either shall have remained unpaid for a period of one year, all the receipts of the association from dues, interest, premium, loans repaid, and the proceeds of all other investments, shall, after the payment of expenses and general indebtedness, be applied toward the payment of withdrawals and maturities; and the board of directors or the official vested by law with powers of state supervision and license may direct that such payments shall be made upon a ratable and proportionate basis. Whenever such applications or demands, whether heretofore or hereafter made, have been on file and remain unpaid in whole or in part for more than two years the official vested by law with powers of state supervision and license, may in his discretion forthwith take possession of the property and business of such association, and retain such possession until its affairs be finally liquidated in the manner provided by law for the liquidation of associations by him. (In effect August 8, 1915.)

Who may become members.

643. Any person of full age and sound mind may become a member of an association by taking one or more shares therein and subscribing to the by-laws, and annexing to his signature his post-office address. A minor may hold shares in the name of a parent, guardian, or next friend, as trustee. The shares of stock in any such corporation held by any person, to the extent of one thousand dollars, shall be exempt from execution.

State supervision and control.

644. All building and loan associations, as in this title defined, doing business in this state, shall be under the supervision and control of such official or officials as are by law vested therewith; and except in the manner provided in this title, no corporation, firm, or association shall conduct or carry on the business of accumulating the savings of its shareholders, members, or investors, and loaning such accumulations to them, in the manner of building and loan associations.

Annual and other reports; penalties.

645. Every association organized under the provisions of this title, and every other association doing a similar business, shall annually make a full report, in writing, of the affairs and condition of such corporation, within thirty days after its annual meeting, to the official or officials vested with powers of state supervision and license. Such

reports shall be verified by the oath of the officers making the same, and a copy of the same shall be delivered to every stockholder, from the office of the corporation, who may call for such report. Every association shall make any further reports which the said official or officials may require, and in such form and as to such matters relating to the conduct of the business of the association as such official or officials may designate. Any wilfully false statement in making and verifying said report shall be perjury. Any such association which shall fail to furnish the said official or officials any such report required, within thirty days after demand, shall forfeit the sum of ten dollars per day for every day such report shall be delayed or withheld, which may be recovered in an action brought by the attorney general in the name of the people of this state; and all moneys so recovered shall be paid to the treasurer of this state, who shall pay the same into such fund as may be provided by law, for the purposes of the official or officials vested with power of supervision and license.

Foreign association; deposit required.

646. Every building and loan association, and every other corporation, association or society organized under and by virtue of the laws of any other state or territory or of any foreign country, for the purpose of conducting and carrying on a business of a character similar to that authorized by this title, or whose by-laws, rules, prospectus, contracts or methods of business provide for the conducting or carrying on the business of accumulating the periodical payments or savings of its shareholders, members or investors in the manner of building and loan associations, or as authorized and provided in this title, desiring to enter the State of California for the transaction of business or for selling its bonds, debentures, certificates, shares of stock, shares of membership, contracts, or other similar securities, must first comply with the requirements of sections four hundred five and four hundred eight of the Civil Code and immediately thereafter deposit with the official vested by law with state supervision and license not less than fifty thousand dollars in lawful money of the United States or in bonds of the United States or of the State of California, or of any county, municipality or school district of said state, or of any public utility corporation, or of any irrigation district in said state, the bonds issued by which district are legal investments for savings banks or any notes or bonds secured by mortgage or deed of trust payment of which is guaranteed by a policy of mortgage insurance, or mortgage participation certificates, issued by a mortgage insurance company in accordance with the provisions of chapter eight, title two, part four of division first of the Civil Code or in lieu thereof promissory notes secured by first mortgages or deeds of trust upon real estate located within this state, satisfactory to the official vested by law with state supervision and license of building and loan associations, all duly assigned or endorsed in blank, to be held by the said official as a guarantee fund for the protection and indemnity of residents of the State of California who shall invest in any of its bonds, debentures, shares, contracts, agreements or other securities, or with whom it shall do business.

It must also procure from the official vested by law with state supervision and license of building and loan associations, the license provided for building and loan and similar corporations and associations, paying the statutory fee therefor before entering upon the transaction of busi-

ness, and annually renew the same; *provided, however*, that the official or officials, vested by law with state supervision and license of building and loan associations may, before issuing license to any building and loan association, or other corporation, organized under and by virtue of the laws of any other state or territory, or of any foreign country, doing a business which would properly place it under the supervision of the state building and loan commission, require such corporation, or corporations, to so modify or change their contracts, certificates of membership shares, or stock that they will conform in all respects to the requirements of associations organized within the State of California; and shall likewise conform in all other respects to the provisions of sections six hundred thirty-three to six hundred forty-eight *a* of the Civil Code of the State of California.

With the consent of the said official vested by law with state supervision and license any of the securities deposited as herein provided may be withdrawn at any time upon the substitution and deposit of others of form and character herein specified and of like or greater net value, so long as the aggregate net convertible value of all equals or exceeds the amount named herein. The fund thus created is not to be foreclosed or realized upon except for the liquidation of a final judgment in favor of residents of California who were investors in any of the above mentioned securities of such foreign company, corporation or association, and then only after certified proof thereof has been filed with the custodian.

Except as above provided, securities deposited as herein specified shall not be withdrawn until satisfactory proof of the liquidation of all liabilities to residents of California, approved by the official vested by law with state supervision and license, shall be filed with the custodian, when all may then be withdrawn.

Any person or persons who shall be found in the state, as principal, agent, solicitor, or in any other capacity, soliciting or conducting the business of selling, disposing of, or taking or soliciting subscriptions for the sale of any of the forms of bonds, debentures, shares, contracts, agreements or other securities of any such foreign company, corporation or association which has not complied with all the requirements of this section shall be deemed guilty of a misdemeanor punishable, upon conviction, by a fine of not less than one hundred nor more than one thousand dollars or by imprisonment in the county jail for not less than one nor more than twelve months, or by both such fine and imprisonment. (In effect August 17, 1923.)

Investments permitted; approval required.

647. Any building and loan association may invest in or loan upon bonds of the United States, of the State of California, or of any county, municipality or school district of said state, or of any public utility corporation, and may also invest in or loan upon notes or bonds secured by mortgage or deed of trust, payment of which is guaranteed by a policy of mortgage insurance, or mortgage participation certificates, issued by a mortgage insurance company in accordance with the provisions of chapter eight, of title two of part four of division first of the Civil Code, the total of which investments at any time shall not exceed twenty-five per centum of the assets of such association; *provided, however*, that any such loan or investment made by such association must be approved by the official, or officials, vested with the powers of supervision and license. (In effect August 8, 1915.)

Consolidation of associations.

647a. Any two or more building and loan associations may unite and become incorporated in one body, with or without any dissolution or division of the funds of either of them; or any such corporation, association or society may transfer its engagements, funds and property to any other like corporation, association or society upon such terms as may be agreed by an unanimous vote of their respective boards of directors, ratified by the written consent of the shareholders holding more than two-thirds of the shares in force in each of the respective contracting associations; *provided, however*, that any such consolidation or transfer must also be approved by the official or officials vested by law with powers of state supervision and license. (In effect July 22, 1919.)

Name; to include what.

648. The name "building and loan associations" as used in this title shall include:

Mutuals.

First—Corporations formed for the purpose of receiving money from, and loaning money to, their members only.

Corporations operating on similar lines.

Second—Corporations, associations, companies, copartnerships, and individuals transacting the business of issuing or selling bonds, debentures, certificates, shares of stock, or other papers, by whatever names said instruments may be designated, whether said instruments are issued for money paid in advance or for money to be paid in installments, but with an intent, either implied or expressed, that the proceeds or accumulated installments thereof and thereon are to be withdrawable or repayable, with accumulated profits, at some future fixed, or indefinite date of maturity; *provided always*, that this section does not include persons, copartnerships or corporations engaged in any kind of banking business. (In effect March 22, 1909.)

Formation with or without capital stock.

648a. Building and loan associations may be formed under this title with or without guarantee or other capital stock, with all the rights, powers and privileges and subject to all the restrictions and liabilities set forth in this title. If formed without any capital stock or with guarantee capital stock only, the working capital may be accumulated by the issue of membership shares, units or certificates having a paid-up or ultimate matured installment value of one hundred or two hundred dollars each, and entitled to all the rights, powers and privileges and subject to all the restrictions and liabilities provided in this title for shares of authorized capital stock of a similar class. Any building and loan association heretofore formed may reincorporate under the provisions of this section and may substitute membership shares, units or certificates of similar classes for its outstanding or authorized shares of capital stock, other than guarantee capital stock by amending its articles of incorporation in the manner prescribed by section three hundred sixty-two of this code, except that such amended articles of incorporation must be adopted by a unanimous vote of the board of directors. (In effect July 29, 1921.)

BUILDING AND LOAN COMMISSION ACT.

CHAPTER 354.

[Approved April 5, 1911. Stats. 1911, p. 607.]

(Amendments effective December 18, 1911, March 23, 1912, August 8, 1915, July 27, 1917, July 29, 1921, August 17, 1923, and July 24, 1925.)

The people of the State of California, represented in senate and assembly, do enact as follows:

SECTION 1. There is hereby created a bureau, to be known and designated as the "bureau of building and loan supervision," with powers of supervision, examination and license of all building and loan associations, mutual loan associations, cooperative home associations, and all other corporations, association and societies whenever, wherever and however formed, which are based, or are operating on plans or methods similar to building and loan associations as defined in section six hundred forty-eight of the Civil Code. Said bureau is charged with the enforcement of all laws designed for the formation, government or operation, in this state, of any such association, corporation or society, and is vested with power to determine what associations, corporations and societies, come within the purview of the laws. (In effect March 23, 1912.)

Administration; commissioner, deputies, etc.

SEC. 2. The administration of said bureau shall be vested in a commissioner, to be known and designated as the "building and loan commissioner," who shall be appointed by the governor and commissioned to hold office at the pleasure of the governor. He must be a citizen of the state; and he must not be in any way connected with any association, corporation or society coming under his supervision. He shall appoint a chief deputy building and loan commissioner with full power as such, who must be a practical, skilled accountant, fully conversant with building and loan systems and accounts; he shall also appoint two deputies who shall be accountants; he shall appoint a clerk, and a stenographer; he shall also have power to appoint such other temporary assistants and employees as may be necessary for the transaction of the business of his office. (In effect July 24, 1925.)

Salaries and expenses.

SEC. 3. The commissioner shall receive a salary of four thousand dollars per annum. He shall, subject to the approval of the board of control, have power to fix the salaries and compensation of deputies, assistants and employees. There shall also be allowed and paid the necessary traveling expenses of the commissioner and his deputies incurred while traveling in the line of their duties. The commissioner shall procure and have an office in the city of San Francisco. Said commissioner shall also provide for such stationery, printing, postage and all other necessary expenditures as may be necessary for the proper conduct of his office. All said salaries and expenses shall be audited and

paid in the same manner as the salaries and expenses of other state offices. Said salaries and expenses shall be paid from the "building and loan fund." (In effect July 24, 1925.)

Bonds and oath of office.

SEC. 4. Before entering upon their duties, the commissioner and his deputies shall each execute an official bond in the penal sum of five thousand dollars, each of which bonds must be guaranteed by a duly authorized surety or bonding company, the premium on which shall be paid from the allowance for office expenses. Any bond executed under this section must be approved by the governor and filed and reported in the office of the secretary of state, and such commissioner and deputies must take the oath of office as prescribed by the Political Code for the state officers in general. (In effect July 29, 1921.)

Commissioner to license and report to governor.

SEC. 5. It shall be the duty of the commissioner to furnish all associations, corporations or societies, which, in his judgment, legally come under his jurisdiction, and that have otherwise complied with the requirements of law, a license authorizing them to transact business for one year from the date of said license; to receive and place on file in his office the annual or other reports required by law to be made by building and loan associations, licensed by him; to supply each with blank forms for such statement; and to make, on or before the first day of October in each year, a tabulated report to the governor of this state, showing the condition of all such associations, corporations or societies reporting to him, with such recommendation as he may deem proper, accompanied by a detailed statement of all moneys received by him since his last report and the disposition thereof. (In effect July 29, 1921.)

Examinations of domestic and foreign associations.

SEC. 6. It shall be the duty of the commissioner, in person, or one of his deputies at least once in each year, without previous notice, to visit and examine into the affairs of every such association, corporation or society licensed by him, incorporated or doing business in this state; on such occasions he shall have free access to all the books, records, securities and papers of every such association, corporation or society, and shall first count the cash and check the bank balance of such corporation or association with the proper amount of funds as shown by the books to be on hand and at the date and hour of such examination, and shall then examine and verify the books, accounts, and securities, and, so far as possible and consistent, the values of all property owned or held as collateral security for moneys loaned, and otherwise use reasonable diligence to ascertain the financial condition and solvency thereof. He and his deputies shall have power to administer oaths in the line of duty, and to examine under oath the officers, employees and agents, or the custodian or receiver, relative to any or all the business thereof. Whenever the result of any such examination shall develop a condition demanding an extended audit of the books and affairs, the commissioner may, for such purpose, appoint a competent auditor at the expense of the association, corpora-

tion or society examined. The expense of such audit shall be fixed by the commissioner and shall not exceed fifteen dollars per diem, plus traveling and hotel expenses, for each day actually engaged in the making of the audit and the preparation of the report.

The commissioner or his deputies shall examine, or cause to be examined, the books and affairs of any such association, corporation or society formed under the laws of any other state, territory or foreign country applying for a license to enter this state for the transaction of business, prior to the granting of such license and annually thereafter, and for every such examination made outside the state the actual traveling and hotel expenses incurred shall be paid by the association, corporation or society so examined; *provided*, that the result of any similar examination made and certified by the duly constituted authorities of any state having similar laws of supervision may be accepted by the commission. (In effect July 29, 1921.)

Books and accounts required; appraisement of real estate.

SEC. 7. To facilitate the examination specified in the foregoing section, he shall require every such association, corporation, or society to keep its books in such form as to accurately show its assets and liabilities in detail and to keep records written in ink, showing the appraised values of the real estate security held in connection with each loan, and signed in each case by the appraiser, officer or committee charged with making such estimated valuations. The commissioner may make a revaluation of the real estate owned, and of other securities of any such association, corporation or society licensed by him, on which the loan payments may be delinquent for six months or more, and may, for that purpose, appoint local appraisers, who shall be disinterested persons, at the expense of such association, corporation or society; the expense of such appraisement to be fixed by the commissioner, but not to exceed the sum of five dollars for property located outside of any incorporated limits and three dollars for property located inside of any incorporated limits for each property so examined and appraised. Each appraiser so appointed shall be required to make a sworn report to the commissioner of his estimated valuations of all property so examined and appraised.

Power to issue subpoenas.

SEC. 8. The commissioner shall have power to issue subpoenas and require attendance of any or all trustees, or agents of any such association, corporation or society, and such other witnesses as they may deem necessary, in relation to its affairs, transactions and condition, and any such person so served with such subpoena may upon application of the commissioner be required by order of the superior court of the county where the corporation, association or society has its principal place of business to appear and answer such pertinent questions as may be put to him by such commissioner and be required to produce such books, papers or documents in his possession as may be required by such commissioner.

Powers of commissioner in unsafe practices and conditions, and in liquidations.

SEC. 9. If the commissioner, as the result of any examination, or from any report made to him or to the shareholders, shall find that any association, corporation or society licensed by him, is violating the

provisions of its charter or of the laws of this state provided for its government, or is conducting its business in an unsafe or unauthorized manner, he may, by an order addressed to the association, corporation or society so offending, direct a discontinuance of such violations or unsafe practices and a conformity with all the requirements of law; and if such association, corporation or society shall refuse or neglect to comply with such order within the time specified therein; or if it shall appear to the commissioner that any such association, corporation or society is in an unsafe condition, or is conducting its business in an unsafe manner, such as to render its further proceeding hazardous to the public, or to those having funds in its custody; or if he shall find that its assets are impaired to such an extent that, after providing for all liabilities other than to shareholders, members and investors, they do not exceed in volume the dues or principal payments paid in by the shareholders, members and investors and accredited to or on account of all classes of stock, shares, or certificates of investment, issued and outstanding, he shall, in order to prevent waste and diversion of assets, assume and take charge of the affairs and business of such association, corporation or society and possession and control of all its property and assets, and retain such possession pending action by the proper court. Upon taking such action, he may, under his hand and official seal, appoint a custodian, require from him a good and sufficient bond, and place him in charge as his representative. He shall immediately notify the attorney general of his action and of all the necessary facts in connection therewith; and thereupon it shall become the duty of the attorney general to at once apply to the superior court of the county in which such association, corporation or society has its principal place of business, for an order citing such association, corporation or society to show cause, if any it may have, within not exceeding ten days, why the action of the commissioner should not be approved and confirmed by the court, and made permanent. Such court may in such application, and after a full hearing, approve or disapprove of the action of the commissioner. If the court shall approve and confirm the action of the commissioner, such approval and confirmation shall operate as a permanent injunction against the further prosecution of business by such association, corporation or society, and the commissioner shall proceed immediately to liquidate the business and affairs thereof, and so continue until such liquidation has been completed. If the action of the commissioner shall be disapproved by the court, the commissioner shall cause all reasonable expenses incurred by him during his occupancy or possession, including not exceeding eight dollars per diem, for each business day, as the compensation of the custodian, to be paid from the funds of such association, corporation or society, and immediately restore the balance of the property and assets thereof to the possession of the proper officers.

The approval and confirmation of the action of the commissioner, by the court, shall operate to empower the commissioner to collect all moneys, debts and claims due to or belonging to such association or society and to give full receipt therefor; to release or reconvey all real or personal property pledged as security for loans; to approve and pay all just and equitable claims; to prosecute all actions necessary to enforce liquidations; and, on the order of the court, to compound bad and doubtful debts and to sell and convey real and personal property.

As soon as practicable after the approval and confirmation of the action of the commissioner, by the court, he shall cause an inventory of all the assets of such association, corporation or society to be made in duplicate, the original to be filed with the proper court and the duplicate in the office of the commissioner. He shall cause due notice to be given by publication, weekly, for four successive weeks, in some newspaper published at or near the principal place of business of such association, corporation or society, requesting all persons having claims against it as creditors, shareholders, members or investors, to present same and make legal proof thereof, at a place and within a time to be designated in such publication; and he shall cause a copy of such notice to be mailed to all persons whose names appear of record upon its books as creditors, shareholders, members or investors; and upon the expiration of the time fixed for the presentation of claims the commissioner shall prepare or cause to be prepared, in duplicate, a full and complete schedule of all claims presented, specifying by classes those that have been approved and those that have been disapproved, and file the original with the proper court and the duplicate in the office of the commissioner. Due notice shall be mailed to all claimants whose claims may have been rejected. Action to enforce the payment of any rejected claim must be brought and service had within thirty days from and after the date of filing of the schedule of claims with the proper court, otherwise all such actions shall be forever barred. The commissioner may, under his hand and official seal, appoint one or more special deputies to assist in the duties of liquidation and distribution, under his direction, and may also employ such counsel and clerical assistance as may be needful and requisite, and fix the salaries and compensation to be allowed and paid to each. All such salaries, together with such other reasonable and necessary expenses as may be incurred in the liquidation, shall be paid by him from the funds of such association, corporation or society in his hands, and from the net realization of assets, in excess of such salaries and expenses, the commissioner shall first pay all approved claims other than to stockholders, shareholders and members; and thereafter he shall distribute and pay dividends, in liquidation to the stockholders, other than guarantee, and to the shareholders and members, as fast as funds to the amount of ten (10) per cent of such approved claims are available therefor, and so continue until all the assets have been realized upon and a final dividend in liquidation shall be declared and paid. Upon the payment of a final dividend in liquidation, the commissioner shall prepare and file with the proper court a full and final statement of the liquidation, including a summary of the receipts and disbursements, and a duplicate thereof shall be filed in the office of the commissioner, and after due hearing and approval by the court the liquidation shall be deemed to be closed. The approval and confirmation of the action of the commissioner, in the manner herein provided, shall operate to dissolve or stay any or all actions or attachments initiated or levied within thirty days next preceding the date of notification of the attorney general by the commissioner; and, pending the process of liquidation, as herein provided, no attachment or execution shall be levied nor lien created upon any of the property of such association, corporation, or society.

In every case where any such association, corporation or society shall have a paid in guarantee capital, and the realization of assets shall be

insufficient to meet the liabilities due to all other classes of stockholders, shareholders, members and investors, the commissioner shall enforce, by action or otherwise, the liability of each and every of the holders of the guarantee capital stock for his or their respective pro rata of any such deficiency. Whenever, in all cases where there shall be a paid in guarantee capital, the commissioner shall have fully liquidated all approved claims, and shall have made due provision for any and all known but unclaimed liabilities, guarantee capital excepted, and shall have paid all expenses of liquidation, any surplus that may then remain in his hands, together with all the records and effects, shall be delivered over to the holders of the guarantee capital stock at a meeting thereof to be called by the commissioner for that purpose. (In effect March 23, 1912.)

Penalty for noncompliance with orders, sheriff may enforce demands.

SEC. 9a. Whenever it shall become necessary for the commissioner to take action against any association because of unsafe practices and of conditions unsafe and hazardous to the public and to those having funds in its custody, as provided in section nine, the refusal of any officer or director to comply with his written demand for possession of the property and assets shall constitute a misdemeanor punishable by a fine of not more than five hundred dollars or by imprisonment in the county jail for not more than ninety days, or by both such fine and imprisonment; and if such demand be not complied with within twenty-four hours after service the commissioner may call to his assistance the sheriff of the county in which the principal place of business of such association is located, by written demand under his hand and official seal, whereupon it shall become the duty of such official to enforce the demands of the commissioner. (In effect August 8, 1915.)

Officers must furnish schedule of property.

SEC. 10. Upon the approval of the action of the commissioner, in the manner and for the cause set forth in section nine, the commissioner shall require the president and secretary of such association, corporation or society to, and such officers shall, make a schedule of all its property and make oath that such schedule sets forth all the property which such association, corporation or society owns or to which it is entitled, and deliver such schedule, and the possession of any and all such property as may not have been so previously delivered, to the commissioner, who may at any time examine under oath such president and secretary, or other officers, to determine whether or not all the property which such association, corporation or society owns, or to which it is entitled, has been transferred and delivered into his possession. (In effect March 23, 1912.)

Receivers, duties and powers.

SEC. 11. Receivers, heretofore appointed, must, at least annually, make due report of all their doings and accounts to the proper court, and immediately thereafter file a copy thereof with the commissioner; and the commissioner shall, at least once in each year, and as much oftener as he may deem expedient, examine the accounts and doings of such receivers, and, for such purpose, shall have full and free access to all books, accounts and vouchers relating to such liquidation, and any defect, irregularity or misconduct on the part of such receivers as he may find to exist shall be, by the commissioner, reported to the proper court. (In effect March 23, 1912.)

Special examinations on request.

SEC. 12. Upon the certificate, under oath, of any ten or more officers, trustees, creditors, shareholders or depositors of any such association, corporation or society, setting forth their interest and the reason for the making of such examination, directed to the commissioner, and requesting him so to do, he shall forthwith make a full investigation of its affairs, in the manner provided.

Failure of commissioner to act.

SEC. 13. If the commissioner, having knowledge of the insolvent condition, or of any violation of law or unsafe practice of any such association, corporation or society under his supervision, such as renders, in his opinion, the conduct of its business hazardous to its shareholders, creditors or depositors, shall fail to take the proper action required by this act, or shall refuse or neglect to perform the official duties pertaining to his office, then upon conviction thereof the office of such commissioner shall be declared vacant by the governor, and a successor be appointed to fill the unexpired term.

Assessments for salaries and support.

SEC. 14. To meet the salaries and expenses provided for by this act, the commissioner shall require every association, corporation or society licensed by him or coming under his supervision to pay in advance, to him, and prior to the issuance of any license, its pro rata amount of all such salaries and expenses, and it is hereby made the duty of every such association, corporation or society to pay the same; such pro rata shall be fixed and determined by the proportion which its assets bear to the aggregate assets of all such associations, corporations, or societies, receiving licenses, as shown by the last reports of such corporations, associations, or societies to the commissioner. On or before the thirtieth day of December, in each year, the commissioner shall notify each of such associations, corporations or societies, through the United States mail, of the amount assessed and levied against it and that the same must be paid within twenty days thereafter; and should payment not be made to him within said twenty days, he shall then assess and collect a penalty, in addition thereto, of ten per cent per day for each day that such payment may be delayed or withheld; *provided, however*, that in the levy and collection of such assessment, no such association, corporation or society shall be assessed for, nor be permitted to pay less than ten dollars per annum, and any such association hereafter formed in this state, shall be required to pay not less than one dollar per month for the unexpired term ending December thirty-first, succeeding application; and in like manner any such association organized outside this state shall be required to pay not less than three dollars per month, for such unexpired term, for its first license.

Requirement for license and renewal; commissioner may revoke license.

SEC. 15. It shall be the duty of the commissioner to require every such association, corporation or society coming under his supervision, to procure from him, prior to the transaction of any business, a certificate of authority or license to transact business in this state; and it is hereby made the duty of every association, corporation or society to comply with such requirement. To procure such license, there must be filed with and approved by the commissioner, a certified copy of its

articles of incorporation, constitution and by-laws and all subsequent amendments thereto, accompanied by the license fee herein provided for; and after the expiration of the term for which a license may have been granted to it, no such association, corporation or society shall be permitted to continue to transact business without first procuring a renewal of such license on the terms provided in this act, and any such association, corporation or society violating the provisions hereof shall be subject to a penalty of ten per cent per day of the amount of the license fee required to be paid under section fourteen of this act, in addition thereto, for each day during the continuance of such offense. The commissioner is authorized and empowered to revoke the license of any such association, corporation or society under his supervision, the solvency whereof may have become imperiled by losses or irregularities; and immediately upon the revoking of any such license he shall report the facts to the attorney general, who shall thereupon take such proceedings as are provided in section nine of this act.

Agents' licenses and renewals.

SEC. 15a. No person receiving compensation therefor, other than an officer, director or salaried employee, no part of whose compensation consists of commissions, or other than a local resident agent who has resided in the county in which he holds such local agency for a period of not less than one year prior to the time that he took such agency, of a building and loan association or other similar corporation or society which is duly licensed by the commissioner, shall act as solicitor or agent for the sale of the shares of stock, shares of membership, certificates or other securities or forms of investment issued by, or for the securing of loans from any such association, corporation or society until he has first procured from the commissioner a license therefor. To obtain such license there must be filed with the commissioner a duplicate of the authorization or appointment issued to him by, together with a request from, a licensed association, corporation or society that a license be issued to him to act as an agent or solicitor for it, and accompanied by a fee of one dollar. All such licenses shall expire by limitation on the thirtieth day of June succeeding their issue, but may be renewed from time to time, for an additional period of one year upon a request therefor from the association, corporation or society originally applying, and payment of a renewal fee of one dollar. Any such license may be revoked at any time on the application of the association, corporation or society for whom it was issued, or may be revoked by the commissioner for cause.

The commissioner shall keep an alphabetical list of the names of persons to whom such licenses are issued with the date of issue and renewal, and the name of the association, corporation or society for whom such licensee is authorized to act. All such licenses shall be issued under rules and regulations to be prescribed by the commissioner. (In effect July 27, 1917.)

Procedure and powers regarding new associations.

SEC. 15c. Before the articles of incorporation of any building and loan association, hereafter desiring to incorporate, under the laws of this state, shall be filed in the office of the secretary of state of the State of California, there must be attached thereto, the certificate of approval of the building and loan commissioner. Such proposed articles shall be

submitted to the commissioner, and upon receipt of same, he shall immediately examine into all the facts connected with the formation of such intended corporation, including its location, and proposed incorporators. If it appears to him that such corporation, if formed, will be entitled to commence the business for which it is organized, and authorized under the law to conduct, the commissioner shall execute his certificate of approval; *provided, however*, that the commissioner may refuse to execute such certificate, if, upon his examination and investigation, he has reason to believe that the proposed corporation is to be formed for any business, other than legitimate building and loan business, or that the persons proposing to incorporate such corporation, lack the character and general fitness to engage in such business, or that the name of the proposed corporation is likely to mislead the public, as to its character or purpose, or that the name proposed for such corporation is the same as one already adopted or appropriated by any existing building and loan association in this state, or so similar thereto, as to be likely to mislead the public. (In effect July 24, 1925.)

Restrictions to use of name "building and loan."

SEC. 15d. No person, firm, company, association, copartnership, or corporation, either domestic or foreign, unless he or it is the lawful holder of a license, to transact business in this state, issued by the building and loan commissioner, and then in force, and is actually engaged in carrying on a building and loan business in this state, shall hereafter transact business under any name or title which contains the term "building and loan," nor use any sign or circulate or use any letterhead, billhead, circular, or paper whatever, or advertise in any manner, which indicates that his or its business is the character or kind of business, carried on or transacted by a building and loan association, or which is calculated to lead the public to believe that his or its business is that of a building and loan association. Any violation of any of the provisions of this section shall constitute a misdemeanor, punishable by a fine of not exceeding five hundred dollars, or by imprisonment in the county jail for not exceeding ninety days, or by both such fine and imprisonment. Upon action brought by the commissioner, the court may also issue an injunction, restraining any person, firm, company, copartnership, or corporation from continuing to violate any provision of this section. (In effect July 24, 1925.)

Annual report required and penalty for failure to report.

SEC. 16. The commissioner shall require every association, corporation or society licensed by him, and including associations in liquidation, within thirty days after the close of its annual fiscal term to make a report to him in writing, verified by the oath of its president and secretary, showing accurately its financial condition at the close of such term; such report shall also include all the receipts and disbursements and income and expenses for the term, together with such statistical and other information as may be deemed essential; all and every of such reports shall be in such form as the commissioner may prescribe, and upon blanks to be by him furnished therefor. Every such association, corporation or society is hereby required to make and file all such reports within the time specified herein, and for failure or neglect so to do shall be subject to a penalty of ten dollars per day for each and every day the same shall be delayed or withheld.

Disposition of moneys—Revolving fund.

SEC. 17. The collection of all moneys assessed, as herein provided, for the payment of salaries and annual expenses, or forfeitable as fines for failure to make payment of assessments, procure licenses, or make and file reports as herein specified, and due from any such association, corporation or society coming within the provisions of this act, or imposed as a penalty for violation of any order or summons, may be enforced by the commissioner by action instituted in any court of competent jurisdiction; and all moneys collected or received by the commissioner under this act, shall be deposited with the state treasury, to be credited to a fund to be known and designated as the "building and loan inspection fund"; which said fund shall only be used in defraying the salaries and expenses provided for by this act; *provided, however*, that the commissioner shall, without at the time furnishing vouchers and itemized statements, withdraw from said fund, a sum not to exceed five hundred dollars. The sum so drawn shall be used as a revolving fund where cash advances are necessary and at any time upon the demand of the board of control, must be accounted for and substantiated by vouchers and itemized statements submitted to and audited by the board of control and the controller. (In effect July 24, 1925.)

Repealing act of 1905 and earlier acts.

SEC. 18. An act approved March 21, 1905, entitled "An act creating a bureau of building and loan supervision; providing for the appointment of administration officials therefor to be known as the building and loan commissioners; prescribing their duties, powers and compensation; providing for a secretary, his powers and compensation; providing for the rental of offices for the use of the bureau and for traveling and office expenses; providing a system for licensing building and loan and other associations, and for assessing and collecting the license fees necessary to meet the salaries and other expenses; providing a course of procedure where violations of law, or unsafe practices are found to exist, or are reported by the commissioners to the attorney general; providing for involuntary liquidation by trustees, and proceedings in connection therewith; providing for exemption of property of associations in liquidation from attachments, executions and liens, pending liquidation; providing for and requiring associations to procure licenses, pay assessments levied for pro rata of salaries and expenses, and to make and file reports; providing penalties for violations of law and orders of the commissioners; providing for succession in office, and repealing all acts and parts of acts in conflict herewith." Also an act approved March 23, 1907, entitled "An act to amend section sixteen (16) of an act entitled 'An act creating a bureau of building and loan supervision; providing for the appointment of administration officials therefor to be known as the building and loan commissioners; prescribing their duties, powers and compensation; providing for a secretary, his powers and compensation; providing for the rental of offices for the use of the bureau and for traveling and office expenses; providing a system for licensing building and loan and other associations, and for assessing and collecting license fees necessary to meet the salaries and other expenses; providing a course of procedure where violations of law, or unsafe practices are found to exist, or are reported by the commissioners to the attorney general; providing for involuntary liquidation by trustees, and proceedings in connection therewith; pro-

viding for exemption of property of associations in liquidation from attachments, executions, and liens pending liquidation; providing for and requiring associations to procure licenses, pay assessments levied for pro rata of salaries and expenses, and to make and file reports; providing penalties for violations of law and orders of the commissioners; providing for succession in office, and repealing all acts and parts of acts in conflict herewith," approved March 21, 1905, relating to and providing for reports to building and loan commissioners and the publication thereof. Also an act approved March 20, 1909, entitled "An act creating a bureau of building and loan supervision; providing for the appointment of administration officials therefor to be known as the building and loan commissioners; prescribing their duties, powers and compensation; providing for a secretary, his powers and compensation; providing for the rental of offices for the use of the bureau and for traveling and office expenses; providing a system for licensing building and loan and other associations, and for assessing and collecting license fees necessary to meet the salaries and other expenses; providing a course of procedure where violations of law, or unsafe practices are found to exist or are reported by the commissioners to the attorney general; providing for involuntary liquidation by trustees, and proceedings in connection therewith; providing for exemption of property of associations in liquidation from attachments, executions and liens pending liquidation; providing for and requiring associations to procure licenses, pay assessments levied for pro rata of salaries and expenses, and to make and file reports; providing penalties for violations of law and orders of the commissioners; providing for succession in office, and repealing all acts and parts of acts in conflict herewith," approved March 21, 1905, relating to the powers and duties and salaries of the state building and loan commissioners, and all acts or parts of acts inconsistent with the provisions of this act are hereby repealed.

Transfer of powers from board of commissioners to commissioner.

SEC. 19. The building and loan commissioner provided for by this act shall be the successor in interest of, and shall succeed to all the rights, powers and privileges possessed by, the building and loan commissioners under and by virtue of that certain act entitled "An act approved March 21, 1905, as amended March 23, 1907, and as amended March 20, 1909, entitled 'An act creating a bureau of building and loan supervision; providing for the appointment of administration officials therefor to be known as the building and loan commissioners; prescribing their duties, powers and compensation; providing for a secretary, his powers and compensation; providing for the rental of offices for the use of the bureau and for traveling and office expenses; providing a system for licensing building and loan and other associations, and for assessing and collecting the license fees necessary to meet the salaries and other expenses; providing a course of procedure where violations of law or unsafe practices are found to exist, or are reported by the commissioners to the attorney general; providing for involuntary liquidation by trustees, and proceedings in connection therewith; providing for exemption of property of associations in liquidation from attachments, executions and liens, pending liquidation; providing for and requiring associations to procure licenses, pay assessments levied for pro rata of salaries and expenses and to make and file reports; providing penalties for violations of law and orders of the commission-

ers; providing for succession in office and repealing all acts and parts of acts in conflict herewith'": and any and all actions or proceedings taken or commenced by the said building and loan commissioners, under the act aforesaid, shall continue in full force and effect and the said actions and proceedings shall not abate and the said building and loan commissioner provided for by this act shall be substituted for and continue in the place and stead of the said building and loan commissioners under the act aforesaid, and likewise all books, documents, records and property of every kind and description obtained or possessed by the building and loan commissioners or their secretary or clerks, examiners or employees under the provisions of the said act of March 21, 1905, shall immediately be turned over and delivered to the said building and loan commissioner herein provided for.

Title of act.

SEC. 20. This act shall be known as the building and loan commission act.

When in effect.

SEC. 21. This act shall take effect immediately.

RULINGS BY BUILDING AND LOAN COMMISSIONER.**Organization of New Associations.**

The following rules, relating to the organization of new associations were put into effect on July 1, 1925:

"If it be a 'Mutual' a committee should proceed to secure subscriptions for not less than 2,500 installment shares on which the monthly payments are to be not less than 50 cents per share, aside from the pro rata or organization expenses, of not less than 50 cents per share, to be paid with the first installment.

"If it is to be a 'Guarantee Capital' association to be located in any one of the following cities, viz: Alameda, Berkeley, Fresno, Glendale, Long Beach, Los Angeles, Oakland, Pasadena, Pomona, Redlands, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Jose, Santa Barbara, Santa Monica, or Stockton, then, irrespective of the authorized capital, there must be a paid in capital of \$50,000 or more, and an organization fund of \$5 per share on the shares actually subscribed. In cities over 5,000 population the paid in capital must be not less than \$25,000 plus an organization fund of \$5 per share.

"All moneys collected for the organization fund must be paid into the treasury to the credit of that fund, and all those desirous of organizing associations must distinctly understand that this department is opposed to the use of any portion thereof as a commission for securing subscriptions to guarantee capital."

"Branch" and "Agency" Office Question.

Under no condition will this department permit an association to establish a branch association in California.

An association that may desire hereafter to establish an agency office must first apply to the Building and Loan Commissioner for permission to establish such an office; the Commissioner will use the same discretion as to issuing a permit for the establishment of an agency office, as is provided by the new law, effective July 24th, vesting him with the authority to permit or refuse to permit the incorporation of a new association.

An association maintaining agency offices must forward to the Commissioner the following information, at the close of its fiscal year:

- (1) Location of agency offices;
- (2) Names of agents in charge;
- (3) Expenses of each agency and how such expenses are met;
- (4) Financial statement of each agency, showing expenses and receipts for the last fiscal year.

An agency office must advertise on the windows of its place of business that it is an *agency*, and state the name of the city where its *home office* is located, so that the public may not mistake such agency for a branch association office or an independent association office. Whenever an *agency* advertises in a newspaper of the city in which it is located, it must state in such advertisement that it is an *agency* office and also state the name of the city where its *home office* is located. All literature advertising the agency office must set forth that it is an *agency* office and mention the city where its *home office* is located. The type, used in designating the name of the *home office city*, must be at

least as large as that used in designating the address of the *agency* office. It is preferable that the name of the home office city be emphasized.

"Advisory" Boards.

Some associations have, without authority, organized so-called advisory boards in connection with agency offices. There is no authority under the by-laws of an association, or under the general laws governing the building and loan associations, permitting the organizing of advisory boards. Such boards may tend to surround an agency with an importance bordering on a branch or an independent office, and instances have been brought to the attention of the Commissioner where investors had thought such advisory boards to be boards of directors.

It is the order of the Building and Loan Commissioner that all associations having advisory boards as a part of their organization, at once take steps to disband such advisory boards; such organizations are directed immediately to notify the Commissioner when they have taken this step.

Agents' Licenses.

A new form of agent's license was issued on July 1, 1925. After that date, all agents, whether resident, local or traveling, who are employed by associations to solicit loans and sell shares of stock, membership shares and certificates, will be required to secure a license from the Building and Loan Commissioner.

No agent, under a license issued by this commission, as provided by section 15a of the Building and Loan Commission Act, will be authorized to solicit for loans and for sale of shares of stock, shares of membership and certificates of investment of building and loan associations in the home office city or town of an association the name of which is so like or similar to the name of the association represented by said agent, that it is likely to mislead the public.

If it appears to the commissioner that a community has a sufficient number of home associations and outside associations represented, no further license will be issued to an agent to represent an outside association in such a community.

The following rules are now printed on licenses of agents:

"Licensed agents or solicitors, leaving the employ of the association named herein, must surrender this license to the association, that it may be cancelled on its records, following which, it must be forwarded to the Commissioner for cancellation on his records.

"Agents or solicitors dismissed for CAUSE by this Department, the Corporation Department, or the Insurance Department, will not again be licensed without the written consent of the association or corporation from whose employ they were dismissed."

Agents' Bonds.

Every agent or solicitor, employed by building and loan associations to solicit loans, and for the sale of shares of stock, shares of membership, certificates or other securities or forms of investments, must give bond in an amount of not less than \$1,000 to protect the association against any act of fraud, dishonesty, larceny, embezzlement, forgery,

misappropriation, wrongful abstraction or wilful misapplication, committed while in the employ of such association.

An agent's license will hereafter be sent direct to the association applying for it, and must not be delivered to the agent until the proper bond has first been obtained; such bond must immediately be sent to the Building and Loan Commissioner to be kept on file in his office; whenever an association makes application for cancellation of a license, the bond connected with such license will be returned to the association.

A regularly licensed real estate broker or bond broker has the authority to represent clients, applying to him, in making loans for them from building and loan associations, without being obliged to obtain a license from the building and loan commissioner.

Location of Mortgaged Properties.

In the annual report to the Commissioner, an association must hereafter give the name of the city and county, or county, where properties, on which it holds a mortgage or deed of trust, is located. Give this information following the names of the owners of the properties involved. (It will not be necessary to give this information concerning properties located in the home city of the association.)

Entrance Fee Must be Collected in Advance.

The legislature this year passed an act, which became effective on July 24, which abolished the provision which permitted associations to charge a withdrawal fee. This leaves the entrance fee to be dealt with. Hereafter, associations availing themselves of the entrance fee right, must charge and collect the entrance fee in advance. The entrance fee provisions must be clearly set forth on the blank applications and in pass books issued with certificates; such provisions must be printed in heavy type or in red ink for the benefit of the investor and a salutary warning to the agent.

PRINCIPAL PROCEEDINGS INVOLVED IN FORMING BUILDING AND LOAN ASSOCIATIONS.

In order to be of assistance to persons desiring to form new building and loan associations, and also with a view of making it possible for them to proceed legally and economically in the various steps required, the building and loan commission has prepared instructions, samples of articles of incorporation and samples of by-laws of the two types of building and loan associations. As the articles of incorporation and by-laws of the two types of associations are similar, it is not deemed necessary to print both sets.

The data referred to above are as follows:

Instructions to be Followed in Forming New Associations.

Effective on and after July 1, 1925.

First—Decide if you should have a "Mutual" or a "Guarantee Capital" association.

Second—If it be a "Mutual" a committee should proceed to secure subscriptions for not less than 2,500 installment shares on which the monthly payments are to be not less than 50 cents per share, aside from the pro rata of organization expenses, of not less than 50 cents per share, to be paid with the first installment.

Third—If it is to be a "Guarantee Capital" association to be located in any one of the following cities, viz: Alameda, Berkeley, Fresno, Glendale, Long Beach, Los Angeles, Oakland, Palo Alto, Pasadena, Pomona, Redlands, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Jose, Santa Barbara, Santa Monica or Stockton, then, irrespective of the authorized capital, there must be a paid in capital of \$50,000, or more, and an organization fund of \$5 per share on the shares actually subscribed. In cities over 5,000 population the paid in capital must be not less than \$25,000 plus an organization fund of \$5 per share.

Fourth—Select a name not now in use by any association in the state, embracing the words "Building and Loan Association" or "Building-Loan Association," and submit it to this office for approval, which, after approval, should then be submitted to the Secretary of State that he may advise if it is available for use. The words "Trust" or "Savings" must not be used as a part of the corporate name.

Fifth—Apply to this office for the loan of a "sample" form of articles of incorporation for the kind of association decided upon, which, after being prepared, but before being executed, must be submitted to this office that we may ascertain if it is in proper form and, if found satisfactory, return for execution.

After being executed the original and a duplicate must be forwarded to this office that the certificate required by Sec. 15c of the Building and Loan Commission Act may be attached before the original can be filed with the Secretary of State, or a certified copy with the county clerk of your county.

Sixth—Apply to this office for the loan of a "sample" form of the by-laws for the kind of association provided for in the articles of incorporation, then prepare your by-laws and submit them to this office for approval, after which they can be regularly adopted.

Seventh—After the by-laws have been adopted, forward a copy of the by-laws, a copy of the articles of incorporation, a list of the subscribers to the stock, or to the shares, a certificate from your bank showing that there is on deposit to the credit of the association the above required \$50,000 or \$25,000 for a guarantee association or not less than \$1,250 for a mutual association, plus the above requirement for organization expenses of either, together with a check to the order of the "Building and Loan Commissioner," for the equivalent of \$1 per month for the number of months unexpired of the calendar year, and a license will be issued to expire December 31st next.

Eighth—All moneys collected for the organization fund must be paid into the treasury to the credit of that fund, and all those desirous of organizing associations must distinctly understand that this department is opposed to the use of any portion thereof as a commission for securing subscriptions to guarantee capital.

Articles of Incorporation of a California Building and Loan Association.

KNOW ALL MEN BY THESE PRESENTS:

That we, the undersigned, citizens and residents of the State of California, have this day voluntarily associated ourselves together for the purpose of forming a corporation under the laws of the State of California.

AND WE HEREBY CERTIFY,

First—That the name of said corporation shall be _____

Second—That the purposes for which said corporation is formed are to encourage industry, frugality, home-building, and savings among its shareholders and members; the accumulation of savings; the loaning to its shareholders, members and others of the moneys or funds so accumulated, with the profits and earnings thereon, and the repayment to each of his savings and profits, whenever they have accumulated to the full par value of the shares, or at any time when he shall desire the same or when the corporation shall desire to repay the same, as it may be provided in the by-laws; and generally to do any and all other acts and things authorized by law, and more particularly by and under Title XVI, Part IV, Division I of the Civil Code of the State of California, and for all the purposes and with all the rights, powers, privileges and immunities in said title set forth.

Third—That the place where the principal business of said corporation is to be conducted is in the city of _____, in the county of _____, State of California.

Fourth—That the term for which said corporation is to exist is fifty (50) years from and after the date of its incorporation.

Fifth—That the number of directors of said corporation shall be _____, a majority of whom shall at all times each be the owner and holder of not less than _____ shares of the guarantee capital stock, and that the names and residences of the directors who are appointed for the first year and to serve until the election and qualification of their successors are as follows, to wit:

NAMES	WHOSE RESIDENCE IS
-----	-----
-----	-----

Sixth—That the amount of the capital stock of this corporation is _____ dollars, and the number of shares into which it is divided is _____ of the par value of one hundred (\$100) dollars each, all of which, when issued, shall be set apart as a fixed and permanent guarantee capital. Additional working capital may be accumulated by the issuance of membership shares, units and certificates, both installment and fully paid as provided for in section 648a of the Civil Code.

Seventh—That the amount of said capital stock which has been actually subscribed is _____ dollars and the following are the names of the persons by whom the same has been subscribed, to wit:

NAMES OF SUBSCRIBERS	NUMBER OF SHARES	AMOUNT
-----	-----	-----
-----	-----	-----

IN WITNESS WHEREOF, we have hereunto set our hands this _____ day of _____ A.D., 192____.

State of California, }
County of _____ } ss.

On this _____ day of _____, A.D. 192____, before me _____, a notary public in and for said county, residing therein, duly commissioned and sworn, personally appeared _____

known to me to be the persons whose names are subscribed to the foregoing instrument, and they each duly acknowledged to me that they executed the same.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed my official seal, at my office in said _____ county, the day and year in this certificate first above written.

(SEAL)

Notary Public in and for the County of _____
State of California.

By-Laws of a California Building and Loan Association.

NAME, LOCATION AND OBJECTS.

Section 1. This corporation shall be known as the _____ of _____, California.

Section 2. The principal place of business of the corporation shall be in the city of _____, County of _____, State of California.

Section 3. The object and purpose of this corporation shall be to encourage industry, frugality and the accumulation of savings among its shareholders, members and others, and to make loans to its shareholders, members and others for the purpose of aiding them in acquiring and improving real estate.

ARTICLE II.

GUARANTEE CAPITAL STOCK.

Section 1. The capital stock of this corporation shall be----- divided into----- shares of a par value of one hundred dollars each, all of which shall be a guarantee capital, and shall be issued at such times and in such amount as the board of directors may determine. It shall be sold upon subscriptions, at not less than par, payable not less than ----- per cent at the time of subscription, and the balance as may be ordered by the board of directors. This stock is not withdrawable until final liquidation, and no loans shall ever be made upon the pledge of any of its shares, as security, to the corporation.

Section 2. A majority of the board of directors shall always be selected from the holders of shares of the guarantee capital holding in their names ten shares or more of guarantee stock, and the minority may be selected from the holders of membership shares.

Section 3. The guarantee capital stock shall participate in the net earnings of the association to the full extent permitted under the provisions of Sec. 641 of the Civil Code. As provided in said section, an amount not exceeding one per cent per annum on the average loans in force, may be set aside from and out of the net profits, at each annual distribution thereof, or a proportionate amount at each semi-annual distribution, from which to declare dividends on and provide a reserve fund that shall be specially applicable thereto. The reserve fund shall be created and maintained in amount as provided in said section.

ARTICLE III.

OFFICERS.

Section 1. The affairs of the corporation shall be managed by a board of----- directors, who shall be elected annually from the shareholders and members, in the manner provided by law, to hold office for one year and until their successors are duly elected and qualify.

Section 2. Immediately following the annual meeting of the shareholders and members, the directors shall organize by the election of a president, and one or more vice presidents from among their own members, a secretary and one or more assistant secretaries, who may or may not be directors but must be shareholders or members. They shall also select an attorney and a treasurer; provided that a banker or banking corporation may be selected as a treasurer or depository. They shall also select from their own number a security committee to consist of three members, and a finance committee to consist of two members.

ARTICLE IV.

POWERS AND DUTIES OF DIRECTORS.

Section 1. The board of directors shall have power:

First—To suspend or remove, for cause, any elected or appointed officer of the corporation.

Second—To require any officer to produce for inspection at any time, any or all books, papers or documents in his possession relating to the business of the corporation.

Third—To fill all vacancies that may occur in the board of directors or elected or appointed officers.

Fourth—To loan the funds of the corporation, or such portion thereof as may be advisable, upon such securities as are provided by law, and to prescribe the terms and conditions upon which loans may be made; provided, that whenever loans are made upon the definite contract plan the body of the note or obligation shall set forth the number of installments, and the amount of each installment required to repay the principal of the loan, together with the interest on the periodical unpaid balances, within the time agreed upon, the exact rate of interest to be specified in each note or obligation.

Fifth—To borrow money for the purpose of making loans or with which to pay withdrawals or maturities.

Section 2. A majority of the board shall constitute a quorum for the transaction of business; provided that no action relating to the final disposition of funds or other financial matters under consideration shall become effective except by an affirmative vote of a majority of the whole board.

ARTICLE V.

DUTIES OF OFFICERS.

PRESIDENT AND VICE PRESIDENT.

Section 1. It shall be the duty of the president, or in his absence, of one of the vice presidents:

First—To preside at all meetings of the shareholders and members of the board of directors; to sign all certificates of stock or membership, contracts, deeds, leases, releases, and orders on the treasurer for the payment of money, and to perform such other duties as may be ordered by the board of directors.

Second—To have the custody of all bonds executed by the officers to secure the faithful performance of their duties, except, that the bond of the president, if any, shall be deposited with the treasurer.

SECRETARY.

Section 1. It shall be the duty of the secretary, or in his absence, of the assistant secretary:

First—To attend all meetings of the corporation, and of the board of directors and to keep correct minutes thereof; to receive and receipt for all moneys paid to the corporation, to endorse all checks or drafts made payable to its order, and to deposit with the treasurer or depository all funds coming into his or her possession and take a proper receipt therefor.

Second—To keep proper and accurate accounts with the shareholders, members and investors; to draw and sign all orders on the treasury or depository; to countersign all documents requiring the signature of the president or vice president, and to affix the seal of the corporation whenever such is required to authenticate the acts of the corporation.

Third—To furnish the board of directors at each monthly meeting with a statement of financial and other transactions since the prior report and semi-annually, immediately after the first day of ----- and -----, of each year, a statement of the condition of the corporation and of the business of the past semi-annual term, and, after approval by the board, to cause the same to be printed for the information of the shareholders and members.

Fourth—To have the custody of, and properly care for, all notes, mortgages, deeds of trust, deeds, leases, insurance policies and other documents pertaining to the business of the association, subject only to the orders of the board of directors.

Fifth—To require that the interest of the corporation in any property or building it may own or on which it may have a loan is properly insured, in an acceptable insurance company, against loss or damage by fire.

Sixth—To protect the interest of the corporation in all tax sales or forfeitures, and for this purpose to draw on the treasurer for the proper funds, without further notice or orders of the board; provided, however, he or she shall report the facts at the first stated meeting of the board thereafter.

Seventh—To deliver to his or her successor all books, vouchers, securities, documents and property of every kind, of which he or she is the custodian for the corporation, whenever he or she may retire from office, or within three days thereafter.

Eighth—To do and perform such further acts as may be required by the board of directors.

TREASURER OR DEPOSITORY.

Section 1. It shall be the duty of the treasurer or depository to receive all moneys deposited by the secretary for account of the corporation, and to disburse same only on orders signed by the secretary and countersigned by the president or a vice president, and to render a proper account thereof at the close of each month.

ATTORNEY.

Section 1. It shall be the duty of the attorney to attend the meetings of the board of directors whenever requested to do so; to examine into the sufficiency of title of any property offered as security for loans that may be referred to him, and to perform such other duties and render such other services as may be required by the board of directors.

COMMITTEES.

SECURITY COMMITTEE.

Section 1. It shall be the duty of the security committee to ascertain the market value of each and every piece of property offered as security for any proposed loan and to report thereon, in writing, at the next meeting of the board of directors.

Section 2. Every application for a loan shall be approved in writing by at least two members of said committee before the loan shall be made.

FINANCE COMMITTEE.

Section 1. It shall be the duty of the finance committee:

First—To examine and report upon all bills or claims against the corporation, prior to the same being ordered paid.

Second—To examine and report upon the books and accounts of the secretary and treasurer, at least semi-annually, and for that purpose, they may employ an expert of accounts to assist them, at a compensation to be fixed by the board of directors.

ARTICLE VI.

BONDS AND SALARIES.

Section 1. The secretary and treasurer (except where the treasurer shall be a bank or bankers), and such other employees as the board of directors shall determine, shall give bond, as security for the faithful performance of their duties, in such amount as the board of directors shall from time to time require, with corporate surety, the expense to be borne by the association.

Section 2. The president, vice presidents, secretary, treasurer, assistant secretary, assistant treasurer, attorney, and the members of the Security and Finance Committees shall receive such compensation for their services as the board of directors shall determine.

Section 3. The compensation of the directors, as such directors, in excess of five dollars each, for each meeting attended, shall be fixed by the stockholders at the annual meeting.

ARTICLE VII.

MEETINGS.

Section 1. The annual fiscal term shall end _____ and the annual meeting of the stockholders and members shall be held at the office of the corporation, at _____, California on the _____, in each year, notice of which must be given in the manner prescribed in section 201 of the Civil Code. Special meetings may be called by the board of directors, on their own initiative, and shall be called upon the written request of ten or more shareholders and members. Notice of special meetings shall be mailed to each shareholder and member, at his last known address, at least two weeks prior to the date of holding such meeting.

Section 2. The board of directors shall convene for the transaction of business on _____ in each month, and as much oftener as the necessities of business may demand. Notice of all meetings of the board of directors shall be given to each director in writing, by the secretary, at least twenty-four hours prior to the time of the holding of the meeting.

Section 3. All meetings of the board of directors shall be open to all shareholders and members.

ARTICLE VIII.

MEMBERSHIP SHARES.

Section 1. Membership shares having an ultimate matured or par value of ----- dollars each may be issued in either of the following forms, viz: "Installment" or "Full paid."

Section 2. Installment membership shares, Class "A," may be subscribed for and issued at any time. Each subscriber to those shares shall on or before -----, pay dues in an amount not less than ----- upon each share held by him, until such payments, together with the profits apportioned thereto, shall amount to the sum of one hundred dollars for each of such shares, at which time the shares shall mature and payments thereon shall cease.

Section 3. Installment membership shares, Class "D.C.," whenever authorized by the board of directors, will be issued only to borrowers on mortgage or deed of trust security, and then only to those who borrow on the "Definite Contract" plan. The monthly payment of dues on this class will be five cents per share of one hundred dollars matured or par value, and must be paid with, and in addition to, the monthly payments required to be paid upon the loan. Such shares shall participate pro rata with other classes of installment shares in the net profits subject to distribution, and, upon the repayment of the loan with which they are pledged, the then book value will be paid to the borrower, or credited as part payment on the loan, and the shares surrendered and cancelled.

Section 4. Full paid membership shares may be issued at such times as the board of directors may determine to any subscriber paying in the full face value of one hundred dollars (\$100) each. Dividends at such rate per annum as may be fixed by the board of directors, not in excess of six per cent, (6%) per annum, shall be paid on these shares, semi-annually in ----- and -----, and in consideration of such payments the holders shall waive all right to further participation in profits of the corporation. These shares are withdrawable, with accrued interest to the date of the notice, at any time after thirty (30) days written notice of the intention to withdraw, but subject in other respects to the restrictions set forth in Sec. 642 of the Civil Code. The corporation reserves the right to retire any or all these shares, in the order of issuance, at any time after two years from issue, upon sixty (60) days written notice to the holders by paying the face value plus accrued interest to date of expiration of notice.

Section 5. Full paid membership shares may also be issued at such times as the board of directors may determine to subscribers paying in the full face value of one hundred dollars (\$100) per share. Dividends at such rate per annum as may be fixed by the board of directors, not exceeding a full participation in the net profits, shall be paid on these shares, semi-annually in ----- and -----.

Section 6. Holders of either form of membership shares are members of the corporation, with all the rights, powers and privileges incident thereto, including the right to vote at all meetings of the shareholders and members—one vote for each share—and are subject to the same restrictions and liabilities.

Section 7. An entrance fee of not exceeding one dollar (\$1) per share may be charged and collected upon all membership shares.

ARTICLE IX.

INVESTMENT CERTIFICATES.

Section 1. Investment certificates having an ultimate matured or par value of one hundred dollars (\$100) each, may be issued in either of the following forms: "Installment investment certificates" and "Full paid investment certificates."

Section 2. Installment investment certificates may be subscribed for and issued at any time. Each subscriber to these certificates shall, on or before the ----- day of each month, pay dues in an amount of not less than ----- upon each certificate held by him, until such payments, together with the profits apportioned thereto, shall amount to the sum of one hundred dollars (\$100) for each of such certificates, at which time the certificates will mature and payments may cease. An entrance fee of one dollar (\$1) per certificate may be charged and collected upon this class of Installment Investment Certificates.

Section 3. Installment Investment Certificates may also be issued, upon which payments may be made at such times and in such amounts as the holder thereof may elect until said shares reach their matured value or are withdrawn. No membership fee, fine or forfeiture shall be chargeable against the holder of these certificates.

Section 4. Full Paid Certificates may be issued at such times as the board of directors may determine, to any subscriber paying in the full face value of one hundred dollars (\$100) each. Dividends at such rate per annum as may be fixed by the board of directors will be paid semi-annually on these certificates, in ----- and -----, and in consideration of such payments the holders shall waive all right to participation, in excess thereof, in the profits of the corporation. These investment certificates are withdrawable, with accrued unpaid interest, to date of notice, at any time after one year from date of issue, upon thirty (30) days written notice of intention to withdraw, but otherwise subject to the restrictions set forth in Sec. 642 of the Civil Code. The corporation reserves the right to retire any or all of these certificates, in the order of issuance, at any time after two years from date of issue, upon sixty (60) days written notice to the holder, upon the payment of the face value plus accrued and unpaid interest to date of expiration of notice.

Section 5. Holders of either form of these investment certificates are *not* members of the corporation and have none of the rights, powers and liabilities incident thereto.

ARTICLE X.

WITHDRAWALS AND MATURITIES.

Section 1. Holders of installment membership shares, and of installment investment certificates, desiring to withdraw a part or all of the amount to the credit of their shares or certificates, may do so by giving thirty (30) days written notice of their intention or desire so to do. On the expiration of such notice, they are entitled to receive the full amount paid in upon their membership shares or investment certificates, exclusive of any entrance fee charged and collected, together with such proportion of the earnings thereon as may have been fixed by the board of directors; provided that not more than one-half of the monthly receipts of any one month shall, without the consent of the board of directors, be applicable to withdrawals for that month. All withdrawals will be paid in succession and in the order in which the notices of intention were filed. Shares or certificates pledged as security for or with a loan can not be withdrawn in money until the loan is fully paid.

ARTICLE XI.

LOANS.

Section 1. Loans may be made on such terms and at such rate of interest as the board of directors may determine: provided that whenever loans are made for a definite period on the installment plan, the number of installments, and the amount of each installment required to pay the principal of the loan together with interest at the agreed rate on the periodical balances, within the time specified, must be expressed in the face of the note or obligation taken.

Section 2. Loans will only be made upon the security of a first mortgage or deed of trust of real estate, the several classes of bonds named in Sec. 647 of the Civil Code, and upon the security or pledge of free "Membership shares," or "Investment certificates" of this association.

Section 3. Loans upon the security of membership shares or investment certificates shall not be made in excess of ninety per cent of the withdrawal value of such shares or certificates.

Section 4. Loans made for a definite period on the installment plan may be repaid at any time by paying the balance then unpaid on the principal and all arrears of interest, if any. The corporation reserves the right to charge a penalty of two months' interest on the unpaid balance if repaid within one year from date of note, or a penalty of one month's interest on the unpaid balance if repaid after one year from date of the note but in advance of the time set forth in the contract.

Section 5. Whenever a borrower shall be three months in arrears in the payment of his interest or loan installments, unless otherwise provided in the note, the whole loan shall become due, at the option of the board of directors, and they may proceed to enforce collection upon the securities held by the corporation. The withdrawal value of all shares or certificates pledged as collateral security shall be applied in part payment of the loan and said shares or certificates shall be deemed canceled and surrendered to the corporation.

Section 6. All expenses incident to abstracts, examinations of title, execution of papers, attorney's fees, or sale of securities pledged as security for loans or advances, shall be paid by the party offering the security or securing the loan.

Section 7. Borrowers must furnish, at their own expense, acceptable policies of fire insurance on all improved realty pledged as security for loans granted, with the usual mortgage clause making loss, if any, payable to the corporation, as its interest may appear.

ARTICLE XII.

FINES AND PENALTIES.

Section 1. Borrowers who neglect or fail to pay their interest or loan installments in accordance with the terms of the note or obligation shall pay interest at not exceeding one per cent per month on the amount of such delinquent indebtedness.

Section 2. The same rate of interest shall apply to all advances made by the association for insurance premium, street or sewer assessments, balances due for unpaid taxes on property pledged as security for loans, or other like advances.

ARTICLE XIII.

MISCELLANEOUS.

Section 1. Each member or investor shall be entitled to a certificate of "membership shares" or "investment certificates" showing the number of such shares or certificates held, and their par, or ultimate value, and each member or investor holding installment membership shares or installment investment certificates shall also be furnished with a pass book, in which to record the periodical payments made by him, and in which the terms and conditions attaching thereto shall be fully set forth. These certificates may be transferred by assignment, in person or by an attorney, but no such assignment shall be valid, except between the parties thereto until duly entered upon the books of the corporation. A transfer fee of ten cents for each share or certificate transferred will be charged by the corporation.

Section 2. In the event of loss of any certificates of stock, membership shares or investment certificates, the recorded owner shall be entitled to a duplicate upon making an affidavit setting forth the facts of the loss and the filing of an acceptable bond, with two or more sureties, in an amount equal to the book value of the certificate lost.

Section 3. The board of directors may provide that partial withdrawals, made "mid-term," shall not participate in the earnings on the amount withdrawn, that shall have accumulated since the last apportionment of profits.

Section 4. The seal of the corporation shall be circular in form, bearing the name of the corporation and the date when incorporated.

Section 5. As to all features not specifically covered by these by-laws, the provisions of sections 633 to 648a, inclusive, of the Civil Code shall govern the transaction of business by this corporation.

ARTICLE XIV.

Section 1. These by-laws may be amended at any annual or special meeting of the shareholders and members; provided the proposed amendments shall first be submitted, in writing, to the board of directors and approved by them, and then adopted by an affirmative vote of two-thirds of all such shares of stock and membership, issued and in force. The signature of the holders of two-thirds of all such shares shall be effective to adopt such amendments, without the holding of a meeting.

CONSENT TO AND ADOPTION OF BY-LAWS.

We, the undersigned, subscribers to the number of shares of the _____ Building and Loan Association, of _____, set opposite our respective names, in all amounting to more than two-thirds of all subscribed shares, hereby give our written assent and consent to the adoption of the foregoing code of by-laws for the government of said corporation, and we hereby adopt the same.

CERTIFICATE OF ADOPTION OF BY-LAWS.

We, the undersigned, directors of the _____ Building and Loan Association, and the secretary thereof, hereby certify that the foregoing code of by-laws was adopted by the signatures of the subscribers to more than two-thirds of all the subscribed shares of said corporation on the _____ day of _____, 192____.

(SEAL)

Directors.

Attest : _____

Secretary.

NOTE.—There being so much similarity in the articles of incorporation and by-laws of the two types of associations it was deemed advisable from the standpoint of space saving, to include only the articles and by-laws of one type of association in this report. The articles and by-laws of the other type of associations will be gladly furnished on application to the commissioner.

CODE OF ETHICS.

The following Code of Ethics, adopted at the annual convention of the California Building and Loan League, held at San Jose, May 23, 24, 1924, should be studied and practiced by every officer, director and employee of the building and loan associations of California:

PREAMBLE.

Realizing the responsibility reposed in the California Building-Loan League through the opportunity afforded its individual members in teaching thrift and systematic saving, so as to house the families of this commonwealth that "the American Home may continue the safeguard of American Liberties," the members of the California State Building-Loan League have adopted this Code of Ethics to aid in the better understanding of common problems, to raise to the highest degree possible the integrity of the business dealings among men whatsoever their relationship and to inject into the economics of "Building and Loan" the formula of the "Golden Rule."

The purposes of all Building and Loan Associations as set forth in the articles of incorporation of each are:

1. To encourage industry.
2. To encourage frugality.
3. To encourage saving.
4. To encourage home building.

The objectives are ideal as evidenced by the history of mankind and it is the purpose of this code to promote among the membership of the California State League the desire and will to attain them unselfishly and without preferment.

CODE OF ETHICS.

I. Chartered by the state, answerable to the citizens of the state for its every act, it is the purpose of League members to observe fully and carefully the laws governing Building and Loan Associations of the State of California as set forth in Title XVI of the Civil Code under Sections 633 to 648a, both inclusive, and any amendments thereto that may be hereafter enacted.

II. Realizing that service to humanity, personal integrity, cooperation and loyalty will develop the spirit of effective citizenship and that each association has a peculiarly advantageous position in each community in which it operates, to foster these ideals, the associated members of the League are pledged to promote and encourage all civic enterprises and movements looking to human betterment.

III. The foundation of good business is built of confidence, integrity, fair dealing, efficient service and mutual benefit, and therefore all parties to any transaction must be equitably benefited thereby.

IV. A just reward for service rendered requires sufficient profit to give capital investment, prudent management, loyal employment and the legal reserve required by law, with due consideration to the public, and all members of our respective organizations.

V. The best endeavors of all officials and employees are required to elevate the standards of our vocation; to extend a true knowledge of its beneficent purposes; to demand that all contracts, written and oral, be performed in letter and spirit; to require of our members a careful and exactly true statement in advertising and publicity to the end that all representations and obligations shall be truthfully made and fulfilled.

VI. That thrift be extolled and waste of time, money, effort, material, or natural resources be condemned; that we discourage speculation, inflation of credit over-buying and other financial excesses.

VII. That extortion, exploitation, secret rebates, fraudulent contracts and unearned commissions are wholly at variance with the ideals of building and loan service and as such are unqualifiedly condemned.

VIII. That unfair competition whether by lower rates of interest to borrowers, or larger rates to investors, and all other acts, characterized by bad faith, deception, fraud or oppression, including commercial bribery, is wasteful, despicable and works a public wrong.

IX. Responsibility of the individual can not be avoided or evaded when representing an association. A friendly and cooperative spirit is desired as beneficial to corporate interests and all controversies and disputes will, when possible, be adjusted by voluntary agreement or impartial arbitration.

X. Acknowledging the obligations owed one to another by reason of similarity of objects it shall be the purpose of the League to strive for brevity and lucidity in all contracts and similarity of contractual forms, so that cooperation may replace competition. It is realized that youth owes a debt to age and that age may gain from the vision and ambition of youth, therefore the application of this section of the code will apply to the relationship existing between the oldest associations holding charters and the latest to incorporate.

XI. As employers, associations shall feel it incumbent to deal justly, humanely and generously with those who serve. The place of business should be modern, well lighted, properly ventilated, and adequately heated. It is desirable that all rooms should be decorated and furnished in a manner pleasing to the eye and designed to promote confidence among all who have transactions therein. Furthermore, the wages paid by the associations to its employees should be sufficient to encourage loyalty, contentment and a feeling of comfort and security. Also we should deem it a duty to investigate the conditions under which employees live and so far as possible lead them into habits of thrift and saving in order to aid them to become home owners and responsible citizens.

XII. To foster friendships which neither demand material benefits nor violate confidences; to promote loyalty to oneself, his employers, fellow employees and the public interest; to sustain, uphold and develop the League in its effort to serve its membership and the state, so that human rights may be universally recognized as deep and broad as the race itself.

A. E. Falch, Los Gatos, Appointed January 13, 1925.

LETTER OF TRANSMITTAL.

STATE OF CALIFORNIA,
OFFICE OF THE BUILDING AND LOAN COMMISSIONER,
SAN FRANCISCO.

*To His Excellency, FRIEND WM. RICHARDSON,
Governor of California,
Sacramento, California.*

SIR: In compliance with section 5 of the Building and Loan Commission Act, I have the honor to submit for your consideration the thirty-third annual report of this department, setting forth the operations and condition of the building and loan associations of California under my supervision, as reported by the associations during the seventy-seventh fiscal year of the state, ending June 30, 1926.

Respectfully submitted.

A. E. FALCH,
Building and Loan Commissioner.

ACKNOWLEDGMENT.

I desire to express my appreciation of the courtesies extended, and the consideration with which officers and directors of associations have cheerfully and promptly complied with the suggestions and requirements of the commission, and cooperated to bring about better conditions.

The efficient service of the faithful members of my staff has been of much value and assistance, not only to the commissioner, but also to the associations. It is a great pleasure to make this acknowledgment.

A. E. FALCH,
Commissioner.

REPORT

OF THE

BUREAU OF BUILDING AND LOAN SUPERVISION

The golden era of the building and loan movement of California, which was inaugurated in 1920, has been growing in splendor year by year since then. Prior to 1920, a yearly increase of from one to three millions of dollars in assets was considered a fairly good showing. But in that eventful year, and the two years following, the assets' increases took strides of eight and a half, nine and a quarter and nine and a half millions.

The year 1923 made the record of its predecessor look like a dwarf when the assets showed an increase of over twenty millions. The next year added over twenty-three millions, and 1925 exceeded that amount by eight millions.

The greatest year in building and loan history was the period which ended June 30, 1926. During that time the assets increased over fifty millions, or more than the entire assets of the associations in 1920 or any of the fifty-five years prior thereto! During this time, too, more associations were licensed than during any previous year, twenty-six corporations qualifying for charters, making the total licensed on June 30 of this year 189, or 90 more than in 1920.

The total assets of the 176 associations reporting this year amount to \$190,106,988.03, an increase of \$49,499,096.93, as compared with \$140,657,891.10 of the 152 associations which reported during the fiscal year ending June 30, 1925. There are eleven new associations which are not required to make detailed reports on account of not having been in business more than six months prior to June 30, 1926; the assets of these associations amounted to \$1,326,467.55, which would make the total assets of all the 189 associations, now licensed to do business, \$191,433,455.58, an increase of \$50,305,542.09, as compared with the assets of all the 162 associations licensed at the close of June 30, 1925. This does not take into consideration the \$5,890,531.17 in California assets of the one foreign association licensed to do business in this state.

The above mentioned figures, as well as all statistical information in this report, are based on the reports of the various associations made on different dates during the year. Therefore, they do not show the true condition of the associations as of the close of the fiscal year, June 30. The total assets of the associations, based on the "call" report as of June 30, amounted to \$210,879,622.10, which is \$19,446,106.52 more than the assets based on fiscal year and term reports of the associations.

Although California, during the past year, was advanced from eighth to seventh place as a building and loan state, the movement in this state has not yet taken advantage of its many opportunities. California is fast becoming a state of homes, and the great majority of its prosperous and thrifty citizens are of a type who prefer to own homes. The opportunities of associations to grow are therefore almost unlimited. The building and loan surface of the state has been barely scratched. Instead of being the seventh building and loan state, California should today be at least third or fourth in the list. If the present high ideals are adhered to and the associations continue to do business along the lines of safety, giving strict obedience to the governing laws, rules and regulations, it will not be many years until California will reach that place.

The commissioner and his deputies are always ready to give encouragement and assistance to capable and conscientious men and women who desire to organize associations in communities where they are needed.

COMPARISONS OF RESOURCES AND LIABILITIES.

Interesting exhibits published in this report on pages 14 to 16 are the "Comparative Statement of Assets and Liabilities" and the "Changes in Assets and Liabilities" for the years ended June 30, 1917, to June 30, 1926, inclusive.

The changes, with the percentage of increase, are summarized as follows:

Items	Increase or (*) Decrease			
	1926 over 1925	Percentage	1926 over 1916	Percentage
Assets.				
Loans on mortgages, etc.	\$45,469,262 48	34.74	\$146,109,588 84	483.11
Arrearages	162,342 63	65.41	221,926 14	117.66
Cash in office and banks	1,206,975 62	21.28	5,489,145 71	396.14
Real estate—office buildings	600,642 43	86.29	1,296,709 43	
Real estate—other	284,145 14	24.57	627,911 62	236.79
Office furniture and fixtures	112,377 49	36.72	390,369 57	1,418.24
Advances and ledger accounts	*62,219 22	*9.63	452,149 70	346.98
Bonds owned	738,938 52	86.54	1,592,913 47	**
Other assets	936,631 84	465.00	1,132,255 37	
Total assets	\$49,449,096 93	35.16	\$157,312,969 85	479.69
Liabilities.				
Guarantee stock—capital	\$2,521,284 02	32.86	\$9,378,622 96	1,150.13
Guarantee stock—surplus reserve	421,799 04	21.85	2,213,129 87	1,592.09
Installment shares—dues	5,076,142 46	19.67	20,365,628 12	193.58
Installment shares—profits	568,199 74	12.77	1,832,175 68	57.57
Paid-up and prepaid shares—capital	2,281,562 39	12.72	15,589,750 87	337.57
Paid-up and prepaid shares—dividends	128,530 83	20.54	416,815 01	123.44
Investment certificates—principal	33,497,629 24	50.50	90,045,498 71	920.79
Investment certificates—interest	1,565,780 76	70.59	3,544,331 70	1,482.85
Advance payments	117,674 15	88.63	193,846 94	342.18
Overdrafts and bills payable	225,534 30	7.20	2,380,516 33	253.88
Reserve and undivided profits	863,954 99	33.31	2,077,683 08	150.50
Loans due and incomplete	1,966,501 94	31.57	7,688,842 49	1,278.88
Sundry ledger accounts	94,051 39	9.49	1,089,743 28	978.09
All other liabilities	120,451 68	29.18	490,384 81	1,144.63
Total liabilities	\$49,449,096 93	35.16	\$157,312,969 85	479.69

*None in 1916.

Further comparison of the 1926 items in the foregoing tables disclose the fact that the arrearages amount to approximately one-fourth of one per cent of the loans in force as compared with one-fifth of one per cent in 1925.

The cash in office and banks amounts to 3.6 per cent of the total assets as compared with 4 per cent in 1925 and 4.2 per cent in 1916.

The other real estate owned amounts to but three-quarters of one per cent of the total assets as compared with about eight-tenths of one per cent in 1925, a material improvement.

The total of the guarantee capital, the guarantee capital surplus reserve and the reserve and undivided profits, \$16,004,426.61, provides a protection equal to 9.97 per cent of the liability to installment and full paid shareholders and holders of investment certificates, including apportioned profits and interest as compared with 10.39 per cent in 1925.

The amount of the guarantee capital and the guarantee capital surplus reserve represent 7.21 per cent of the total liabilities exclusive of guarantee capital and reserve and undivided profits, as compared with 7.47 per cent in 1925. The amount of the guarantee stock-capital represents 16 per cent of the total paid in capital as compared with 15 per cent in 1925.

The volume of investment certificates of all classes equals 52.51 per cent of the total liabilities as compared with 47.16 per cent in 1925, while the amount of money borrowed, on bills payable, decreased from 2.23 per cent of the total liabilities in 1925 to 1.77 per cent in 1926.

The receipts from shareholders and investors, exclusive of guarantee capital stockholders, aggregate \$110,305,582.66, an increase of 38.09 per cent over 1925. These receipts are 58.02 per cent of the gross assets and the disbursements on account of withdrawals and maturities amount to \$76,479,323.06, of which \$6,400,224.85 represents dividends and profits and the balance invested capital withdrawn, in all equal to 65.17 per cent of the gross liability to shareholders and investors at the close of the previous year.

The receipts on account of interest, premiums, fines and fees amounted to \$13,717,538.04, an increase of 35.46 per cent over similar receipts in 1925.

Loans repaid, \$47,504,981.22, increased 55.60 per cent, and real estate and bonds sold increased 81.02 per cent over 1925 to \$2,701,850.12.

The disbursements, on account of dividends, to the holders of guarantee stock, and all classes of shares and investment certificates amounted to \$7,296,153.01, an increase of 30.14 per cent over 1925.

The amount invested in bonds during the current year, \$2,313,066.62, increased 142.81 per cent. This indicates that there is considerable volume of surplus funds in the state that could not be loaned at more profitable rates.

CHANGES IN ASSETS SINCE 1894.**Changes in Total Roll, Number of Associations Reporting and Gross Assets Since Organization of Building and Loan Commission.**

The following table shows the changes in assets, total roll and number of associations reporting since May 31, 1894, the date of the first report, to June 30, 1926:

Year	Total associations	Associations Reporting	Assets	Increase
1894.....	146	137	\$20,820,082 18	
1895.....	153	144	21,500,520 01	\$680,437 83
1896.....	153	147	21,470,309 86	*30,210 15
1897.....	155	151	21,791,928 81	321,618 95
1898.....	157	118	20,721,226 72	*1,070,702 09
1899.....	159	151	20,285,454 24	*435,772 48
1900.....	157	148	18,935,883 76	*1,349,570 48

1926.....	187	176	190,106,988 03	49,440,096 93

*Decrease.

SHAREHOLDERS AND INVESTORS.

The number of shareholders and investors increased from 156,388 to 223,440, the increase for 1926 being 67,052 or 42.88%, as compared with the increase of 39,999 the previous year. These shareholders and investors are composed of 135,559 male and 87,881 female. These shareholders and investors have an average investment of \$774.34, a decrease of 4.61% over 1925.

The graphic chart on page 18 tells an eloquent story of thrift and savings and shows plainly the strides made by the business in the past year. The number of shares in force, 1,446,578, increased 324,447 or 28.91% over 1925; of this number 1,244,499 were installment and 202,079 full paid. The number of investment certificates in force is 935,179, an increase of 329,953 or 54.51% over 1925.

NEW ASSOCIATIONS LICENSED.

There were twenty-six new associations licensed by the commissioner during the past year. The following table gives the name of the association, the location, paid-in capital and date of incorporation:

Name	Location	Paid in capital	Date of incorporation
Great Northern Building and Loan Association	Burlingame	\$25,100	Aug. 26, 1924
Mutual Building and Loan Association of Pasadena	Pasadena	28,925	April 22, 1925
Great Western Building and Loan Association	Los Angeles	28,100	May 12, 1925
Security Bond Building and Loan Association	Berkeley	51,049	June 5, 1925
Reliance Building and Loan Association	Oakland	22,561	June 29, 1925
Gibraltar Building and Loan Association	Los Angeles	91,500	July 1, 1925
Peoples Guarantee Building and Loan Association*	Ontario	89,719	Aug. 4, 1925
Insurance Plan Building and Loan Association	Los Angeles	59,755	Aug. 24, 1925
Van Nuys Building and Loan Association	Van Nuys	51,200	Aug. 30, 1925
Watsonville Building-Loan Association	Watsonville	25,000	Sept. 18, 1925
Home Guaranty Building and Loan Association	Oakland	50,499	Oct. 2, 1925
Pioneer Building-Loan Association	Los Angeles	55,600	Oct. 19, 1925
Republic Building and Loan Association	South Pasadena	25,488	Oct. 19, 1925
San Gabriel Valley Building and Loan Association	East San Gabriel	27,325	Oct. 24, 1925
Monterey Peninsula Building and Loan Association	Monterey	31,923	Nov. 5, 1925
Mercantile Building-Loan Association	Oakland	50,000	Jan. 5, 1926
Surety Building and Loan Association	San Jose	50,000	Jan. 20, 1926
Vermont Building and Loan Association	Los Angeles	78,800	Jan. 25, 1926
Superior California Building and Loan Association	Roseville	28,980	Feb. 2, 1926
Citrus Belt Building and Loan Association	Riverside	50,000	Mar. 3, 1926
The Mutual Building and Loan Association*	Long Beach	275,000	Mar. 5, 1926
Investment Building and Loan Association	Los Angeles	208,830	Mar. 15, 1926
Home District Building and Loan Association	Encinitas	20,600	April 17, 1926
Reserve Building and Loan Association	Oakland	50,740	April 19, 1926
San Pedro Building and Loan Association	San Pedro	25,000	May 3, 1926
Conservative Building and Loan Association	Oakland	50,000	May 3, 1926

*Virtually re-incorporations to correct defects in former articles of incorporation.

ELEVEN ASSOCIATIONS ORGANIZED LESS THAN SIX MONTHS.

Eleven of the associations licensed during the fiscal year ended June 30, 1926, were in operation less than six months and as their expenses were out of proportion to their income, they were not included in the regular tabulations, as so doing would have materially affected the percentage calculations.

The total assets of these associations was \$1,326,467.55. A condensed statement of the assets and liabilities of each of these associations and a summary of their assets and liabilities will be found in an appendix to this report following page 250.

The location and the names of these associations follow:

Encinitas—Home District Building and Loan Association.
 Los Angeles—Investment Building and Loan Association.
 Los Angeles—Vermont Building and Loan Association.
 Oakland—Conservative Building and Loan Association.
 Oakland—Mercantile Building-Loan Association.
 Oakland—Reliance Building and Loan Association.
 Oakland—Reserve Building and Loan Association.
 Riverside—Citrus Belt Building and Loan Association.
 Roseville—Superior California Building and Loan Association.
 San Jose—Surety Building and Loan Association.
 San Pedro—San Pedro Building and Loan Association.

There are three inactive associations which make the associations licensed at June 30, 1926, total 189.

TWENTY-EIGHT ASSOCIATION COUNTIES.

Despite the large increase in the number of associations licensed during the past year, only one county, Monterey, was added to the building and loan column. There are now associations in twenty-eight counties of the state. Thirty counties are without building and loan associations!

Fortuna, Newcastle, Roseville and Auburn are the only communities that have local building and loan associations in that large territory north of Sacramento. The latter two cities are newcomers in the building and loan field, and have splendid opportunities to build up large associations. This may also be said of many other cities of northern, as well as other, portions of the state that are today without local associations.

The following table, showing the distribution of the assets by counties, shows the number of associations and counties in which they are located. The assets of each county and the increases made by each during the past year should be an object lesson to those counties where no local associations now exist.

COMPARISON BY COUNTIES FOR FISCAL YEAR ENDED JUNE 30, 1925, AND JUNE 30, 1926.

Counties	Number reporting		Assets		Increase
	1925	1926	1925	1926

*Consolidated at June 30, 1926.

EIGHTY-FIVE CITIES WITH ASSOCIATIONS.

The 176 associations reporting during the fiscal year ended June 30, 1926, are located in eighty-two different cities. In addition to the 11 associations not reporting for the reason that they had been in business less than six months, there are three cities not previously having a local association. These three cities are Encinitas, Roseville and San Pedro.

A list of the cities having associations reporting during the year 1925 or 1926 and the increase in the assets of the associations during the past year is found on page 12 of this report. This table will furnish the basis for many interesting comparisons. It will also show anyone acquainted with the state that there are a great many cities and towns with more resources and population than many in the list that have not the benefit of a local association.

At June 30, 1926, there were 132 associations operating with a permanent guarantee capital and 54 on the mutual, or partly mutual, plan, an increase in number over 1925 of 24 with guarantee capital.

Associations using the "Serial Plan" in their dealings with their installment shares, number forty-four while all others operate on the permanent or "Dayton" plan.

CITIES HAVING OVER \$1,000,000 ASSETS.

The cities having building and loan associations with total assets in excess of \$1,000,000, arranged in the order of the assets and showing also their standing at June 30, 1925, follow:

Order		City	1926 assets	Order		City	1926 assets
1926	1925			1926	1925		
1	1	Los Angeles.....	\$43,369,294	15	16	Palo Alto.....	\$2,916,027
2	2	San Jose.....	22,721,807	16	18	Alameda.....	2,150,813
3	3	Long Beach.....	14,851,882	17	17	Whittier.....	2,148,534
4	4	San Francisco.....	12,107,383	18	15	Santa Ana.....	2,125,683
5	5	Stockton.....	11,555,388	19	19	Culver City.....	1,905,290
6	6	Pomona.....	9,850,440	20	20	Ontario.....	1,899,349
7	7	Santa Barbara.....	7,630,884	21	22	Anaheim.....	1,673,053
8	8	Oakland.....	6,622,425	22	21	Santa Paula.....	1,472,403
9	9	Pasadena.....	5,094,460	23	23	Orange.....	1,348,369
10	11	San Diego.....	3,907,587	24	-----	Riverside.....	1,223,930
11	13	Berkeley.....	3,774,682	25	-----	Bakersfield.....	1,122,669
12	12	Redlands.....	3,303,201	26	-----	Santa Monica.....	1,058,753
13	10	San Bernardino.....	3,116,045	27	-----	Glendale.....	1,053,200
14	14	Sacramento.....	2,918,124	28	-----	Fresno.....	1,038,936

It will be noted that five cities have advanced into the million dollar class during the past year and that there has also been a rearrangement of others.

Additional interesting comparisons follow:

	1926	1925
Associations with assets in excess of \$1,000,000.....	48	35
Associations increasing assets over \$2,000,000 during year.....	2	1
Associations increasing assets \$1,000,000 to \$2,000,000 during year.....	13	4
Associations increasing assets \$500,000 to \$1,000,000 during year.....	14	15
Associations increasing assets \$250,000 to \$500,000 during year.....	26	14
Associations increasing assets \$100,000 to \$250,000 during year.....	39	25

NET PROFITS.

	1925	1926
Net profits reported for year	\$7,722,950 25	\$10,287,355 54
Percentage to average loans in force	6.945%	7.036%
Average for past ten years	7.038%	7.037%
Percentage of profit to average investment	7.240%	7.364%
Average for past ten years	7.534%	7.517%

DIVIDENDS AND INTEREST.

The dividends or interest reported as paid or apportioned to installment shares and certificates represent 21 different rates with the lowest at 5 per cent and the highest at 15 per cent. The mean average of all being

Apportioned to installment shares	\$2,112,124 69 or	6.893%
Apportioned to full paid shares	1,223,675 87 or	6.183%
Apportioned to investment certificates	4,811,443 21 or	5.779%
Apportioned to guarantee capital	892,791 53 or	10.054%
Total dividends and interest	\$9,040,035 30	
Added to surplus, reserve and undivided profits	1,247,320 24	
Total net profits	\$10,287,355 54	

SALARIES, TAXES AND OTHER EXPENSES.

The amounts reported as disbursed on account of the above, and the percentages to average loans in price are:

For salaries	\$1,131,239 16 or	0.773%
For taxes	378,699 53 or	0.259%
For other expenses	1,620,825 75 or	1.109%
Making gross expense of	\$3,130,764 44 or	2.141%
The percentage for 1925 was		2.087%

OPERATING EXPENSES TO AVERAGE LOANS.

Of the above, the percentages directly applicable to operating expenses, aside from taxes, were:

	Percentage for 1925	Percentage for 1926
For salaries	0.745%	0.773%
For other operating expenses	0.986%	1.109%
Total operating expenses	1.731%	1.882%
An increase of		.151%

OPERATING EXPENSES TO DUES CAPITAL.

	Percentage for 1925	Percentage for 1926
Percentage cost for salaries	0.776%	0.800%
Percentage cost for other expenses	1.028%	1.160%
Total	1.804%	1.969%
An increase of		.165%

GROSS INCOME AND PERCENTAGE OF EXPENSES TO INCOME.

	Percentage for 1925	Percentage for 1926
Percentage of net profits to average loans	6.945%	7.036%
Percentage of taxes to average loans	0.356%	0.259%
Percentage of operating expenses	1.731%	1.882%
Percentage of apparent gross income	9.032%	9.177%
Ratio of operating expense to income	19.165%	20.508%
An increase in percentage of cost to income of		1.343%

RATES OF INTEREST ON LOANS.

The rates of interest charged upon loans range from 7 per cent to 12 per cent per annum. The factors governing the interest rate usually depend upon locality, security offered and local money conditions.

The groups of associations, and the mean rate per cent charged by each, appear as follows:

7 associations charge-----	7.00%	20 associations charge-----	9.00%
2 associations charge-----	7.20%	4 associations charge-----	9.60%
8 associations charge-----	7.50%	5 associations charge-----	10.00%
9 associations charge-----	7.80%	2 associations charge-----	10.20%
39 associations charge-----	8.00%	1 association charges-----	10.60%
75 associations charge-----	8.40%	1 association charges-----	12.00%
1 association charges-----	8.50%		

The mean average of all these rates is 8.652 per cent, an increase of about three-tenths of one per cent over the rate in 1925.

The interest collections aggregate 8.722 per cent of the average loans in force for the year, which indicates that a large volume of the loans in force were at a rate in excess of the above mentioned mean average rate.

Again using the average loans in force as a basis, the gross income was 9.450 per cent, and the operating expense, including taxes, was 1.882 per cent, equal to 19.92 per cent of the gross income.

If taxes are included with the expenses, the cost of operation was 2.141 per cent of the average loans in force or 22.66 per cent of the gross income.

RATES OF DIVIDENDS PAID.

The associations paid or credited twenty-one different rates of dividends upon investments in installment shares and certificates, the mean average rate of all being 6.893 per cent.

The groups of associations and the mean rate of dividend or interest paid or credited by each group appear as follows:

3 associations-----	5.00%	1 association-----	7.80%
89 associations-----	6.00%	19 associations-----	8.00%
1 association-----	6.25%	1 association-----	8.40%
1 association-----	6.38%	3 associations-----	8.50%
1 association-----	6.47%	1 association-----	8.75%
1 association-----	6.50%	7 associations-----	9.00%
28 associations-----	7.00%	2 associations-----	10.00%
7 associations-----	7.20%	1 association-----	11.50%
2 associations-----	7.25%	1 association-----	12.00%
1 association-----	7.30%	1 association-----	15.00%
2 associations-----	7.75%		

LOANS MADE BY ASSOCIATIONS.

The popularity of building and loan association loans among borrowers is attested by the increase in the number of borrowers and loans. There are 65,552 borrowers, an increase of 29.52 per cent or 14,941 over 1925.

The graphic chart on page 22 shows very clearly the increases made in 1926 as compared with 1925 and previous periods, in the number of real estate and of building loans and number of borrowers.

During the current year 11,759 building loans were made, an increase of 34.1 per cent or 2991 over 1925. New real estate loans during 1926 numbered 27,904 or an increase of 9308 or 50 per cent over the preceding year.

This increase in the number of loans indicates that the people of this state are rapidly learning that the building and loan plan of loaning is the most advantageous plan for the borrower and encourages and promotes saving.

REAL ESTATE AND OFFICE BUILDINGS OWNED.

The book value of all real estate owned by California associations is \$2,737,400.81, an increase of 47.79 per cent. The above amount comprises \$1,296,709.43 invested by 27 associations in property acquired for office buildings, and \$1,440,691.38 representing the values of 264 parcels of real estate acquired, principally as a result of foreclosures of delinquent loans. These amounts have increased 86.29 per cent and 24.57 per cent respectively during the year.

The value of real estate owned is 1.44 per cent of the gross assets of all associations.

The value of furniture and fixtures owned is \$417,894.49, an increase of 36.72 per cent over 1925.

The commissioner has ruled that a mutual association must not invest in office buildings an amount in excess of its accumulated reserve, and a guarantee capital association an amount in excess of its paid in guarantee capital and surplus reserve.

All associations, before making such investments, must receive permission to do so from the commissioner.

CLASSIFICATION OF ACCOUNTS.

The need of uniform classification of accounts in the building and loan business is apparent. This relates chiefly to terminology. As a whole, the methods employed by associations in this state, are modern and make for efficiency, but there seems to be no concerted action to standardize forms and practices for the various classes of associations.

The building and loan business is no longer a small business. It is fast becoming one of the most important in the state. For this reason it is very important that standardized methods be inaugurated. More secretaries and more employees will be needed, and these should be so trained under a standardized method that they would be able to take up the work in any association.

The standardizing of methods and the use of a common terminology would also be of great assistance to the commission, in that it would expedite the work of examiners, especially newly employed deputies.

STATISTICAL COMPARISONS.

The number of persons interested in the building and loan business, either as investors or borrowers, has materially increased, as disclosed by the following table:

Items	Increases			
	1926 over 1925	Percentage	1926 over 1916	Percentage
Shareholders—male.....	24,805	52.03	54,884	312.00
Shareholders—female.....	6,579	20.93	27,307	254.99
Investors—male.....	20,407	47.82	53,147	534.84
Investors—female.....	15,261	44.10	45,852	1,142.59
Number of borrowers.....	14,941	29.52	45,230	222.57
Number new building loans.....	2,991	34.11	10,016	571.64
Number of installment shares.....	311,883	33.44	926,421	291.26
Number of full paid shares.....	22,816	12.73	155,897	337.57
Number of investment certificates.....	298,711	46.93	840,875	891.66
Number of associations.....	24	15.43	91	94.79

Further interesting comparisons can be made by reference to the tables in various sections of this report, particularly that entitled "Statistical Information," on page 17.

"CALL" REPORTS NOW RENDERED.

The first "call" financial statements in the history of building and loan associations of California were ordered by the commissioner as of March 31 and June 30. The call sets forth that the statements should be published in papers of general circulation. One hundred per cent of the associations complied with the request in both instances. The large number of complimentary letters on this ruling received from building and loan associations and banks would indicate that it was considered of considerable importance in financial circles. The commissioner can see no reason why building and loan associations should be exempt from publishing their statements when savings banks are required to do so. Associations have nothing to hide from the public; the publication of their statements will not only be of great advertising value but also add further to the strength of the public's confidence in the associations.

It is significant to note, in this connection, that the call statements make it now possible to know the conditions of all associations as of one date. For instance, the March 31 call showed that the associations had \$198,443,603.02 of assets, as compared with \$210,879,662.10 according to the June 30 call statements, an increase of \$12,436,059.08 during those three months. Heretofore the associations have never been required to render financial statements as of the same date, and the total assets of the associations have never been made public except through the annual report of the commissioner. As soon as the results of a "call" have been compiled, the information as to the assets is forwarded to each association.

The assets of the associations, based on these two calls, are given on pages 44 to 46.

CAPITAL REQUIREMENTS INCREASED.

The commissioner has issued new instructions for forming new associations, effective July 1, 1926.

In the case of a mutual association, the number of installment shares required to be sold has been increased from 2500 to 3500, the premium per share being increased from 50 cents to \$1.

In the case of guarantee associations, the cities of the state have been placed in four groups, requiring the following amounts of paid in capital: \$25,000, \$50,000, \$75,000 and \$100,000. No guarantee association may hereafter be organized with a paid in capital of less than \$25,000. The paid in capital requirements of new associations last year were \$25,000 and \$50,000.

Each guarantee capital share must be sold at a premium of not less than \$10, and no portion of the premium of either mutual or guarantee stock may be used for paying promotion fees or commission or for the payment of dividends on mutual or guarantee stock. The premium must be used to pay the running expenses of an association until it has been placed upon a self-sustaining basis.

All shares of guarantee capital stock, when sold to provide for the necessary initial paid in capital, must be fully paid up.

The instructions are given in full on pages 285 to 287.

ASSOCIATIONS AND FINANCE COMPANIES DIVORCED.

On April 2, the commissioner sent the following letter to the various associations:

Because of complications, detrimental to the good name and standing of building and loan associations, largely financed, controlled and operated by and in conjunction with corporations engaged in the business of making or negotiating loans upon mortgages or deeds of trust upon real estate, which have developed recently, and which are very liable to again develop under existing and past conditions, and for the better protection of the associations, and of the investors in all classes of their shares and certificates, the following rules are promulgated for the government of all such associations, and must be rigidly observed and followed:

First—Every such association must be divorced from, and operated separately, in every respect, and have a separate room or office from the corporation holding or controlling the guarantee capital, or whose officers or directors hold such control in their own names.

Second—Wherever the officers and directors of an association are the same, in whole or in part, as the officers and directors of a corporation holding or controlling the guarantee capital, no business of any kind may be transacted by and between the two corporations, or by and with the officers, directors or employees of either, directly or indirectly.

The ruling has already shown beneficial results. Associations can not afford to be jeopardized by criticism of or actions by corporations which have not the same kind of supervision and do not operate under the same set of laws.

ONE COMMON REPORTING DATE.

The financial statements of the various associations, as printed in the annual report of the commissioner, have never been made as of any specific date. Consequently no adequate comparison and no data or statistical information based on one date could be given. This sometimes has worked an injustice to some of the associations.

Take, for instance, the matter of the assets of the associations. If based on the annual reports, that is, their reports at the close of their fiscal years, the amount is \$190,106,988.03, while if they were all based on statements as of June 30, 1926, the date of the commissioner's report, the amount would be \$210,879,662.10.

The reports of the associations, upon which the statistical information of the commissioner's report is based, are made as of the following dates: December 31, January 31, February 11, February 28, March 1, March 31, April 30, May 15, May 31 and June 30. Thus it will be seen that a large percentage of these reports are from one to six months old at the time of compilation of the statistics and publication of the commissioner's report. Up to this year, there were eighteen associations that reported on dates between July 1 and December 1, which antiquated these reports from 12 to 15 months when published. These associations have this year submitted their reports as of June 30, which is a great improvement over former conditions.

Consider also the fact that the printed report of the commissioner does not get into the hands of the public until October or November, and it should be apparent to anyone that there is need of having all reports brought up to the date of the closing of the fiscal year of the commissioner, namely, June 30. With such a change, it would be possible to present a report of the business of the associations in a form that would be of material benefit to all concerned.

The 1927 report of the commissioner will be based on the June 30 date. Associations whose fiscal year ends on other dates than June 30 will be asked to change their fiscal year to that date. Of course the commissioner has no authority to compel associations to change the time of the closing of their fiscal years; however, he has the authority to call for reports as of any date, and associations which do not see fit to change their fiscal years will be obliged to submit two annual reports a year, one as of the close of their fiscal year and one as of June 30. By changing the fiscal years to close June 30, only one annual report will be necessary.

By serving the notice of the change in the date of reporting, a year in advance, the commissioner feels that all associations affected will have ample time to comply with the wishes of the department.

AVAILABILITY OF FUNDS.

It is not a good policy for an association to pay interest on daily balances. Such practice would have a tendency to make an investor believe that his money is available at any time, and thus minimize the incentive for him to leave his money with the association for a period of time, thereby losing sight of the thrift idea which an associa-

tion should always try to instill in an investor. Then, too, the practice is subject to the just criticism of banks, for they look upon such practice as commercial banking business.

Associations should never advertise or create the impression that funds invested with them are available at any time, for this is contrary to the law, which gives the splendid protection to both the investors and the associations in making the provision that investors may be required to give a notice of thirty days before they may withdraw their funds. It is true that associations very seldom avail themselves of this provision of the law, but nevertheless they should educate their investors on this point so that they may not find themselves in embarrassing positions in times of stress or unforeseen situations when the law would have to be invoked.

The commissioner frequently has had to criticize such statements as the following, found in advertisements of some of the associations: "Your money available at any time," "Your money can be drawn out at any time or without notice." These statements are even in the most charitable light misleading and dangerous. The associations are merely showing their investors and members a courtesy when they pay without notice and do not avail themselves of the law under which they originally accepted the investments. Associations should make their true position known in an emphatic manner, namely, that they usually make repayments without "unnecessary delay." Every member and investor should be given a copy of section 642, setting forth the conditions and limitation of withdrawals. It would even be advisable to have everyone on making application for membership or investments in associations to sign a blank on which this provision is set forth in full, that there may be no misapprehension on the part of the applicants that they thoroughly understand the provision. The section should also be printed in full in all passbooks which accompany shares or certificates, as well as on all other securities on which associations at present merely refer to the provision.

NEW SOURCES OF FUNDS.

The commissioner has received a favorable ruling from the attorney general that trust funds may be invested in investment certificates of associations; the bank superintendent and insurance commissioner have ruled that state commercial banks and insurance companies may invest in such certificates. National banks may also make such an investment, but the controller first reserves the right to pass on the certificates before such investment may be made. The commissioner has ruled that an association may invest a limited amount of its funds in investment certificates of another association, when it is found difficult to find suitable mortgage investments and where it is found that another association lacks funds and has opportunities to make investments in desirable mortgages. This ruling tends to encourage the saving habit as well as home building and home owning. Of course, the permission of the commissioner must be obtained in each case where an association desires to make such an investment. These rulings are given in full on pages 297-298.

ASSOCIATIONS SHOULD CONTROL SALE OF GUARANTEE STOCK.

This department does not look with favor on any organization or individual who engages in the business of purchase or sale of California building and loan association guarantee stock, whether paid up or unissued. Such practice tends to place this kind of stock in the same category with the stock of ordinary corporations, under the jurisdiction of other state departments, and also tends to mislead investors who have knowledge of such stock and its liabilities and have little or no knowledge of guarantee stock and its liabilities. This department has tried to keep out high pressure sales methods from the building and loan business, and has succeeded reasonably well in its regulations of agents employed to solicit for loans and the sale of membership shares and investment certificates. To look kindly upon the proposal of the movement to have guarantee stock sold to the public at large, which ultimately would bring into the sale of such stock high pressure methods, would be to stultify the position of the department in its ruling relating to the sale of guarantee stock of new associations. Under the proposed method, an association might be at the mercy of a stock salesman or stock sales corporation; its guarantee stock might fall into the hands of people either unfriendly or objectionable to the holders of the majority of guarantee stock or to the management of the association. In fact, it would be possible to transfer the control of the association to a group of people who might have very little knowledge of building and loan methods or might not be in sympathy with its high ideals; the sound policies that have been instrumental in building up building and loan associations might be overturned over night, and officers and directors who may have spent many years in building up the association might be turned out of office.

It is a good rule for a building and loan association to have its stock owned by a small group of people, living in the community in which the association is located—people of honesty, integrity and knowledge of building and loan ideals and aspirations. Guarantee stock, it should be remembered, protects and guarantees all other stock holders and creditors against any loss.

The commissioner has ruled the unissued or treasury guarantee stock must be sold without the payment of any commission or cost to the association. He has also held that in the sale of any association's unissued or treasury guarantee stock, the first opportunity to purchase such guarantee stock should be given to holders of guarantee stock, permitting them to subscribe for their pro rata, in proportion to the amount of guarantee stock they hold. Individual stockholders who desire to sell all or part of their holdings should first take the matter up with the secretary of their association, and in nine cases out of ten the secretary will be able to get other stockholders to purchase the stock offered for sale or find some person or persons friendly to the association and its policy to purchase the stock.

INTERPRETATION BY ATTORNEY GENERAL.

Because of questions arising from time to time concerning the interpretation of certain sections of the laws governing building and loan associations, it has been deemed advisable that the interpretation of the attorney general should be obtained for the future government of the commissioner; hence he was asked to interpret several of the sections, regarding which he submitted an opinion under date of May 12, 1926.

He was first asked to interpret that part of section 634 regarding the accumulation of the capital of an association, as to whether it was obligatory that all associations must issue, and offer to the general public at all times, shares in installment form, and his interpretation is that such is the requirement of the law.

He was next asked to interpret the meaning of the words "units" and "certificates" as used in section 648a, Civil Code, for the reason that several have insisted that the word certificates as used therein meant "certificates of investment," which it was ascertained was not the intention of the author of that section.

The interpretation of the attorney general is that the words "units" and "certificates" as used therein mean that they are "units of membership" and "certificates of membership."

He was next asked to consider several sections which were specified, and advise as to the right of an association to operate solely upon guarantee capital and investment certificates.

His opinion is to the effect that an association may issue investment certificates if it maintains the requisite reserve and conducts its business in conformity with the building and loan laws. In his interpretation of section 634, Civil Code, he holds that the law requires every association to issue shares in installment form, hence it appears that such issue is a necessary requirement, in addition to the required reserve, to authorize an association to issue investment certificates.

He was finally asked to interpret section 641 as to the limit of participation of the guarantee capital of an association, and states that the "one per cent of the average loans in force" for the year, is the limit.

The opinion is given in full on pages 294 to 296.

SALES CONTRACTS.

All associations who have entered into contracts with companies, corporations or individuals, for the sales of their (associations') securities, have been directed to forward to the department copies of such contracts; this does not include contracts with agents, who receive a part or all of the legal entrance fee as their compensation. All future sales contracts are required to be submitted to this department for approval before they can be entered into.

Sales contracts that have been reviewed thus far by the commissioner have not met with his approval. Some of the contracts seem to permit a systematic "milking" of associations. There is little justification why an association should delegate the selling of its securities to an outside company, corporation or individual. Associations should manage and supervise the sales of their own securities and thus be able to save a considerable portion of fees that are now paid to so-called sales managers.

ADVERTISING STANDARD IS RAISED.

The commissioner has taken particular interest in reviewing literature and newspaper advertising of associations, and is glad to say that this publicity, as a whole, is of a high class, and comparatively few statements have been found that may be classed as untruthful, exaggerated, misleading or offensive to competing associations or banks. Associations, banks and better business bureaus are encouraged to send to the department building and loan publicity which they think may be subject to criticism, and their assistance and cooperation in this matter have been of great value to the department.

The commissioner is heartily in favor of associations telling the public about the service they have to offer, and it is gratifying to note that associations are giving greater and greater attention to the importance of spreading the gospel of thrift and savings. But the commissioner will insist that such advertising be kept within the bounds of truth, and contain nothing that is contrary to the laws governing associations or the bank act. Whenever the attention of the commissioner is called to questionable advertising, he always takes up the matter with the offending association by clearly setting forth why the publicity is objectionable and almost invariably the association sees his standpoint and evinces a desire to be more careful in its advertising methods.

There was a time when practically every mail brought letters from bankers, associations and better business bureaus, in which association literature or advertisements were criticised. This class of missives are now coming with less frequency. This is due chiefly to the cooperation that is given the commissioner in his desire to raise the advertising standard of associations, and the further fact that association officers and directors are becoming more acquainted with the principles that underlie the building and loan movement, as well as the duty they owe to their competitors, whether they be associations or banks.

AUTHORIZED CAPITAL SHOULD NOT BE ADVERTISED.

The attention of this department has been called to the fact that some associations have been advertising their "authorized capital." The commissioner takes the position that an association should not advertise its authorized capital, as such advertising is apt to be misleading. "Authorized capital," from the standpoint of enhancing the strength or importance of an association, means nothing. A person who is uninformed on the question of "authorized capital" may be misled into the belief that an association, for instance, with a million dollars of "authorized capital," is safer and stronger than an association having one hundred thousand dollars of "authorized capital," when as a matter of fact the opposite may be true. Of course, there is no objection to an association advertising its paid in capital.

PUBLICITY WILL HELP BUILDING-LOAN MOVEMENT.

At the last convention of the California Building-Loan League, the committee on publicity and advertising made the following recommendation:

"The committee also recommends that the President appoint a committee to study and investigate the feasibility of a cooperative advertising campaign and to work in conjunction with the Publicity Department, and that whatever campaign they may enter into will be with the spirit of education and propaganda to educate the public as to the reason of our existence and what we have accomplished.

"We have purposely separated what we might call the Publicity Department, and whatever we may go into as a cooperative advertising campaign, for there is always the discussion as to how much can be spent for cooperative advertising and who is going to pay for it, but there should be no discussion as to the amount of money that the League should appropriate every year for publicity to further the idea of building and loan associations in the public mind. Advertising is soliciting business; propaganda, as publicity, is nothing more than to set in the minds of the people what we are."

A cooperative publicity campaign has been launched by associations located in the southern part of the state. The following is an extract from a letter received by the commissioner from the committee having charge of this campaign:

"You will no doubt be interested in knowing that the building and loan associations of southern California have succeeded in providing a fund of \$36,000.00 to be used for educational purposes during the next twelve months.

"This is in no sense an advertising campaign, in that the name of no individual association will appear; it is purely educational, to enlighten the general public upon the functions of building and loan associations—the benefits that they can derive from investments in building and loan associations, the safe-guards thrown around their investments, the advantages of paying off a loan on the building and loan plan and the benefits to the community at large in encouraging home ownership. Also to impress upon the general public that the building and loan associations were the pioneers in the plan of systematic saving and amortized loans.

"The writer confidently believes that this is the greatest step forward ever inaugurated by building and loan associations in this state and I sincerely trust that we will be able to prove this campaign so successful, that by the time our next State League meets, the League will take it over and make it a state-wide proposition."

A number of the individual associations have also inaugurated publicity and advertising campaigns during the past year.

These are steps in the right direction, and will prove very effective in spreading the gospel of thrift, saving, home building and home ownership among the people of California.

MASQUERADING AS ASSOCIATIONS.

Some of the finance companies have been investigated by the commissioner during the past year on complaints that they were using building and loan features in connection with their business and therefore violating building and loan laws. As some of the investments offered for sale by these companies are alleged to be unfair, unjust, inequitable and oppressive, from the investor's standpoint, this department is desirous that they do not masquerade as building and loan associations or create a belief in the minds of prospective investors that they are doing business similar to such associations. Such corporations should either be compelled to discontinue their present practices or come under the supervision of this department. A brief is now being prepared against one of these companies and will be submitted to the attorney general for his opinion.

Section 15*d* of the Commission Act, restricting the use of the name "building and loan" to corporations under the jurisdiction of this department, has proven very effective, and as a result, during the past year, the commissioner has compelled three corporations to eliminate the words from their corporate names.

BETTER TYPE OF AGENTS.

Although the commissioner issued 840 agents' licenses during the past year, an increase of 63 as compared with the previous year, comparatively few complaints or criticisms of agents have been made. This record is very gratifying to the department, because of the fact that during previous years a considerable portion of the correspondence dealt with such complaints and criticisms. The strict rules and regulations governing agents, as formulated by the commissioner during the past year, have demonstrated that they are practicable and adequate, and have doubtless been instrumental in bringing into the building and loan service a better class of agents. The records of the department show that a large number of undesirable agents have been eliminated from the service during the past year. An agent applying for a license is now required to give a brief history of his former activities and also give at least four references. He is also required to give a bond in an amount of not less than one thousand dollars, and file it with the department.

In order to keep a better check on the operation of agents, the scope of the license has been limited. Formerly a license permitted its holder to canvass in all parts of California, but under the new rule, an agent is limited to a specified field of operation. An association is also limited in the number of agents it may employ. Under these conditions it is possible to regulate the number of agents in various communities. Whenever an agent is dismissed for cause, a report of such dismissal is made to other state departments having the power to license agents.

Among the new regulations may be mentioned the following:

Upon securing subscriptions for shares or certificates, a solicitor may collect and receipt for the entrance fee and not more than one periodical installment; and upon securing loans he may collect from the borrower the fee allowed by the State Usury law, but no more.

Whenever an association or its agent or solicitor maintains an office, either at his own expense or at the expense of the association he represents, in the home cities of local associations, no sign on the building or on the windows or doors may

exceed in size or display, similar signs of any local association, and in every case the words "Agency of" must appear immediately *above*, and the name of the Home City immediately *below* the name of the association, in letters at least one-half the size of those used in the name of the association.

In no case may an agency, agent or solicitor advertise in the newspapers, or by circulars or cards, window display, electric sign or letter heads, that the association he represents pays, or will pay, a higher rate of interest or dividend to investors, or to loan money to borrowers at a lower rate of interest, than the rate of either offered or advertised by local associations.

No rebating of fees will be permitted, and no promises of loans, or of procuring and paying withdrawals, may be made as an inducement in the securing of subscriptions.

All designs for agency or agent's office signs, window display, electric light display, and proofs for circulars or advertisements, must be submitted to the commissioner for approval before being erected, installed, printed or circulated.

BUILDING AND LOAN FIELD NOT ATTRACTIVE TO FRENZIED FINANCIERS.

Several of the states have suffered from the effects of frenzied financiers entering the building and loan field. Members of this gentry have tried to utilize California associations as an avenue to easy riches. The first obstacle they meet with is the ruling of the commissioner that no association may be organized unless from \$25,000 to \$100,000 paid up capital, all shares fully paid, is first raised, depending on the size of the city, and that no stock promotion fees or commissions will be allowed them out of the bonus fund; when they next study the laws and the rules and regulations of the department and learn of the strict supervision, they decide that it would be a waste of time to apply for a license, and seek more congenial fields elsewhere. It is a pleasure to state that a large number of promoters of this type were prevented from entering the building and loan business during the past year.

California building and loan laws, rules and regulations encourage the highest type of investors to enter the building and loan field and help to place associations on the highest possible financial footing.

DEPUTY TO APPRAISE REAL ESTATE SECURITIES.

The commissioner has decided to appoint a deputy whose chief duties shall be to appraise real estate upon which associations hold first mortgages or deeds of trust. This will add another safeguard to the investors of associations, inasmuch as the strength of an association chiefly depends upon its unincumbered real estate securities. While the commissioner feels satisfied that the prevailing practice among associations is to make conservative loans upon carefully appraised real estate, still he has had no means of properly checking up on the loans; the data to be collected by the new deputy will furnish the desired information. The associations of California are in favor of this measure, as was demonstrated by their unanimous vote of approval at their last convention.

From the above statement, it should not be understood that the commissioner heretofore has had no first-hand information on the associations' real estate securities. Deputies who examine associations check up on some of these securities, especially if interest is in arrears more than three months, and where they believe that the securities have been improperly valued or excessive loans made.

The question of whether or not urban land values are inflated should be carefully considered by loan committees in making their appraisements; over-building in a community is also a very important factor to take into account in making loans; a borrower's ability to pay his loan installments is beyond question of vital importance; he may be a good moral risk, the security may be adequate and the obligations he proposes to take on may not seem a great burden—but if he is also shouldering one or more second mortgages, or is burdened with chattel mortgages, extreme caution should be used.

INCREASE IN FORCE OF DEPUTIES.

On account of the rapidly increasing business of associations, as well as the constant increase in their number, it was necessary to add another deputy to the commissioner's force last March. Provision has been made to employ another deputy, whose chief duties shall be to appraise real estate held as securities by associations. This appointment will probably be made the latter part of this year. The appointment of at least two more deputies will doubtless have to be made during 1927 and 1928.

Deputies who now examine associations are required to make complete written reports of their examinations and these are submitted to the commissioner. Copy of the financial reports of examination, together with the commissioner's comments or criticisms, are forwarded to the associations and directors are required to send to the commissioner a statement that they have read the reports of examination and the commissioner's communication on the subject.

NEW OFFICES OF COMMISSION.

The San Francisco offices of the building and loan commission are now located on the sixth floor of the Security Building, Sansome and Halleck streets. These quarters, which were occupied February 1, 1926, are in every way adequate and well equipped, and will take care of the growth of business for many years to come. The state board of control deserves much commendation for providing these quarters for the commission, not only because of the very low rental but also because the offices are pleasant, well lighted and ventilated, and what is very important, located in the center of the financial district. Another advantage of the new offices is the fact that the bank and corporation departments now occupy the seventh and eighth floors of the Security Building, thus placing all departments that supervise the financial institutions of the state in the same building.

Since the commission was organized, its offices have been located in the following places in San Francisco: 1893, at 137 California street; 1897, Mills Building; 1898, Clunie Building; 1905, Alto Building; 1907, Claus Spreckels Building; 1923, State Building; 1926, Security Building. On account of the fire in 1906, the offices were located in Oakland for a few months and then moved back to the Ferry Building.

EARLY HISTORY OF ASSOCIATIONS.

A feature of the commissioner's report, printed in the appendix, is an article entitled "Sketches of the Past History of California Associations," written by J. L. Fields, who has been a deputy in the employ of the commission since April 17, 1895. The commissioner has frequently been asked by associations for information concerning the early history of California associations, and he knew of no one better qualified to do justice to the subject than Mr. Fields. The building and loan knowledge obtained by him through over thirty years of service with this department, and his research work in state and public libraries and offices, have given him a fund of building and loan information which makes his article of great value and interest.

MUTUAL RELATIONSHIP OF BUILDING AND LOAN ASSOCIATIONS AND BANKS.

Building and loan associations and banks should work shoulder to shoulder; the one group can help the other; each has wide fields of operation and well defined duties to perform; each enjoys the confidence of the investing public. No state can show a better record than that made by the banks and building and loan associations of California. While it may be true that an association sometimes takes some of the deposits from a bank, it should be remembered that these same deposits are usually used in erecting a home and that, during the course of construction, most of the money finds its way back to the bank; the deposits, however, have been instrumental in creating a permanent home and a contented family, and thus helped the bank, the association and the community. There is very little reason why one of these financial groups should unduly criticise the other, for the criticism of one group by the other usually reacts on the faultfinder. In these days when armies of parasites are besieging gullible men and women and robbing them of billions of dollars, it is time that associations and banks should get together and forget petty bickerings and bring some of these billions to their safe havens before the swindlers get hold of them.

George E. McKinnis, president of the United States League of Building and Loan Associations, put the matter in a splendid manner when he said:

The measure of success of the business and industry of the community and state depends mainly upon the financial structure of the community and state. Banks, building and loan associations, trust companies, insurance companies, and mortgage companies, compose our financial system. There is a mutual relationship and interdependency existing between all the composing units. Banks and building and loan associations are of major importance to the connectional group, and it is most encouraging to recognize the growing cooperative spirit of bankers and building and loan men. But few things could take place that would be of more value to the community and state than the absolute cooperation of banks and building and loan associations. These institutions provide the strength and life of business, trade and industry, and promote thrift and home ownership.

12,403 ASSOCIATIONS IN UNITED STATES.

1925 proved another banner year for the associations throughout the United States. According to the last report of the 12,403 associations, their assets amounted to \$5,509,176,154, distributed among 9,886,997 members and investors. These associations increased during 1925 \$743,238,957 in assets and 1,332,645 in members and investors. The percentage of increase both in assets and membership and investors was 15.6 per cent. The amount of mortgage loans made during last year was \$1,730,000,000, as against \$1,460,000,000 for 1924 and the number of homes financed was about 500,000 as against 425,000 for the previous year. In the matter of losses, the report also shows that the associations have made a remarkable record, the percentage of loss to total building and loan resources being only .009 per cent. While this record does not equal that of California, which has not experienced a building and loan failure during the past ten years, still it is one of which all connected with the movement may well be proud.

CONCLUSION.

In closing, the commissioner desires to state that at no time since the creation of the bureau of building and loan supervision have the associations of California been upon so satisfactory a basis, or in so satisfactory condition, as at the close of this fiscal year, and, while well managed associations have always merited the confidence of the public, there never was a time when associations of this state so merited and deserved that confidence as at the present. During the past ten years there have been no failures among California associations and the outlook for many years of such a record is reasonably assured. All the associations are upon a fully solvent basis, with reasonable and annually increasing reserves for losses.

As an appendix to this report, as printed, there will be found the following important features:

(1) Detailed statement of the receipts and expenses of this department.

(2) The names of the 189 associations, locations, dates of incorporation, names of secretaries.

(3) History of all associations licensed since 1893 to June 30, 1926.

(4) Condensed annual statement of condition of each of the 176 associations reporting during the fiscal year ending June 30, 1926, arranged in alphabetical order, both as to city or town of location and to names of associations therein, including names of their officers and directors.

(5) Condensed annual statement of condition of a foreign association doing business in this state.

(6) Statement of assets and liabilities of eleven associations that have been in operation less than six months prior to June 30, 1926, together with total tabulation.

(7) Assets of associations as of March 31, 1926, and June 30, 1926, according to "call" reports.

(8) Statement showing growth of associations by assets for the past fifteen years.

(9) Existing laws, both for the government and supervision of associations.

(10) Instructions for forming new associations.

(11) Sample articles of incorporation and by-laws of associations.

(12) Instructions to associations and agents.

(13) Rulings by attorney general.

(14) New sources of investments.

(15) Limitation on words, "deposits," "interest," "savings."

(16) Instructions for preparing annual reports.

(17) Taxes and fees.

(18) Report on federal taxation.

(19) Sketch of early history of California associations.

(20) Relation of banks and associations.

(21) Place of associations in economic life.

(22) Appraising.

(23) Code of ethics.

Respectfully submitted.

(SEAL)

A. E. FALCH,
Commissioner.

APPENDIX (A)

**Statement Showing Growth of Associations by Assets for the Past
Fifteen Years.**

**Assets of Associations According to Call Reports of March 31 and
June 30, 1926.**

**Names of Associations, When Incorporated, Local Addresses and
Names of Secretaries.**

General Laws Governing Building and Loan Associations.

As amended, effective July 24, 1925.

CIVIL CODE.

TITLE XVI.

BUILDING AND LOAN ASSOCIATIONS.

- Section 633. Formation, powers, and organization.
634. Capital stock.
635. Retiring free shares.
636. Maturity of stock.
637. Loans—Prohibitions—Penalties.
638. Interest—Securities—Repayment of loans.
639. Arrears in payments—Default—Forfeitures.
640. Purchase of real estate.
641. Profits and losses.
642. Withdrawals.
642a. Delayed withdrawals and maturities.
643. Membership.
644. State supervision and control.
645. Annual report.
646. Foreign corporations—Deposit by.
647. Investment in and loans upon bonds.
647a. Consolidation of associations.
648. Definition of building and loan association.
648a. Formation with or without capital stock.

Powers—Purposes for which formed.

633. Building and loan associations as hereinafter in this title defined, shall have power to receive money and accumulate funds to be loaned, and to loan the same to their shareholders, investors and others; to permit shareholders and investors to withdraw part or all of their payments, investments or stock deposits, and to prescribe the terms and conditions of such withdrawal; to cancel shares of stock, the payments on which have been withdrawn; to receive money and to execute certificates therefor, which must specify the date, amount, rate of interest, and when the principal and interest are payable, and also the withdrawal value thereof at the end of each year; to borrow money for the purpose of making loans and of paying withdrawals and maturities; and shall have such further powers as may be specifically set forth under this title; *provided, however*, that no such association shall, at any time, have or carry upon its books, for any member or

investor, any demand, commercial or checking account or any credit to be withdrawn upon the presentation of any negotiable check or draft. Every such corporation hereafter formed, in setting forth the purposes for which it is formed, shall state, in its articles of incorporation, that it is formed to encourage industry, frugality, home building, and savings among its shareholders and members; the accumulation of savings; the loaning to its shareholders and members of the moneys or funds so accumulated, with the profits and earnings thereon, and the repayment to each of his savings and profits, whenever they have accumulated to the full par value of the shares, or at any time when he shall desire the same or when the corporation shall desire to repay the same, as it may be provided in the by-laws; and shall also state that it is formed for all the purposes specified in this title. (In effect August 11, 1913.)

Capital—How accumulated; classes of shares.

634. The capital of every such corporation shall be divided into shares of the matured or par value of one hundred or two hundred dollars each, as provided by the articles of incorporation, and shall be paid in by the subscribers in the manner provided by the by-laws. All such payments shall be called dues. Certificates shall be issued to each shareholder on the first payment of dues by him. Shares pledged as security for the payment of a loan shall be called pledge shares, and all others, free shares. All shares matured and surrendered or canceled, shall become the property of the corporation and may be reissued. The capital shall consist of the accumulated dues together with the apportioned profits of the corporation, and shall be accumulated by the issuance of shares in "installment" form and, where the by-laws shall so provide, in any or all of the following forms, viz: "full paid," "pass book," and "guarantee."

Installment shares.

(a) Installment shares shall be either "serial" or "permanent" in form. When issued in "serial" form the periodical dues on shares in each series shall commence with the date of the issue of such series and the holder must pay such dues and such amounts per share and at such times as the by-laws may provide, and such payments must continue on each share until, with the profits allotted thereto, it reaches its matured value or is withdrawn or canceled. On all such issues the dividends shall be apportioned or credited equally to each share in each series. No share of a prior series shall be issued after the issue of shares in a new series, except by way of transfer. Shares issued in "permanent" form may be issued at any time and the dividends thereon may be credited in the pass books of the members. Shares of either form may be issued in "classes" with a different periodical payment for each class designation, to be specified in the by-laws, and shall be issued with full participation in the profits subject to apportionment as dividends.

Full paid shares.

(b) Full paid shares shall be shares upon which a single payment of dues amounting to one hundred or two hundred dollars per share shall be paid at the time of subscription and upon which the holder shall be entitled to either a full participation in the net profits or to an agreed rate of dividends not exceeding six per cent per annum, payable semi-annually in cash, to be specified in the body of the certificate issued.

All such shares may be issued in separate classes as to participation, under regulations to be provided in the by-laws and which must be fully set forth in or upon each certificate issued.

Pass book shares.

(c) Pass book shares are shares which shall participate in the apportionment of net profits and be credited therewith at a rate not less than seventy-five nor more than ninety per centum of the rate apportioned to installment shares, as the by-laws shall determine, and upon which the dues may be paid in at such times and in such amounts as the holder thereof may elect until said shares reach their matured value or are withdrawn. Such shares shall be withdrawable under rules to be provided in the by-laws and fully set forth in the pass books issued. The matured value of this class of shares shall not exceed in volume twenty-five per centum of the matured value of all other shares in force. No membership fee, fine or forfeiture shall be chargeable against such shares.

Guarantee stock.

(d) Guarantee stock shall be stock, provided by the by-laws, to be set apart and sold as a fixed, permanent or guarantee capital. When any such stock has been once so set apart, sold and issued, it shall thereafter remain as a fixed, permanent and guarantee capital, and shall be subjected to all the conditions and liabilities attaching to the paid in capital stock of other classes of corporations. Such guarantee stock shall protect and guarantee all other stockholders and creditors against any loss, and when once paid it must be kept unimpaired.

May issue investment certificates to minors.

(e) Every corporation specified in this title, in addition to being entitled to issue investment certificates to adults, shall also have power to issue one or more investment certificates to a minor of any age and receive payments thereon by or for such minor. If such minor be fourteen years of age or over, he shall be entitled to withdraw, transfer or pledge any such certificate owned by him and to receive from such corporation any and all interest or other moneys at any time becoming due thereon and his receipt or acquittance therefor shall constitute a valid release and discharge to the corporation for the payment of such money.

Investment certificate—Reserve required.

(f) Every corporation specified in this title issuing installment or full paid investment certificates, or both, shall at all times have issued and fully paid for, either an amount of guarantee capital stock, or permanent non-withdrawable capital stock, or both such guarantee capital stock and permanent non-withdrawable capital stock, or a reserve fund equal to ten per cent of the aggregate amount of its liability on its said installment investment certificates and full paid investment certificates; *provided, however*, that the aggregate of guarantee capital stock, or permanent non-withdrawable capital stock, or both such guarantee capital stock and permanent non-withdrawable capital stock, or a reserve fund, of every building and loan association issuing installment or full paid investment certificates, or both, must equal the following percentages of its investment certificate liabilities:

1. Ten per centum of any amount up to and including one million dollars.

2. Seven and one-half per centum of any amount in excess of one million dollars, up to and including two million dollars.

3. Five per centum of any amount in excess of two million dollars, up to and including five million dollars.

4. Three per centum of any amount in excess of five million dollars.

Guarantee stock may have majority of directors.

(g) Corporations specified in this title, issuing guarantee stock, may provide in their by-laws that a majority of the board of directors shall be selected from the holders of such stock.

Entrance and transfer fees.

(h) Every corporation specified in this title shall also have power, by its by-laws, to charge and collect an entrance fee, for each share of stock, or membership share, or investment certificate, it may issue, not exceeding one dollar on each share or investment certificate having a matured or face value of one hundred dollars, and also to charge and collect a transfer fee, not exceeding ten cents on each share, or investment certificate, all of which fees shall be accounted for by the corporation like other funds of the association. No other fee, charge or deduction shall ever be made or permitted to be made against any shareholder, or certificate holder, or against any of his shares or certificates, hereafter issued, or the dues paid in thereon for the purpose of creating a fund to be used in the payment of current or running expenses. (In effect July 24, 1925.)

Retiring free shares.

635. The directors may in their discretion, under the regulations prescribed by the by-laws, retire any free shares of stock, other than those of the guarantee stock, by enforcing the withdrawal thereof, but whenever the withdrawal of any shares is to be enforced, the holders thereof must be paid the amount actually paid in, and the full amount of earnings at the date of retirement: *provided*, that shares of installment stock shall not be forced out until after they shall have become four years old.

Maturity of shares, and payment.

636. When any stock shall have reached its matured value, payment of dues thereon shall cease. Borrowing stockholders whose loans are fully paid shall have their securities released and returned to them. Holders of free shares of stock shall be paid the matured value thereof out of the funds of the corporation with interest at such rate as the by-laws shall provide, from the time the board of directors shall declare such shares to have been matured, until paid; but at no time shall more than one-half of the receipts of the corporation be applicable to the payment of matured shares without the consent of said board. The order of the payment of matured shares, if not otherwise determined by the by-laws, shall be in the numerical order of issuance.

Loans—Officers and directors may not borrow; no loans on guarantee stock or mining stock.

637. Loans may be made upon the "mutual plan" or upon the "definite contract plan." Loans made upon the mutual plan shall be accompanied by a pledge of shares having a matured or par value equal to the face of the loan. Definite contract loans shall be repayable in a

definite number of equal periodical installments, to be named in the note or obligation, each in an amount sufficient for the aggregate of all to repay the principal of the loan together with interest on the unpaid periodical balances, within the time and at the rate agreed upon. It shall be unlawful for any director or officer of any corporation governed by this title, directly or indirectly, for himself, or as a partner or agent for others, to borrow any of the funds of such corporation, and any officer or director violating the provisions of this section shall be guilty of a felony. Any officer or director of any such corporation who consents on behalf of such corporation to make a loan to any officer or director of such corporation shall be guilty of a felony, and shall also be personally liable to the corporation for the full amount thereof. It shall be unlawful for any building and loan association, corporation or society operating under the provisions of this title to loan any of its funds upon any of its own guarantee stock or upon its permanent non-withdrawal capital stock as security. Any officer or director of an association who shall make any such loan for and on behalf of any association shall be personally liable to the corporation for the full amount thereof, and shall also be deemed guilty of a felony. It shall be unlawful for any building and loan association, corporation or society, operating under the provisions of this title, to loan any of its funds upon the security of, or to invest any of its funds in any mining shares or mining stocks, or in the stocks or bonds of any corporation, other than in this title provided; and any officer or director who, on behalf of any such corporation, shall make any such loan or investment, or who shall consent thereto, shall be personally liable to the corporation for the whole amount of any such loan or investment, and shall also be guilty of a felony. (In effect August 11, 1913.)

Security for loans—Interest, rate to appear.

638. For every loan made a note or obligation, expressing and setting forth the exact rate of interest, must be executed by the borrower, secured by a first mortgage or deed of trust upon unencumbered real estate having an appraised value of not less than twenty-five per cent in excess of the face of the loan, except such loans as may be made upon the security of bonds specified in section six hundred forty-seven; or in lieu of a mortgage or deed of trust, loans to the extent of not exceeding ninety per cent of the then withdrawable value, may be made upon the pledge of free shares or certificates as security for their repayment. The board of directors may from time to time fix the rate of interest to be charged on loans. A borrower may at any time repay his loan together with interest or arrears due thereon and upon the surrender of the shares, or certificate pledged as security therefor. (In effect July 27, 1917.)

Arrears in payment; default; forfeitures.

639. Whenever any non-borrowing member shall be six months in arrears in the payment of his dues upon free shares, the secretary may give him notice thereof in writing, and a statement of his arrearages, by mailing the same to him at his last post-office address given by him to the association; and if he shall not pay all arrearages within two months thereafter, the board of directors may, at their option, declare his shares forfeited, and at the time of such forfeiture, the withdrawal value thereof shall be determined and stated, and the defaulting member

shall be entitled to withdraw the same without interest, upon such notice as shall be required of a withdrawing shareholder. Whenever a borrower shall be three months in arrears in the payment of his dues or interest or loan installments, the whole loan shall become due at the option of the board of directors, and they may proceed to enforce collection upon the securities held by the association. The withdrawal value, at the time of exercising such option, of all shares pledged as collateral security, shall be applied to the payment of the loan, and said shares from that time shall be deemed surrendered to the association and canceled.

May purchase real estate on foreclosure sale.

640. Any such association may purchase at any sale, public or private, any real estate upon which it may have a mortgage, judgment, lien, or other incumbrance, or in which it may have an interest, and may sell, lease, or mortgage the same at pleasure to any person or persons.

Apportionment of profits; reserve. Guarantee stock participation and reserve.

641. Profits and losses shall be apportioned at least annually, and shall be apportioned to all shares in each class at the time of such apportionment, according to the actual or book value thereof. If the guarantee capital herein provided for if any there be, together with the reserve fund, or if the reserve fund, where there be no guarantee capital, shall not equal five per cent of the outstanding loans at the time of each apportionment of profits, the directors shall set aside, as a reserve fund, not less than five per cent of the net profits accruing since the last prior apportionment, and shall continue so to do until said fund shall amount to at least five per cent of the loans in force, at which figure said fund shall thereafter be maintained. Said reserve fund shall at all times be available to meet losses arising from any source not heretofore provided to be assumed by the guarantee capital. Every such corporation having a paid-in guarantee capital stock, may provide in its by-laws, that an amount not exceeding one per cent per annum on the average loans in force, shall be set aside from and out of the net profits, at each annual distribution thereof, or a proportionate amount at each semi-annual distribution, from which to declare dividends on and provide a reserve fund that shall be specially applicable thereto. At least one-tenth of the amount so set aside shall be carried to such reserve fund until the same shall amount to at least twenty-five per cent of the paid-in guarantee stock. (In effect July 24, 1925.)

Withdrawals; conditions and limitations.

642. A stockholder or investor, desiring to withdraw from any such corporation or to surrender a part or all of his stock, or investment certificate, may do so by giving thirty days' notice, in writing, of his intention or desire so to do. On the expiration of such notice, he is entitled to receive the full amount paid in upon the stock or investment certificate surrendered, exclusive of the entrance fee, together with such proportion of the earnings thereon as the by-laws may provide, or as may be fixed by the board of directors; but not more than one-half of the monthly receipts in any one month must be applied to withdrawals for that month, without the consent of the board of

directors, and no stockholder must be permitted to withdraw whose stock is pledged to the corporation as security for a loan, until such loan is fully paid. All withdrawals must be paid in succession in the order that the notices of intention are given. Whenever the demands of withdrawing stockholders or investors exceed the money applicable to their payment, the notices of intention to withdraw must be registered in the order of filing and payments thereon must be made in succession, in the order that such notices were filed and registered. The board of directors may permit the withdrawal of a part of the accumulations to the credit of a stockholder or member, on shares of installment stock not issued in serial form, without thereby reducing the number of shares held by him. (In effect July 24, 1925.)

Demands unpaid for two years, business may be taken over.

642a. Whenever an application for withdrawal of free shares or certificates shall have been on file, or the payment of matured shares demanded, and either shall have remained unpaid for a period of one year, all the receipts of the association from dues, interest, premium, loans repaid, and the proceeds of all other investments, shall, after the payment of expenses and general indebtedness, be applied toward the payment of withdrawals and maturities; and the board of directors or the official vested by law with powers of state supervision and license may direct that such payments shall be made upon a ratable and proportionate basis. Whenever such applications or demands, whether heretofore or hereafter made, have been on file and remain unpaid in whole or in part for more than two years the official vested by law with powers of state supervision and license, may in his discretion forthwith take possession of the property and business of such association, and retain such possession until its affairs be finally liquidated in the manner provided by law for the liquidation of associations by him. (In effect August 8, 1915.)

Who may become members.

643. Any person of full age and sound mind may become a member of an association by taking one or more shares therein and subscribing to the by-laws, and annexing to his signature his post-office address. A minor may hold shares in the name of a parent, guardian, or next friend, as trustee. The shares of stock in any such corporation held by any person, to the extent of one thousand dollars, shall be exempt from execution.

State supervision and control.

644. All building and loan associations, as in this title defined, doing business in this state, shall be under the supervision and control of such official or officials as are by law vested therewith; and except in the manner provided in this title, no corporation, firm, or association shall conduct or carry on the business of accumulating the savings of its shareholders, members, or investors, and loaning such accumulations to them, in the manner of building and loan associations.

Annual and other reports; penalties.

645. Every association organized under the provisions of this title, and every other association doing a similar business, shall annually make a full report, in writing, of the affairs and condition of such corporation, within thirty days after its annual meeting, to the official or officials vested with powers of state supervision and license. Such

reports shall be verified by the oath of the officers making the same, and a copy of the same shall be delivered to every stockholder, from the office of the corporation, who may call for such report. Every association shall make any further reports which the said official or officials may require, and in such form and as to such matters relating to the conduct of the business of the association as such official or officials may designate. Any wilfully false statement in making and verifying said report shall be perjury. Any such association which shall fail to furnish the said official or officials any such report required, within thirty days after demand, shall forfeit the sum of ten dollars per day for every day such report shall be delayed or withheld, which may be recovered in an action brought by the attorney general in the name of the people of this state; and all moneys so recovered shall be paid to the treasurer of this state, who shall pay the same into such fund as may be provided by law, for the purposes of the official or officials vested with power of supervision and license.

Foreign association; deposit required.

646. Every building and loan association, and every other corporation, association or society organized under and by virtue of the laws of any other state or territory or of any foreign country, for the purpose of conducting and carrying on a business of a character similar to that authorized by this title, or whose by-laws, rules, prospectus, contracts or methods of business provide for the conducting or carrying on the business of accumulating the periodical payments or savings of its shareholders, members or investors in the manner of building and loan associations, or as authorized and provided in this title, desiring to enter the State of California for the transaction of business or for selling its bonds, debentures, certificates, shares of stock, shares of membership, contracts, or other similar securities, must first comply with the requirements of sections four hundred five and four hundred eight of the Civil Code and immediately thereafter deposit with the official vested by law with state supervision and license not less than fifty thousand dollars in lawful money of the United States or in bonds of the United States or of the State of California, or of any county, municipality or school district of said state, or of any public utility corporation, or of any irrigation district in said state, the bonds issued by which district are legal investments for savings banks or any notes or bonds secured by mortgage or deed of trust payment of which is guaranteed by a policy of mortgage insurance, or mortgage participation certificates, issued by a mortgage insurance company in accordance with the provisions of chapter eight, title two, part four of division first of the Civil Code or in lieu thereof promissory notes secured by first mortgages or deeds of trust upon real estate located within this state, satisfactory to the official vested by law with state supervision and license of building and loan associations, all duly assigned or endorsed in blank, to be held by the said official as a guarantee fund for the protection and indemnity of residents of the State of California who shall invest in any of its bonds, debentures, shares, contracts, agreements or other securities, or with whom it shall do business.

It must also procure from the official vested by law with state supervision and license of building and loan associations, the license provided for building and loan and similar corporations and associations, paying the statutory fee therefor before entering upon the transaction of busi-

ness, and annually renew the same; *provided, however*, that the official or officials, vested by law with state supervision and license of building and loan associations may, before issuing license to any building and loan association, or other corporation, organized under and by virtue of the laws of any other state or territory, or of any foreign country, doing a business which would properly place it under the supervision of the state building and loan commission, require such corporation, or corporations, to so modify or change their contracts, certificates of membership shares, or stock that they will conform in all respects to the requirements of associations organized within the State of California; and shall likewise conform in all other respects to the provisions of sections six hundred thirty-three to six hundred forty-eight *a* of the Civil Code of the State of California.

With the consent of the said official vested by law with state supervision and license any of the securities deposited as herein provided may be withdrawn at any time upon the substitution and deposit of others of form and character herein specified and of like or greater net value, so long as the aggregate net convertible value of all equals or exceeds the amount named herein. The fund thus created is not to be foreclosed or realized upon except for the liquidation of a final judgment in favor of residents of California who were investors in any of the above mentioned securities of such foreign company, corporation or association, and then only after certified proof thereof has been filed with the custodian.

Except as above provided, securities deposited as herein specified shall not be withdrawn until satisfactory proof of the liquidation of all liabilities to residents of California, approved by the official vested by law with state supervision and license, shall be filed with the custodian, when all may then be withdrawn.

Any person or persons who shall be found in the state, as principal, agent, solicitor, or in any other capacity, soliciting or conducting the business of selling, disposing of, or taking or soliciting subscriptions for the sale of any of the forms of bonds, debentures, shares, contracts, agreements or other securities of any such foreign company, corporation or association which has not complied with all the requirements of this section shall be deemed guilty of a misdemeanor punishable, upon conviction, by a fine of not less than one hundred nor more than one thousand dollars or by imprisonment in the county jail for not less than one nor more than twelve months, or by both such fine and imprisonment. (In effect August 17, 1923.)

Investments permitted; approval required.

647. Any building and loan association may invest in or loan upon bonds of the United States, of the State of California, or of any county, municipality or school district of said state, or of any public utility corporation, and may also invest in or loan upon notes or bonds secured by mortgage or deed of trust, payment of which is guaranteed by a policy of mortgage insurance, or mortgage participation certificates, issued by a mortgage insurance company in accordance with the provisions of chapter eight, of title two of part four of division first of the Civil Code, the total of which investments at any time shall not exceed twenty-five per centum of the assets of such association; *provided, however*, that any such loan or investment made by such association must be approved by the official, or officials, vested with the powers of supervision and license. (In effect August 8, 1915.)

Consolidation of associations.

647a. Any two or more building and loan associations may unite and become incorporated in one body, with or without any dissolution or division of the funds of either of them; or any such corporation, association or society may transfer its engagements, funds and property to any other like corporation, association or society upon such terms as may be agreed by an unanimous vote of their respective boards of directors, ratified by the written consent of the shareholders holding more than two-thirds of the shares in force in each of the respective contracting associations; *provided, however*, that any such consolidation or transfer must also be approved by the official or officials vested by law with powers of state supervision and license. (In effect July 22, 1919.)

Name; to include what.

648. The name "building and loan associations" as used in this title shall include:

Mutuals.

First—Corporations formed for the purpose of receiving money from, and loaning money to, their members only.

Corporations operating on similar lines.

Second—Corporations, associations, companies, copartnerships, and individuals transacting the business of issuing or selling bonds, debentures, certificates, shares of stock, or other papers, by whatever names said instruments may be designated, whether said instruments are issued for money paid in advance or for money to be paid in installments, but with an intent, either implied or expressed, that the proceeds or accumulated installments thereof and thereon are to be withdrawable or repayable, with accumulated profits, at some future fixed, or indefinite date of maturity; *provided always*, that this section does not include persons, copartnerships or corporations engaged in any kind of banking business. (In effect March 22, 1909.)

Formation with or without capital stock.

648a. Building and loan associations may be formed under this title with or without guarantee or other capital stock, with all the rights, powers and privileges and subject to all the restrictions and liabilities set forth in this title. If formed without any capital stock or with guarantee capital stock only, the working capital may be accumulated by the issue of membership shares, units or certificates having a paid-up or ultimate matured installment value of one hundred or two hundred dollars each, and entitled to all the rights, powers and privileges and subject to all the restrictions and liabilities provided in this title for shares of authorized capital stock of a similar class. Any building and loan association heretofore formed may reincorporate under the provisions of this section and may substitute membership shares, units or certificates of similar classes for its outstanding or authorized shares of capital stock, other than guarantee capital stock by amending its articles of incorporation in the manner prescribed by section three hundred sixty-two of this code, except that such amended articles of incorporation must be adopted by a unanimous vote of the board of directors. (In effect July 29, 1921.)

BUILDING AND LOAN COMMISSION ACT.

CHAPTER 354.

[Approved April 5, 1911. Stats. 1911, p. 607.]

(Amendments effective December 18, 1911, March 23, 1912, August 8, 1915, July 27, 1917, July 29, 1921, August 17, 1923, and July 24, 1925.)

The people of the State of California, represented in senate and assembly, do enact as follows:

SECTION 1. There is hereby created a bureau, to be known and designated as the "bureau of building and loan supervision," with powers of supervision, examination and license of all building and loan associations, mutual loan associations, cooperative home associations, and all other corporations, association and societies whenever, wherever and however formed, which are based, or are operating on plans or methods similar to building and loan associations as defined in section six hundred forty-eight of the Civil Code. Said bureau is charged with the enforcement of all laws designed for the formation, government or operation, in this state, of any such association, corporation or society, and is vested with power to determine what associations, corporations and societies, come within the purview of the laws. (In effect March 23, 1912.)

Administration; commissioner, deputies, etc.

SEC. 2. The administration of said bureau shall be vested in a commissioner, to be known and designated as the "building and loan commissioner," who shall be appointed by the governor and commissioned to hold office at the pleasure of the governor. He must be a citizen of the state; and he must not be in any way connected with any association, corporation or society coming under his supervision. He shall appoint a chief deputy building and loan commissioner with full power as such, who must be a practical, skilled accountant, fully conversant with building and loan systems and accounts; he shall also appoint two deputies who shall be accountants; he shall appoint a clerk, and a stenographer; he shall also have power to appoint such other temporary assistants and employees as may be necessary for the transaction of the business of his office. (In effect July 24, 1925.)

Salaries and expenses.

SEC. 3. The commissioner shall receive a salary of four thousand dollars per annum. He shall, subject to the approval of the board of control, have power to fix the salaries and compensation of deputies, assistants and employees. There shall also be allowed and paid the necessary traveling expenses of the commissioner and his deputies incurred while traveling in the line of their duties. The commissioner shall procure and have an office in the city of San Francisco. Said commissioner shall also provide for such stationery, printing, postage and all other necessary expenditures as may be necessary for the proper conduct of his office. All said salaries and expenses shall be audited and

paid in the same manner as the salaries and expenses of other state offices. Said salaries and expenses shall be paid from the "building and loan fund." (In effect July 24, 1925.)

Bonds and oath of office.

SEC. 4. Before entering upon their duties, the commissioner and his deputies shall each execute an official bond in the penal sum of five thousand dollars, each of which bonds must be guaranteed by a duly authorized surety or bonding company, the premium on which shall be paid from the allowance for office expenses. Any bond executed under this section must be approved by the governor and filed and reported in the office of the secretary of state, and such commissioner and deputies must take the oath of office as prescribed by the Political Code for the state officers in general. (In effect July 29, 1921.)

Commissioner to license and report to governor.

SEC. 5. It shall be the duty of the commissioner to furnish all associations, corporations or societies, which, in his judgment, legally come under his jurisdiction, and that have otherwise complied with the requirements of law, a license authorizing them to transact business for one year from the date of said license; to receive and place on file in his office the annual or other reports required by law to be made by building and loan associations, licensed by him; to supply each with blank forms for such statement; and to make, on or before the first day of October in each year, a tabulated report to the governor of this state, showing the condition of all such associations, corporations or societies reporting to him, with such recommendation as he may deem proper, accompanied by a detailed statement of all moneys received by him since his last report and the disposition thereof. (In effect July 29, 1921.)

Examinations of domestic and foreign associations.

SEC. 6. It shall be the duty of the commissioner, in person, or one of his deputies at least once in each year, without previous notice, to visit and examine into the affairs of every such association, corporation or society licensed by him, incorporated or doing business in this state; on such occasions he shall have free access to all the books, records, securities and papers of every such association, corporation or society, and shall first count the cash and check the bank balance of such corporation or association with the proper amount of funds as shown by the books to be on hand and at the date and hour of such examination, and shall then examine and verify the books, accounts, and securities, and, so far as possible and consistent, the values of all property owned or held as collateral security for moneys loaned, and otherwise use reasonable diligence to ascertain the financial condition and solvency thereof. He and his deputies shall have power to administer oaths in the line of duty, and to examine under oath the officers, employees and agents, or the custodian or receiver, relative to any or all the business thereof. Whenever the result of any such examination shall develop a condition demanding an extended audit of the books and affairs, the commissioner may, for such purpose, appoint a competent auditor at the expense of the association, corpora-

tion or society examined. The expense of such audit shall be fixed by the commissioner and shall not exceed fifteen dollars per diem, plus traveling and hotel expenses, for each day actually engaged in the making of the audit and the preparation of the report.

The commissioner or his deputies shall examine, or cause to be examined, the books and affairs of any such association, corporation or society formed under the laws of any other state, territory or foreign country applying for a license to enter this state for the transaction of business, prior to the granting of such license and annually thereafter, and for every such examination made outside the state the actual traveling and hotel expenses incurred shall be paid by the association, corporation or society so examined; *provided*, that the result of any similar examination made and certified by the duly constituted authorities of any state having similar laws of supervision may be accepted by the commission. (In effect July 29, 1921.)

Books and accounts required; appraisement of real estate.

SEC. 7. To facilitate the examination specified in the foregoing section, he shall require every such association, corporation, or society to keep its books in such form as to accurately show its assets and liabilities in detail and to keep records written in ink, showing the appraised values of the real estate security held in connection with each loan, and signed in each case by the appraiser, officer or committee charged with making such estimated valuations. The commissioner may make a revaluation of the real estate owned, and of other securities of any such association, corporation or society licensed by him, on which the loan payments may be delinquent for six months or more, and may, for that purpose, appoint local appraisers, who shall be disinterested persons, at the expense of such association, corporation or society; the expense of such appraisement to be fixed by the commissioner, but not to exceed the sum of five dollars for property located outside of any incorporated limits and three dollars for property located inside of any incorporated limits for each property so examined and appraised. Each appraiser so appointed shall be required to make a sworn report to the commissioner of his estimated valuations of all property so examined and appraised.

Power to issue subpoenas.

SEC. 8. The commissioner shall have power to issue subpoenas and require attendance of any or all trustees, or agents of any such association, corporation or society, and such other witnesses as they may deem necessary, in relation to its affairs, transactions and condition, and any such person so served with such subpoena may upon application of the commissioner be required by order of the superior court of the county where the corporation, association or society has its principal place of business to appear and answer such pertinent questions as may be put to him by such commissioner and be required to produce such books, papers or documents in his possession as may be required by such commissioner.

Powers of commissioner in unsafe practices and conditions, and in liquidations.

SEC. 9. If the commissioner, as the result of any examination, or from any report made to him or to the shareholders, shall find that any association, corporation or society licensed by him, is violating the

provisions of its charter or of the laws of this state provided for its government, or is conducting its business in an unsafe or unauthorized manner, he may, by an order addressed to the association, corporation or society so offending, direct a discontinuance of such violations or unsafe practices and a conformity with all the requirements of law; and if such association, corporation or society shall refuse or neglect to comply with such order within the time specified therein; or if it shall appear to the commissioner that any such association, corporation or society is in an unsafe condition, or is conducting its business in an unsafe manner, such as to render its further proceeding hazardous to the public, or to those having funds in its custody; or if he shall find that its assets are impaired to such an extent that, after providing for all liabilities other than to shareholders, members and investors, they do not exceed in volume the dues or principal payments paid in by the shareholders, members and investors and accredited to or on account of all classes of stock, shares, or certificates of investment, issued and outstanding, he shall, in order to prevent waste and diversion of assets, assume and take charge of the affairs and business of such association, corporation or society and possession and control of all its property and assets, and retain such possession pending action by the proper court. Upon taking such action, he may, under his hand and official seal, appoint a custodian, require from him a good and sufficient bond, and place him in charge as his representative. He shall immediately notify the attorney general of his action and of all the necessary facts in connection therewith; and thereupon it shall become the duty of the attorney general to at once apply to the superior court of the county in which such association, corporation or society has its principal place of business, for an order citing such association, corporation or society to show cause, if any it may have, within not exceeding ten days, why the action of the commissioner should not be approved and confirmed by the court, and made permanent. Such court may in such application, and after a full hearing, approve or disapprove of the action of the commissioner. If the court shall approve and confirm the action of the commissioner, such approval and confirmation shall operate as a permanent injunction against the further prosecution of business by such association, corporation or society, and the commissioner shall proceed immediately to liquidate the business and affairs thereof, and so continue until such liquidation has been completed. If the action of the commissioner shall be disapproved by the court, the commissioner shall cause all reasonable expenses incurred by him during his occupancy or possession, including not exceeding eight dollars per diem, for each business day, as the compensation of the custodian, to be paid from the funds of such association, corporation or society, and immediately restore the balance of the property and assets thereof to the possession of the proper officers.

The approval and confirmation of the action of the commissioner, by the court, shall operate to empower the commissioner to collect all moneys, debts and claims due to or belonging to such association or society and to give full receipt therefor; to release or reconvey all real or personal property pledged as security for loans; to approve and pay all just and equitable claims; to prosecute all actions necessary to enforce liquidations; and, on the order of the court, to compound bad and doubtful debts and to sell and convey real and personal property.

As soon as practicable after the approval and confirmation of the action of the commissioner, by the court, he shall cause an inventory of all the assets of such association, corporation or society to be made in duplicate, the original to be filed with the proper court and the duplicate in the office of the commissioner. He shall cause due notice to be given by publication, weekly, for four successive weeks, in some newspaper published at or near the principal place of business of such association, corporation or society, requesting all persons having claims against it as creditors, shareholders, members or investors, to present same and make legal proof thereof, at a place and within a time to be designated in such publication; and he shall cause a copy of such notice to be mailed to all persons whose names appear of record upon its books as creditors, shareholders, members or investors; and upon the expiration of the time fixed for the presentation of claims the commissioner shall prepare or cause to be prepared, in duplicate, a full and complete schedule of all claims presented, specifying by classes those that have been approved and those that have been disapproved, and file the original with the proper court and the duplicate in the office of the commissioner. Due notice shall be mailed to all claimants whose claims may have been rejected. Action to enforce the payment of any rejected claim must be brought and service had within thirty days from and after the date of filing of the schedule of claims with the proper court, otherwise all such actions shall be forever barred. The commissioner may, under his hand and official seal, appoint one or more special deputies to assist in the duties of liquidation and distribution, under his direction, and may also employ such counsel and clerical assistance as may be needful and requisite, and fix the salaries and compensation to be allowed and paid to each. All such salaries, together with such other reasonable and necessary expenses as may be incurred in the liquidation, shall be paid by him from the funds of such association, corporation or society in his hands, and from the net realization of assets, in excess of such salaries and expenses, the commissioner shall first pay all approved claims other than to stockholders, shareholders and members; and thereafter he shall distribute and pay dividends, in liquidation to the stockholders, other than guarantee, and to the shareholders and members, as fast as funds to the amount of ten (10) per cent of such approved claims are available therefor, and so continue until all the assets have been realized upon and a final dividend in liquidation shall be declared and paid. Upon the payment of a final dividend in liquidation, the commissioner shall prepare and file with the proper court a full and final statement of the liquidation, including a summary of the receipts and disbursements, and a duplicate thereof shall be filed in the office of the commissioner, and after due hearing and approval by the court the liquidation shall be deemed to be closed. The approval and confirmation of the action of the commissioner, in the manner herein provided, shall operate to dissolve or stay any or all actions or attachments initiated or levied within thirty days next preceding the date of notification of the attorney general by the commissioner; and, pending the process of liquidation, as herein provided, no attachment or execution shall be levied nor lien created upon any of the property of such association, corporation, or society.

In every case where any such association, corporation or society shall have a paid in guarantee capital, and the realization of assets shall be

insufficient to meet the liabilities due to all other classes of stockholders, shareholders, members and investors, the commissioner shall enforce, by action or otherwise, the liability of each and every of the holders of the guarantee capital stock for his or their respective pro rata of any such deficiency. Whenever, in all cases where there shall be a paid in guarantee capital, the commissioner shall have fully liquidated all approved claims, and shall have made due provision for any and all known but unclaimed liabilities, guarantee capital excepted, and shall have paid all expenses of liquidation, any surplus that may then remain in his hands, together with all the records and effects, shall be delivered over to the holders of the guarantee capital stock at a meeting thereof to be called by the commissioner for that purpose. (In effect March 23, 1912.)

Penalty for noncompliance with orders, sheriff may enforce demands.

SEC. 9a. Whenever it shall become necessary for the commissioner to take action against any association because of unsafe practices and of conditions unsafe and hazardous to the public and to those having funds in its custody, as provided in section nine, the refusal of any officer or director to comply with his written demand for possession of the property and assets shall constitute a misdemeanor punishable by a fine of not more than five hundred dollars or by imprisonment in the county jail for not more than ninety days, or by both such fine and imprisonment; and if such demand be not complied with within twenty-four hours after service the commissioner may call to his assistance the sheriff of the county in which the principal place of business of such association is located, by written demand under his hand and official seal, whereupon it shall become the duty of such official to enforce the demands of the commissioner. (In effect August 8, 1915.)

Officers must furnish schedule of property.

SEC. 10. Upon the approval of the action of the commissioner, in the manner and for the cause set forth in section nine, the commissioner shall require the president and secretary of such association, corporation or society to, and such officers shall, make a schedule of all its property and make oath that such schedule sets forth all the property which such association, corporation or society owns or to which it is entitled, and deliver such schedule, and the possession of any and all such property as may not have been so previously delivered, to the commissioner, who may at any time examine under oath such president and secretary, or other officers, to determine whether or not all the property which such association, corporation or society owns, or to which it is entitled, has been transferred and delivered into his possession. (In effect March 23, 1912.)

Receivers, duties and powers.

SEC. 11. Receivers, heretofore appointed, must, at least annually, make due report of all their doings and accounts to the proper court, and immediately thereafter file a copy thereof with the commissioner; and the commissioner shall, at least once in each year, and as much oftener as he may deem expedient, examine the accounts and doings of such receivers, and, for such purpose, shall have full and free access to all books, accounts and vouchers relating to such liquidation, and any defect, irregularity or misconduct on the part of such receivers as he may find to exist shall be, by the commissioner, reported to the proper court. (In effect March 23, 1912.)

Special examinations on request.

SEC. 12. Upon the certificate, under oath, of any ten or more officers, trustees, creditors, shareholders or depositors of any such association, corporation or society, setting forth their interest and the reason for the making of such examination, directed to the commissioner, and requesting him so to do, he shall forthwith make a full investigation of its affairs, in the manner provided.

Failure of commissioner to act.

SEC. 13. If the commissioner, having knowledge of the insolvent condition, or of any violation of law or unsafe practice of any such association, corporation or society under his supervision, such as renders, in his opinion, the conduct of its business hazardous to its shareholders, creditors or depositors, shall fail to take the proper action required by this act, or shall refuse or neglect to perform the official duties pertaining to his office, then upon conviction thereof the office of such commissioner shall be declared vacant by the governor, and a successor be appointed to fill the unexpired term.

Assessments for salaries and support.

SEC. 14. To meet the salaries and expenses provided for by this act, the commissioner shall require every association, corporation or society licensed by him or coming under his supervision to pay in advance, to him, and prior to the issuance of any license, its pro rata amount of all such salaries and expenses, and it is hereby made the duty of every such association, corporation or society to pay the same; such pro rata shall be fixed and determined by the proportion which its assets bear to the aggregate assets of all such associations, corporations, or societies, receiving licenses, as shown by the last reports of such corporations, associations, or societies to the commissioner. On or before the thirtieth day of December, in each year, the commissioner shall notify each of such associations, corporations or societies, through the United States mail, of the amount assessed and levied against it and that the same must be paid within twenty days thereafter; and should payment not be made to him within said twenty days, he shall then assess and collect a penalty, in addition thereto, of ten per cent per day for each day that such payment may be delayed or withheld; *provided, however*, that in the levy and collection of such assessment, no such association, corporation or society shall be assessed for, nor be permitted to pay less than ten dollars per annum, and any such association hereafter formed in this state, shall be required to pay not less than one dollar per month for the unexpired term ending December thirty-first, succeeding application; and in like manner any such association organized outside this state shall be required to pay not less than three dollars per month, for such unexpired term, for its first license.

Requirement for license and renewal; commissioner may revoke license.

SEC. 15. It shall be the duty of the commissioner to require every such association, corporation or society coming under his supervision, to procure from him, prior to the transaction of any business, a certificate of authority or license to transact business in this state; and it is hereby made the duty of every association, corporation or society to comply with such requirement. To procure such license, there must be filed with and approved by the commissioner, a certified copy of its

articles of incorporation, constitution and by-laws and all subsequent amendments thereto, accompanied by the license fee herein provided for; and after the expiration of the term for which a license may have been granted to it, no such association, corporation or society shall be permitted to continue to transact business without first procuring a renewal of such license on the terms provided in this act, and any such association, corporation or society violating the provisions hereof shall be subject to a penalty of ten per cent per day of the amount of the license fee required to be paid under section fourteen of this act, in addition thereto, for each day during the continuance of such offense. The commissioner is authorized and empowered to revoke the license of any such association, corporation or society under his supervision, the solvency whereof may have become imperiled by losses or irregularities; and immediately upon the revoking of any such license he shall report the facts to the attorney general, who shall thereupon take such proceedings as are provided in section nine of this act.

Agents' licenses and renewals.

SEC. 15a. No person receiving compensation therefor, other than an officer, director or salaried employee, no part of whose compensation consists of commissions, or other than a local resident agent who has resided in the county in which he holds such local agency for a period of not less than one year prior to the time that he took such agency, of a building and loan association or other similar corporation or society which is duly licensed by the commissioner, shall act as solicitor or agent for the sale of the shares of stock, shares of membership, certificates or other securities or forms of investment issued by, or for the securing of loans from any such association, corporation or society until he has first procured from the commissioner a license therefor. To obtain such license there must be filed with the commissioner a duplicate of the authorization or appointment issued to him by, together with a request from, a licensed association, corporation or society that a license be issued to him to act as an agent or solicitor for it, and accompanied by a fee of one dollar. All such licenses shall expire by limitation on the thirtieth day of June succeeding their issue, but may be renewed from time to time, for an additional period of one year upon a request therefor from the association, corporation or society originally applying, and payment of a renewal fee of one dollar. Any such license may be revoked at any time on the application of the association, corporation or society for whom it was issued, or may be revoked by the commissioner for cause.

The commissioner shall keep an alphabetical list of the names of persons to whom such licenses are issued with the date of issue and renewal, and the name of the association, corporation or society for whom such licensee is authorized to act. All such licenses shall be issued under rules and regulations to be prescribed by the commissioner. (In effect July 27, 1917.)

Procedure and powers regarding new associations.

SEC. 15c. Before the articles of incorporation of any building and loan association, hereafter desiring to incorporate, under the laws of this state, shall be filed in the office of the secretary of state of the State of California, there must be attached thereto, the certificate of approval of the building and loan commissioner. Such proposed articles shall be

submitted to the commissioner, and upon receipt of same, he shall immediately examine into all the facts connected with the formation of such intended corporation, including its location, and proposed incorporators. If it appears to him that such corporation, if formed, will be entitled to commence the business for which it is organized, and authorized under the law to conduct, the commissioner shall execute his certificate of approval; *provided, however*, that the commissioner may refuse to execute such certificate, if, upon his examination and investigation, he has reason to believe that the proposed corporation is to be formed for any business, other than legitimate building and loan business, or that the persons proposing to incorporate such corporation, lack the character and general fitness to engage in such business, or that the name of the proposed corporation is likely to mislead the public, as to its character or purpose, or that the name proposed for such corporation is the same as one already adopted or appropriated by any existing building and loan association in this state, or so similar thereto, as to be likely to mislead the public. (In effect July 24, 1925.)

Restrictions to use of name "building and loan."

SEC. 15*d*. No person, firm, company, association, copartnership, or corporation, either domestic or foreign, unless he or it is the lawful holder of a license, to transact business in this state, issued by the building and loan commissioner, and then in force, and is actually engaged in carrying on a building and loan business in this state, shall hereafter transact business under any name or title which contains the term "building and loan," nor use any sign or circulate or use any letterhead, billhead, circular, or paper whatever, or advertise in any manner, which indicates that his or its business is the character or kind of business, carried on or transacted by a building and loan association, or which is calculated to lead the public to believe that his or its business is that of a building and loan association. Any violation of any of the provisions of this section shall constitute a misdemeanor, punishable by a fine of not exceeding five hundred dollars, or by imprisonment in the county jail for not exceeding ninety days, or by both such fine and imprisonment. Upon action brought by the commissioner, the court may also issue an injunction, restraining any person, firm, company, copartnership, or corporation from continuing to violate any provision of this section. (In effect July 24, 1925.)

Annual report required and penalty for failure to report.

SEC. 16. The commissioner shall require every association, corporation or society licensed by him, and including associations in liquidation, within thirty days after the close of its annual fiscal term to make a report to him in writing, verified by the oath of its president and secretary, showing accurately its financial condition at the close of such term; such report shall also include all the receipts and disbursements and income and expenses for the term, together with such statistical and other information as may be deemed essential; all and every of such reports shall be in such form as the commissioner may prescribe, and upon blanks to be by him furnished therefor. Every such association, corporation or society is hereby required to make and file all such reports within the time specified herein, and for failure or neglect so to do shall be subject to a penalty of ten dollars per day for each and every day the same shall be delayed or withheld.

Disposition of moneys—Revolving fund.

SEC. 17. The collection of all moneys assessed, as herein provided, for the payment of salaries and annual expenses, or forfeitable as fines for failure to make payment of assessments, procure licenses, or make and file reports as herein specified, and due from any such association, corporation or society coming within the provisions of this act, or imposed as a penalty for violation of any order or summons, may be enforced by the commissioner by action instituted in any court of competent jurisdiction; and all moneys collected or received by the commissioner under this act, shall be deposited with the state treasury, to be credited to a fund to be known and designated as the "building and loan inspection fund"; which said fund shall only be used in defraying the salaries and expenses provided for by this act; *provided, however*, that the commissioner shall, without at the time furnishing vouchers and itemized statements, withdraw from said fund, a sum not to exceed five hundred dollars. The sum so drawn shall be used as a revolving fund where cash advances are necessary and at any time upon the demand of the board of control, must be accounted for and substantiated by vouchers and itemized statements submitted to and audited by the board of control and the controller. (In effect July 24, 1925.)

Repealing act of 1905 and earlier acts.

SEC. 18. An act approved March 21, 1905, entitled "An act creating a bureau of building and loan supervision; providing for the appointment of administration officials therefor to be known as the building and loan commissioners; prescribing their duties, powers and compensation; providing for a secretary, his powers and compensation; providing for the rental of offices for the use of the bureau and for traveling and office expenses; providing a system for licensing building and loan and other associations, and for assessing and collecting the license fees necessary to meet the salaries and other expenses; providing a course of procedure where violations of law, or unsafe practices are found to exist, or are reported by the commissioners to the attorney general; providing for involuntary liquidation by trustees, and proceedings in connection therewith; providing for exemption of property of associations in liquidation from attachments, executions and liens, pending liquidation; providing for and requiring associations to procure licenses, pay assessments levied for pro rata of salaries and expenses, and to make and file reports; providing penalties for violations of law and orders of the commissioners; providing for succession in office, and repealing all acts and parts of acts in conflict herewith." Also an act approved March 23, 1907, entitled "An act to amend section sixteen (16) of an act entitled 'An act creating a bureau of building and loan supervision; providing for the appointment of administration officials therefor to be known as the building and loan commissioners; prescribing their duties, powers and compensation; providing for a secretary, his powers and compensation; providing for the rental of offices for the use of the bureau and for traveling and office expenses; providing a system for licensing building and loan and other associations, and for assessing and collecting license fees necessary to meet the salaries and other expenses; providing a course of procedure where violations of law, or unsafe practices are found to exist, or are reported by the commissioners to the attorney general; providing for involuntary liquidation by trustees, and proceedings in connection therewith; pro-

viding for exemption of property of associations in liquidation from attachments, executions, and liens pending liquidation; providing for and requiring associations to procure licenses, pay assessments levied for pro rata of salaries and expenses, and to make and file reports; providing penalties for violations of law and orders of the commissioners; providing for succession in office, and repealing all acts and parts of acts in conflict herewith," approved March 21, 1905, relating to and providing for reports to building and loan commissioners and the publication thereof. Also an act approved March 20, 1909, entitled "An act creating a bureau of building and loan supervision; providing for the appointment of administration officials therefor to be known as the building and loan commissioners; prescribing their duties, powers and compensation; providing for a secretary, his powers and compensation; providing for the rental of offices for the use of the bureau and for traveling and office expenses; providing a system for licensing building and loan and other associations, and for assessing and collecting license fees necessary to meet the salaries and other expenses; providing a course of procedure where violations of law, or unsafe practices are found to exist or are reported by the commissioners to the attorney general; providing for involuntary liquidation by trustees, and proceedings in connection therewith; providing for exemption of property of associations in liquidation from attachments, executions and liens pending liquidation; providing for and requiring associations to procure licenses, pay assessments levied for pro rata of salaries and expenses, and to make and file reports; providing penalties for violations of law and orders of the commissioners; providing for succession in office, and repealing all acts and parts of acts in conflict herewith," approved March 21, 1905, relating to the powers and duties and salaries of the state building and loan commissioners, and all acts or parts of acts inconsistent with the provisions of this act are hereby repealed.

Transfer of powers from board of commissioners to commissioner.

SEC. 19. The building and loan commissioner provided for by this act shall be the successor in interest of, and shall succeed to all the rights, powers and privileges possessed by, the building and loan commissioners under and by virtue of that certain act entitled "An act approved March 21, 1905, as amended March 23, 1907, and as amended March 20, 1909, entitled 'An act creating a bureau of building and loan supervision; providing for the appointment of administration officials therefor to be known as the building and loan commissioners; prescribing their duties, powers and compensation; providing for a secretary, his powers and compensation; providing for the rental of offices for the use of the bureau and for traveling and office expenses; providing a system for licensing building and loan and other associations, and for assessing and collecting the license fees necessary to meet the salaries and other expenses; providing a course of procedure where violations of law or unsafe practices are found to exist, or are reported by the commissioners to the attorney general; providing for involuntary liquidation by trustees, and proceedings in connection therewith; providing for exemption of property of associations in liquidation from attachments, executions and liens, pending liquidation; providing for and requiring associations to procure licenses, pay assessments levied for pro rata of salaries and expenses and to make and file reports; providing penalties for violations of law and orders of the commission-

ers; providing for succession in office and repealing all acts and parts of acts in conflict herewith'"; and any and all actions or proceedings taken or commenced by the said building and loan commissioners, under the act aforesaid, shall continue in full force and effect and the said actions and proceedings shall not abate and the said building and loan commissioner provided for by this act shall be substituted for and continue in the place and stead of the said building and loan commissioners under the act aforesaid, and likewise all books, documents, records and property of every kind and description obtained or possessed by the building and loan commissioners or their secretary or clerks, examiners or employees under the provisions of the said act of March 21, 1905, shall immediately be turned over and delivered to the said building and loan commissioner herein provided for.

Title of act.

SEC. 20. This act shall be known as the building and loan commission act.

When in effect.

SEC. 21. This act shall take effect immediately.

PENAL CODE, SECTION 564.

Every director, officer, or agent of any corporation or joint stock association, who knowingly concurs in making, publishing, or posting either generally or privately to the stockholders or other persons, any written report, exhibit, or statement of its affairs or pecuniary condition, or book or notice containing any material statement which is false, or any untrue or wilfully or fraudulently exaggerated report, prospectus, account, statement of operations, values, business, profits, expenditures, or prospects, or any other paper or document intended to produce or give, or having a tendency to produce or give, the shares of stock in such corporation a greater value or a less apparent or market value than they really possess, or refuses to make any book or post any notice required by law, in the manner required by law, is guilty of a felony.

INSTRUCTIONS FOR FORMING NEW ASSOCIATIONS.**Effective on and After July 1, 1926.**

First—Decide if you should organize a “Mutual” or a “Guarantee Capital” association.

Second—If it be a “Mutual” association, obtain subscriptions for not less than 3500 installment shares on which the monthly payments are to be not less than 50 cents per share, aside from the pro rata for an organization fund of not less than \$1 per share, to be paid with and in addition to the first installment.

Third—If it is to be a “Guarantee Capital” association, then, irrespective of the authorized capital, there are certain paid-in capital requirements.

To organize “Guarantee Capital” associations in the following cities, there must be a paid-in capital of \$100,000 or more:

Los Angeles,	Oakland,	San Francisco.
--------------	----------	----------------

To organize “Guarantee Capital” associations in the following cities, there must be a paid-in capital of \$75,000 or more:

Berkeley,	Long Beach,	Sacramento,	San Jose,
Fresno,	Pasadena,	San Diego,	Stockton.

To organize “Guarantee Capital” associations in the following cities, there must be a paid-in capital of \$50,000 or more:

Alameda,	Glendale,	Redlands,	Santa Cruz,
Alhambra,	Lodi,	Richmond,	Santa Monica,
Bakersfield,	Modesto,	Riverside,	Vallejo,
Burlingame,	Ontario,	San Bernardino,	Venice,
Chico,	Palo Alto,	Santa Ana,	Whittier.
Eureka,	Pomona,	Santa Barbara,	

To organize “Guarantee Capital” associations in the following cities, there must be a paid-in capital of \$25,000 or more:

Anaheim,	Hollister,	Paso Robles,	Santa Paula,
Auburn,	Huntington Beach,	Petaluma,	Santa Rosa,
Beverly Hills,	Huntington Park,	Pittsburg,	Sausalito,
Brawley,	Inglewood,	Pleasanton,	Selma,
Burbank,	Lankershim,	Porterville,	South Pasadena,
Calexico,	Livermore,	Red Bluff,	So. San Francisco,
Chino,	Madera,	Redding,	Taft,
Colton,	Martinez,	Redondo,	Tiburon,
Corona,	Marysville,	Redwood City,	Torrance,
Cucamonga,	Merced,	Rialto,	Tulare,
Culver City,	Mill Valley,	Roseville,	Turlock,
El Centro,	Monrovia,	Salinas,	Upland,
Elsinore,	Monterey,	San Fernando,	Van Nuys,
Encinitas,	Napa,	San Gabriel,	Ventura,
Escondido,	Newcastle,	San Leandro,	Visalia,
Fortuna,	Ocean Park,	San Luis Obispo,	Watsonville,
Fullerton,	Oceanside,	San Mateo,	Wilmington,
Grass Valley,	Orange,	San Pedro,	Woodland.
Hanford,	Oroville,	San Rafael,	
Hayward,	Oxnard,	Santa Clara,	
Hemet,	Pacific Grove,	Santa Maria,	

All shares of "Guarantee Capital" stock must be in denominations of \$100 and when sold to provide for the necessary initial paid-in capital, must be fully paid up.

In organizing a "Guarantee Capital" association, an organization fund of not less than \$10 per share on the shares actually subscribed must be provided.

Fourth—Select a name not now in use by any association in the state, embracing the words "Building and Loan Association," or "Building-Loan Association," and submit it to this office for approval, which, after approval, should then be submitted to the Secretary of State that he may advise if it is available for use. The words "Trust" or "Savings" must not be used as a part of the corporate name.

Fifth—Apply to this office for the loan of a "sample" form of articles of incorporation for the kind of association decided upon, which, after being prepared, but before being executed, must be submitted to this office that we may ascertain if it is in proper form, and, if found satisfactory, return for execution.

After being executed the original and a duplicate must be forwarded to this office that the certificate required by section 15c of the Building and Loan Commission Act may be attached before the original can be filed with the Secretary of State, or a certified copy with the county clerk of your county.

Sixth—Apply to this office for the loan of a "sample" form of the by-laws for the kind of association provided for in the articles of incorporation, then prepare your by-laws and submit them to this office for approval, after which they can be regularly adopted.

Seventh—As section 15c of the Building and Loan Commission Act provides that the commissioner shall examine into the general character and fitness of persons proposing to incorporate associations, it will be necessary to submit a brief history of the incorporators and directors; references should also be given to assist the commissioner in his investigation.

Eighth—After the by-laws have been adopted, forward a copy of the by-laws, a copy of the articles of incorporation, a list of the stockholders showing the number of shares of guarantee capital stock fully paid up and the total amount of money paid in, a certificate from your bank showing that there is on deposit to the credit of the association the above required \$25,000, \$50,000, \$75,000 or \$100,000 for a "Guarantee Capital" association, or not less than \$3,500 for a "Mutual" association, plus the above requirement for organization expenses of either, together with a check to the order of the "Building and Loan Commis-

sioner," for the equivalent of \$1 per month for the number of months unexpired of the calendar year, and a license will be issued to expire December 31st next.

Ninth—All moneys collected for the organization fund must be paid into the treasury to the credit of that fund to be used to defray the expenses of the association until it has been placed on a self-supporting basis. No part of the organization fund may be used to pay commission for the sale of "Guarantee Capital" shares of stock, nor for the payment of dividends upon such "Guarantee Capital" shares of stock.

Tenth—The association must be operated separately, in every respect, and have a separate room or office from a corporation holding or controlling the guarantee capital stock, or whose officers or directors hold such control in their own names.

Wherever the officers and directors of the association are the same, in whole or in part, as the officers and directors of a corporation holding or controlling the "Guarantee Capital Stock," no business of any kind may be transacted by and between the corporations, or by and between the officers, directors or employees of either, directly or indirectly.

Eleventh—No window, door or office signs of any kind, advertising the proposed association, may be displayed until the organizers have been assured by this department that a license will be granted to the association, or until such license has actually been granted.

Twelfth—Manuscripts or proofs of circulars or advertisements must be submitted to the commissioner for approval before being printed or circulated.

ARTICLES OF INCORPORATION OF A GUARANTEE CAPITAL ASSOCIATION.

KNOW ALL MEN BY THESE PRESENTS:

That we, the undersigned, citizens and residents of the State of California, have this day voluntarily associated ourselves together for the purpose of forming a corporation under the laws of the State of California.

AND WE HEREBY CERTIFY:

First—That the name of said corporation shall be _____

Second—That the purposes for which said corporation is formed are to encourage industry, frugality, home-building, and savings among its shareholders and members; the accumulation of savings; the loaning to its shareholders, members and others of the moneys or funds so accumulated, with the profits and earnings thereon, and the repayment to each of his savings and profits, whenever they have accumulated to the full par value of the shares, or at any time when he shall desire the same or when the corporation shall desire to repay the same, as it may be provided in the by-laws; and generally to do any and all other acts and things authorized by law, and more particularly by and under Title XVI, Part IV, Division I of the Civil Code of the State of California, and for all the purposes and with all the rights, powers, privileges and immunities in said title set forth.

Third—That the place where the principal business of said corporation is to be conducted is in the city of _____, in the county of _____, State of California.

Fourth—That the term for which said corporation is to exist is fifty (50) years from and after the date of its incorporation.

Fifth—That the number of directors of said corporation shall be _____, a majority of whom shall at all times each be the owner and holder of not less than _____ shares of the guarantee capital stock, and that the names and residences of the directors who are appointed for the first year and to serve until the election and qualification of their successors are as follows, to wit:

NAMES

WHOSE RESIDENCE IS

Sixth—That the amount of the capital stock of this corporation is _____ dollars, and the number of shares into which it is divided is _____ of the par value of one hundred (\$100) dollars each, all of which, when issued, shall be set apart as a fixed and permanent guarantee capital. Additional working capital may be accumulated by the issuance of membership shares, units and certificates, both installment and fully paid as provided for in section 648a of the Civil Code.

Seventh—That the amount of said capital stock which has been actually subscribed is _____ dollars and the following are the names of the persons by whom the same has been subscribed, to wit:

NAMES OF SUBSCRIBERS

NUMBER OF SHARES

AMOUNT

IN WITNESS WHEREOF, we have hereunto set our hands this _____ day of _____ A. D., 192____.

State of California, }
County of _____ } ss.

On this _____ day of _____, A. D. 192____, before me _____, a notary public in and for said county, residing therein, duly commissioned and sworn, personally appeared _____

known to me to be the persons whose names are subscribed to the foregoing instrument, and they each duly acknowledged to me that they executed the same.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed my official seal, at my office in said _____ county, the day and year in this certificate first above written.

(SEAL)

Notary Public in and for the County of

State of California.

BY-LAWS OF A GUARANTEE CAPITAL ASSOCIATION.**ARTICLE I.****NAME, LOCATION AND OBJECTS.**

Section 1. This corporation shall be known as the _____ of _____, California.

Sec. 2. The principal place of business of the corporation shall be in the city of _____, County of _____, State of California.

Sec. 3. The object and purpose of this corporation shall be to encourage industry, frugality and the accumulation of savings among its shareholders, members and others, and to make loans to its shareholders, members and others for the purpose of aiding them in acquiring and improving real estate.

ARTICLE II.**GUARANTEE CAPITAL STOCK.**

Section 1. The capital stock of this corporation shall be _____ divided into _____ shares of a par value of one hundred dollars each, all of which shall be a guarantee capital, and shall be issued at such times and in such amount as the board of directors may determine. It shall be sold upon subscriptions, at not less than par, payable not less than _____ per cent at the time of subscription, and the balance as may be ordered by the board of directors. This stock is not withdrawable until final liquidation, and no loans shall ever be made upon the pledge of any of its shares, as security, to the corporation.

Sec. 2. A majority of the board of directors shall always be selected from the holders of shares of the guarantee capital holding in their names ten shares or more of guarantee stock, and the minority may be selected from the holders of membership shares.

Sec. 3. The guarantee capital stock shall participate in the net earnings of the association to the full extent permitted under the provisions of section 641 of the Civil Code. As provided in said section, an amount not exceeding one per cent per annum on the average loans in force, may be set aside from and out of the net profits, at each annual distribution thereof, or a proportionate amount at each semiannual distribution, from which to declare dividends on and provide a reserve fund that shall be specially applicable thereto. The reserve fund shall be created and maintained in amount as provided in said section.

ARTICLE III.**OFFICERS.**

Section 1. The affairs of the corporation shall be managed by a board of _____ directors, who shall be elected annually from the shareholders and members, in the manner provided by law, to hold office for one year, and until their successors are duly elected and qualify.

Sec. 2. Immediately following the annual meeting of the shareholders and members, the directors shall organize by the election of a president, and one or more vice presidents from among their own members, a secretary and one or more assistant secretaries, who may or may not be directors but must be shareholders or members. They shall also select an attorney and a treasurer; provided that a banker or banking corporation may be selected as a treasurer or depository. They shall also select from their own number a security committee to consist of three members, and a finance committee to consist of two members.

ARTICLE IV.**POWERS AND DUTIES OF DIRECTORS.**

Section 1. The board of directors shall have power:

First—To suspend or remove, for cause, any elected or appointed officer of the corporation.

Second—To require any officer to produce for inspection at any time, any or all books, papers or documents in his possession relating to the business of the corporation.

Third—To fill all vacancies that may occur in the board of directors or elected or appointed officers.

Fourth—To loan the funds of the corporation, or such portion thereof as may be advisable, upon such securities as are provided by law, and to prescribe the terms and conditions upon which loans may be made; provided, that whenever loans are made upon the definite contract plan the body of the note or obligation shall set forth the number of installments, and the amount of each installment required to repay the principal of the loan, together with the interest on the periodical unpaid balances, within the time agreed upon, the exact rate of interest to be specified in each note or obligation.

Fifth—To borrow money for the purpose of making loans or with which to pay withdrawals or maturities.

Sec. 2. A majority of the board shall constitute a quorum for the transaction of business; provided that no action relating to the final disposition of funds or other financial matters under consideration shall become effective except by an affirmative vote of a majority of the whole board.

ARTICLE V.

DUTIES OF OFFICERS.

PRESIDENT AND VICE PRESIDENT.

Section 1. It shall be the duty of the president, or in his absence, of one of the vice presidents:

First—To preside at all meetings of the shareholders and members of the board of directors; to sign all certificates of stock or membership, contracts, deeds, leases, releases, and orders on the treasurer for the payment of money, and to perform such other duties as may be ordered by the board of directors.

Second—To have the custody of all bonds executed by the officers to secure the faithful performance of their duties, except, that the bond of the president, if any, shall be deposited with the treasurer.

SECRETARY.

Section 1. It shall be the duty of the secretary, or in his absence, of the assistant secretary:

First—To attend all meetings of the corporation, and of the board of directors and to keep correct minutes thereof; to receive and receipt for all moneys paid to the corporation, to endorse all checks or drafts made payable to its order, and to deposit with the treasurer or depository all funds coming into his or her possession and take a proper receipt therefor.

Second—To keep proper and accurate accounts with the shareholders, members and investors; to draw and sign all orders on the treasury or depository; to countersign all documents requiring the signature of the president or vice president, and to affix the seal of the corporation whenever such is required to authenticate the acts of the corporation.

Third—To furnish the board of directors at each monthly meeting with a statement of financial and other transactions since the prior report and semiannually, immediately after the first day of ----- and -----, of each year, a statement of the condition of the corporation and of the business of the past semi-annual term, and, after approval by the board, to cause the same to be printed for the information of the shareholders and members.

Fourth—To have the custody of, and properly care for, all notes, mortgages, deeds of trust, deeds, leases, insurance policies and other documents pertaining to the business of the association, subject only to the orders of the board of directors.

Fifth—To require that the interest of the corporation in any property or building it may own or on which it may have a loan is properly insured, in an acceptable insurance company, against loss or damage by fire.

Sixth—To protect the interest of the corporation in all tax sales or forfeitures, and for this purpose to draw on the treasurer for the proper funds, without further notice or orders of the board; provided, however, he or she shall report the facts at the first stated meeting of the board thereafter.

Seventh—To deliver to his or her successor all books, vouchers, securities, documents and property of every kind, of which he or she is the custodian for the corporation, whenever he or she may retire from office, or within three days thereafter.

Eighth—To do and perform such further acts as may be required by the board of directors.

TREASURER OR DEPOSITORY.

Section 1. It shall be the duty of the treasurer or depository to receive all moneys deposited by the secretary for account of the corporation, and to disburse

same only on orders signed by the secretary and countersigned by the president or a vice president, and to render a proper account thereof at the close of each month.

ATTORNEY.

Section 1. It shall be the duty of the attorney to attend the meetings of the board of directors whenever requested to do so; to examine into the sufficiency of title of any property offered as security for loans that may be referred to him, and to perform such other duties and render such other services as may be required by the board of directors.

COMMITTEES.

SECURITY COMMITTEE.

Section 1. It shall be the duty of the security committee to ascertain the market value of each and every piece of property offered as security for any proposed loan and to report thereon, in writing, at the next meeting of the board of directors.

Sec. 2. Every application for a loan shall be approved in writing by at least two members of said committee before the loan shall be made.

FINANCE COMMITTEE.

Section 1. It shall be the duty of the finance committee:

First—To examine and report upon all bills or claims against the corporation, prior to the same being ordered paid.

Second—To examine and report upon the books and accounts of the secretary and treasurer, at least semiannually, and for that purpose, they may employ an expert of accounts to assist them, at a compensation to be fixed by the board of directors.

ARTICLE VI.

BONDS AND SALARIES.

Section 1. The secretary and treasurer (except where the treasurer shall be a bank or bankers), and such other employees as the board of directors shall determine, shall give bond, as security for the faithful performance of their duties, in such amount as the board of directors shall from time to time require, with corporate surety, the expense to be borne by the association.

Sec. 2. The president, vice presidents, secretary, treasurer, assistant secretary, assistant treasurer, attorney, and the members of the security and finance committees shall receive such compensation for their services as the board of directors shall determine.

Sec. 3. The compensation of the directors, as such directors, in excess of five dollars each, for each meeting attended, shall be fixed by the stockholders at the annual meeting.

ARTICLE VII.

MEETINGS.

Section 1. The annual fiscal term shall end----- and the annual meeting of the stockholders and members shall be held at the office of the corporation, at -----, California, on the -----, in each year, notice of which must be given in the manner prescribed in section 301 of the Civil Code. Special meetings may be called by the board of directors, on their own initiative, and shall be called upon the written request of ten or more shareholders and members. Notice of special meetings shall be mailed to each shareholder and member, at his last known address, at least two weeks prior to the date of holding such meeting.

Sec. 2. The board of directors shall convene for the transaction of business on ----- in each month, and as much oftener as the necessities of business may demand. Notice of all meetings of the board of directors shall be given to each director in writing, by the secretary, at least twenty-four hours prior to the time of the holding of the meeting.

Sec. 3. All meetings of the board of directors shall be open to all shareholders and members.

ARTICLE VIII.

MEMBERSHIP SHARES.

Section 1. Membership shares having an ultimate matured or par value of ----- dollars each may be issued in either of the following forms, viz: "Installment" or "Full paid."

Sec. 2. Installment membership shares, Class "A," may be subscribed for and issued at any time. Each subscriber to those shares shall on or before -----, pay dues in an amount not less than ----- upon each share held by him, until such payments, together with the profits apportioned thereto, shall amount to the

sum of one hundred dollars for each of such shares, at which time the shares shall mature and payments thereon shall cease.

Sec. 3. Installment membership shares, Class "D.C.," whenever authorized by the board of directors, will be issued only to borrowers on mortgage or deed of trust security, and then only to those who borrow on the "Definite Contract" plan. The monthly payment of dues on this class will be five cents per share of one hundred dollars matured or par value, and must be paid with, and in addition to, the monthly payments required to be paid upon the loan. Such shares shall participate pro rata with other classes of installment shares in the net profits subject to distribution, and, upon the repayment of the loan with which they are pledged, the then book value will be paid to the borrower, or credited as part payment on the loan, and the shares surrendered and canceled.

Sec. 4. Full paid membership shares may be issued at such times as the board of directors may determine to any subscriber paying in the full face value of one hundred dollars (\$100) each. Dividends at such rate per annum as may be fixed by the board of directors, not in excess of six per cent (6%) per annum, shall be paid on these shares, semiannually in ----- and -----, and in consideration of such payments the holders shall waive all right to further participation in profits of the corporation. These shares are withdrawable, with accrued interest to the date of the notice, at any time after thirty (30) days written notice of the intention to withdraw, but subject in other respects to the restrictions set forth in section 642 of the Civil Code. The corporation reserves the right to retire any or all these shares, in the order of issuance, at any time after two years from issue, upon sixty (60) days written notice to the holders by paying the face value plus accrued interest to date of expiration of notice.

Sec. 5. Full paid membership shares may also be issued at such times as the board of directors may determine to subscribers paying in the full face value of one hundred dollars (\$100) per share. Dividends at such rate per annum as may be fixed by the board of directors, not exceeding a full participation in the net profits, shall be paid on these shares, semiannually in ----- and -----.

Sec. 6. Holders of either form of membership shares are members of the corporation, with all the rights, powers and privileges incident thereto, including the right to vote at all meetings of the shareholders and members—one vote for each share—and are subject to the same restrictions and liabilities.

Sec. 7. An entrance fee of not exceeding one dollar (\$1) per share may be charged and collected upon all installment membership shares.

ARTICLE IX.

INVESTMENT CERTIFICATES.

Section 1. Investment certificates having an ultimate matured or par value of one hundred dollars (\$100) each, may be issued in either of the following forms: "Installment investment certificates" and "Full paid investment certificates."

Sec. 2. Installment investment certificates may be subscribed for and issued at any time. Each subscriber to these certificates shall, on or before the ----- day of each month, pay dues in an amount of not less than ----- upon each certificate held by him, until such payments, together with the profits apportioned thereto, shall amount to the sum of one hundred dollars (\$100) for each of such certificates, at which time the certificates will mature and payments may cease. An entrance fee of one dollar (\$1) per certificate may be charged and collected upon this class of installment investment certificates.

Sec. 3. Installment investment certificates may also be issued, upon which payments may be made at such times and in such amounts as the holder thereof may elect until said certificates reach their matured value or are withdrawn. No membership fee, fine or forfeiture shall be chargeable against the holder of these certificates.

Sec. 4. Full paid certificates may be issued at such times as the board of directors may determine, to any subscriber paying in the full face value of one hundred dollars (\$100) each. Dividends at such rate per annum as may be fixed by the board of directors will be paid semiannually on these certificates, in ----- and -----, and in consideration of such payments the holders shall waive all right to participation, in excess thereof, in the profits of the corporation. These investment certificates are withdrawable, with accrued unpaid interest, to date of notice, at any time after one year from date of issue, upon thirty (30) days written notice of intention to withdraw, but otherwise subject to the restrictions set forth in section 642 of the Civil Code. The corporation

reserves the right to retire any or all of these certificates, in the order of issuance, at any time after two years from date of issue, upon sixty (60) days written notice to the holder, upon the payment of the face value plus accrued and unpaid interest to date of expiration of notice.

Sec. 5. Holders of either form of these investment certificates are *not* members of the corporation and have none of the rights, power and liabilities incident thereto.

ARTICLE X.

WITHDRAWALS AND MATURITIES.

Section 1. Holders of installment membership shares, and of installment investment certificates, desiring to withdraw a part or all of the amount to the credit of their shares or certificates, may do so by giving thirty (30) days written notice of their intention or desire so to do. On the expiration of such notice, they are entitled to receive the full amount paid in upon their membership shares or investment certificates, exclusive of any entrance fee charged and collected, together with such proportion of the earnings thereon as may have been fixed by the board of directors: provided that not more than one-half of the monthly receipts of any one month shall, without the consent of the board of directors, be applicable to withdrawals for that month. All withdrawals will be paid in succession and in the order in which the notices of intention were filed. Shares or certificates pledged as security for or with a loan can not be withdrawn in money until the loan is fully paid.

ARTICLE XI.

LOANS.

Section 1. Loans may be made on such terms and at such rate of interest as the board of directors may determine: provided that whenever loans are made for a definite period on the installment plan, the number of installments, and the amount of each installment required to pay the principal of the loan together with interest at the agreed rate on the periodical balances, within the time specified, must be expressed in the face of the note or obligation taken.

Sec. 2. Loans will only be made upon the security of a first mortgage or deed of trust of real estate, the several classes of bonds named in section 647 of the Civil Code, and upon the security or pledge of free "Membership shares," or "Investment certificates" of this association.

Sec. 3. Loans upon the security of membership shares or investment certificates shall not be made in excess of ninety per cent of the withdrawal value of such shares or certificates.

Sec. 4. Loans made for a definite period on the installment plan may be repaid at any time by paying the balance then unpaid on the principal and all arrears of interest, if any. The corporation reserves the right to charge a penalty of two months' interest on the unpaid balance if repaid within one year from date of note, or a penalty of one month's interest on the unpaid balance if repaid after one year from date of the note but in advance of the time set forth in the contract.

Sec. 5. Whenever a borrower shall be three months in arrears in the payment of his interest or loan installments, unless otherwise provided in the note, the whole loan shall become due, at the option of the board of directors, and they may proceed to enforce collection upon the securities held by the corporation. The withdrawal value of all shares or certificates pledged as collateral security shall be applied in part payment of the loan and said shares or certificates shall be deemed canceled and surrendered to the corporation.

Sec. 6. All expenses incident to abstracts, examinations of title, execution of papers, attorney's fees, or sale of securities pledged as security for loans or advances, shall be paid by the party offering the security or securing the loan.

Sec. 7. Borrowers must furnish, at their own expense, acceptable policies of fire insurance on all improved realty pledged as security for loans granted, with the usual mortgage clause making loss, if any, payable to the corporation, as its interest may appear.

ARTICLE XII.

FINES AND PENALTIES.

Section 1. Borrowers who neglect or fail to pay their interest or loan installments in accordance with the terms of the note or obligation shall pay interest at not exceeding one per cent per month on the amount of such delinquent indebtedness.

Sec. 2. The same rate of interest shall apply to all advances made by the association for insurance premium, street or sewer assessments, balances due for unpaid taxes on property pledged as security for loans, or other like advances.

ARTICLE XIII.

MISCELLANEOUS.

Section 1. Each member or investor shall be entitled to a certificate of "membership shares" or "investment certificates" showing the number of such shares or certificates held, and their par, or ultimate value, and each member or investor holding installment membership shares or installment investment certificates shall also be furnished with a pass book, in which to record the periodical payments made by him, and in which the terms and conditions attaching thereto shall be fully set forth. These certificates may be transferred by assignment, in person or by an attorney, but no such assignment shall be valid, except between the parties thereto until duly entered upon the books of the corporation. A transfer fee of ten cents for each share or certificate transferred will be charged by the corporation.

Sec. 2. In the event of loss of any certificates of stock, membership shares or investment certificates, the recorded owner shall be entitled to a duplicate upon making an affidavit setting forth the facts of the loss and the filing of an acceptable bond, with two or more sureties, in an amount equal to the book value of the certificate lost.

Sec. 3. The board of directors may provide that partial withdrawals, made "mid-term," shall not participate in the earnings on the amount withdrawn, that shall have accumulated since the last apportionment of profits.

Sec. 4. The seal of the corporation shall be circular in form, bearing the name of the corporation and the date when incorporated.

Sec. 5. As to all features not specifically covered by these by-laws, the provisions of sections 633 to 648a, inclusive, of the Civil Code shall govern the transaction of business by this corporation.

ARTICLE XIV.

Section 1. These by-laws may be amended at any annual or special meeting of the shareholders and members; provided the proposed amendments shall first be submitted, in writing, to the board of directors and approved by them, and then adopted by an affirmative vote of two-thirds of all such shares of stock and membership, issued and in force. The signature of the holders of two-thirds of all such shares shall be effective to adopt such amendments, without the holding of a meeting.

CONSENT TO AND ADOPTION OF BY-LAWS.

We, the undersigned, subscribers to the number of shares of the _____ Building and Loan Association, of _____, set opposite our respective names, in all amounting to more than two-thirds of all subscribed shares, hereby give our written assent and consent to the adoption of the foregoing code of by-laws for the government of said corporation, and we hereby adopt the same.

NAMES.

SHARES.

CERTIFICATE OF ADOPTION OF BY-LAWS.

We, the undersigned, directors of the _____ Building and Loan Association, and the secretary thereof, hereby certify that the foregoing code of by-laws was adopted by the signatures of the subscribers to more than two-thirds of all the subscribed shares of said corporation on the _____ day of _____, 192__.

Directors.

Attest: _____

Secretary.

NOTE.—There being so much similarity in the articles of incorporation and by-laws of the two types of associations, it was deemed advisable, from the standpoint of space saving, to include only the articles and by-laws of one type of association in this report. The articles and by-laws of the other type of associations will be gladly furnished on application to the commissioner.

INSTRUCTIONS TO ASSOCIATIONS AND AGENTS.

Pursuant to the provisions of sections 9 and 15 of the Building and Loan Commission Act, the following rules are promulgated for the government of agents and solicitors licensed by the Commissioner.

The license permits the holder to solicit subscriptions for shares of stock, shares of membership, and certificates of investment, and also for securing loans from the association for which the license has been issued.

The license limits the operations of the holder to the territory specified in the body thereof.

Upon securing subscriptions for shares or certificates a solicitor may collect and receipt for the entrance fee and not more than one periodical installment; and upon securing loans he may collect from the borrower the fee allowed by the state usury law, but no more.

No "branch office," as such, will be permitted to be maintained by any association, or its agents or solicitors.

Wherever an association or its agent or solicitor maintains an office, either at his own expense or at the expense of the association he represents, in the home cities of local associations, no sign on the building or on the windows or doors may exceed in size or display, similar signs of any local association, and in every case the words "Agency of" must appear immediately *above*, and the name of the home city immediately *below* the name of the association, in letters at least one-half the size of those used in the name of the association.

In no case may an agency, agent or solicitor, advertise in the newspapers, or by circulars or cards, window display, electric sign or letter heads, that the association he represents pays, or will pay, a higher rate of interest or dividend to investors, or to loan money to borrowers at a lower rate of interest, than the rates of either offered or advertised by local associations.

No rebating of fees will be permitted, and no promises of loans, or of procuring and paying withdrawals may be made as an inducement in the securing of subscriptions.

All designs for agency or agents' office signs, window display, electric light display, and proofs for circulars or advertisements, must be submitted to the commissioner for approval before being erected, installed, printed or circulated.

Misrepresentation of law or facts in the soliciting for subscriptions, or for loans, or the violation of the rules and regulations governing the issuance of agents' licenses, will constitute justifiable cause for the revocation of a license, in which event no future license will be issued to the offender.

In every case where a license is required, by any law, for the conduct of a business or calling, the conduct of such business or calling without a license constitutes a misdemeanor under section 405 of the Penal Code of California.

AGENTS' LICENSES.

All agents, whether resident, local or traveling, who are employed by associations to solicit loans and sell shares of stock, membership

shares and certificates are required to secure a license from the Building and Loan Commissioner.

No agent, under a license issued by this commission, as provided by section 15*a* of the Building and Loan Commission Act, will be authorized to solicit for loans and for sale of shares of stock, shares of membership and certificates of investment of building and loan associations in the home office city or town of an association the name of which is so like or similar to the name of the association represented by said agent, that it is likely to mislead the public.

If it appears to the commissioner that a community has a sufficient number of home associations and outside associations represented, no further license will be issued to an agent to represent an outside association in such a community.

The following regulations are printed on licenses of agents:

"Licensed agents or solicitors, leaving the employ of the association named herein, must surrender this license to the association, that it may be cancelled on its records, following which, it must be forwarded to the commissioner for cancellation on his records.

"Agents or solicitors dismissed for CAUSE by this Department, the Corporation Department, or the Insurance Department, will not again be licensed without the written consent of the association or corporation from whose employ they were dismissed."

AGENTS' BONDS.

Every agent or solicitor, employed by building and loan associations to solicit loans, and for the sale of shares of stock, shares of membership, certificates or other securities or forms of investments, must give bond in an amount of not less than \$1,000 to protect the association against any act of fraud, dishonesty, larceny, embezzlement, forgery, misappropriation, wrongful abstraction or wilful misapplication, committed while in the employ of such association. Such bond must accompany the application for an agent's license and will be kept on file by the commissioner.

An agent's license will be sent direct to the association applying for it. Whenever an association makes application for cancellation of a license, the bond connected with such license will be returned to the association.

LOCATION OF MORTGAGED PROPERTIES.

In the annual report to the commissioner, an association must hereafter give the name of the city and county, or county, where properties, on which it holds a mortgage or deed of trust, is located. Give this information following the names of the owners of the properties involved. (It will not be necessary to give this information concerning properties located in the home city of the association.)

"BRANCHES" AND "AGENCIES."

Under no condition will this department permit an association to establish a branch association in California.

An association that may desire hereafter to establish an agency office must first apply to the Building and Loan Commissioner for per-

mission to establish such an office; the commissioner will use the same discretion as to issuing a permit for the establishment of an agency office, as is provided by the new law, effective July 24, 1925, vesting him with the authority to permit or refuse to permit the incorporation of a new association.

An association maintaining agency offices must forward to the commissioner the following information, at the close of its fiscal year:

- (1) Location of agency offices;
- (2) Names of agents in charge;
- (3) Expenses of each agency and how such expenses are met;
- (4) Financial statement of each agency, showing expenses and receipts for the last fiscal year.

ADVISORY BOARDS.

There is no authority under the by-laws of an association, or under the general laws governing the building and loan associations, permitting the organizing of so-called advisory boards. Such boards may tend to surround an agency with an importance bordering on a branch or an independent office, and instances have been brought to the attention of the commissioner where investors had thought such advisory boards to be boards of directors. It is the order of the Building and Loan Commissioner that all associations having advisory boards as a part of their organization, at once take steps to disband such advisory boards.

RULINGS BY ATTORNEY GENERAL

SIMILARITY OF NAMES.

State of California,
Office of the Attorney General.

San Francisco, December 1, 1925.

Mr. A. E. Faleh,
Building and Loan Commissioner,
San Francisco, California.

Dear Sir: I have before me your communication of July 16, 1925, enclosing a letter addressed to me but sent to you by H. Stanley Benedict, secretary of the California Building-Loan Association of Los Angeles. You state that the letter is self-explanatory and you ask that I render you my opinion in the matter therein stated.

It appears from Mr. Benedict's letter that on May 24, 1923, a certificate of incorporation was issued by the Secretary of State to the California Building-Loan Association, which thereafter proceeded to organize and engage in business; that in November, 1923, the Secretary of State issued a certificate of incorporation to the California Building and Loan Association of Long Beach, which last named association has since been conducting business under that name; that upon learning of the existence of this new corporation, the first corporation protested to the Secretary of State, who admitted his error in having allowed the use of a name so similar to the one already in use, but stated that there was nothing he could do and advised the California Building-Loan Association to enjoin the Long Beach company against using such similar name. If the name be so similar as to deceive, the suggestion and advice of the Secretary of State should be followed.

Upon these facts you present the following questions to this office: First, whether an injunction would lie to prevent the use by the corporation secondly formed of the name adopted by it, and, secondly, whether the Building and Loan Commissioner has power to cite the second association into court for the purpose of settling this difficulty or whether there is any other way by which the desired result may be accomplished.

Every corporation must have a name and articles of incorporation must be prepared setting forth such name; but it is provided by section 296 of the Civil Code that the Secretary of State shall not file the original articles of incorporation or issue any certified copy thereof, or issue any certificate of incorporation to any corporation whose articles set forth a name so closely resembling the name of another corporation heretofore organized in this state, or of any foreign corporation qualified to do business in this state, as will tend to deceive.

From this it would appear that our statute contemplates that there should not be at the same time two corporations in this state having names so similar to each other as will tend to deceive the public or those having business with such corporations. It is apparent, therefore, that we might expect to find some authority in law for the prevention of such condition, or the correction thereof, if it exists.

When the California Building-Loan Association of Los Angeles received its certificate of incorporation under that name, it obtained thereby the right to protection in the use of that name. It also thereby obtained the right to prevent any other corporation from using that name or any other name so similar thereto as to result in injury to it in the conduct of its business. In the case of *Dodge Stationery Co. vs. Dodge*, 145 Cal. 380, it was held that if the name adopted for a corporation was so similar to the name of a prior corporation as "to create confusion and to enable the latter corporation to obtain, by reason of the similarity of names, the business of the prior one," injunction will lie to restrain the latter so far as necessary to protect the rights of the prior corporation even to the extent of prohibiting the use of the name at all, the courts interfering in such cases solely for the purpose of preventing fraud, actual or constructive. It was held in that case that it is immaterial whether the name adopted by the latter corporation was so adopted with actual fraudulent intent; that if the natural and necessary consequences of adopting such similar name was such as to cause deception, then the corporation later adopting such name must be held to the same responsibility even if it acted under the honest impression that no right of the earlier corporation was invaded.

Considering in the present instance the similarity of business in which both corporations are engaged, the proximity of their respective places of business, it might be that a court would hold the similarity of names sufficient to grant an injunction. However, this is a debatable question and one which this office is not called upon to decide.

In answer to your second inquiry, and in view of the fact that the Secretary of State has issued his certificate of incorporation to the second corporation above mentioned, and in view of the fact that you yourself have licensed said corporation, we are inclined to hold that the use of the name by the second corporation, pursuant to the aforesaid permits, is not a violation of the laws of this state provided for its government or the conducting of its business in an unsafe or unauthorized manner, or a violation of the provisions of its charter, within the purview of section 9 of the Building and Loan Commission Act (Stats. 1911, p. 607, and amendments thereto), and in view of the fact that if the names be so similar as to deceive the corporation complaining has a plain, adequate and speedy remedy.

Very truly yours,

U. S. WEBB, Attorney General.
By (signed) E. B. Power, Assistant.

INTEREST AND FINES.

State of California,
Office of the Attorney General.

February 4, 1926.

Mr. A. E. Faleh,
Building and Loan Commissioner,
San Francisco, California.

Dear Sir: I have before me your communication of December 1, 1925. You enclose a form of promissory note and ask my opinion as to whether

a fine, imposed under the terms thereof by a holder upon the maker on the latter's default in the payment of interest when due, should be treated as a portion of the interest or cost paid by the maker for the use of the money, and in that event make the holder guilty of violating the usury law in case the interest plus the fine exceeded in amount the sum of \$12 on \$100 for any given year.

The form of note enclosed is one for \$2,500, payable in 111 monthly installments of \$32.50 each, after date, with interest from said date on the unpaid balance, at the rate of 8.40 per cent per annum. It contains the provision that each installment shall be applied to interest then due, and the remainder on unpaid principal, and to be paid on the first day of each month thereafter, in advance, and in default of such payment on or before the tenth day of the month in which the same becomes due, the maker agrees to pay the sum of \$2.50 for each month of such delinquency as a fine, and should such installments not be paid monthly, then the whole sum of principal, interest and such fines shall become immediately due and payable at the option of the holder of said note. The note contains a further provision to the effect that the holder agrees to accept more than the amount of the above named installments, in any month, and to accept payment in full at the end of any month after one year from date thereof, but if paid in full before one year from date, then the maker agrees to pay a bonus of $1\frac{1}{2}$ per cent of the face of the note.

In your communication you have set forth a table of figures based upon such note from which it appears that in the payment of interest and fines pursuant to the terms of the note, the amount paid by the borrower will not exceed 12 per cent until the loan has been paid down to \$1,100, but that from that time on the amount paid would exceed such rate.

Section 1 of the usury law of this state (initiative act adopted November 5, 1918. Statutes 1919, page lxxxiii) prescribes the maximum rate of interest for the payment of which it is competent for parties to contract in writing, such rate "not exceeding twelve dollars on the one hundred dollars for one year and not exceeding that rate for a greater or less sum or for a longer or shorter time."

Section 2 of that act contains the further expressed provision that "No person, company, association or corporation shall directly or indirectly take or receive in money, goods or things in action, or in any other manner whatsoever, any greater sum or any greater value for the loan or forbearance of money, goods or things in action than at the rate of twelve dollars upon one hundred dollars for one year; * * *. Any agreement or contract of any nature in conflict with the provisions of this section shall be null and void as to any agreement or stipulation therein contained to pay interest and no action at law to recover interest in any sum shall be maintained and the debt can not be declared due until the full period of time it was contracted for has expired."

Section 3 of the act contains similar provisions and also provides further penalties for transactions in violation of the provisions of the act.

It has been said that one test for determining whether a particular transaction was usurious is to ascertain whether the borrower could discharge the debt at maturity by paying a sum within the legal rate,

and that if he could do so the transaction was not rendered usurious by the presence of an agreement to pay an additional sum as a penalty in the event of default at maturity. It has even been said where the borrower agreed to pay interest at the rate of 10 per cent per annum until the principal was paid, but, at the rate of 7 per cent if paid when due, that the additional 3 per cent was to be treated as a penalty and void, leaving the rate for all time at 7 per cent (the legal rate) and therefore the transaction was not usurious. On the other hand, it has been said that in the absence of statutory inhibition an agreement to pay a certain rate of interest to maturity and a further rate of interest thereafter is an agreement to pay interest at all times. These statements, however, were made by courts with respect to particular statutes or in the absence thereof.

The question before us is to be determined solely by our statute. In my opinion both the terms and the intent of our law is that any transaction is in violation thereof under the terms of which, whether directly or indirectly, or under any guise whatever, an amount is to be paid for the loan or forbearance of money which will exceed a greater rate on the principal than twelve dollars upon one hundred dollars for one year, and the same rate for a greater or less sum or for a longer or shorter time.

To say that one could under our law contract for interest at a rate of 12 per cent if paid at maturity, and 20 per cent if not so paid, and that such additional rate is merely a penalty and not an amount exacted for the loan or forbearance of money, would do violence to the terms and intent of our statute. Nor does it alter the matter that the parties designate such additional amount a "penalty" or a "fine." The law was intended to prevent persons from taking advantage of those whose necessities might induce them to enter into such improvident agreements, and to save such needy persons from their own acts. If such agreements can stand in the face of our law, then it would be possible for designing persons to exact one day notes from those whose necessities obscured their vision as to anything but the immediate possession of money, or whose necessities prevent them from insisting upon the protection which it was the design of the statute to give, and thus by the addition of fines or penalties place the borrower in a position from which he can be relieved only by bankruptcy or insolvency proceedings. I do not believe such transactions to be beyond the ban of the statute, nor do I believe courts would hold them legal. It is my view that the statute is not to be thus emasculated.

I am therefore of the opinion that the transaction presented by you is in violation of our usury law.

Very truly yours,

U. S. WEBB, Attorney General.

By (signed) Robert W. Harrison, Chief Deputy.

NAME OF LOCATION WITH REFERENCE TO CORPORATE NAME.

State of California,
Office of the Attorney General.

San Francisco, April 15, 1926.

Mr. A. E. Falch,
Building and Loan Commissioner,
San Francisco, California.

Dear Sir: A communication has been received from you in which you call attention to section 15c of the Building and Loan Commission Act as amended in 1925 (see Statutes 1925, p. 253), which reads as follows:

Before the articles of incorporation of any building and loan association, hereafter desiring to incorporate, under the laws of this state, shall be filed in the office of the secretary of state of the State of California, there must be attached thereto, the certificate of approval of the building and loan commissioner. Such proposed articles shall be submitted to the commissioner, and upon receipt of same, he shall immediately examine into all the facts connected with the formation of such intended corporation, *including its location*, and proposed incorporators. If it appears to him that such corporation, if formed, will be entitled to commence the business for which it is organized, and authorized under the law to conduct, the commissioner shall execute his certificate of approval; *provided, however*, that the commissioner may refuse to execute such certificate, if, upon his examination and investigation, he has reason to believe that the proposed corporation is to be formed for any business, other than legitimate building and loan business; or that the persons proposing to incorporate such corporation, lack the character and general fitness to engage in such business, or that the name of the proposed corporation is likely to mislead the public, as to its character or purpose, or that the name proposed for such corporation is the same as one already adopted or appropriated by any existing building and loan association in this state, *or so similar thereto, as to be likely to mislead the public*.

You then state that

Prior to the passage of section 15c, the United States Holding Corporation filed articles of incorporation for the organization of ten or more building and loan associations, each association to be called the United States Building-Loan Association; the only distinction between the names is that the names of the cities in which they are to have their home office will be added as a part of their corporate names. For instance, United States Building-Loan Association of Fresno; United States Building-Loan Association of Marysville; United States Building-Loan Association of San Francisco. The Secretary of State has approved the articles of incorporation of these associations, also the names of the associations concerned.

You ask whether or not under the provision of said section 15c, and the facts set forth by you, the Building and Loan Commissioner may legally issue licenses to this group of associations. The location of the place of business of each of these subsidiary corporations being made a part of the corporate name, it may be conceded that the names are not the same, but are they so similar as to be likely to mislead the public? At the outset we call your attention to the fact that one of the things you are to consider and examine into is the location of the proposed place of business of the corporation.

For instance, similar names might conflict if the place of business was in the same city or county where they would not conflict if the two corporations were transacting business in widely separated localities.

Thus the words "Mechanical Store" adopted by a second corporation was held to deceive as against a former corporation adopting the corporate name of "Mechanics Store," but in this instance both stores were situated in the same city and the places of business were adjoining. It

was found, as a matter of fact by the court, that the name "Mechanical Store" was adopted for the purpose of deceiving.

Weinstock, Lubin & Co. vs. Mark, 109 Cal. 529.

To the same effect, see *Hainque vs. Cyclops Iron Works*, 136 Cal. 351, as to the exclusive user and right acquired in the name "Cyclops."

As a general rule, geographical names can not be appropriated and under a statute forbidding the use of similar names the "Michigan Savings Bank of Detroit, Michigan," was not entitled to enjoin the "Dimes Savings Bank of Detroit, Michigan," from changing its name to "The Bank of Michigan" merely on the showing that the two banks had offices on the same street in the same city, the court holding that when the corporate names are properly descriptive the use of geographical words in a business name will not be enjoined in the absence of estoppel or actual misleading of the public.

Michigan Savings Bank vs. Dimes Savings Bank, 127 N. E. 364.

And again the name "American Wine Company" can not be exclusively appropriated as a trade mark or name, the word "American" being broadly geographical and its use as a name by a second corporation is not an infringement unless, of course, it should be used fraudulently and with the intention of deceiving the public, to the injury of the first user.

American Wine Co. vs. Kohlman et al., 138 Fed. 830.

In its decision the court said:

The word "American" is broadly geographic. *Draper vs. Skerrett* (C. C.), 116 Fed. 206. I am clear on the proposition that the words "American Wine Company" are not in themselves a good trade-mark, and can not be exclusively appropriated as a trade-mark or trade-name.

To the same effect see *Nebraska Loan and Trust Co. vs. Nine*, 20 Am. St. Rep. 686.

Under this general rule the use of the words "United States" would not, in our opinion, be sufficient to warrant the refusal of a license if other words were used in the corporate name showing it was a different entity.

By parity of reasoning it needs no argument to hold that the words "building loan association" would not fall within the prohibition of said section 15c.

Practically every building and loan association incorporated under the laws of this state, and there are many, contain similar, if not identical, words.

In the case of *Nebraska Loan and Trust Co. vs. Nine*, *supra*, the court was considering the use of the words "Nebraska Loan and Trust Company" and said:

The words "loan and trust" are simply indicative of the character of the business which they propose to carry on, and so far as they are concerned there can be no question but that there can be no special property or right in them. So the real and only question involved is, whether or not a loan and trust company organized in any part of the state can appropriate the name of the state to its own exclusive use, building up thereby a trade name which will be protected, and to which such company will have the exclusive right, the word "Nebraska" being a geographical name. We are of the opinion that such can not be done.

This disposes of the use of the words "United States Building-Loan Association" used in each of the corporate names and bring us to the consideration of the use and effect of the words designating the place

that each corporation intends to transact business in, which is, we understand, in each instance in a different city or town.

One corporate name is to be regarded as an imitation of another within the meaning of a statute proscribing such name, when it so far resembles the other that a person using that care, caution and observation which the public uses and may be expected to use, would mistake for the other. The location of the corporations and the character of the business conducted being considered.

State vs. McGrath, 92 Mo. 355, 5 S. W. 29.

The location of the corporation is one of the facts that you are required to consider by the provisions of the statute we are construing and measuring the use of the name we have under consideration by the rules above set forth, it would seem that the location of the principal place of business of the corporation which in each instance is made a part of its corporate name, would not constitute a similarity that would warrant you in withholding license, even though the words "United States Building-Loan Association" is used in each instance.

It has been held that:

Courts of equity must in such cases assume that the public will use reasonable intelligence and discretion with reference to the names of corporations with which they are dealing or intend to deal, the same as in cases of individuals bearing the same or similar names. *H. W. I. Co. vs. N. Y. H. I. Co.*, 140 N. W. 94.

Yours very truly,

U. S. WEBB, Attorney General.

By (signed) E. B. Power, Assistant.

DIVIDENDS OF GUARANTEE CAPITAL.

State of California,

Office of the Attorney General.

San Francisco, May 12, 1926.

Mr. A. E. Falch,

Building and Loan Commissioner,
San Francisco, California.

Dear Sir: Your favor duly received in which you present a number of questions based on various code sections relative to building and loan corporations, and in particular the sections of the Civil Code hereinafter referred to.

Section 634 of the Civil Code provides in part as follows:

The capital shall consist of the accumulated dues together with the apportioned profits of the corporation, and shall be accumulated by the issuance of shares in "installment" form and, where the by-laws shall so provide, in any or all the following forms, viz: "Full-paid," "pass-book" and "guarantee."

This provision is applicable to all building and loan corporations, the section being introduced with the words "the capital of *every such corporation shall*," etc. You then state:

Consider now, associations formed prior to the passage of section 648 (a) that have introduced a guarantee capital under the provisions of paragraph (d) of section 634 * * *. May the quotation above noted be interpreted to mean that every such association *must*, not only provide for, but actually offer installment shares for investment to the general public at all times?

Said paragraph (d) of section 634, above referred to, relates to "guarantee stock" that the portion of said section 634 above quoted provides may be specifically authorized to be issued by the by-laws of any such corporation and the portion of said section 634 above quoted, by its terms not only provides for but directs the issuance of shares in "installment" form and it is apparent that if such associations are required to issue such "installment" shares, they are to be offered for sale to the general public.

You ask us to consider section 648 (a) of the Civil Code and particularly that portion which reads as follows:

If formed without any capital stock or with guarantee capital stock only, the working capital may be accumulated by the issue of membership shares, units or certificates having a paid-up or *ultimate matured installment value* of one hundred or two hundred dollars each, and entitled to all the rights, powers and privileges and subject to all the restrictions, and liabilities provided in this title for shares of authorized capital stock of a similar class.

and ask if in construing this language, the words "units" and "certificates" as used therein, should be used as though the word "membership" attached to both of said words in exactly the same manner as the word "shares."

We are of opinion that this is the proper construction and that these membership shares and membership units and membership certificates are issued with all privileges and subject to all the restrictions and liabilities set forth in this title (see section 648 (a)), as regards the issuance of installment membership shares.

You call our attention to that portion of section 633 of the Civil Code reading as follows:

* * * to receive money and to execute certificates therefor, which must specify the date, amount, rate of interest, and when the principal and interest are payable, and also the withdrawal value thereof at the end of each year; * * *

As hereinafter noted, that is one of the purposes for which building and loan associations are formed and you state that this text appears to be the authority for the issuance of what is known and referred to in section 634, paragraph (f), as investment certificates and desire to know if taking into consideration sections 633, 634 and 648 (a) of the Civil Code, building and loan associations may conduct business solely by the issuance of investment certificates and the guarantee capital. You express the view that holders of such certificates are practically in the same category as the holders of certificates of deposit or depositors in a savings bank.

We do not concur in this last statement, as section 633 of the Civil Code provides that no building and loan association shall, at any time, have or carry upon its books for any member or investor, any demand, commercial or checking account, or credit to be withdrawn upon the presentation of any negotiable check or draft; but this same section does provide that every such corporation shall set forth in its articles of incorporation that it is formed for the purpose of encouraging savings among its share holders and members, accumulation of savings and the repayment to each of his savings and profits at any time he shall desire the same or when the corporation desires to repay the same as may be provided in the by-laws.

Therefore we are of opinion that building and loan associations may conduct business in conformity with the Building and Loan Act by the

issuance of investment certificates if such association maintains the reserve required by the provisions of section 634 (f).

Finally you ask us to construe section 641 of the Civil Code as to the participation in the net profits and whether or not, where the guarantee capital does not specifically elect in the by-laws of such association, to participate in common with installment and other classes of shares entitled to full participation in the net profits subject to distribution, may that participation be to any greater extent than the limit fixed in section 641.

Said section 641 fixes the limit, namely, an amount not exceeding 1 per cent per annum on the average loans in force to be set aside from and out of the net profits, and said 1 per cent is the maximum amount.

Yours very truly,

U. S. WEBB, Attorney General.

By (signed) E. B. Power, Assistant.

INSTRUCTIONS TO BE OBSERVED AND FOLLOWED IN THE PREPARATION OF ANNUAL REPORTS.

1. **INTEREST** delinquent—not actually collected—must be listed on the proper blanks, and must appear in its proper place, as an **ASSET**, under **Arrearages**, and must **NOT** be charged into **Loan Account** or to **Dues Account** and credited to **Interest**, as **Interest**, subject to distribution as a profit.

2. **DIVIDENDS** or **Interest** not actually paid out, on **ALL CLASSES** of shares or investment certificates, must be set up as a **Liability**, as is called for in the **Report Blanks**, and **MUST NOT** be entered as though disbursed and credited as principal received.

3. Under "**Loss and Gain**," on the **Report Blanks**, the actual amounts of **Dividends** (or **Interest**) apportioned to the several classes of shares and certificates must be set out separately, as therein called for, and **NOT** be entered in a lump sum covering all.

4. In the preparation of the "**Receipts and Disbursements**" be very careful to literally follow the instructions to **INCLUDE ALL CASH TRANSACTIONS AND JOURNAL ENTRIES THAT AFFECT ASSETS AND LIABILITIES**. Condense both **Receipts** and **Disbursements** to conform to the titles of the **Accounts** as printed in the **Blanks**.

5. Under "**Statistical Information**" answer every question and fill every blank space as called for in the **Instructions** at top.

6. When listing "**Loans made since last Report**," set forth the location of every loan made upon security located outside the **Home City** of your association. This list can be more expeditiously and economically prepared upon a typewriter than with a pen.

7. Be very sure that the names of the **Officers** and **Directors** appear as called for, and that all **Real Estate** owned is properly scheduled.

A strict compliance with these instructions will obviate the necessity for returning **Reports** for correction and completion, and will greatly facilitate the work of this Department, and permit of a more accurate showing in the preparation of the **Annual Report** of this office for publication, all of which will tend to uniformity and economy and should receive the full cooperation of the several secretaries.

State of California,
Department of Insurance.

Mr. A. E. Faleh,
Building and Loan Commissioner,
San Francisco.

Section 421, subdivision 2, of the Civil Code of this state provides that insurance companies may invest "in the purchase of, or loans upon, interest-bearing bonds, notes, or other obligations issued by a corporation organized under the laws of any state or territory in the United States," provided that such corporation has not within five years next preceding defaulted in payment of any part of either principal or interest of any bond, note, or obligation offered, and provided that such "stocks, bonds, notes, or obligations, must, in each case, be rated as first class securities."

Such investment, however, must be made in accordance with the provisions of the section above referred to and limited as provided therein. The law also provides that investments under this subdivision are subject to the approval of the Insurance Commissioner, who may require the company to sell or dispose thereof, in the event of his disapproval.

Yours very truly,
(Signed) CHARLES R. DETRICK,
Insurance Commissioner.

Treasury Department,
Washington, D. C., January 26, 1926.
A. E. Falch,
Building and Loan Commissioner,
San Francisco.

It is regretted that your request can not be complied with, as this office has been obliged to refrain from expressing any opinion in regard to the legality of investments for national banks, except where such investments are found among the assets of a bank under examination because of the actions of certain companies in using an informal opinion of this office as a basis of advertising matter disseminated among national banks.

The general position of this office, however, is that obligations secured predominantly by real estate are subject to the provisions of section 24 of the Federal Reserve Act, and the same restrictions as apply to loans thereunder would also apply to other obligations secured by real estate.

Very truly yours,
E. W. STEARNS,
Deputy Controller.

State Bank Department,
California.

San Francisco, January 23, 1926.

Mr. A. E. Falch,
Building and Loan Commissioner,
San Francisco.

This is in response to your request of January 21st for a definite ruling for your own files on the status of building and loan certificates as investments for California state banks.

A commercial bank or commercial department may purchase building and loan certificates within the unsecured loaning limit of such banks or departments. The purchase of any such certificate is construed as a credit transaction to be supported by the financial responsibility of the Building and Loan Association.

Under no circumstances may a savings bank or department invest in such certificates since they do not constitute legal investments for savings banks in this state.

Yours very truly,

J. F. JOHNSON,
Superintendent of Banks.
By A. E. Bary, Chief Examiner.

State of California,
Office of Attorney General.

San Francisco, September 26, 1925.

Mr. A. E. Falch,
Building and Loan Commissioner,
San Francisco.

You have requested the opinion of this office as to whether or not guardians of minors and incompetent persons may place the trust funds of their wards with building and loan associations. In your letter you state:

"I have carefully gone over the laws governing guardians and wards and can find no provision which prohibits building and loan associations from receiving trust funds. It appears to me that the principal question a court has to consider with reference to the placing of trust funds is whether they are given the best possible protection and at the same time whether the investment brings reasonable returns to the ward. There is no question as to the safety of building and loan associations, there being no safer financial institution in the state, and they offer fair and adequate returns on the investments placed with them."

The statutes place no restriction upon the nature of the investments that are to be made by guardians. Section 1779 of the Code of Civil Procedure directs that the guardian, after a sale of property is made, "put out the residue, if any, on interest or invest it in the best manner in his power." Likewise, section 1780 of the Code of Civil Procedure provides "the guardian must make the investment according to his best judgment or in pursuance of any order that may be made by the court."

U. S. WEBB, Attorney General.
By R. L. Chamberlain, Deputy.

“DEPOSITS,” “SAVINGS” AND “INTEREST.”

Because of the zeal displayed by the officers and directors of some of the building and loan associations, in an honest endeavor to so educate the public, that all may appreciate the benefits that accrue by reason of investment and membership therein, and with a laudable desire to increase the volume of the business of their associations, the bounds of propriety appear, in some instances, to have been somewhat overstepped, with the result that the attention of the banking department of the state has been directed to the language used in advertising in the newspapers, on window signs, circulars, etc.

Your attention is particularly directed to the text of sections 12 and 12a of the Bank Act of California which prohibit any person, firm, company, copartnership, or corporation, either domestic or foreign, that is not under the supervision of the Superintendent of Banks, from advertising by circular, office sign, letterhead or otherwise that he or it is receiving or accepting money or savings and issuing notes or certificates of deposit therefor, with or without interest, or that deposits are received payable by check or on demand without notice, or to transact business in such manner as to indicate to the public that the business so transacted is that of a bank or savings bank; *provided*, that a building and loan association may borrow money, issue investment certificates, or evidences of indebtedness, stating the rate of interest and terms and conditions of repayment and do such other business as may be authorized by the laws of the state relating to building and loan associations.

The penalty for violation of these provisions of the Bank Act is \$100 per day for each day the violation continues.

That the Banking Department makes serious objection to the manner in which the word “savings” is and has been used on window signs and in advertising, as being in direct violation of the provisions of sections 12 and 12a may be, and possibly is, in some instances, amply justified, there may be little doubt; hence great care must be exercised in its future use, and also in the use of the words “interest” and “deposit,” or “deposits”—in fact the use of the two latter words may justly be said to be prohibited to any organization other than banks.

There is no occasion or real necessity for so conducting the business of a building and loan association, either in advertising or in practice, as to conflict with the provisions of the Bank Act, or to encroach upon the prerogatives of a bank or savings bank, and all associations and their representatives and agents should clearly understand that they *must not* advertise in the newspapers, on window signs, on letterheads or by circulars in any of the following forms:

“*The acceptance of deposits:*” that “*We pay six (or any other) per cent on savings:*” that “*Your money can be drawn out at any time, or without notice:*” that “*We pay interest (as such) for money left with us for either long or short periods:*” or by the use of any other such phrase as would indicate the conduct of a banking or savings bank business; *provided*, that associations may use the word “interest” in connection with the issuance of “full-paid shares” or “full-paid investment certificates,” due care being exercised that the bounds of propriety may not be overstepped in so doing.

Associations may also, in their discretion, use the word “savings” and be upheld in the exercise of this privilege by the commissioner,

where the same is used substantially as follows: "Invest your savings in a building and loan certificate or account," or "savings invested with us," etc. While the use of such word, when used in the above manner, is perfectly proper, yet after all there is no real necessity therefor, as the words "funds" or "surplus funds" can be used in place of "savings" and the results be equally good; the word "dividend" can be used in lieu of "interest," with even a more potent meaning, and "rate of dividend" readily takes the place of "rate of interest."

All associations and their representatives and agents, conducting or soliciting business in California, are advised and directed to withdraw and cancel all forms of advertising that conflict with the provisions of the Bank Act, or with the requirements of this statement, and to so conduct their future operations and advertising that there may be no occasion for friction to develop therefrom on the part of the banks, savings banks or banking department of the state, and thereby relieve the commissioner from future and continual correspondence and explanation in connection therewith.

TAXES AND FEES FOR BUILDING AND LOAN ASSOCIATIONS.

State Corporation License Tax—

\$10 per year, payable to Secretary of State on or before February 1st, yearly.

State Franchise Tax—

In the past has been 1.6 per cent per annum upon 1/20th of assets, less borrowed money, as per report to State Board of Equalization as of March 1st. Payable to State Treasurer semiannually in January and July.

County and Municipal Taxes—

Payable upon real estate owned, personal property and money in bank.

Building and Loan License Tax—

For new domestic associations, \$1 per month for months unexpired for calendar year.

For foreign associations, \$3 per month for months unexpired for calendar year.

Annual renewal—Pro rata of estimated expenses, based upon assets as per last report, with a minimum of \$10 per year.

Secretary of State—Fees for New Associations—

Authorized capital of not over \$25,000_____	\$15 00
Authorized capital over \$25,000 and not over \$75,000_____	25 00
Authorized capital over 75,000 and not over 200,000_____	50 00
Authorized capital over 200,000 and not over 500,000_____	75 00
Authorized capital over 500,000 and not over 1,000,000_____	100 00
Authorized capital over 1,000,000 adds \$50 for each \$500,000 or fraction thereof.	
For recording, per folio_____	\$0 20
For certificate of incorporation_____	3 00
For certifying copy of articles_____	2 50
Also pro rata of state corporation license tax for unexpired por- tion of year_____	10 00

REPORT ON FEDERAL TAXATION.

A special committee appointed to investigate the matter of federal taxation has reported to the California Building-Loan League that after much study on the part of members and the holding of a number of meetings, two questionnaires were mailed to all associations in the state. The information secured in this way, it was felt, would give the committee an intimate knowledge of the existing situation and enable it to be of the greatest possible assistance in its handling of this most perplexing problem.

Generally speaking, the federal tax problem must be considered from two widely different viewpoints: first, that of the associations who have or hope to secure exemption and, second, that of the associations who have been denied exemption and were required to file income tax returns and pay taxes. Accordingly, one questionnaire was designed to secure information necessary in the determination of mutuality as it has been construed by the federal government, and the other was intended to develop information concerning matters which have been the subject of controversy between the government and associations which have been denied exemption.

The response to committee's communications urging that these questionnaires be filled out and sent in has been somewhat disappointing, particularly so in view of very interesting data contained in those which have been received.

From a total of 163 associations doing business in the state on June 30, 1925 (as shown in the report of the commissioner), we have received 59 answers and some 55 filled-in questionnaires. Forty-four of the associations submitting questionnaires were of the guarantee form and 10 were mutual.

Eighteen of the 55 associations have been granted exemption and 37 have not.

Eight of the 18 associations which have been declared exempt are mutual and 10 are guarantee.

Not enough associations have answered to make it worth while to present a complete report, but the following will show what a wide range of useful information regarding the situation as a whole will be available when we receive a 100 per cent response.

15 associations report borrowing from banks.

28 associations require borrowers to be members.

Most of the associations loan to persons for other than their occupancy.

25 associations loan to contractors who resell to home buyers.

15 associations loan money on apartment houses.

18 associations loan money on business properties.

We can not urge upon you too strongly the importance of filling in these questionnaires and mailing them to us at once. Your association may have been granted exemption or you may feel that you do not care to try to secure exemption. Our investigations have shown us, however, that, due to changes in the conditions which prevailed when tax exemption was granted, an association may in fact face a large tax assessment. We also know of developments which may very largely increase the tax burdens of associations which have not elected to secure exemption.

In February of this year your committee, feeling that the development warranted the step, sent out a letter requesting associations not only to send in their questionnaires but also to join in making available a small fund to provide for necessary expenses. Your secretary will report separately on this matter.

There may be varying opinions as to the basis on which associations should share the financial burden of this work and we desire to place the matter before you for your consideration before sending out a second appeal.

Your committee estimates that the additional tax burden which may be placed upon California associations and investors in membership and guarantee shares and investment certificates is in excess of \$500,000 per annum. Surely we can afford to contribute to a common fund to protect ourselves and the industry as a whole against this possible loss which will almost inevitably fall upon us if we do not act together.

In addition to the work of preparing the questionnaires previously referred to and analyzing and tabulating the information contained on those which have been received, your committee has kept in touch with all cases filed, particularly in the Board of Tax Appeals, to which body we must look for the clarification of some of the disputed questions.

For your information we might state that some 14 cases have been appealed to the Board of Tax Appeals, 3 of these petitions having been filed on behalf of California Associations, and practically all of the others by Ohio associations, which state, as in the past, is bearing the brunt of the fight in determining the taxable status of the

industry. Most of these cases have not been heard, but in one decision which has been rendered by the board in which an assessment made by the commissioner was overruled, we are impressed with the fair and understanding spirit with which the board seems to be considering the question.

Concerning the problems which confront the associations in their fight for an equitable tax burden, we will not attempt to cover the question in detail, but will refer you in general to the proceedings of the last convention, where the matter was gone into at length. We do, however, wish to bring before you some of the points of controversy which have arisen or which, though previously raised, have been dealt with more vigorously.

These are:

1. The question of invested capital and the exclusion as a deductible item of interest on investment certificates. These questions are problems primarily of associations which have not secured exemption.

2. The practice of making loans to contractors who, resell to others.

3. The making of loans on commercial buildings.

4. The borrowing of large sums of money at fixed rates of interest.

The latter three questions are primarily those of the mutual associations as they vitally affect the exempt status of the institutions.

Your committee during the coming year, if you see fit to continue its existence, will function along the following lines:

1. Endeavor to have questionnaires filed by every association in the state.

2. Tabulate the information contained in these questionnaires.

3. Acquaint itself with the points involved in every case where there has been controversy to the end that the best possible defense may be made and the interest of all of the associations in the state protected.

4. Keep in touch with all decisions and opinions of the federal government in connection with California or other cases.

5. Cooperate with the institute in an endeavor to clarify the whole situation and establish a permanent basis of agreement so that both guarantee and mutual associations will be able to stabilize their business practices and relations.

6. To endeavor to establish a uniform basis for determining the amount of franchise tax payable to the State of California. The present attitude of the State Board of Equalization concerning investment certificates is arbitrary and unfair and may possibly affect the stand taken by the federal government.

7. To endeavor to secure uniformity in opinion as to the inheritant differences between membership shares (fully paid or installment) guarantee stock and investment certificates. There is a general attitude on the part of government officials to consider investment certificates in the same category as capital stock. This has arisen partly, we believe, from the nomenclature used by the associations themselves in describing their various classes of stocks and obligations and the returns paid thereon. A case in point in this connection is the last annual report of the Building and Loan Commissioner which repeatedly denominates interest paid on investment certificates as "dividends on investment certificates."

In conclusion, your committee desires to state that its contact with this subject during the past year has convinced its members that the associations collectively can undertake no work which will prove to be more beneficial to every individual association and to the industry than that which you inaugurated with the appointment of this committee at the Long Beach convention last year.

We trust that the importance of this work will impress you with the need of creating a permanent Committee on Income Tax and that you will support such committee with your interest and with your money and by generously supplying any information which may be requested. All information received in the past has been kept absolutely confidential and this policy should be adhered to in the future.

Respectfully submitted,

HERBERT C. JONES,
WILLIAM E. BOUTON,
FRED D. BULLOCK,
Committee.

SKETCHES OF PAST HISTORY OF CALIFORNIA ASSOCIATIONS.

By J. L. FIELDS, Deputy Commissioner.

In building and loan circles there has always been an element of uncertainty as to the date when the first association was established in California, the consensus of opinion being that it was with the incorporation of the Germania, in Sacramento, December 31, 1872, as that particular association was the oldest then in operation when the bank commissioners made their first survey, and collected the first available statistics, in 1891, at the suggestion of the governor.

In conversation with a resident of San Francisco, of the late sixties and early seventies, he stated that of his personal knowledge there were at least two such associations transacting business in San Francisco in 1870 and 1871, even designating the particular location of their place of business.

Acting upon this statement, the building and loan commissioner requested the writer to proceed to Sacramento and make a search and examination of the early records in the office of the secretary of state and the state library.

First Association Founded in 1865.

Such search and examination demonstrated the correctness of the statement upon which it was based, as it was there found that on February 9, 1865, the California Building and Loan Society, with its principal place of business in San Francisco, filed articles of incorporation with the secretary of state, with an authorized capital of \$250,000 divided into 2500 shares of a par value of \$100 each, and with seven directors, mostly of apparent German descent; then on March 14, 1865, the California Building and Loan Association, also of San Francisco, filed articles of incorporation with an authorized capital of \$50,000 divided into 500 shares of a par value of \$100 each, with five directors, one of whom was Washington Bartlett, who, in later years, became governor of the state.

Beyond the fact of the filing of the articles of incorporation of these two associations, there does not appear to be any written or printed evidence regarding their methods, or of the conduct of their business, as neither appears to have been in business in 1891 when the bank commissioners made their first survey and report to the governor, but it is undoubtedly safe to assume that they were operated upon the "terminating plan," under which all shares were subscribed for at the very outset, and that the associations terminated with the maturity of the shares and the consequent repayment of all loans, as under that plan every shareholder was presumed to become a borrower at some period prior to the maturity of his shares.

First Authentic Statistics Compiled in 1891.

Apparently the first authentic compilation of statistics in connection with the business is the report of bank commissioner, as of date September, 1891, which contains the reports of 111 associations with assets aggregating \$12,652,667.49, and in addition they also listed the names of nineteen associations from which they had been unable to secure reports in time to be included in the tabulations—thus making

an aggregate of 130 associations at that time in operation in the state.

The early day associations conducted their business under the provisions of the Land and Building Corporations Act, which permitted the formation with or without capital stock, but as far as is now apparent only two associations were formed without capital stock, both of which are still in existence and are in flourishing condition.

The act of March 31, 1891, for the formation and government of mutual building and loan associations, materially changed the provisions of the former laws, but permitted those associations that did not elect to accept its provisions, to continue business under the old law. This was a concession to the national associations, all of which strenuously opposed many of the provisions of the new law.

National Plan Invaded State in 1889.

The national plan, imported from Minnesota, invaded this state in 1889—the first incorporation being that of the “National,” now the State Mutual, of Los Angeles, on June 20, 1889, followed within two years by about ten others, virtually along similar lines, the principal difference being in the premium plans of loaning, three using the premium stock plan, while the others adopted the monthly cash premium in addition to the interest rate charged, but all required the shareholder to contribute ten cents out of each 60 cents per share per month to the expense fund to provide for the expense of operation, other than for taxes, and in addition thereto, an entrance or membership fee of \$1, and in some instances \$2 per share, was deducted to provide compensation for solicitors. The expenses being provided for as above indicated, the income from interest was all presumed to be apportioned to the shareholders and investors.

Associations Increase in Five Years to 128.

In the five years from 1886 to 1891 the number of associations incorporated appears to have increased from 33 to 128, then from 1891 to 1896 there was a further increase to 157, of which number 147 appear to have then been conducting business, according to the report of that year, all of which were being operated as “mutuals” on the “serial” plan, mostly with annual series, though some few were on a semiannual basis.

Much the largest percentage, aside from the nationals, were loaning upon the “gross premium” plan, mostly at 7 per cent interest with 20 per cent gross premium deducted from the face of the note. Much the larger percentage of the associations were treating this 20 per cent as an immediate profit and distributing it as dividends at each annual or semiannual distribution, thus creating and distributing an exorbitant dividend, much in excess of the actual power of the loans, which, as a matter of fact, was 10.25 per cent, though not a single secretary was able to make the calculation to produce the correct result. This exorbitant dividend, which often amounted to 20 or 25 per cent, was very evidently the motive for the formation of the large number of new associations during the ten years above noted.

Distribution Method is Exposed.

The fallacy of the prevailing method for the distribution of the gross deducted premium upon the loans was first exposed by the writer

at the session of the state league in the autumn of 1893, at which some fifty delegates were present, and developed the fact that one solitary delegate was willing to accept the solution presented, yet within one year it was accepted by virtually all. About one year later the commissioners became cognizant of the outcome of the famous "Windsor" case, at Windsor, Illinois, where the method of loaning had been the same, and began to devise means to correct the evil, with the result that at an early date the associations were first advised, then later instructed to set the gross premium aside as an "unearned" premium to be distributed as earned during the life of the several loans involved, and in many cases to reapportion the profits on a proper basis and set aside the surplus as unearned. Those associations that were not loaning upon the gross premium plan were mostly loaning at 7 per cent interest with a monthly installment premium of 25 cents per one hundred dollars of loan, which produced a gross return of 10 per cent upon the actual amount loaned.

The loaning plan of the nationals was generally at 6 per cent interest and 60 cents per month as dues upon each premium share, where that plan was in use, or 60 cents per month, per each \$100 of loan as a cash installment premium, making, in either case, a gross cost of 13.20 per cent.

Because of the inability of the average borrower to understand the stock premium plan, and of other complications that developed, it was abandoned, after a few years, and the cash premium substituted, but even this did not remove the objections to the national plan, and gradually those associations either retired, or abandoned the 10 cent deduction from the dues, for expenses, and paid their expenses from their current income.

Guarantee Capital Plan.

What is now known as the guarantee capital stock plan was first introduced by the California Guarantee Investment Company, incorporated August 2, 1890, by the creation of a special class of shares, mostly held by the directors, which were not withdrawable, and were to protect all other classes of shares against loss of principal; the exact terms of which are not available because of inability to procure a copy of the by-laws of the association.

Investment Certificates.

The Renters Cooperative Investment Company, incorporated November 24, 1890, was the first to introduce what is now known as "investment certificates." The only stock provided for by the Renters was fully paid or prepaid shares, virtually all held by the incorporators and their friends, and was classed as a guarantee capital association.

What was virtually the present form of investment certificates, with dues at 60 cents per month, with a deduction of 10 cents for expenses were practically the only form offered to the public. Under the terms of their by-laws these certificates were entitled to "full participation" in the profits subject to distribution as dividends, but the holders had no vote or voice in the management and conduct of the business.

The articles of incorporation of the Renters, and also of the Phoenix, (formerly the Republic), both nationals, were originally prepared with

the view of a possible future conversion into savings banks, and prior to the close of 1905 permission for such conversion was granted by the Attorney General over the protest of the commissioners. This conversion accounted for a decrease of \$2,801,638.65 in the gross assets of the associations, in the tabulated annual report for 1906.

The California Guarantee Investment Company had liquidated voluntarily because of unfortunate loans in the San Joaquin Valley region, thus both the original guarantee capital associations had eliminated themselves from the building and loan field. The next association to adopt this method of capitalization was the State Mutual of Los Angeles, and it was the only association so capitalized when the amended law of 1907 became effective on July 1st of that year, legalizing that form of capitalization, and that same act legalized what is now known as "investment certificates."

Early Associations Without Supervision.

From the very inception of the building and loan business in 1865 until the first survey and report of the bank commissioners, the associations operated without supervision of any kind by any state authority, and, so far as is now known, without any collection of statistics regarding the business, and while the bank commissioners collected reports and reported the result to the governor in 1892, they were without any legal authority over the associations or their acts.

Two Commissioners Appointed in 1893.

On May 1, 1893, two commissioners, appointed by the governor under the provisions of an act approved March 23d of that year, assumed office and took up the work of supervision, but the law was somewhat crude, and they had very little real authority other than in an advisory capacity. During the first two years their work was strenuous; there was no uniformity in systems or methods of accounting, still taken as a whole the condition of the associations was found to be very satisfactory. In some twelve or fifteen cases defalcations in various amounts were developed, some through carelessness, and some intentional and deliberate, all of which were made good and without loss to the associations or investors; but in the intentional and deliberate cases the defaulting secretaries were forced to resign and seek other fields, as the commissioners were without authority to prosecute and the several boards of directors desired to avoid publicity as far as possible.

Associations Experience Trouble.

But the associations, especially in San Francisco, were not without their troubles. Inadequate laws and lack of supervision, and boards of directors that were none too careful in appraising the security offered for loans to some nineteen associations, permitted a contractor and builder, presumed to be wealthy, to secure a large number of loans, in many cases in excess of the real value of the security pledged, with a resulting loss in excess of \$157,000 to the nineteen associations, in a majority of which the contractor was an officer or a director. With two exceptions, the associations were able to care for the losses without impairment of the dues paid in by the members. Acting upon the advice of the attorney general these two associations voluntarily

scaled the book value of their shares and continued business for a time, but this set-back eventually caused all the associations to either liquidate voluntarily or be absorbed by others.

The contractor and builder responsible for the troubles suddenly emigrated to the South African mining regions to renew his activities.

During the adjustment of these losses it developed that the attorney for one of the associations had certified as perfect, a title that proved to be worthless. Upon the facts becoming known to the commissioners, the attorney was called upon to make good the loss, which he did without undue delay.

Another problem that was somewhat difficult to handle was to convince many of the associations that the rules by which they were distributing the profits were not always equitable.

Eleven Different Formulas.

There were eleven different formulas in use for this purpose, five of which were variations of the partnership rule, which, in its simplified form, allows virtually simple interest upon the shares of each series, irrespective of age, making a variation of over 2 per cent in favor of the youngest over a ten-year period. The Wrigley rule, mostly used in the distribution of the gross premium, often gave the youngest series five times the percentage accorded to the oldest in a like ten-year period. The so-called Dexter, or compound interest rule, with calculations based upon payments in advance, or at the end of a month, is the only one that gives an equal rate to each series. All the others operate to the disadvantage of the older series. As devised by Dexter, its method of operation was defective. In its simplified, or corrected form it is in use by virtually all the serial associations in the state today. To convince the associations of the advisability of discarding the unequal rules was a task of no mean magnitude, but it was gradually accomplished.

The law of California, in common with those of virtually all of the states, required that borrowers must subscribe to and carry shares of an ultimate matured value equal to the face of the loan, and that the maturity of the shares would automatically repay the loan. Because of the fact that it is impossible to determine, in advance, upon a uniform rate of annual distribution over a term of years, the maturity of the shares and the consequent repayment of a loan were indefinite.

In the late nineties there developed throughout the east a desire for some system of loaning that should be definite as to the term of the loan and, at the same time, retain the "mutual" feature demanded by the laws of all the states.

Amortization Plan Brought Solution.

Late in 1899 this feature was solved by the writer by adopting the amortization, or definite contract plan in conjunction with a special class of shares with monthly payments of dues at one-tenth of those of ordinary installment shares—to be issued to borrowers upon the definite contract plan, the dues, of usually fifty cents per \$1,000 of loan, to be paid with and in addition to the loan payments. These shares were to participate in common, pro rata, with other classes of installment shares and the accumulated book value to be refunded to the borrower upon final payment of the loan, and the shares canceled.

In the opinion of competent building and loan attorneys this idea complied with all requirements of the then existing laws, and was very generally adopted.

With the general introduction of guarantee capital into both old and new associations the issue of this class of shares was quite generally abandoned, thereby abandoning actual mutuality in the conduct of the business, but the amortization, or definite contract plan of loaning, without the issue of shares, was retained and is in almost universal use at the present time. Some few associations still retain the original plan, all of which must be classed as "mutuals."

Results of the Big 1906 Fire.

The disaster—earthquake and fire—of April 18 to 20, 1906, was a serious blow to the associations of San Francisco. Three-fourths of the associations of San Francisco lost virtually every vestige of their records, and fully one-half lost all their securities. The records and securities that were protected by brick vaults, or were on deposit in bank vaults were saved, yet many of them were in a condition that necessitated very careful handling. Very few of their loans were in the burned area, and those were protected by insurance. Recourse was had to the county records of the various counties and gradually certified copies of mortgages and deeds of trust were obtained, but the tedious work of the restoration of their records was not completed for over two years.

The records and property of the commission, not contained in its small safe which fortunately landed in the street when the building fell, were entirely lost. A temporary office was immediately established in Oakland and the restoration of its records progressed as rapidly as time could be found therefor, which was very limited, as the associations in the burned and disturbed area needed and must have care, assistance and all the protection that could be given them.

That the associations in the burned and disturbed area recovered from the effects of the disaster and have prospered and increased in number and volume of business, in common with those in all parts of the state, is best evidenced by the number of associations and the volume of their assets as shown by the annual report of the commissioner for the past fiscal year—and may they continuously prosper.

Building and Loan Idea Beneficial Form.

The past history of building and loan associations, not alone in California, but throughout the entire United States, tends to confirm the world-wide verdict that this particular class of business is the most beneficial form of financial cooperation yet devised for the benefit of wage earners and those desirous of acquiring a competence and a home.

The experience of the past has also demonstrated that supervision by a public official, while not intended to be inquisitorial nor to interfere with legitimate business is a valuable deterrent and a protection to the public against fraudulent and reckless management.

A legitimate enterprise has nothing to fear from supervision. On the other hand it should be looked upon with favor. It therefore follows that those inclined to criticize or evade it are the ones that most require supervision for protection of the public.

RELATION OF BANKS AND BUILDING AND LOAN ASSOCIATIONS.

By V. J. LAMOTTE, of San Jose, before California Building-Loan League.

Building and loan associations have been in existence in this country for over 95 years, but they did not come much into the limelight until the world war, when a phenomenal increase in the individual's earning capacity, followed by an acute housing shortage, created on the one hand a great national wealth seeking investment, and on the other an almost unlimited demand for loans on the very safest security.

We do not change our habits abruptly, and when the war caused an unprecedented demand for material and labor, we suddenly found ourselves possessed of incomes considerably greater than required by our past habits of living. Until we grew up to a more extravagant standard of spending we were possessed of an enormous surplus, which found its way into the banks and building and loan associations. As an indication of the extent of this increase, in the city of San Jose alone, where the institution I represent is located, the total assets in six banks in 1914 were \$18,074,087 and in 1926, \$42,077,338; while the total assets of the three building and loan associations in 1914 were \$1,207,479 and of six in 1926, \$20,800,000. In the State of California we find that the total assets of the state banks in 1914 were \$705,871,341 and in 1926, \$2,619,200,186. The total assets of the national banks in 1914 were \$508,314,000 and in 1926, \$1,076,263,000. The total assets in state and national banks in 1914 were \$1,214,185,341, and in 1926, \$3,695,463,186. The total assets of the building and loan associations in the State of California in 1914 were \$29,515,762 and in 1926 they were \$140,657,891.

The Savings Bank Division of the American Bankers Association in their publication report total savings deposits for the United States in both state and national banks in 1914 were \$8,711,975,000 and in 1926, \$23,134,052,000. Quoting from that report, they say: "Savings deposited in the banks and trust companies of continental United States as of June 30, 1925, according to reports received by the American Bankers Association, amounted to 23 billion 134 million dollars, a savings per inhabitant of \$204, a gain in one year of 9 per cent or of one billion 945 million dollars, which is approximately 500 million dollars more than the gain in savings during the year preceding. These are colossal sums, representing as they do the residue of earnings above expenditure on the part of the people of the United States."

The Pacific States have won a high place in savings with a per capita savings average of \$255; a gain over last year of \$18 per inhabitant, which is \$3 above the average for the entire United States."

These figures do not indicate that the banks have suffered severe loss of business through the activity of the associations.

Under that great regulatory power known as the law of supply and demand, some striking adjustments were bound to follow, and one of the most important of these was the constructive part played by the associations which had placed upon them the problem of meeting the national housing shortage, and they provided both the funds and the system with the same marked success that the federal reserve banks supplied the channel for the transfer of commercial credits. It is estimated that last year 70 per cent of the homes built in the United States were financed by the associations. There are no figures available to show what part of the home building was financed by the banks, but it certainly was not large.

It can not justly be said that the growth of the associations was at the expense of the banks, because the figures just quoted show both types of financial institutions have made remarkable progress. Associations have been partly the outgrowth of an incomplete banking system. There was a crying need for a convenient method of financing home building, and at the same time a demand for a flexible method of investment for the man of small means. The banker believed he furnished the latter through a 4 per cent savings account, but the rate was so low it invited investment in too many "wild-cat" stock selling schemes, and of necessity there should be some better plan. Perhaps the largest single item contributing to the associations' rapid rise came from Liberty bonds. During the war the people strained every nerve to save and purchase their country's securities. Through this need there was developed an army of savers such as the world had never before known. When war needs were over the people found their bonds temporarily depreciated. I believe our association was about the first to take advantage of that situation in offering to accept these for investment at par, thus giving almost every man, woman and child a chance to convert the money they saved for their country's use and put it to work a second time in meeting the national home shortage.

The great underlying principle which differentiated America from other countries is the constitutional guaranty of equal opportunity, which opens the door for right to succeed and keeps it open for wrong methods to fail. The popularity and growth

of the associations is a good indication that the principle upon which they are conducted is sound. They have survived and prospered, with a record for losses much lower than any other class of financial institutions. It is distinctly in line with American ideals that we should have these two rival systems—the banks and the building and loan associations—but the rivalry should be one of service and not of destruction.

It is of the utmost importance to the associations that they look with concern upon their own growth. It means that the people here in the West have given us their whole-hearted confidence, thus placing upon us a grave responsibility. To err and become at any point careless of that trust would be an inconceivable crime. During this period of marvelous prosperity our whole aim should be to build great strength and a bulwark of reserves which can be trusted to withstand every reverse.

Banks have never looked with favor upon construction loans, and as a general thing have declined them, unless the borrower was in a position to give security through the deposit of bonds, or some other form of collateral. What then was the home-builder to do? In the philosophy of the wise and prudent, we are continually advised to stimulate home ownership as a safeguard against the demoralizing effect of socialism and communism. All recognize the fact that the thrifty are the happy, and thrift expressed through home ownership undoubtedly indicates the presence of other virtues such as civic responsibility and patriotism. It certainly tends to raise the standards of any group. A tenant seldom cares to preserve the value of beauty of rented property, but the same man will spend both time and money in beautifying a home of his own. Take a dirt street, full of ruts and dust, and pave it; then see how quickly the home owners along the block will clean up their yards and paint their houses.

Now, if this home ownership is desirable, through what agency is it to be accomplished? The building and loan associations have been the legitimate answer, merit ing and receiving public endorsement.

The banks complain bitterly because they look upon investments in the associations as losses from their savings departments. To some extent of course this is true, and we must have some sympathy with their view, but it has caused them to err in trying to discredit the associations and being more willing to recommend speculative stocks and bonds which are daily sold their clients by highly specialized salesmen, though it is obvious most of this money goes from their savings accounts in \$1,000 blocks, leaving the district entirely; while a building and loan investment satisfies the desire for a higher than bank rate and keeps the funds at home to be used in creating new community wealth, from which the banks must ultimately profit.

Most bankers are not trained or prepared to look after construction loans and hence are very loath to extend the helping hand to the prospective home owner, but after the house is built they will readily take over the loan created by the associations, with this adjustment—that the loan shall be for a short period, and without monthly reduction.

Now let us analyze the situation we find here. Undoubtedly the monthly reduction of principal is the best thing for the average home buyer because it gradually liquidates the obligation without any serious embarrassment; while with a flat loan it is almost inevitable that he will not accumulate the funds during the life of the note to repay it. Should banks adopt the ten-year installment loan? I believe they should not, because the borrower being unable to refinance elsewhere to advantage, the loan would usually run the full term, and the banks must maintain a more liquid position. With the associations' loans, made as they are at a higher than bank rate, the borrower after his home is finished can, if he is called upon to do so, refinance without difficulty, and it is this fact which keeps the associations in the liquid position which they enjoy. Very few people appreciate that this makes our loans even more liquid than those of the savings bank. The average of our loans is $4\frac{1}{2}$ years. One of the greatest sources of strength of any financial institution is its ability to pay on demand, and to my mind there is no factor of greater value to us in accomplishing this than a loaning rate a point or so above the other sources of supply.

There should be and eventually, I believe, there will be the closest cooperation between banks and building and loan associations, because both these institutions are of the utmost value to their communities. One with its checking accounts, unsecured lines of credit for mercantile purposes, its vaults, escrows, exchange and agricultural loans; the other with its construction and installment loans. Both must look to the public for the means with which to conduct their business, and both fill a very important niche in our domestic affairs. If they were conducted under unified control the banks would draw their support from those funds in active business, and people willing to accept a lower rate in exchange for the utmost flexibility; while the association would draw from investment funds which would otherwise be seeking private loans.

I think associations should be careful in discussing conditions with their clientele to make it very clear that the customer is making an investment which he has no right to expect to withdraw on demand. Of course it is permissible to show that past conditions have always permitted withdrawals without notice, but it will strengthen our future position to have a clear understanding that in reality the transaction involves a long-term mortgage loan, shorn, as far as the investor is concerned, of all the annoying details and responsibilities which he would have to assume if he were to attempt to make a personal loan, and greatly strengthened by the experience of the loaning officers, and the capital and surplus of the associations. These differences alone should be a sufficient recommendation for the system, and when they are coupled with an almost certain withdrawal privilege there is no more attractive investment.

Associations now recommend their clients to deposit in banks where they can secure courteous service and good advice. We recognize that these institutions are uniformly officered by a very high type of trustworthy men, but in view of the fact that the losses sustained through banks are many times greater than have ever been sustained through building and loan associations, there should be a better understanding by bankers of their competitors. It can not be to save the public from disaster that banks warn against the associations. When the history of the two types of institution is compared the thought of protecting the funds of the public must be eliminated from the argument of the banks against building and loans. In calling attention to the difference in losses sustained, we do not wish to mislead ourselves into the belief that it is the clever financial sense of the associations that is altogether responsible, because it is due to the fact that we are not called upon to make any unsecured loans, and also that all the loans we do make are reduced by regular monthly payments; bankers do not generally recognize what a great added strength this is to our business.

In 25 years banking experience I never consented to a ten-year loan on a home, because such a long term mortgage would be what bankers call "frozen"; that is, it could not be easily cashed or liquidated, and I certainly felt that the ten-year loans of the associations were "frozen." It was not until several months after I left the banking fraternity, and became allied with the associations, that I began to sense the liquid conditions of their loans. What brought it about was for some time a mystery, but it ultimately became clear that it was due to the higher rates of interest charged borrowers. Let me here sound a word of warning to those who are trying to reduce associations' loaning rates to the bank level. When they come in direct competition with the bank rate, there will be no incentive to early payment of the obligation. Associations should bridge the gap between the desire to own a home and the period when this desire has crystalized into an established building and a seasoned financial risk. At this point it is quite logical that the borrower should seek to refinance at the lowest possible rate and his desire and ability to do so through the banks makes the associations' position liquid.

It is false philanthropy to try and conduct business without a profit. Banks pay 4 per cent on savings accounts and nothing on checking accounts, and loan at 7 per cent, having from 3 to 7 per cent gain, less expenses. It appeals to me as unsound to try and conduct a business without a fair margin of profit. I have seen associations advertise that because they were loaning at only $\frac{1}{8}$ of 1 per cent above the bank rate they were therefore able to secure all the good loans, and would be that much stronger than their competitors. This argument and practice is more apt to create a condition where, having no profit, they can stand no loss. It is a fallacy to assume that higher rates are paid only by poor risks because there are several other angles beside rate entering into most loans. Some insurance companies underbid the banks, but get but little of the business because of the great delay and red tape. It is promptness in closing, the prepayment privileges, the smallness of the fee which secures the best business.

Associations pay a good rate on investment funds, and they should exact a profitable rate on loans, and then merit it by the service rendered. They will find there are many ways in which the borrower can be compensated for the small additional interest.

The banks and the associations are both well established financial institutions. It would not be possible for either to prescribe the exact lines along which the other should work, because we are human, and must be excused for giving most consideration to our side of the question, but we can not go very far wrong if each gives his very best effort to rendering the highest service which may be developed in his chosen calling, and letting the requirements and wishes of his clientele regulate the scope of his activity. Under such methods, during a term of years, the evolution of business will stabilize the most beneficial system.

THE PLACE OF BUILDING AND LOAN ASSOCIATIONS IN THE ECONOMIC LIFE OF THE UNITED STATES.

By Professor GORDON WATKINS, of Los Angeles, before the California Building-Loan League.

In every country building and loan associations are accepted as an integral part of the financial organization. As such they are rapidly being accorded the place in the public esteem to which they are justly entitled. No financial institution should have a greater claim upon the interest, cooperation, confidence and loyalty of the public. In the process of its evolution the building and loan movement has not always enjoyed this full spiritual heritage. Neither has any other institution that man ever created. With maturity and experience the weaknesses are being eliminated and mistakes corrected. Today building and loan associations compare favorably with the best and soundest financial organizations. Profound esteem for its great history, confidence in its present integrity, and a vision of its remarkable mission in the future have stimulated my personal interest in this hitherto practically unexplored field of economics.

The Nature and Purpose of the Building and Loan Movement Often Misunderstood.

The building and loan movement has been erroneously regarded by a great many people as a semi-philanthropic institution. This false notion has in no small measure been responsible for much misunderstanding and misrepresentation of the movement, and has often acted as a deterrent to public trust. The public mind must be disabused of this conception. It must be taught that a building and loan association is not a peddler of charity, and that, although it has a peculiar social purpose, it is nevertheless a business enterprise organized on sound business principles and conducted along the lines of sound business procedure.

The Economic Status of the Building and Loan Movement.

At the present time there are approximately 12,000 building and loan associations in the United States, with a membership of about 10,000,000 and total assets of something like \$6,000,000,000. This means that for the last fiscal year average assets were \$500,000, or an increase of about 21 per cent over the preceding one. In the present period of rapid expansion the assets of these associations are increasing at the rate of about \$1,000,000,000 a year, and there is reason to believe that the rate of increase will be greatly accelerated as the public becomes acquainted with the real nature of the movement and its marked financial advantages.

In the State of California there are 152 associations with total assets of almost \$141,000,000, according to the commissioner's last report. This means average assets of about \$927,000, or an increase of about 30 per cent in assets for the last fiscal year over the preceding one. By this time there has doubtless been a considerable increase in assets. It would not be surprising that the total assets of California associations in the immediate future would exceed \$200,000,000, nor is it too much to expect that in normally prosperous years the associations of this state will continue to grow at the rate of about \$50,000,000 a year. Certainly there is reason to be proud of being identified with a business movement of such large proportions in the state and the nation, not to mention the vast operations of other countries.

The Foundations of Success and Growth in Business.

To achieve success and experience growth a financial institution, such as a building and loan association, must meet certain requirements. In the first place, it must be adequately financed. Capital stock and other resources must be sufficient to meet the needs of the community and keep pace with its development. Many financial institutions do not experience the expansion which properly belongs to them because capital and other resources are too limited to meet the expanding needs of the people. Lending operations are necessarily curtailed because of lack of available funds and the prospective home builder is denied the service he needs. Consequently, he is forced to negotiate his loan through some other and, frequently, less desirable agency.

Secondly, the institution must be capable of attracting the saving and investing public. Building and loan associations, like banks, are clearing houses for lenders and borrowers. They are a market to which there come those who desire to sell money and those who wish to buy it. The profitableness of an association is determined by the success with which sources of funds are tapped and the ability with which desirable loan contracts are made. Profits will depend upon the volume of

funds and the rapidity of turnover. To attract funds the association must have the confidence of the investing public.

Thirdly, the institution must be efficiently organized and administered. To obtain the confidence of the investing public and make desirable contracts with borrowers, it is necessary that there be competent organization and management. The building and other physical equipment, such as vaults, files, etc., must be adequate to meet the needs of the volume of business. A five million dollar concern should not try to conduct business in a five thousand dollar building. The business organization must be efficient and scientific. Departmentalization, subdivision of duties, and proper centralization of authority and responsibility are indispensable in any growing business enterprise. The personnel must be competent, courteous and loyal.

Fourthly, the institution must have a useful commodity or service to sell, and possess the capacity to sell it. Every building and loan association has a real service to sell to both the borrowing and the investing public, but not every association knows how to sell that service. It is claimed with much justification that the building and loan movement has never achieved its greatest potential growth and possibilities chiefly because it has never fully devised or adopted efficient ways and means of educating the general public concerning the peculiar merits and advantages of doing business with a building and loan association. I should be the last person to urge high powered salesmanship, which is one of the curses of the present economic system, but I should be among the first to insist that the building and loan movement should be wide awake to the great possibilities of dignified, intelligent, and effective publicity and advertising.

Fifthly, behind every institution there must be common sense, courage, confidence, vision, and idealism. Common sense is capacity to do the proper thing at the proper time and place. Courage is the ability to meet difficulties and solve problems without wincing or flinching. Confidence is a wholesome faith in the worthwhileness and ultimate success of the thing we are doing. Vision is the ability to see the potentialities of the organization. Idealism is the larger spiritual conception of the fundamental purposes and mission of the institution of which we are a part.

Building and Loan and the Investing Public.

The American people are not sufficiently familiar with the attractiveness of building and loan securities as a form of investment. Careful consideration of the basic principles of a sound investment policy will reveal how completely the offerings of building and loan associations meet the fundamental requirements of a good investment. Let us recall the primary principles of a sound investment policy and then scrutinize the securities of building and loan associations to see how closely they harmonize. The basic principles of a sound investment policy are that there shall be (a) differentiation between investment and speculation, (b) adjustment of the forms of investment to individual needs, (c) consistent accumulation and reinvestment of principal and interest, (d) diversity of holdings, (e) definite maturity, (f) marketability, (g) the highest possible yield compatible with safety, (h) a definite financial objective, (i) an established relation with a reliable and reputable institution.

Sound investment consists of lending or investing surplus funds with adequate security to guarantee payment of interest and ultimate repayment of principal when due. Speculation is the placement of funds with less regard to safety of principal and interest and more regard for the possibility of turnover at a considerable margin. Investment in building and loan securities is distinctly an investment and not a speculation. Strict state supervision coupled with a traditional conservatism are two of the important factors responsible for this character. The forms of investment must be adjusted to the needs of the individual, because all persons do not desire the same kind of securities. The various types of certificates issued by California building and loan associations furnish an unusual degree of flexibility to meet the requirements of different investors. An estate is most rapidly built up when there is a consistent policy of reinvesting principal and interest. It is an established practice in building and loan associations to encourage this kind of investment procedure. Diversity of investment is a cardinal principle in proper financial protection. It is never wise to put all of one's financial eggs in one financial basket. Building and loan securities offer one of the most attractive items in this diversity, and the wide distribution of funds among several associations is always possible. Security of investment is assured in building and loan offerings because of strict state supervision, the wide margin of safety on loans, and the excellent type of security required of borrowers. The record of building and loan associations in the matter of safety

is unequaled by any other financial institution. The securities of building and loan associations in this state can be offered in short or long term maturities to meet the need of individual investors, and these certificates are always readily marketable. It is a fact of general knowledge that the interest yield on these securities is considerable higher than that offered by financial institutions enjoying no greater degree of safety. Through its consistent encouragement of thrift and saving the building and loan association aids the individual in setting a definite financial objective in life. Finally, there is no more cordial and informal business relation than one can find at the average building and loan association.

The Need for an Aggressive Building and Loan Movement.

The agricultural population of the United States is in serious danger of becoming a class of peasant farmers completely divorced from ownership in the land they till and the farms they operate and waging an almost hopeless struggle against the cumulative burden of mortgages. Similarly our industrial population which congests in the central beehives of manufacturing and commerce seems destined to become a population of renters. Of the total number of homes in the United States in 1920, 54.4 per cent were rented as compared with 52.2 per cent in 1890. Of the total number of homes owned in 1920 less than 62 per cent were free from incumbrance as compared with 72 per cent in 1890. The problem of farm tenancy has become so serious that nearly two out of every five farms in the United States are operated by renters instead of by owners. Fully 38 per cent of the American farmers have no share in the ownership of the land they till, as compared with about 25 per cent in 1880. I know of no greater challenge to the extension of the energies of the building and loan movement that that revealed in these statistics of the 1920 census on home ownership and farm tenancy.

Building and Loan Associations More Than Business Institutions.

Thus far I have discussed the building and loan association only as a business enterprise and have tried to evaluate it as a financial institution. I should consider this discussion incomplete if no mention were made of the larger phase of the building and loan program. I refer to our associations as social institutions. The building and loan association is more than a business concern; it is a great social institution conducing to the cultivation of those habits of thought and life which make for national progress and prosperity and for the advancement of civilization in general. We must not lose sight of these larger and more spiritual values of our movement. The greatest achievement of this movement can not be measured in terms of assets and net profits. If that is all it means to you and to me and to others immediately and directly interested in the successful organization and operation of associations, its value is as transitory as life itself. Greater, far greater, however, are those large personal and social values which I designate as the spiritual accomplishments of this great movement, namely:

Its encouragement of thrift and the paving of the way to financial independence.

Its development of the spirit of self-respect and confidence in one's own personality.

The opportunity it affords the average man for more complete enjoyment of the worthwhile things of life.

The immeasurable personal satisfaction which comes from the sense of home ownership.

The contribution it makes to the stabilization of population and the consequent stabilization of those other great institutions—industry, the home, the state, the school, and the church.

One of the greatest causes of industrial and social unrest is the fact that men have been separated from ownership in those things which constitute the foundation of welfare and progress, namely, the basic agencies of production, distribution, and exchange. The revolutionary movements of our day urge men and women to rise up out of their poverty and their misery and seize property, industry, and government. That subtle call to revolution finds welcome in the hearts of the impoverished. But to the man who by thrift and sacrifice and effort has been able to accumulate a portion of his substance, who owns the home he inhabits or the soil he tills, such a call has no charm. In encouraging thrift and home ownership, the building and loan movement is making more solid the foundations of the greatest civilization the world has yet known. Yours is not merely a business function; it is a mission which seeks to achieve social justice in an evolutionary manner. Yours is not just a job, but a profession of the highest order.

APPRAISING FOR BUILDING AND LOAN ASSOCIATIONS.

By MR. CHARLES H. TUCKER, of Long Beach.

Delivered at Pacific States Conference held at Salt Lake City, Utah.
September 9th, 10th and 11th, 1926.

The science by which a building and loan association protects its investors from loss is an entirely different process from fire insurance appraising or general judgment appraising with radically different aims and methods. It is planned to cover long stretches of time. It must tell the association how much money it will be able to get out of a given piece of property in case of default by the borrower, as well as accurately forecasting the annual net producing power of the holding from which principal and interest payments are to be met. If it does not do this it is not appraising but guessing, and guessing is the most dangerous pastime in which a building and loan association may indulge.

Building and loan appraising knows two kinds of value, market and capital value; these are two separate and distinct things.

Market value is merely the price at which a willing buyer and seller meet. Capital value is the sum created by multiplying the annual net earnings of an investment by a rate closely indicative of the individual degree of commercial hazard.

The test of value of any property except, perhaps, home or residence property, is income. However, since by far the major portion of the funds of all building and loan associations are loaned on single family dwellings, I will attempt to set forth a few of the principal factors I use in appraising property upon which our association intends to loan its funds.

Individual family homes are appraised by the comparison process. When considering the erection of a single family dwelling on any residential lot, care should be taken that the value of the improvements are in the correct ratio to the value of the ground; if the lot is under-improved it is quite likely that the property will yield less than the average rental level of the community and if over-improved, the amount of over-improvement would have to be written off as misplaced depreciation.

Another big factor to be taken into consideration is the income level of the community in which the building is to be erected or the loan made. A careful analysis has been made by several institutions to determine the amount that the man with an income up to \$3,000 per year could afford to pay as rent, and they have determined to their satisfaction that the amount should be about 25 per cent but in no case to exceed $33\frac{1}{3}$ per cent of his income in order that he may keep himself in a sound financial condition. This is, in my opinion, a very important matter to be taken into consideration as it enables the appraiser to determine whether the improvement proposed to be erected is in harmony with the income level of the community.

While there is very little variation in building costs in the localities in which we operate, the lot values are not always easy to arrive at in places where we are not familiar with real estate values, and upon making inquiries as to values, are frequently quoted prices on sales that seem entirely too high and out of line, but upon making further inquiry we find that these inflated prices are the result of a trade and not a cash sale.

To illustrate this I might tell a story of a man visiting in Florida. He had frequently observed a colored man passing the house with a hound dog at his heels. One day Sambo appeared without the dog and when questioned by the man from the north, stated that he had "Done sold that dog for \$10,000."

"Do you mean to tell me that you got \$10,000 cash for that dog?"

"Oh," said Sambo, "Not all cash money. I took two \$5,000 cats in trade."

Trading prices as a rule have very little relation to cash values and should not be given consideration by an appraiser.

Another point, that, I believe, requires careful thought and study, is the plans and specifications of the building proposed to be erected in order that we may satisfy ourselves of the total cost of the structure. If the amount of loan asked for, in our opinion, is not sufficient to complete the building we insist upon the applicant putting in escrow a sum which, with the loan made by ourselves, will be ample to insure the completion of the building.

We often find it difficult to determine what the total cost of a building will be if built by day labor and we invariably recommend that a contract for a completed structure be awarded to some reliable contractor, preferably one capable of giving bond and guaranteeing the completion of the building for the amount of the bid

made by him. This method avoids the necessity of having us advance additional funds over the amount originally agreed upon in order that the building may be completed, thus protecting the amount of our loan.

A definite contract is especially desirable when we have an application for a loan where the funds are to be used for the improvement or remodeling an old building, as almost invariably if this is not done, the amount of the loan falls considerably short of the cost of the improvement, necessitating the advancing of further funds.

As the appraisal of real estate is the keystone of the industrial, commercial and financial world, a building and loan association may enjoy a surplus or suffer a deficit, dependent largely on the accuracy of the appraisals upon which the loans are made.

CODE OF ETHICS OF CALIFORNIA BUILDING-LOAN LEAGUE

PREAMBLE.

Realizing the responsibility reposed in the California Building-Loan League through the opportunity afforded its individual members in teaching thrift and systematic saving, so as to house the families of this commonwealth that "the American Home may continue the safeguard of American Liberties," the members of the California State Building-Loan League have adopted this Code of Ethics to aid in the better understanding of common problems, to raise to the highest degree possible the integrity of the business dealings among men whatsoever their relationship and to inject into the economics of "Building and Loan" the formula of the "Golden Rule."

The purposes of all building and loan associations as set forth in the articles of incorporation of each are:

1. To encourage industry.
2. To encourage frugality.
3. To encourage saving.
4. To encourage home building.

The objectives are ideal as evidenced by the history of mankind and it is the purpose of this code to promote among the membership of the California State League the desire and will to attain them unselfishly and without preferment.

CODE OF ETHICS.

I. Chartered by the state, answerable to the citizens of the state for its every act, it is the purpose of league members to observe fully and carefully the laws governing building and loan associations of the State of California as set forth in title XVI of the Civil Code under sections 633 to 648a, both inclusive, and any amendments thereto that may be hereafter enacted.

II. Realizing that service to humanity, personal integrity, cooperation and loyalty will develop the spirit of effective citizenship and that each association has a peculiarly advantageous position in each community in which it operates, to foster these ideals, the associated members of the league are pledged to promote and encourage all civic enterprises and movements looking to human betterment.

III. The foundation of good business is built of confidence, integrity, fair dealing, efficient service and mutual benefit, and therefore all parties to any transaction must be equitably benefited thereby.

IV. A just reward for service rendered requires sufficient profit to give capital investment, prudent management, loyal employment and the legal reserve required by law, with due consideration to the public, and all members of our respective organizations.

V. The best endeavors of all officials and employees are required to elevate the standards of our vocation; to extend a true knowledge of its beneficent purposes; to demand that all contracts, written and oral, be performed in letter and spirit; to require of our members a careful and exactly true statement in advertising and publicity to the end that all representations and obligations shall be truthfully made and fulfilled.

VI. That thrift be extolled and waste of time, money, effort, material, or natural resources be condemned; that we discourage speculation, inflation of credit overbuying and other financial excesses.

VII. That extortion, exploitation, secret rebates, fraudulent contracts and unearned commissions are wholly at variance with the ideals of building and loan service and as such are unqualifiedly condemned.

VIII. That unfair competition whether by lower rates of interest to borrowers, or larger rates to investors, and all other acts, characterized by bad faith, deception, fraud or oppression, including commercial bribery, is wasteful, despicable and works a public wrong.

IX. Responsibility of the individual can not be avoided or evaded when representing an association. A friendly and cooperative spirit is desired as beneficial to corporate interests and all controversies and disputes will, when possible, be adjusted by voluntary agreement or impartial arbitration.

X. Acknowledging the obligations owed one to another by reason of similarity of objects it shall be the purpose of the league to strive for brevity and lucidity in all contracts and similarity of contractual forms, so that cooperation may replace competition. It is realized that youth owes a debt to age and that age may gain from the vision and ambition of youth, therefore the application of this section of the code will apply to the relationship existing between the oldest associations holding charters and the latest to incorporate.

XI. As employers, associations shall feel it incumbent to deal justly, humanely and generously with those who serve. The place of business should be modern, well lighted, properly ventilated, and adequately heated. It is desirable that all rooms should be decorated and furnished in a manner pleasing to the eye and designed to promote confidence among all who have transactions therein. Furthermore, the wages paid by the association to its employees should be sufficient to encourage loyalty, contentment and a feeling of comfort and security. Also we should deem it a duty to investigate the conditions under which employees live and so far as possible lead them into habits of thrift and saving in order to aid them to become home owners and responsible citizens.

XII. To foster friendships which neither demand material benefits nor violate confidences; to promote loyalty to oneself, his employers, fellow employees and the public interest; to sustain, uphold and develop the league in its effort to serve its membership and the state, so that human rights may be universally recognized as deep and broad as the race itself.

**INCOME FROM LICENSES AND ASSESSMENTS
FOR SALARIES AND SUPPORT.**

From renewal of annual licenses-----	\$20,003 25
From licenses of new associations-----	166 00
From licenses of agents and solicitors-----	840 00
